Coupling (Ger. *Koppelung, Oktavkoppelung*). In Schenkerian analysis (*see* ANALYSIS, §II, 4), a method of PROLONGATION involving the linking of two registers separated by one or more octaves. The two registers are not sounded simultaneously, but are 'coupled' by movement from one to the other and back again. At a primary structural level, coupling reinforces movements in the OBLIGATORY REGISTER of the URLINIE, i.e. the prevailing octave of the fundamental upper voice.

At later levels, that is, towards the musical 'foreground', coupling enables the composer to abandon a register while fulfilling some other task elsewhere. Ex.1 shows one of Schenker's favourite examples of coupling in the

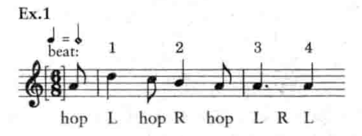
Ex.1

bass voice, the last six bars (bars 98–103) of the slow movement of Beethoven's Sonata in D minor op.31 no.2 (*Der freie Satz*, 1935, fig.108/2): the *B♭′* at the beginning of this passage, which is picked up by the *B♭′* at the end (note Schenker's exclamation mark), is coupled to the *B♭* in bars 100–02, which supports a more delicate contrapuntal design. Coupling is indicated here by the straight lines joining the B♭s in the two registers.

As coupling involves the linking of octave registers, it may be thought of as a synthesis of two closely related methods of prolongation, namely, ascending and descending REGISTER TRANSFER.

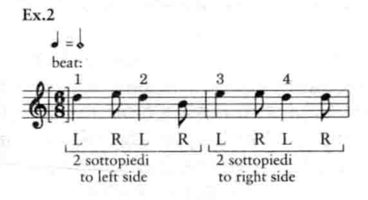
WILLIAM DRABKIN

Couppeau, Charles. *See* DASSOUCY, CHARLES.



Courante. (Fr.: 'running', 'flowing'; It. *corrente*; Eng. corant, coranto). A dance and instrumental form which flourished in Europe from the late 16th century to the mid-18th, often as a movement of a suite.

1. Terminology and types. 2. Corrente. 3. Courante.



1. TERMINOLOGY AND TYPES. The origins of the courante are obscure; a few examples appeared in 16th-century collections printed by Pierre Phalèse (1549, 'Currendo'), Sebastian Vredeman (1569, 'Le courante') and Emanuel Adriaenssen (1584, 'courrante'), and in manuscript sources such as the Philidor Collection (i, *c*1570, in *F-Pn*). By the early 17th century it was a popular dance in both France and Italy and by the end of the century there were two distinct types: the Italian 'corrente', a fast triple-metre dance (3/4 or 3/8), usually in binary form with a relatively homophonic texture, balance phrases, virtuoso performance style and a clear harmonic and rhythmic structure; and the French 'courante', a 'majestic' and 'grave' triple-metre dance, usually in 3/2, characterized by rhythmic and metrical ambiguities, especially hemiola, frequent use of modal harmonies and melodies, and a contrapuntal texture. Examples of both styles can be found together in the earliest musical sources that include the dance where the given names seem not to have implied stylistic distinctions, as both styles are labelled 'corrente' in Italian sources and 'courante' in Franco-Flemish sources.

17th-century courantes were written in one of two mensurations, C3 or 3, and it seems that the mensuration was their earliest distinguishing feature. Dances in 3, whether in French or Italian sources, tend to be more contrapuntal and use hemiola frequently, while those in C3 are almost invariably simple and lively. It is not certain if the two styles had a common ancestor. National taste and idiomatic instrumental styles may have predisposed the French, for example, to stress the contrapuntal and metrical interest possible in one kind of courante, just as the French taste for elegant choreography may have altered the hopping courtship dance of the early 17th century into the sophisticated, serious court dance called 'courante' (see illustration). French taste subsequently passed to many German composers, notably those who had strong ties with the French court, like Froberger and J.C.F. Fischer, while Germans like Georg Muffat and Handel, trained in Italy, preferred the simpler and livelier Italian corrente style.

2. CORRENTE. The early 17th-century Italian corrente was a courtship dance combining fixed with improvised step patterns. A general air of gaiety prevailed, the dancers seeming to run rather than walk, moving from side to side in zigzag fashion rather than proceeding backwards and forwards. The steps used in the corrente were described by Cesare Negri (*Nuove inventioni di balli*, 1604) as consisting mainly of hop–step combinations (e.g. for a step on to the left foot one should hop on the right foot and then step forward on the left). The basic step pattern was four beats long; a variable number of such patterns made up a strain, and two or more strains, each repeated, made a complete dance.

Ex.1 shows a typical hop–step pattern described by Negri; the rhythmic shape of the pattern is one of two active beats followed by two relatively restful ones, with the third beat having a feeling of rhythmic climax. Ex.2

shows how four *sottopiedi* (springing sideways on to the left foot while raising the right backwards, then thrusting the right toe behind the left heel, moving the left foot forward into the air) might be fitted into a corrente. Here the rhythmic pattern is active–rest–active–rest.

The corrente usually combined these four-beat patterns, perhaps with some others, to form phrases of eight or 12 beats. Although the steps fit most easily into a triple metre (to accommodate the hop–step pattern) the dance could apparently be performed to music in duple metre as well. Both Negri and Gasparo Zanetti (*Il scolaro*, 1645) included examples of the corrente that contain both duple and triple measures. Thoinot Arbeau (*Orchésographie*, 1588) described a dance called 'courante' that was to be performed to a duple strain; apparently the dance he

discussed was a corrente, for one of the two steps he prescribed, the 'double a gauche', is identical to that given in ex.1 (see also Fabritio Caroso, *Nobiltà di dame*, ed. Sutton and Walker, 1986).

Correntes were common throughout the Baroque period, although they were frequently not labelled as such. The Fitzwilliam Virginal Book included 14 called 'corranto', one of them a variation corrente by Byrd. These, and the corantos in later virginal collections (e.g. Elizabeth Rogers's Virginal Book, 1657), were written in one of two mensurations, C3 or 3 (3/4 or 6/4) in a free-voice texture which often includes points of imitation at the beginnings of strains. Some consist of two or three unrelated strains, each repeated, while others approximate to binary form. Frescobaldi's correntes (*Il secondo libro di toccate, canzone, versi d'hinni, Magnificat, gagliarde, correnti et altre partite*, 1627), like those in English sources, appeared in two metres, C3 and 3. Ex.3*a* shows a typical corrente style written in the former mensuration, clearly presaging the later simple corrente; ex.3*b* shows Frescobaldi's typical treatment of the corrente in 3, with signs of the rhythmic ambiguity considered characteristic of the courante.

Both of these styles also appear in Michael Praetorius's *Terpsichore* (1612), as do pieces labelled 'courante sarabande' and 'courante bransle' that do not seem significantly different from the 'courrants' themselves. Later Italian composers of the corrente, such as

Ex.3 G. Frescobaldi: *Il secondo libro di toccate, canzone, versi d'hinni, Magnificat, gagliarde, correnti et altre partite*, 1627

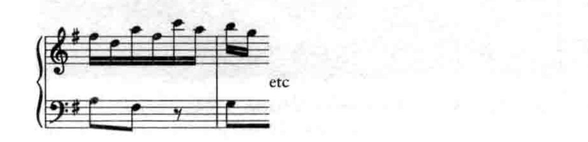
(a)

(b)

Michelangelo Rossi (1657), Corelli, Vivaldi and Pasquini, tended to prefer the less complicated C3 corrente (eventually written in 3/4), writing in a clear homophonic

Charles II and his sister Mary, Princess of Orange, dancing a courante at The Hague: painting by Hieronymus Janssens, c1660 (Royal Collection, Windsor Castle)

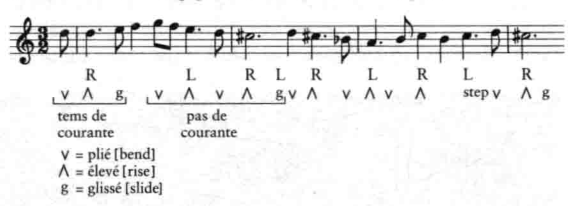
Ex.4 A. Corelli: Sonata for 2 violins and continuo, op.4 no.2



texture often characterized by rapid figuration in the upper part (ex.4).

The corrente in C3 was adopted in Germany as one of the standard dances in a suite and as a vehicle for idiomatic display. Scheidt's *Tabulatura nova* (1624) includes two pieces called 'courante 4 voc.' written in C3, which correspond to the description of the corrente given above. Both show a great deal of motivic play and use points of imitation at the beginnings of phrases, often at the expense of a clear phrase structure, and both feature rapid passage-work. The 'courente' movements included by Schein in the suites of *Banchetto musicale* (1617) are written in 6/4, in a homophonic texture; the occasional use of hemiola in the penultimate bars of sections hints at a preference for the more elaborate kind of corrente found in the works of Frescobaldi. Schein placed the 'courente' as the third dance of the suites, between the galliard and the final allemande to which it is often motivically related. In his keyboard suites Handel placed movements called 'courante' after the opening allemandes; all are in 3/4, and all share a simple texture, a tendency to rapid movement in the upper part and the binary form of correntes by contemporary Italians. Many of Bach's 'courante' movements are actually correntes as well: in the original engraving of the keyboard partitas (*Clavier-Übung*, i), movements are clearly labelled either 'corrente' or 'courante'; this distinction has often been omitted by editors. The first, third, fifth and sixth keyboard partitas all include correntes by Bach's ascription, as do the second, fourth, fifth and sixth French suites, the first and second partitas for solo violin and the first, second, third,

Ex.5 J. S. Bach: Partita no.5 in G major



fourth and sixth suites for solo cello. These correntes are written either in 3/4 or 3/8 with a simple texture, clear harmonic and rhythmic movement and much triadic passage-work in the upper part (ex.5).

3. Courante. Precise information on the dance movements of the French courante is not available until after 1700, so that it is difficult to ascertain if the French dance was an outgrowth of the much livelier Italian one. At least ten choreographies with music are extant, by French choreographers such as L. Pécour (ex.6) and English choreographers such as Mr Isaac ('The Northumberland', Little and Marsh, 1992, no.6220a) and Mr Siris ('The Brawl of Audenard', no.1600a). Two types of step were common, both of which created a mood of gravity and dignity. One type of step, the *tems de courante*, is a noble gesture consisting of a bend, rise and slide. (A *plié*, or bending of the knees, comes on the final crotchet of a bar, followed by an *élevé* or rise on the downbeat and a curved slide of the non-weight-bearing foot on the second beat of the bar.) Another type of step, actually a group of three steps, is the *pas de courante*, made up of a *demi-coupé* (a *plié* and an *élevé*, the latter coinciding with the third minim beat of the bar) and a *coupé* (a *demi-coupé* on to one foot and a *pas glissé* or slide on the other). Ex.6

Ex.6 L. Pécour: *La Bourgogne* (*Recueil de dances*, 1700, p.43)

shows how these steps fit to music in one choreography from the 18th century. According to Pierre Rameau (1725) a small leap might be substituted for the first *demi-coupé* of the *pas de courante*, but scholars are unsure whether this applies to all courantes or only to those of Rameau's time. The courante had the slowest tempo of all French court dances, and was described by Mattheson, Quantz and Rousseau as grave and majestic, Mattheson adding that its typical affection was one of 'sweet hope and courage'.

As a dance the courante was probably performed in ballet early in the 17th century. Mersenne quoted the tunes to several courantes in current use (*Harmonie universelle*, 1636–7); while for at least one of these, *La Bocanne*, a choreography exists in 18th-century sources (Little and Marsh, no. 1420), the musical style of Mersenne's examples is not significantly different from that of contemporary Italian correntes. By Lully's time the courante had become less popular in ballet, and of his more than 250 titled dances only five are courantes. Under Louis XIV, however, the courante became the most prominent dance of court balls, with the king, himself an accomplished dancer, performing the first courante of the evening. It was still being danced at balls in 1725, according to Pierre Rameau, but by then it was no longer of prime importance. Gottfried Taubert, who had earlier described its use as the opening dance at balls in Germany (*Rechtschaffener Tanzmeister*, Leipzig, 1717, 570–615), also provided three choreographies, two 'courante simple' and one 'courante figurée' (Little and Marsh, nos.2320, 2340 and 2360); unfortunately, the music is lacking.

Ex.7 R. Ballard: *Premier livre d'intabulations pour la luth* (1611)

Early examples of music for the courante may be seen in the works of 17th-century lutenists such as Robert Ballard, Nicolas Vallet and Ennemond Gaultier. Like the early 17th-century English and Italian examples discussed above (see §2), some of these pieces were written in C3 with regular phrasing, simple texture and no traces of hemiola, while others, written in 3, reveal the contrapuntal interest, heavy ornamentation and continual rhythmic tension that characterized later courantes. Ex.7, from Ballard's *Premier livre d'intabulations pour la luth* (1611), is typical of the developing courante in its imitative opening and use of hemiola just before the first cadence. Sung courantes appeared as examples of BRUNETTE and

Ex.8 J.-C. de Chambonnières: *Pièces de clavessin* (1670)

chansons à danser published by Christophe Ballard, L'Affilard and others. From some time in the 1620s or 1630s the courante became a standard part of the French dance suite, appearing between the allemande and the sarabande; this arrangement of dances was also established in the German suite by Froberger. Highly stylized courantes can be found in suites and keyboard collections by Chambonnières, d'Anglebert, Louis Couperin, Marin Marais, Francesco Corbetta, François Couperin and J.-P. Rameau. Ex.8, from Chambonnières' *Pièces de clavessin* (1670), shows the courante's typical rhythmic and metrical fluidity and complicated texture. Rameau's courantes carried the traits of metrical tension and heavy ornamentation to their logical extremes. Bach used French courantes in the C major orchestral suite, in all the English

Ex.9 J. S. Bach: Partita no.4 in D major

suites and in the overture in the French style, as well as in the first and third French suites and second and fourth keyboard partitas (ex.9); Bach's courantes, however, show less rhythmic ambiguity and fewer modal harmonies than those of his French predecessors.

MEREDITH ELLIS LITTLE/SUZANNE G. CUSICK

Couraud, Marcel (*b* Limoges, 20 Oct 1912; *d* Loches, 14 Sept 1986). French conductor. He studied the organ with André Marchal, followed courses in harmony, counterpoint and fugue at the Ecole Normale, Paris, until 1939, and attended Nadia Boulanger's composition classes. He also studied conducting with Charles Münch. He made his début in 1945 on French radio, and in the same year founded the Marcel Couraud Vocal Ensemble which made several recordings before being disbanded in 1954. He then concentrated his activities on choir and oratorio work and received many conducting invitations, especially from Germany and Italy. In 1967 he was appointed artistic director of the ORTF choirs, which he divided into three distinct and specialized groups – a large choir, a chamber choir, and a third group of 12 soloists to whom he devoted the greater part of his time. This group was intended as a new instrument rather than a conventional choir or vocal ensemble. It performed Classical works, but concentrated on avant-garde music for 12 solo voices, often specially composed for it – for example *Nuits* by Xenakis (1968), which he also recorded. The fine quality of the voices, the originality of the group's composition and repertory and its high performing standards gained it an international reputation. In 1976 Couraud founded the Groupe Vocale de France, which he directed until 1978. Among the many other premières he gave are Messiaen's *Cinq rechants* (1950), which he later recorded, Petrassi's *Nonsense* (1953), Jolivet's *Epithalame* (1956) and Ohana's *Cris* (1969).

CHRISTIANE SPIETH-WEISSENBACHER

Courbes [first name(s) unknown], Sieur de (*fl* 1622). French amateur composer and poet. All we know about him is that he called himself 'elected member' and 'lieutenant particulier' on the title-page of his only known collection of music, *Cantiques spirituels* (Paris, 1622; one piece in D. Launay, ed.: *Anthologie du motet latin polyphonique en France, 1609–1661*, Paris, 1963; three in D. Launay, ed.: *Le psaume français polyphonique au XVIIème siècle*, Paris, 1974). This volume is interesting for two reasons. The first is the appearance of bilingual texts at a time when the church prohibited the use of languages other than Latin for liturgical use. The pieces include settings of six psalms in the French verse translation by Desportes, two other French sacred pieces to words by Courbes himself and a series of Latin liturgical pieces (hymns, sequences, antiphons, responds). In this last group, the Latin text is printed under the highest voice part, while the other voices have Courbes' own French verse translation: performers could thus choose between the two languages according to whether they were singing in a service or not. The other interesting feature is that the collection shows Courbes to have been a late follower of the humanist ideas of Baïf and Mauduit. Most of his pieces are four-part homophonic, syllabic settings, sometimes employing short note values. He stresses that they are *en mesure d'air*, that is, the note values match the quantity of the syllables of the verse (in a few pieces he even added the words 'avec l'accent observé'). The collection closes with pieces for from five to eight voices, of which one for double choir – *Vis tu sanus fieri* (ed. in Launay, 1963) – is clearly influenced by the double-choir motets of Du Caurroy. As a conscientious, learned follower of the humanists Courbes also indulged in various kinds of poetic and musical ingenuity: he twice used masculine lines only, suggested that longs and shorts be reversed and posed problems such as canons to be solved (adding 'qui potest invenire inveniet').

DENISE LAUNAY/JAMES R. ANTHONY

Courboin, Charles (Marie) (*b* Antwerp, 2 April 1884; d New York, 13 April 1973). American organist of Belgian birth. He studied at the Brussels Conservatory with Alphonse Mailly. In 1904 he went to the USA, where he held several organ posts and toured widely as a recitalist. During the 1920s he helped organize musical programmes at the Wanamaker department stores in New York and Philadelphia (each of which housed a large pipe organ), that presented to the American public many European artists, including Stokowski and Marcel Dupré. In 1942 Courboin was appointed head of the organ department of Peabody Conservatory, and the following year became organist and music director at St. Patrick's Cathedral in New York, where he served until 1970. Through his activities as a church organist and concert organizer, as well as through his recitals and recordings (many of them for RCA Victor), teaching, and expertise in organ design, Courboin exercised a long and beneficial influence on American organs and organ playing.

VERNON GOTWALS/CHARLES KRIGBAUM

Courbois, Philippe (*fl* 1705–30). French composer. He was at one time *maître de musique* in the household of the Duchess of Maine, whose home in Sceaux became an important musical centre during the closing years of Louis XIV's reign and the beginning of the Regency. Musicians associated with it included Bernier, Bourgeois, Collin de Blamont and Mouret. It was just before the period of the Grandes Nuits de Sceaux (1714–15), the lavish nocturnal divertissements devised for the Duchess of Maine, that Courbois published his book of cantatas. The seven cantatas were dedicated to the duchess and were to texts by Louis Fuzelier (1674–1752) who later provided the libretto of Rameau's *Les Indes galantes*. These works, which reveal Courbois as a composer adept in both French and Italian styles, are typical examples of the French cantata of the period. Yet despite the stylistic variety displayed in them, Courbois' fondness for picturesque tone-painting, melodic simplicity, and movements in which aria, arioso and recitative sometimes merge into each other, mark the composer's French bias. His *Dom Quichotte* is the masterpiece of the collection and a valuable contribution to the cantata repertory. He also wrote some sacred music, his motets *Quare fremuerunt*

gentes and *Omnes gentes* receiving a performance at the Concert Spirituel in 1726. Three years later one of his masses was sung three times before the king.

DAVID TUNLEY

Courcelle [Corselli], **Francisco** [Francesco] (*b* Piacenza, 19 April 1705; *d* Madrid, 3 April 1778). Italian composer, active in Spain. He was born to French parents, Charles Courcelle, dance master to the Farnese family and member of a well known family of dance masters active in several European courts, and Jeanne Médard. He conducted (and perhaps composed) music for the funerals in Parma of Francesco Farnese (1727) and Antonio Farnese (1731), and on 25 March 1727 succeeded Giacomelli as *maestro di cappella* of the Chiesa della Madonna della Steccata in Parma. From 1 September 1727 until 1733 he was also *maestro di cappella* to the Duke of Parma, the future King Carlos III of Spain. By January 1734 Courcelle had arrived in Madrid at the behest of Isabella Farnese, the second wife of Felipe V, and was appointed music master to the royal children. His first opera for Madrid was *La Cautela en la amistad y el robo de las Sabinas* (1735), and as early as 1738 he was composing villancicos. In the same year he married into a family of French court officials. On 5 June 1738 Courcelle succeeded Joseph de Torres as *maestro* of the royal chapel and rector of the Colegio de Niños Cantores. He inherited, along with the chapel organist José Nebra, the task of replenishing the music library lost in the catastrophic fire at the palace on Christmas Eve 1734.

During the reigns of Felipe V, Fernando VI and Carlos III, Courcelle was a central figure in the life of a Spanish court whose musical luminaries included Domenico Scarlatti, Farinelli, Gaetano Brunetti and Boccherini. His entry into the *capilla* took place in the midst of a rebirth of operatic life in Madrid, and for the reopening of the Coliseo del Buen Retiro on 19 December 1738 a new production of Metastasio's *Alessandro nell'Indie* was mounted, with music by Courcelle. For the king's nameday (4 November) in 1739, and in celebration of the wedding of Prince Felipe and Princess Louisa Isabella of France, Courcelle's *Farnace* was performed; it was enthusiastically reviewed in the *Gaceta de Madrid* on 10 November. According to Barbieri (MSS 14.084) Courcelle was 'of noble character, unaffected and kind ... respected not only by the artists who worked under his direction but by his acquaintances as well'.

Courcelle was a prolific composer, almost exclusively in text-based genres. His works include about 30 masses composed throughout his career. Like his other liturgical works, they are innovative but also employ traditional techniques: cantus firmus, frequent cross-relations and particularly effective concerted solo-choral textures. The masses of the 1720s show the skills of a consummate Neapolitan Baroque composer, with imaginative use of an orchestra which included four-part strings and separate melodic parts for woodwind and brass instruments. But by the 1740s he was employing articulated phrases and rhythmic and harmonic variety in a clearly Classical spirit. Courcelle's sacred works are characterized by striking rhythmic gestures, extensive syncopation and an ability to go beyond mere text-painting to a portrayal of the underlying spirit of the various sections of text. They also demonstrate operatic influence, as seen in bravura and expressive melodic writing, a prescient use of the orchestra and varied combinations of the exclusively adult male vocal forces. The masses are replete with operatic solo ensembles. Fugal movements are usually employed for the Kyrie and the joyous closing sections of the Gloria and Credo. Instrumental sinfonias and interludes are not unusual. Bass lines, meticulously figured, are brought into relief by regularly changing instrumentation and not infrequent use of pizzicato. The four orchestral responsory sets for Christmas and Epiphany matins services are substantial cantata sets that celebrated a long night's vigil with all the panoply appropriate to the season, and the seven orchestral vespers settings are no less impressive.

Of Courcelle's ten operas (including two of doubtful authenticity), only *Farnace* (1739) and *Achille in Sciro* (1744) survive complete. They are number operas in which recitative and da capo arias predominate. The first movement of the Sinfonia (in D) of *Farnace* is an incipient sonata form in which varying phrase lengths, subtle chromatic shifts, textures and dynamics converge to define the periodic structure. The opera itself is characterized by brilliant arias with wide and disjunct melodic leaps, considerable chromaticism and bold orchestration.

Couroierie, Oede de la. *See* OEDE DE LA COUROIERIE.

Couronnée. *See* CANTUS CORONATUS.

Couroupos, George (*b* Athens, 1 Jan 1942). Greek composer. After graduating in the piano (1965) from the Athens Conservatory and mathematics (1967) from Athens University, he studied under Messiaen at the Paris Conservatoire (1968–72), where in 1971 he was appointed assistant for the propagation of contemporary music. He took the first prize for composition in 1972. From 1972 to 1976, Couroupos worked as an *animateur musical* at the Maison des Arts et de la Culture of the Créteil district of Paris, thus acquiring invaluable experience of music for the stage. Since his subsequent return to Greece, he has worked as a freelance composer, and has held a number of positions: deputy director of the Third Programme of Greek Radio (1977–81); president of the board of the National State Opera in Athens (1982–4, 1994–9); director of the Kalamai Conservatory and the local state enterprise for cultural development (1985–90); artistic director of the Orchistra ton Chromaton (1995 onwards).

Often suggested by ancient Greek subjects, Couroupos's music, both on and off the stage, is essentially dramatic. Where a text is present, his instrumental writing is conceived as an extension or a completion of the words, whether declaimed or sung; his incidental music has been an especially fruitful area for experiment. Couroupos's earlier works call on a wide range of means, including clusters, insistent rhythms, drones, brief melodic fragments that may be chromatic or even diatonic, natural sounds and folksong. His later music has become characterized by a continuous fluidity of rhythmic patternings; an expanded conception of tonality which has come to encompass frequent shifts from tonal or modal structures to atonal ones; and a conception of vocal melody, exemplified in the opera *Pylades*, which originates in Greek folk music and in the inherent musicality of the Greek language. His large-scale ballet *Odyssey* represents one of his most mature achievements.

WORKS

(*selective list*)

Stage: Hermes and Prometheus (musical theatre, Aeschylus: *Prometheus Bound*, trans. Couroupos), op.10, 1971; rev. 1973; Les enfants du sable (musical tragedy, M. Fabre), op.19, 1974, collab. G. Robard; Dieu le veut (musical spectacle, J.-M. Ribes), op.22, 1975, collab. Y. Kokkas; La tour de Babel (musical spectacle), op.24, 1976, collab. J.-C. Pennetier; Grisélidis (musical spectacle, C. Perrault, A. Vitez), op.26, 1977; Labyrinth (op, 1, P. Korovessis), op.45, 1984–90, inc.; The Little Red Riding Hood (musical comedy, 1, T. Tolia, after J. Thurber), op.55, 1988; Leontichos-Henidas-Hymnis (satire, Lucianus, trans. P. Moulas), op.58, 1988; Pylades (chbr op, 1, Heimonas, after Sophocles: *Electra* and Euripedes: *Electra*), op.72, 1991, collab. Heimonas and D. Photopoulos; Odhysseia [Odyssey] (ballet, 3 [28 scenes], J. Neumeier, after Homer: *Odyssey*), op.80, 1995; I dhrapétes tis skakiéras [The Runaways of the Chessboard] (op, 2, E. Trivizas), op.88, 1998; 24 scores of incidental music (incl. 12 for ancient Greek tragedies)

Vocal: Antiphonies (Pss vi, xxii, xlvi), op.1, Bar, female chorus, hpd, 1967; Homériques I (Homer: *Odyssey*), op.4, S, pf, perc, 1969; Contrepoids (textless), op.13, S, Bar, ob, hn, vn, va, vc, perc, 1971, arr. as Affrontement, S, Bar, ob, hn, orch, 1972; Le tricôt rouge (textless), op.23, male v, pf, 1976; Prometheus Bound (cant., Aeschylus, trans. T. Roussos), op.29a, 2 actors, female chorus, fl, 3 trbn, tuba, 3 perc, str qt, 1979; Serenade for Two (A. Embirikos and others), op.34, 1v + fl, pf, 1981; Akindhynou, Elpidhoforou, Anembodhistou [Harmless, Hopeful, Uninhibited] (O. Elytis), Bar, orch, 1997; Three Pieces on Verses by Cephallonian Poets: Tis Antigonis [Antigone's] (A. Mothonios), 4vv, mixed chorus, 1997, Tis Elénis [Helen's] (Mothonios), 4vv, mixed chorus, 1997, Dhès ti lambro fengari [See, What a Bright Moon] (A. Laskaratos, after Heine), 3vv, male chorus, 1997 [in memoriam M. Kouroupos]; songs

Orch: Études sur les progressions géometriques, op.6, str, temple blocks, 1970; Ecclessiazoussae, ov., op.8, 1971; Tavrokathapsia [Minoan Bullfights], op.54, 1988–90

Other works: 5 nocturnes, op.7, vn, gui, 1970; Élegie, op.12, ob, 1971; Mutations, fl, 1973; Hippos, op.17, cornet, pf, 1973; Fantasmes d'avant-garde, op.18, 2 ondes martenot, perc, 1973; Abstr'acte, op.21, 13 insts, 1974; Hespéria, op.25, 6 ondes martenot, 1976–7; To kivotio [The Box] (after A. Alexandrou's novel); radio score, op.37, fl, tpt, trbn, 2 perc, pf, 1982; 13/8 with Love, op.43, pf, 1984; Secrets d'une guitare solitaire, op.65, gui, 1989; Sonata, op.66, vc, pf, 1990; Moussika scholia pano se pénde poiémata Marias Kyrtzaki [Musical Comments on 5 Poems by Maria Kyrtzaki], op.70, tape, 1991

GEORGE LEOTSAKOS

Courses (Fr. *choeurs*, *rangs*; Ger. *Chöre*, *Saitenchöre*; It. *cori*). The term by which ranks of strings on plucked instruments were known from the 16th century to the 18th. Thus one would speak of a 'ten-course' lute, meaning one with ten sets of strings. A course may consist of one, two or even three strings; the lute usually has the first course (and, from about 1650 onwards, the second course) single and the rest double, and citterns often have triple third and fourth courses.

Although most commonly tuned to the same note, the strings comprising a course may be an octave apart. This was certainly a feature of lutes in the 15th and 16th centuries, though no less an authority than John Dowland condemned it as 'irregular to the rules of Musicke'. The reason for octave courses was almost certainly the unsatisfactory tone of gut strings in the lowest registers, which may tend to sound solid and heavy. Some of the missing upper harmonics are provided by the higher octave string, but it must be very carefully chosen if it is not to overpower the lower string, and should be at considerably lower tension. The need for octave courses disappeared in the 17th century, when overspun strings first appeared, though they continued to be used even after this date.

Generally speaking, paired or tripled courses were used on instruments with relatively low-tension strings. The thicker strings usual from the 19th century onwards were employed singly, though the modern mandolin still has four double courses.

IAN HARWOOD

Court, Antoine de la. *See* LA COURT, ANTOINE DE.

Court, Henri de la. *See* LA COURT, HENRI DE.

Courtaut (Fr.). An instrument resembling a SORDUN, described by Mersenne (*Harmonie universelle*, 1636–7) as a shortened BASSOON. Like the early bassoon its bore is doubled back inside the body of the instrument, but it is shorter than the bassoon because, having a cylindrical bore, it need be only half the length to produce the same pitch as the conical-bore bassoon. According to Trichet (*F-Psg* 1070, *c*1640) the courtaut could be played with a wind-cap. The name is related to both *curtal* and KORTHOLT.

BARRA R. BOYDELL

Courtesan. The tradition of women making music for entertainment at royal courts has been notable in many cultures. Within this tradition the courtesan musician has a long history. Courtesan musicians and/or dancers were virtually institutionalized in many sophisticated art traditions of Asia and North Africa. Musical courtesans also flourished at certain times in Europe, e.g. Moorish Spain and 15th-century Venice, where they were renowned for their exquisite singing. Courtesans tended to arise in opulent conditions where powerful men restricted their own wives and daughters, exploiting the talents of lower-born women (often slaves) for entertainment.

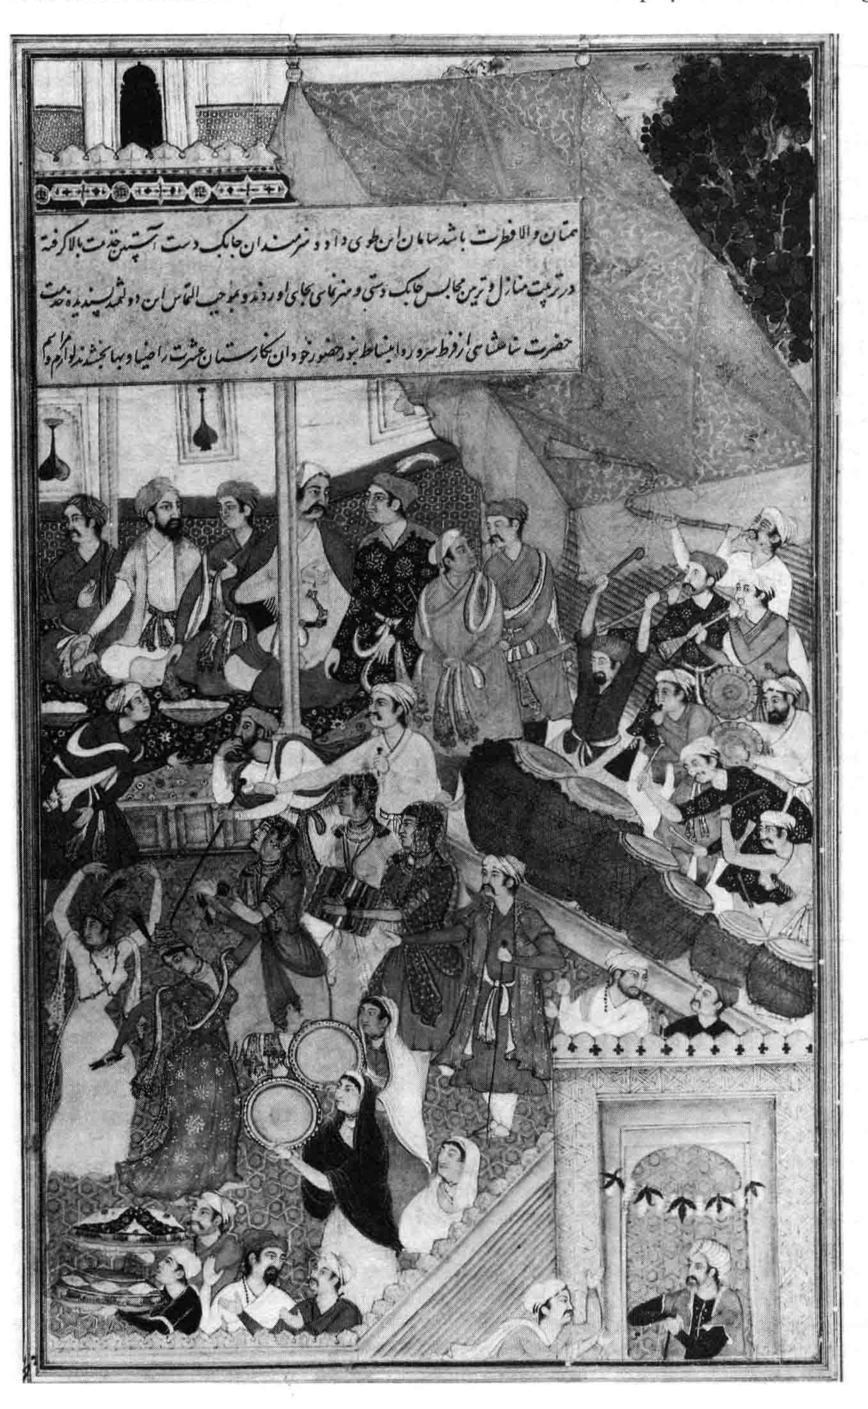
1. The problem of definition. 2. Women musicians within palaces and private households. 3. Public courtesans. 4. Artistic contribution.

1. THE PROBLEM OF DEFINITION. The English term 'courtesan' is imprecise. It originally denoted a woman attached to the court, but later acquired negative connotations of sexual immodesty.

Whatever the shades of difference between societies, the courtesan displayed certain features. Good looks and sexual availability were prerequisites of her artistic life. She offered erotic entertainment, but was distinct from a common prostitute. She was unmarried, often a household dependant or slave, and never a social equal with her client. Her particular status was recognized and sometimes highlighted by a distinctive appearance (e.g. the Japanese geisha's make-up, wig and kimono). Within the public domain, she relied on regular payment and gifts: Japanese geishas and Indian *tavāifs* were usually contracted by a male protector to give exclusive sexual favours. Courtesans were usually well educated, refined and adept in etiquette; the arts of conversation and music were often necessary accomplishments.

Loss of patronage caused the demise of most courtesan traditions, and some shaded into prostitution. With historical change, terminology for courtesans often changed in meaning. Korean *kisaeng* entertainers occupied the professional end of the folk tradition, and are considered to have been poets and musicians in the 16th century, but '*kisaeng*' is now applied to bar-hostesses and prostitutes. Transitions were often quite subtle: while aristocratic marriageable women played chamber music in the original *concerti di donne* at Ferrara in the 1580s, lower-born women recruited into Italian courts for their musical skills had a more ambiguous status.

2. WOMEN MUSICIANS WITHIN PALACES AND PRIVATE HOUSEHOLDS. Documentation of this phenomenon in various parts of the world is inadequate. The following are some examples.



Throughout Chinese imperial history the courts, civil and military officials and wealthy households employed attractive women to sing, dance and play instruments. Many poets in the Tang dynasty (618–906) immortalized the gifts of their favourite musical courtesans, who were important as an interface between élite and popular culture.

In pre-Islamic and Islamic Arab culture (until at least the 10th century) beautiful slave-girls were trained as singers and instrumentalists known as QAYNA (*see* ARAB MUSIC, §I, 2(i)–(iii)). Highly appreciated for their artistry, some were kept in palaces and wealthy households, treated as extremely expensive saleable commodities; others worked in taverns. In North Africa such women were called *jāriya*. In Ottoman culture this term (*cariye*) was applied to female slave entertainers specialized in music (*see* OTTOMAN MUSIC, §6). In Persian society female musicians portrayed in court scenes probably had a comparable low status.

In North India in the late sultanate and early Mughal period women provided aristocratic house-music (*akhāra*). The instruments were played by the women of the house, or slaves trained by dancing-masters (*naṭva*). North India has an important tradition of *tavāif* courtesans (fig.1). Matrilineal *tavāif* families were attached to courts, mainly as vocalists and dancers, performing in 'light classical' styles such as *ṭhumrī*; noted performers included Kesarbai Kerkar, Malika Pukhraj and Noorjahan. The honorific title of *Ustād* and prestigious genres were reserved for men.

3. PUBLIC COURTESANS. Some courtesans operated on a more casual basis. In classical Greece hetaira courtesans presided over symposia (*see* SYMPOSIUM) where men enjoyed witty debate, wine and uninhibited female company; aulos reed-pipe music was played by low-status female auletrides (*see* AULOS, §II, 4).

In some Indian cities (e.g. Delhi and Lucknow) *tavāifs* kept open house to the élite. In their salons (*koṭhā*) they offered refined singing, dancing and conversation in an atmosphere of intense aesthetic appreciation and gift-display. In Indonesia singing-dancing girls travelled as

1. Female dancers at the court of Emperor Akbar, accompanied by naubat ensemble (right) and jalra (cymbals) and daff (frame drum) players: miniature by Sanwala from the 'Akbarnāma', c1590 (GB-Lv IS.2-1896)

entertainers, performing before wealthy notables and receiving lavish gifts. Professional female erotic dancing remains a widespread form of entertainment today (*see* INDONESIA, §I, 1(iii)(b)).

Japanese geishas evolved as specialized entertainers catering to a sophisticated clientele in the tea-houses of special licensed quarters of cities. They used to live in all-female geisha households and cultivated the arts of dancing and singing to the *shamisen* lute. Today geishas cater mainly to businessmen, serving drinks, dancing and singing (usually *kouta* songs or, occasionally, the *nagauta* 'long song' genre). In China prostitutes working in the brothel quarters were often accomplished musicians, accompanying their singing on the plucked lutes *sanxian* or *pipa*.

4. ARTISTIC CONTRIBUTION. It appears that in most courtesan traditions girls were trained from an early age (about five onwards). Transmission was sometimes from mother to daughter; male expertise was often brought in at a more advanced stage. In some societies courtesans played a variety of musical instruments, especially those suitable for accompanying singing, e.g. the Korean *kayagŭm* (long zither), for the *kayagŭm p'yongch'ang* genre.

The conditions in which courtesans operated encouraged virtuoso performance. At court, feats of musicianship were designed to impress the company and enhance the prestige of the king or master. Where courtesans competed for male favours and appreciation with showers of money, solo performance was the most effective way of displaying individual talent. Courtesans have been important as performers, connoisseurs, transmitters and innovators of music, yet were frequently dismissed or even deliberately erased from memory. As unmarried but sexually active women they had an ambivalent status, and subsequent generations often viewed them with disdain.

VERONICA DOUBLEDAY

Courteville, Raphael [Ralph] **(i)** (*fl* 1675–*c*1735). English organist and composer. He was the son of Raphael Courteville (*d* 28 Dec 1675), a Gentleman of the Chapel Royal. As a boy he may have sung in the Chapel Royal and was probably a pupil of John Hingeston, who bequeathed him some music books and an organ ('the one with two sets of keys') on his death in 1683. He was appointed organist of St James's, Piccadilly, on 7 September 1691 on the recommendation of the Earl of Burlington at a salary of £20 a year. It is not clear when he relinquished this position, but at some point it appears to have passed to his son Raphael Courteville (ii). Many of his songs are to be found in late 17th-century songbooks printed in London; although there was apparently a John Courteville (autograph songbook, 1691, in *GB-Lbl*), those ascribed simply to 'Mr. Courteville' are probably by this Raphael. More than two dozen are unambiguously attributed to him in such collections as *Comes Amoris* (RISM 1687[4]–1694[5]), *Vinculum societatis* (1688[9]–1691[7]), *The Banquet of Musick* (1692[8]), *The Gentleman's Journal* (1692–4), *Thesaurus musicus* (1693[8]–1695[12]) and *Deliciae musicae* (1695[7]–1696[7]); some were published singly after 1700. Courteville's songs were strongly influenced by Purcell; they are in both the florid expressive style and in the simple tuneful idiom of the time. Plays for which he provided songs include Tate's *A Duke and no Duke* (1684), Southerne's *Oroonoko* (1695) and D'Urfey's *Don Quixote*, part iii (1695). His hymn tune 'St James' is in *Select Psalms and Hymns for the Use of the Parish-Church ... of St James, Westminster* (London, 1697). Instrumental pieces by him are in *The Self Instructor on the Violin* (1695) and *The Second Book of the Harpsichord Master* (1700) and he published *Sonatas of two parts ... for Two Flutes* (London, *c*1700) and *Six Sonatas ... for 2 Violins* (London, *c*1702), though no copy of the latter is known. Various instrumental compositions – sonatas, suites and individual movements for flutes or violins and basso continuo – survive in manuscript (*Ckc*, *Lbl*, *Ob*, *Och*), as well as some keyboard pieces (*CDp*, *Cfm*, *Lbl*). Two of the latter (in *Cfm* 652) are inscribed '23[d]: of Feb: 1701/2', with one 'a little past 12 a Clock att Night' and the other 'allmost one a Clock'. (*HawkinsH*; *SpinkES*)

IAN SPINK

Courteville, Raphael (ii) (*d* London, bur. 10 June 1772). English organist, composer and political pamphleteer, son of RAPHAEL COURTEVILLE (i). It is presumably he who is referred to as 'Courteville Junior' in a benefit concert given with his father at York Buildings on 1 April 1720. He succeeded to his father's post as organist of St James's at an unspecified date, and was one of the original members of the Royal Society of Musicians. He was well known as a political pamphleteer and propagandist for Sir Robert Walpole, which earned him the nickname 'Court-evil' from the opposition. On 14 September 1735 he married Lucy Green, a lady possessed of a fortune of £25,000. He seems to have neglected his organist's duties and incurred the displeasure of the church authorities during the last 20 years of his life. Some tunes by him are included in *An Abridgement of the New Version of the Psalms ... With Proper Tunes Adapted to Each Psalm* (London, 1777).

IAN SPINK

Courtis, Jean-Philippe (*b* Airaines, 24 May 1951). French bass. He studied the oboe and conducting before turning to singing at the Paris Conservatoire. He sang Johann in *Werther* at the 1979 Aix-en-Provence Festival and made his Paris Opéra début the following year in Rameau's *Dardanus*. He performed several other roles at the Opéra and Opéra-Comique in the early 1980s, including Mr Plunket in Henze's *The English Cat* and Frère Bernard in the world première of Messiaen's *Saint François d'Assise* in 1983. His international career dates from April 1987 when he created the role of Malfortune in the world

première of Rolf Liebermann's *La forêt* in Geneva. Appearances in Bonn, Cologne, Vienna, Amsterdam and Salzburg followed.

Courtis sang Don Diègue in the first staged performance of Debussy's reconstructed *Rodrigue et Chimène* in Lyons, and McCreah in a revival of Bécaud's *opéra d'Aran*. His repertory, which focusses principally on French roles, also includes Massenet's *Don Quichotte*, Enescu's *Oedipe* and Martin's *Golgotha*. Among his recordings are *Pelléas et Mélisande* (Arkel) with Abbado, *Les Troyens* (Narbal) with Dutoit and Massenet's *Esclarmonde* and *Grisélidis*, both with Fournillier.

PATRICK O'CONNOR

Courtois. *See* MEINL.

Courtois [Courtoys, Cortois, Mourtois], **Jean** (*fl* 1530–45). South Netherlandish composer. The only available information links him to Cambrai, where he was *petit vicaire* during the periods 1516–17 and 1534–5, and *maître de chapelle* to Bishop Robert de Croÿ in 1540. The welcome given by Cambrai on 20 January 1540 to Charles V on his way to Ghent with his troops included the performance, by 34 singers, of Courtois's four-voice motet *Venite populi terrae*, specially composed for the occasion. Guicciardini, in his *Descrittione ... di tutti Paesi Bassi* (1567), considered Courtois to have been one of the true masters of music in the Low Countries, and, in his list of dead composers, grouped Courtois with such illustrious men as Josquin, Obrecht, Willaert and Gombert.

Although Courtois is only known to have been associated with the southern Netherlands, his works appear chiefly in French and German sources. The chansons can be separated into three styles. His four-voice chansons show the Parisian patterns which were by then traditional: on the one hand, those to courtly texts have clearly profiled melodies, cadential clichés, homophonic passages, brevity and consistent use of exact repetition, while the others on popular texts employ an imitative patter style and exact repetition for the refrain. Courtois's chansons for five and six voices found in German and a few Flemish sources show a Franco-Flemish line of descent from Josquin; they maintain extended imitation, overlapping cadences and canon techniques, and they lack exact repetition. At least one motet besides *Venite populi terrae* is an occasional piece: *O pastor eterne* celebrated the installation of a Bishop Nicolaus.

WORKS

4 Masses: 'Dominus quis habitabit', 'Emendenus', 'Hoc in templo', 'Urbs beata': *F-CA*

14 motets, 3–6vv, in 1532[9], 1532[10], 1534[6], 1538[2], 1540[7], 1542[18], 1543[3], 1545[2], 1547[5], 1554[11]; 3 ed. A. Smijers and A.T. Merritt, *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535* (Paris and Monaco, 1934–64), iii, iv

19 chansons, 4–6vv, in 1529[2], 1534[12], 1534[14], 1538[12], 1538[13], 1538[14], 1539[16], 1540[7], 1544[12], 1545[14] (attrib. both Courtois and Benedictus [Appenzeller]), *D-Mbs* Mus. 1508, *GB-Lbl* Add. 11582, *I-Bc* Q26; 1 ed. in *MMRF*, v (1897), 2 ed. in PÄMw, xxiii (1899)

COURTNEY S. ADAMS

Courtois [Courtoys, Curtois], **Lambert** (*b* France, ?*c*1520; *fl* 1542–83). French composer, singer and trombonist working mainly in Italy and Ragusa (now Dubrovnik). His presence in Italy is suggested by the appearance in Italian prints of two motets attributed simply to 'Courtois' (RISM 1542[18] and 1543[3]), which could refer to either Jean or Lambert Courtois, and two madrigals by 'Lamberto' (1543[18]). Eitner and Haar have suggested that 'Lamberto' is more likely to be Pierre Lambert (Petrus Lambertus) than Courtois. But Courtois was sometimes known simply as 'Lamberto' and was also known in Venice under his full name as a composer in the 1540s: in 1550 Doni attributed to 'Lamberto Curtois' a printed book of four-voice madrigals (now lost).

In 1550 'Lamberto Cortese et compagni cantori' performed during Easter week for the Arciconfraternita del SS Crocifisso, in S Marcello, Rome. In 1553 Nasco approved the choice of Courtois temporarily to fill his former post with the Verona Accademia Filarmonica, writing to the academicians on 9 February: 'I am pleased that you have chosen messer Lamberto, as he is a good man and knows music very well. I came to Venice expressly to get him to come in time for the whole Carnival season'. Courtois served for Carnival season only. On 29 May 1553 'Lambertus Gallus' was chosen to join, as a player of the *tibicina*, the wind ensemble that was part of the music of the princely court in the city-state of Ragusa, which became his home for the next sixteen years. He quickly enlarged his musical reputation there and became *maestro di cappella* for the court. In a letter of 15 November 1556 the Ragusan Archbishop Lodovico Beccadelli described him as 'Musico eccellente non solo a Ragusa, ma anche in Italia'. In Ragusa he was active as an instrumentalist (principally on the trombone), as a conductor or leader of ensembles and as a teacher. He rarely travelled outside Ragusa. On 19 April 1570 he began a three-year contract in Udine to act as *maestro di cappella* in the cathedral, to teach singing to the clerics and to lead the *musici concentus*. At the end of his three years the chapter gave him a testimonial to his superior qualities and performances. His whereabouts during the next three to four years are unknown, but in 1578 and 1579 he was the *maestro di cappella* of Treviso Cathedral, and the same in Vicenza in 1582 and 1583.

Apart from the individual motets published in 1542 and 1543, Courtois' surviving published music includes one work in *Il primo libro delle Muse a tre voci* (1562[8]), a spiritual madrigal in six parts in *Musica spirituale ... a cinque voci* (1563[7]), and a book of *Madrigali a cinque voci* (1580[10], inc.), which includes a madrigal in two parts by his son Henry. The book is dedicated to three gentlemen of Ragusa, young aristocrats who were probably among Courtois' many students. Courtois also composed an instrumental piece, *Petit Jaquet*, printed in score in Angelo Gardano's collection of *Musica de diversi autori: La bataglia francese et Canzon delli ucelli Insieme alcuni Canzon Francese* (1577[11]). Three madrigals by 'Lamberto' are found in anthologies: two in *Il secondo libro dei madrigali ... misura di breve* (1543; ed. in CMM, lxxiii/2, 1978) and one in *Il primo libro delle muse a 5* (1555[27]).

A comparison of the three madrigals by 'Lamberto' with Courtois' contribution to the *Musica spirituale* of 1563 suggests that they are all by the same composer. All show idiosyncrasies of part-writing, including a predilection for parallel 4ths and for certain unusual cadential

formulae; melodic writing, which sometimes includes a brief chromatic rise or fall; and a partiality for open 5ths and for simultaneous or successive cross-relations (sometimes unusually jarring), and for occasional irrational dissonances. Courtois' son Henry (*fl* 1573–1629) and grandson Lambert (*fl* 1614–64) were also wind players and composers. Both served as *maestro di cappella* to the Prince of Ragusa.

THOMAS W. BRIDGES

Courville [Courvile], **Joachim Thibault de** (*d* Paris, 8 Sept 1581). French singer, lutenist, lyre player and composer. He was co-founder, with Jean-Antoine de Baïf, of the Académie de Poésie et de Musique in 1570. Baïf acknowledged him as the 'maistre de l'art de bien chanter' who instigated the invention of French VERS MESURÉS about 1567; some of the melodies Courville composed for Baïf's new translation of the psalms into measured verse were performed for Charles IX (see Travers). Courville's official post at court was 'joueur de lyre', the instrument being a curious 11-string version of the Greek model constructed by Antoine Potin and designed to be bowed.

True to the Académie's ideals of secrecy, Courville published none of his music, but some idea of his style may be gained from a few pieces printed in collections of compositions by his colleagues. The four-voice *Airs mis en musique* (Paris, 1576[3]; ed. in SCC, iv, 1994) by his disciple Caietain include three strophic pieces treated in free homorhythmic fashion fastidiously following the textual rhythm; two of these, *Lorsque mouray* (a rhymed poem by Baïf) and *J'en ayme deux* (constructed in quantitative verse without rhyme), were later reset with exactly the same rhythms by Claude Le Jeune, who also used the third, *Arm' arm'*, as the *rechant* for *La guerre* (*Airs*, 1608; ed. D.P. Walker, Rome, 1951–9, nos.10, 24 and 104). Five more of Courville's pieces (two using poems by Desportes: *Si je languis* and *Sont ce dards*, ed. in PSFM, 1st ser., xvi, 1961) survive as monodic pieces for voice and lute published posthumously in Bataille's fifth and sixth books of *airs* (RISM 1614[10]/R, 1615[11]); *Si je languis* has exceptionally long melismatic diminutions quite unlike anything in Caietain's 1576 book.

FRANK DOBBINS

Courvoisier, Walter (*b* Riehen, canton of Basle, 7 Feb 1875; *d* Locarno, 27 Dec 1931). Swiss composer. His father was professor of surgery at Basle University. After studying medicine in Basle and Strasbourg (1893–9), he qualified to practise in 1900. In 1902, however, he abandoned his medical career and went to Munich to study privately with Thuille, and at the university with Sandberger (music history). In 1907 he was appointed co-conductor of the Kaim Orchestra popular concerts. In 1910 Mottl appointed him to teach music theory at the Akademie der Tonkunst, and in 1919 he succeeded Friedrich Klose as professor of composition. As a composer he belonged to the 'Munich School'. The music drama *Lanzelot und Elaine* is pervasively influenced by *Tristan*. Courvoisier's gift, however, was more lyrical than dramatic, and is better represented by his lieder. Most important are the later children's pieces and sacred songs, marked by very transparent accompaniments and the influence of folk music. His one significant instrumental work is a set of suites for solo violin.

WORKS
(*selective list*)

Stage: Lanzelot und Elaine (music drama, 4, W. Bergh), op.25, Munich, 1917; Die Krähen (comedy, A. Wohlgemuth), op.30, Munich, 1921; Der Sünde Zauberei (op, after J.F. von Eichendorff, after P. Calderón, unpubd

Choral: Gruppe aus dem Tartarus (F. von Schiller), op.5, chorus, orch, perf. 1905; Der Dinurstrom (W. Hertz), op.11, chorus, orch, perf. 1907; Das Schlachtschiff Téméraire (D. von Liliencron), op.12, male vv, orch, perf. 1908; Auferstehung (Totenfeier) (orat, A. Bertholet), op.26, 4 solo vv, chorus, boys' chorus, orch, org, perf. 1917; Männerchöre, op.33; 5 Gesänge, op.34 (1931)

Solo vocal: 6 Lieder, op.1; 7 Lieder, op.2; 8 Gedichte (A. Ritter), op.3; Die Muse (H. Leuthold), op.4, Bar, orch, perf. 1904; 6 Lieder, op.6; 5 Lieder, op.7; 7 Gedichte (P. Cornelius), op.8; 6 Gedichte (T. Storm), op.9; 2 Gedichte (Storm), 4 Gedichte (K. Groth), op.13; 5 Gedichte (W. Hertz), op.14; 3 Gedichte, (E. Geibel), op.15; 5 Gedichte (F. Hebbel), op.16; 5 Gedichte (Cornelius), op.17; 3 Sonette (Michelangelo, old It.), op.18; 7 Gedichte (Geibel), op.19; 7 Gedichte (old Ger.), op.23; Lieder, op.24; Geistliche Lieder, op.27, 5 vols.; Kleine Lieder zu Kinderreimen, op.28, 4 vols.; Lieder (old Ger.), op.29, 4 vols. (1935)

PETER ROSS

Cousin, Jean Escatefer dit (*fl* 1446–74). French composer. He worked as a singer at the court of Duke Charles I of Bourbon at Moulins in 1446–8, and joined the French royal chapel in 1461, where he remained until 1474. Johannes Tinctoris described him as a composer 'of no small authority'.

A *Missa tube* (edn in DTÖ, cxx, Jg.cxx, 1970) survives under Cousin's name in *I-TRmp* 90 and *TRcap* 93; it may have been composed some time in the 1440s. As the name

suggests, *Missa tube* imitates trumpet sounds by means of persistent reiterations of triadic motifs in the lower parts, often in close imitations; these occasionally involve the top part as well. The setting is not based on a cantus firmus, and it is hard to tell much about Cousin's style or his skill from it, as it is so thoroughly governed by a single (and in the end monotonous) musical idea.

No longer extant, it seems, is Cousin's *Missa nigrarum*, which was mentioned by Tinctoris in 1472–3 with a brief musical excerpt. Most authors have assumed that 'nigrarum' must be a corruption of 'nigra sum' (which could mean that the mass was based on the antiphon for the Blessed Virgin *Nigra sum sed formosa*). Yet it is hard to see how a phrase from a book as well known as the *Song of Songs* could have been misspelt by nearly all scribes of Tinctoris's writings. Another possible identification is found in *B-Gu* 70, one of the most authoritative Tinctoris sources and a possible autograph by the theorist himself, which gives the unique variant 'nisi granum', suggesting that Cousin's Mass was perhaps based on the antiphon from the Common of One Martyr *Nisi granum frumenti cadens in terram*.

ROB C. WEGMAN

Cousineau. French family of harp makers, harpists and publishers. Georges Cousineau (*b* Mouchamps, Vendée, 1733; *d* Paris, 3 Jan 1800) published music in Paris in 1766 and in 1769 was a member of the instrument makers' guild. His shop, originally opposite the Louvre, stocked music engraved by his wife, and a variety of string instruments, including his own pedal harps.

In 1775 his son Jacques-Georges Cousineau (*b* Paris, 13 Jan 1760; *d* Paris, 11 Jan 1836) joined the business, and the title of Luthier-in-Ordinary to the Queen was given them both. Jacques-Georges published his first harp music in 1780. From about 1780 to 1811 he was harpist at the Paris Opéra; he was a soloist at the Concert Spirituel in 1781 and became harpist to Empress Josephine in 1804. Cousineau catalogues of the period list harp solos, ensemble music and methods composed or arranged by the Cousineaus and others.

Now best remembered for their single-action pedal harps (see illustration), the Cousineaus made several improvements in the mechanism of the instrument. Their *à béquilles* ('crutch') system was superior to the earlier hook as a device for raising string pitch, and their bridge-pin slide made it possible to regulate individual string lengths. They also reorganized the connecting levers in the harp neck. These developments assured a more accurate proportioning of the strings throughout the octaves.

According to P.-J. Roussier's *Mémoire sur la nouvelle harpe de M. Cousineau* (1782), the Cousineaus developed a harp which could be tuned in C♭ (rather than E♭) and played in all keys. Ingeniously conceived, but surely formidable to play, the instrument had 14 pedals, arranged in a double row. More conventional seven-pedal Cousineau harps, usually handsomely carved and painted in the Rococo style, are in most major museum collections; the examples in the Victoria and Albert Museum, London, are particularly notable. Empress Josephine's harp at Malmaison, with its gilt-bronze eagle perched on a rectangular capital, is a Cousineau instrument.

Pedal harp (with 'crutch' device) by Georges Cousineau, Paris, late 18th century (Victoria and Albert Museum, London)

Cousins, Benjamin. *See* COSYN, BENJAMIN.

Coussemaker, Charles-Edmond-Henri de (*b* Bailleul, 19 April 1805; *d* Lille, 10 Jan 1876). French musicologist.

He showed great musical ability as a child, particularly as a singer and pianist, but his professional career was in law. He studied law in Paris from 1825 to 1830, during which time he participated actively in the musical life of the city, attending concerts and private salons, and studying singing with Félix Pellegrini and composition with Jérôme Payer and Reicha. Upon receiving his degree, Coussemaker became a barrister at Douai, where he also studied counterpoint with Victor Lefebvre, produced several compositions and began his musicological studies. He later held various jobs in the legal profession, moving to Bailleul, Bergues, Hazebrouck and Dunkirk, with occasional promotions, and finally becoming a judge at Lille in 1858.

In spite of his busy professional career, he devoted much of his life to musicology. He was one of the first scholars to investigate the music of the Middle Ages, and his numerous books opened paths into the topics of Gregorian chant, neumatic and mensural notation, and medieval instruments, theory and polyphony (which he called 'harmonie'). His publications are frequently contrasted with those of Fétis, who expressed reservations about Coussemaker's scholarship: though Coussemaker apparently did not have Fétis's broad knowledge and ability to synthesize large quantities of information into abstract theories, his approach was more precise, more scientific and less speculative. Using primary sources (many of which he had himself discovered), he presented little more than descriptions based upon careful observations; he has been criticized for this approach by those who think him a good collector of data but an inadequate historian. He demonstrated the value of presenting facsimiles of manuscripts, but also provided his own transcriptions into modern notation. His most important work is probably the *Scriptorum de musica*, a four-volume compilation of the writings (all of which are in Latin) of several early music theorists, intended to supplement Gerbert's *Scriptores ecclesiastici de musica*. He made scholarly editions of early music, including medieval liturgical dramas and the works of Adam de la Halle, and collected and edited Flemish folksongs. His publications contain numerous errors, some of which are evidently typographical and many of which were almost inevitable in the work of an innovator at a time when the science of musical palaeography was just beginning; nevertheless, his books introduced much music which was previously unknown, led the way to successful research in the field, and remain valuable references.

Coussemaker's library contained over 1600 items, among which were many early manuscripts and instruments. His compositions include dramatic scenes, masses and other religious works, which were not published; only some romances and dances are known. He also left unpublished treatises on counterpoint and fugue and on harmony. He was a Chevalier of the Légion d'Honneur and, concomitant with his deep interest in law, history and archaeology as well as music, a member of several scholarly societies, among them the Royal Society of Antiquaries in London.

Cousser, Jean [John] Sigismond. *See* KUSSER, JOHANN SIGISMUND.

Cousu, Antoine du [de]. *See* DU COUSU, ANTOINE.

Coutinho, Francisco José (*b* Lisbon, 21 Oct 1680; *d* Paris, 13 Feb 1724). Portuguese composer. Son of Manuel Pereira Coutinho, govenor of Angola (1630–35), he came from a rich and aristocratic family. In deference to his social status, he was usually asked to compose the first villancico in nine published sets of instrumentally accompanied villancicos sung at various Lisbon festivities between 1719 and 1723. Late in 1723 he went to Paris for medical treatment, and he died there of an aneurysm.

He impressed his contemporaries with such polychoral works as an eight-voice *Te Deum* sung in S Roque Church, Lisbon, on 31 December 1722, and a four-choir *Missa 'Scala Aretina'* accompanied by trumpets, timpani and strings that vied with Valls's hexachord mass. According to Barbosa Machado he wrote hymns, psalms, responsories and villancicos, but his catalogued extant works are of more modest dimensions: a solo aria *Este dezasosiego* (*P-Ln*) and an accompanied duo still performed as late as 1761 (*GCA-Gc*).

ROBERT STEVENSON

Coutreman [Couterman], **Jacobus** (*d* ?Bruges, 1432). South Netherlandish composer. He was active as singer, succentor, organist and scribe at the cathedral of St Donatian, Bruges, in 1417–22 and 1427–32. Only one composition survives with an ascription to him: this is the May song *Vaylle, que vaylle il faut ... au moys de may* (ed. in CMM, xi/2, 1959, 21), which has been thought to make an oblique reference to the Burgundian chaplain Robert Vaille.

ROB C. WEGMAN

Coutts, Francis Burdett Money. *See* MONEY-COUTTS, FRANCIS BURDETT.

Couture, Guillaume (*b* Montreal, 23 Oct 1851; *d* Montreal, 15 Jan 1915). Canadian composer, choirmaster, conductor and teacher. An astonishingly precocious musician, he became choirmaster at Ste Brigitte when he was 13. In 1873 he went to France to pursue his studies; he was the first Canadian to be admitted to the Paris Conservatoire and its first Canadian graduate. He worked under Théodore Dubois, whose teaching in harmony, counterpoint and fugue was traditional and academic, and studied singing under Romain Bussine, founder and president of the Société Nationale de Musique; he was also an organist. Couture was a guest at the Soirées du Lundi. He was an ardent defender of Wagner and debated with Fauré, Massenet, d'Indy, Saint-Saëns and others. In 1875 Couture was accepted by the jury of the Société Nationale, and his *Memorare* op.1 was performed at the Salle Pleyel under Edouard Colonne. This work reveals his command of counterpoint and his innate sense of sacred style. The same society later performed his *Rêverie* op.2 for orchestra. In 1876 Couture was appointed choirmaster of Ste Clotilde, where Franck was organist. A Fugue in D minor for organ, dedicated to Dubois, was his next work. In 1876 Couture's *Quatuor-fugue* had its première at the Société Nationale, with Ysaÿe as one of the performers. But for his Canadian nationality, Couture would have competed for the Prix de Rome: his cantata *Atala* may have been written for this purpose.

In 1877 Couture returned to Canada. His activities in Montreal as a teacher, critic and conductor no doubt explain why he became less active as a composer. In great demand as a choir director, he served successively at Trinity Church, Christ Church Cathedral, Gésu Church, Notre-Dame Church and St Jacques Cathedral, where he remained from 1893 until his death. He also lectured widely in convents and schools; in 1896 he was invited to the New England Conservatory in Boston. He conducted the Société des Symphonistes, which he organized in 1878, and the Montreal Philharmonic Society (1880–99), as well as conducting the orchestra in concerts given by Emma Albani. Through these and two other concert societies he founded, Couture introduced the Montreal public to the operas of Wagner (which he studied on a trip to Bayreuth in 1893) and other Classical and Romantic repertory. Couture's own compositional abilities are revealed in two important late works, a requiem and the oratorio *Jean le Précurseur*, which is in three sections. The first, *La nativité*, is pastoral in character and is based on a liturgical theme; the second, *La prédilection*, opens with the liturgical theme *Attende*; the third is titled *Le martyre*. The contrapuntal writing is impressive, and the choruses exhibit both verve and drama; but in general the work lacks firm structure and concise expression. Yet Couture's work commands respect despite its traditional and academic aspects.

Both as a composer and as a teacher, Couture was an ardent proponent of a Canadian music that would reflect French origins, as some Ontario composers looked to English or Austro-German models. If his compositions may be said to mark the end of an epoch, his teaching activities pointed towards a new era of enriched diversity in Canadian music. Léo-Pol Morin wrote: 'Couture was the first great musician in the history of Canadian music, the most learned, the most intelligent, the most cultured of his time. He was moreover the first great [music] educator in our country'. Several of his manuscripts and other signed documents are at the University of Montreal. A catalogue, the *Répertoire numérique du Fonds Guillaume-Couture* by Francine Pilote and Jacques Ducharme, was published in 1979. A selection of Couture's letters appeared in the *Revue de l'Université Laval*, xvi (May 1962).

WORKS

all printed works published in Paris

VOCAL

Ave Maria, T, vn, vc, org, op.36, 1875
Hymne national canadien-français (N. Bourassa), 4vv, orch, pf, op.4, 1875
Memorare (Prière de la très sainte Vierge), solo v, 4vv, orch, org, op.1 (1875)
Salut de la Fête-Dieu (3 morceaux en plain-chant traités en contrepoint fleuri), 4vv, org, op.6 (1875)
Salut pour les double majeur et mineur, 3 chorales, 4vv, org, op.5 (1875/*R* in Canadian Musical Heritage, v, 1986)
Atala (cant.), 3 solo vv, pf, 1876/7
Ave verum, S, B/Bar, org, 1877

Rêverie (A. de Lamartine), 1894
Veni creator spiritus, T, orch, org, ?1894
Messe de requiem, solo vv, 4vv, orch, org, c1904
Le souvenir (L. Nastorg), 1v, pf, 1907, ed. in Canadian Musical Heritage, vii (1987)
Jean le Précurseur (orat, A. Lozeau, A. Legel), 1907–9 (1914)

INSTRUMENTAL

Marche triomphale, orch, 1875
La perle cachée, incid music, ?1875
Quatuor-fugue, str qt, op.3 (1875)
Rêverie, orch, op.2 (1875/R in Canadian Musical Heritage, viii, 1990)
Grand fugue, d, org, 1876/7
Petit menuet, pf/(vn, pf), 1884
Souvenir de couvent (Feuille d'album), pf, 1906

ANDRÉE DESAUTELS

Covell, Roger David (*b* Sydney, 1 Feb 1931). Australian musicologist, music critic and conductor. He graduated from the University of Queensland with the BA in 1964 and founded the department of music at the University of New South Wales, Sydney, in 1966 (the university first offered music as an interdisciplinary study before it established an institute of practical studies and music education). He took the doctorate at New South Wales in 1976 and was appointed Chair in 1984. His work covers a broad spectrum and includes writings on 17th-century Italian and 19th-century German and French opera, but his major contribution has been in Australian music. His *Australia's Music: Themes of a New Society* (1967) is regarded as the classic study on this topic, and his insights into the Australian repertory (and beyond) have been sharpened through his work as chief music critic at the Sydney Morning Herald (from 1960). He is also well known in Sydney as a conductor, particularly through his work with the University of New South Wales Opera, which since 1968 has staged more than 50 professional productions of Baroque, early 19th-century and contemporary operas, including first performances of Australian operas. He has been president of the Australian Society for Music Education and the Musicological Society of Australia and in 1985 was elected Fellow of the Australian Academy of the Humanities. The following year he was appointed a Member of the Order of Australia for his service to music.

DAVID TUNLEY

Covent Garden. London opera house, also known as the Royal Opera House. *See* LONDON, §V, 1, §VI, 1(i) and §VII, 2.

Covent Garden English Opera Company. Title of the BRITISH NATIONAL OPERA COMPANY from 1929, when it was taken over by the Royal Opera House, London, until 1938, when it ceased to exist.

Coventry & Hollier. English firm of music sellers and publishers, active in London from about 1833 to 1849. It published a number of important works, many from plates taken over when the firm succeeded PRESTON & SON, including many of Handel's works originally issued by Walsh, Randall and others. Some of these plates were acquired by J. Alfred Novello (*see* NOVELLO & CO.) in 1849, after John Hollier had left the partnership. Charles Coventry was a keen advocate of Bach's organ works, and among the firm's original publications was the first English edition of many of the preludes and fugues in 1836, issued jointly with Cramer, Addison & Beale. Because few English organs of the time possessed pedal departments suitable for these works, they were also advertised as performable on the piano, with the pedal part being taken either by a second pianist or by a cello or double bass, for which a separate part, edited by Domenico Dragonetti, was provided. In 1845–6 followed four books of Bach's chorale preludes, edited by Mendelssohn, whose own six organ sonatas, op.65, were commissioned by Coventry and published in 1845, initially by subscription. The firm also published several of the early works of Sterndale Bennett, who was a close friend of Coventry; Sterndale Bennett's Sextet, op.8, was dedicated to the publisher. From 1849 to 1851 Charles Coventry continued alone but fell into financial difficulties; at the sale of his trade stock in 1851 Novello purchased another 4780 plates of sacred works, and subsequently reissued from some of them.

Coventry plays. One of the Civic cycles of medieval English religious plays, now mainly lost. A Corpus Christi play was performed at Coventry in the early 15th century in the form of a cycle of biblical plays acted on wagons in the city streets. The last performance was probably in the period 1569–75. The Coventry trade guilds' records

suggest that it contained ten plays, mainly concerned with New Testament material. Only two plays survive, both revised texts dating from 1534 or 1535. The manuscript of the Weavers' play *The Purification and Doctors in the Temple*, still owned by the Broadweavers and Clothiers, contains the texts of two songs, 'Rejoyce, rejoyce, all that here be' and 'Beholde, now hit ys come to pase': the name James Hewitt appears below the second song, as if he were the poet, composer or scribe. Hewitt was a well-known city wait and organist in Coventry, and his long involvement with the plays is documented in the guild accounts between 1554 and 1573.

The Shearmen and Tailors' play *The Nativity and Slaughter of the Innocents* was edited by Thomas Sharp in 1817 and again in 1825. The manuscript, like that of the Weavers' play, was evidently the guild's own prompt copy, but it was destroyed by fire in 1879 and Sharp's edition is now its only source. Stage directions call for the shepherds to sing twice and the mothers of the Innocents once. Musical settings for one song by each group are at the end of the play: a fine song for the shepherds, 'As I out rode this enderes night', and the famous lullaby ('Lully, lulla, thow littell tyne child', often called the Coventry Carol) for the mothers of the Innocents. The songs are for alto, tenor and bass, and presumably one group of actor-singers played both sets of characters. In performance there would be about half an hour between the exit of the shepherds and the entrance of the mothers of the Innocents, ample time for the singers to costume themselves for the new roles.

The musical settings may be contemporary with the play's revision of 1534 or 1535. They are written in void notation with full black semiminims (i.e. crotchets). Neither has any musical concordance. 'As I out rode' is a charming refrain song with a lively texture alternating homophony with simple imitation. The cadences are clear and invariably simultaneous in the three voices, and the harmonic language is limited; but the uncomplicated surface hides a motivic concentration and level of harmonic and rhythmic manipulation unusual in so short a work. The composer was highly skilled and knew how to use limited resources effectively. The much better-known lullaby is justly famous, a strophic setting in homophonic style of a four-verse poem. A single composer was probably responsible for both songs.

Cover [cover version, cover record]. A term used in the popular music industry usually for a recording of a particular song by performers other than those responsible for the original recorded version; it may also be applied to a re-recording of a song by the original performers (generally using pseudonyms) for a rival record company. In the 1950s and 60s a cover typically entailed the re-recording of a song, for the purposes of disseminating it among a broader or different section of the record-buying public from that of the original. At this time many international popular music hits were in fact cover versions by established white performers of songs originally recorded by black artists on small regional labels.

By the late 1960s the term had largely lost these purely commercial connotations. Rock and soul artists recorded their own versions of songs which had often already been hits in their own right: thus John Lennon had a hit with Ben E. King's *Stand by me* in 1975. A cover can simply be a straightforward copy of the original song, or a more radical reinterpretation of it: the Talking Heads' rendition of Al Green's *Take me to the river* actually appears to be an analysis of the song, and the arrangement of the Beatles' *Help*, as performed by Tina Turner, changes the melody and harmony so fundamentally that it is scarcely the same song as that written by Lennon and McCartney.

While the term cover is not often applied to such reworkings, some of the principles of cover versions are present in the REMIX. In the 1980s reggae artists used the term 'version' for dub remixes of their own songs, in which they altered the sound of the original by adding delay and other electronic effects. By the 1990s the concept of the remix had developed in dance music such that a single was often reinterpreted in a number of different styles: for example Dreadzone's *Life, Love and Unity* (1996) contained a dub instrumental as well as techno and drum and bass remixes.

ROBERT WITMER/ANTHONY MARKS/R

Covey-Crump, Rogers (Henry Lewis) (*b* St Albans, 24 March 1944). English tenor. After singing as a boy chorister in the choir of New College, Oxford, he studied the organ (with John Birch) and singing (with Ruth Packer and Wilfred Brown) at the RCM and took the BMus at London University. Although he has been associated primarily with early music, singing with David Munrow's Early Music Consort, the Consort of Musicke, the Landini, Deller and Taverner consorts and the Hilliard Ensemble, he was also involved in the first British performance and recording, with Singcircle, of Stockhausen's *Stimmung*. Covey-Crump is an accomplished Evangelist in the Bach Passions, as can be heard on his recordings, and has made a major contribution in reinstating the high tenor voice in music often thought accessible only to falsettists, notably in the recordings for Hyperion of the complete odes and church music of Purcell. His keen interest in vocal tuning and historical temperaments, refreshingly audible in his performances, has generated several writings from him on the subject.

GEORGE PRATT

Coward, Sir Noël (Peirce) (*b* Teddington, 16 Dec 1899; *d* Blue Harbour, Jamaica, 26 March 1973). English composer, lyricist, librettist and performer. Born into a family of keen amateur musicians, he made his first professional

appearance as an actor in *The Goldfish* in 1911, achieving great public recognition with *The Vortex* (1924) as both playwright and leading actor. Many of his plays have become standards of the repertory and often include individual songs, most famously with 'Someday I'll find you' from *Private Lives* and the integrated musical numbers in his series of one-act plays, *Tonight at 8.30*. As a singer he remains best known for those recordings of his own songs made in the 1950s, and associated with his cabaret performances first at the Café de Paris in London and then the Desert Inn in Las Vegas. The clipped pronunciation, light baritone with much use of head tones, and rhythmic licence have become instantly recognizable trademarks, much copied and parodied.

Although a noted performer Coward considered his writing, both literary and musical, as his main work. He was a self-taught pianist and his formal musical training was slight. He was concerned with details of harmony and orchestration, but relied on musical assistants for notation: the most influential of these was Elsie April, to whom the vocal score of *Bitter-Sweet* is dedicated, and whose help prompted Coward into bolder uses of harmony. His later assistants were his cabaret accompanists Robb Stewart and Norman Hackforth. Coward's preference for composing in flat keys was guided by his own pianistic comfort, just as his characteristic use of rhythm was derived from his own style of vocal delivery: his music has consequently remained relatively free from later stylistic reinterpretation.

In early revue numbers he showed a talent for providing songs which captured the essence of current social style, presenting concise vignettes of the private reality behind public display, for example in 'Parisian Pierrot' (*London Calling*, 1923) and 'Poor Little Rich Girl' (*On with the Dance*, 1925). He absorbed the contemporary syncopated rhythms of jazz into his lyrics, most notably in 'Dance Little Lady' (*This Year of Grace*, 1928). His first venture into a more expanded musical dramatic form was the operette *Bitter-Sweet*, his only unqualified success in both Britain and America. It is a fine example of the genre, showing the direct influence of Lehár and a fluency Coward was not to repeat. Of its several now-classic songs, 'If Love were All' has gained the status of a personal credo. Although his later operettes contained some excellent songs, particularly in waltz form, they never achieved the same appeal as his first. *Pacific 1860* (1946), an indulgent score redolent of Romantic excesses, takes his by now characteristic harmonic colorations to extremes, as in the soliloquy 'Dear Madame Salvador'. Of his later musicals, characterized by revue-style numbers, only *Sail Away* (1961) achieved moderate success.

Coward's most concentrated emotional directness was achieved with deceptively simple diatonic melodies and little harmonic complexity, as in *Matelot*, *Sail Away* and the patriotic *London Pride*. In his comic songs, which increasingly came to define his musical public image, the melodies are usually subservient to the closely-written lyrics. With roots in music hall, these run through his entire output, from the mildly suggestive early work *Forbidden Fruit* (1916) through revue (*I went to a marvellous party*) [*I've been to a marvellous party*] and operette (*The Stately Homes of England*), to cabaret (*Why must the show go on?*). In *Time and Again*, a fine later example, he combines complex internal rhymes and intricate verse structures with a sinuous melody, whose seductive rise and fall is a perfect foil for the song's libidinous message.

Coward also provided the scenario and music for the ballet *London Morning* (1959) and his music was arranged for *The Grand Tour*, performed by the Royal Ballet in 1971. Hugh Martin and Timothy Gray adapted Coward's play *Blithe Spirit* as the musical *High Spirits* to moderate success, while the Coward compilation show *Cowardy Custard* is frequently revived. Although his critical popularity during his life was seldom constant he remains one of the most important figures in British theatre of the 20th century. He was knighted in 1970.

JOHN SNELSON

Cowbells (Fr. *sonnailles*, *cloches à vache*; Ger. *Kuhglocken*, *Kuhschellen*, *Almglocken*, *Herdenglocken*; It. *cencerro*). Clapper bells (*see* BELL (i)) suspended from the necks of cows and other herd animals. Those in orchestral usage are similar in shape and sound but are often clapperless, in which case they are struck with a drumstick. They are classified as idiophones: percussion vessels. Various types include (1) those made by folding and riveting or otherwise joining metal plates; (2) wooden bells; (3) cast campaniform bronze bells. The metal variety includes a number of well-known shapes, the open end varying from rectangular to oval, and the height frequently greater than the diameter. Wooden specimens take spectacular shapes and large proportions; examples from Java are over 75 cm wide.

Cowbells are particularly associated with the Alps where, in addition to the tintinnabulation of small bells, the deeper sound of the large bell worn by the champion milk-yielder can be heard. Sounds of this description are captured in orchestral works, notably Mahler's Sixth Symphony (*Herdenglocken* to be shaken intermittently) and Richard Strauss's *Alpensinfonie*. A small clapperless cowbell is specified by Constant Lambert in *The Rio Grande*.

A chromatic series of cowbells has entered the percussion section of the orchestra; at the end of the 20th century four octaves were available (*f*–*f'''*). It would be difficult for a single player to play such a large set, as progressively heavier mallets are required as the bells become larger and lower. The use of chromatic cowbells in the orchestra is largely attributable to Messiaen, who called for two octaves in *Sept haïkaï* (1962), three octaves in *Couleurs de la cité céleste* (1963) and three and a half octaves, played by three players, in *Et exspecto resurrectionem mortuorum* (1964). Peter Schat's *Signalement* (1961) also employs three and a half octaves. In Karlheinz Stockhausen's *Gruppen* (1955–7) eight percussionists each play a series of three, four or five cowbells.

JAMES BLADES/JAMES HOLLAND

Cowboy song. A type of song describing cowboys and their life. Such songs began to appear in popular newspapers, as broadsides, in magazines (such as stockmen's journals), and in songbooks in the late 19th century; they became increasingly romanticized when they were taken over by Tin Pan Alley songwriters (such as Billy Hill) and by Hollywood composers. They are generally written in ballad style, but are melodically and structurally indebted to traditional popular, folk and religious songs. The first significant collections were N.H. Thorp's *Songs of the Cowboy* (1908) and J.A. Lomax's *Cowboy Songs and Other Frontier Ballads* (1910, rev. and enlarged 3/1938/*R*). The first commercial recordings of cowboy songs were probably those made by Charles Nabell for Okeh in 1924; Charles T. Sprague, known as the 'Original Singing Cowboy', made a very successful recording of *When the Work's all Done this Fall* for Victor in 1925. Other early cowboy singers were the Cartwright Brothers, Goebel Reeves (the 'Texas Drifter'), Jules Verne Allen ('Longhorn Luke') and Harry McClintock, but the true union of cowboy song and COUNTRY MUSIC did not come until after 1934, when Gene Autry began his career as a singing cowboy in Hollywood films. He popularized such songs as *Back in the Saddle Again* and *Riding Down the Canyon*; he and the singers he influenced, such as Roy Rogers, Tex Ritter, and the Sons of the Pioneers, did much to implant the romantic image of the cowboy in country music.

BILL C. MALONE

Cowell, Henry (Dixon) (*b* Menlo Park, CA, 11 March 1897; *d* Shady, NY, 10 Dec 1965). American composer, writer, performer, publisher and teacher. Described by Cage as 'the open sesame for new music in America', he was an early advocate for many of the main developments in 20th-century music, including the systematization of musical parameters, the exploration of timbral resources and transculturalism.

1. LIFE. Many facets of Cowell's remarkable personality resulted from the unusual circumstances of his upbringing. His father, upper-class Irish immigrant Harry Cowell, drifted to California after the failure of an orchard in British Columbia, given to him by his own father, the Dean of Kildare Cathedral. There he married Clarissa

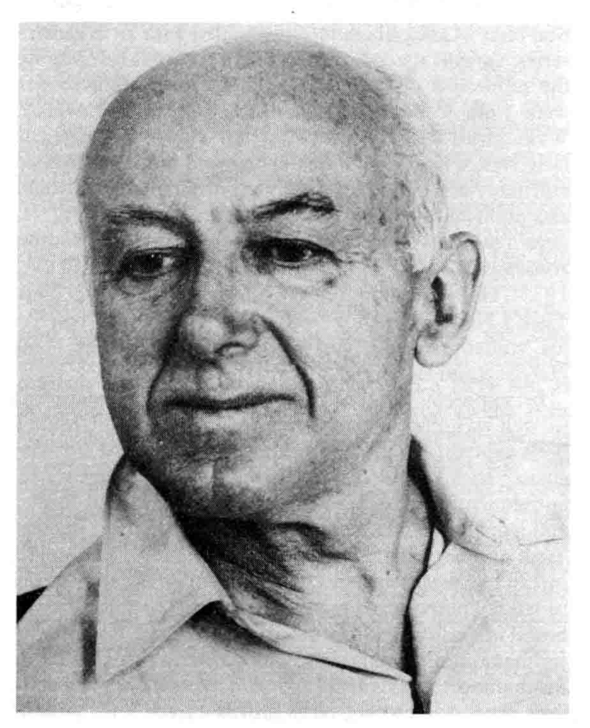
Dixon, who had fled to the West Coast from her Midwestern farming family. The couple have been characterized as philosophical anarchists: both were writers, and neither believed in conventional schooling. Their home was a cottage in a rural area southeast of San Francisco; Henry Cowell was born there, and it remained his principal base until 1936.

After showing early musical talent, from the age of five Cowell received violin lessons, with the idea that he might become a prodigy. The pressure proved too great however, and – with the onset of juvenile chorea – the lessons stopped after three years. His parents divorced in 1903, and following the San Francisco earthquake of 1906, he and his mother lived (mainly with relatives) in Iowa, New York and eventually Kansas, where he had access to a piano. Three decades later, he recalled this period in the *Old American Country Set* (1939). By the time of their return to Menlo Park, probably in 1910, Clarissa Cowell was ill with cancer. After her son had been bullied at school in third grade (during his sole, brief period of public education) she had chosen to teach him at home; now he became their main wage-earner, working variously as a janitor, cowherd and wildflower collector. Concurrently, the dishevelled boy came to the attention of Stanford University psychologist Lewis Terman, who was amazed by his breadth of knowledge, conversational abilities, poor arithmetic and wretched spelling. Terman noted that 'Although the IQ [of 131] is satisfactory, it is matched by scores of others . . . but there is only one Henry'.

Around 1912, Cowell somehow saved $60 and bought a second-hand piano. He had been composing spasmodically since 1907, but from 1913 onwards (when he started keeping a list of his pieces) he experienced a major creative spurt. In order that his blossoming talents be properly nurtured, a fund was organized in 1914 by Samuel S. Seward, a Stanford English professor. The fund, whose contributors included Terman and Jaime de Angulo, supported Cowell until the mid-1920s and helped with his mother's medical expenses, prior to her death in May 1916. Cowell's formal début as a composer-pianist took place on 5 March 1914, in a concert promoted by the San Francisco Musical Club; included in the programme was *Adventures in Harmony* (1913). Perhaps in response to press notices – one suggested that 'he needs a thorough schooling' – Harry Cowell took his son to the University of California, Berkeley in the fall of 1914. Tuition in harmony and counterpoint was arranged with E.G. Stricklen and Wallace Sabin, while weekly discussions on contemporary music were held with Charles Seeger, who recognized in Cowell 'the first brilliant talent of my teaching experience'. A remarkable exchange of ideas ensued (though in later years Seeger felt his contributions went unacknowledged by Cowell). The products of this association included the rhythm-harmony quartets (1917–19) and the first draft of *New Musical Resources* (written with the literary assistance of Seward, and published, after much revision, in New York in 1930). The wealth of possibilities contained in this self-styled 'theory of musical relativity' has influenced several generations of radical composers, in both America and Europe.

Apart from a brief sojourn in New York in late 1916, during which he studied at the Institute of Musical Art and met Leo Ornstein, Cowell remained on the West Coast until 1918. A second important influence there, after Seeger, was John O. Varian, a Theosophist poet and mystic, who in some ways became a surrogate parent to Cowell, especially after Clarissa's death. A regular visitor to the Theosophist community at Halcyon, near Pismo Beach on the Pacific coast, Cowell set several of Varian's texts (the earliest is *The Prelude*, *c*1914), wrote a number of piano pieces influenced by his tales of Irish mythology, and provided music for his 'mythological opera' *The Building of Bamba* (1917), whose introductory number is 'The Tides of Manaunaun'.

After 15 months in the army (1918–19), an experience that triggered his interest in wind band music, Cowell began his career as a crusader for ultra-Modernism. Performing his own piano works, he undertook five European tours (1923, 1926, 1929, 1931, 1932); he also visited Cuba (1930), gave frequent American performances (formal New York début at Carnegie Hall, 4 Feb 1924), and was the first American composer invited to the USSR (May 1929). His tone clusters and direct manipulation of the piano's strings scandalized audiences, established him as an international figure of notoriety, and generated terrific publicity ('Cowell displays new method of attacking piano', as the *New York Tribune* put it in 1924). But European Modernists, including Bartók and Schoenberg, took him more seriously: the former, around 1923, asked Cowell's permission to use clusters, while the latter invited him to perform for his Berlin composition class in 1932. *Dynamic Motion* (1916) was probably among the pieces Cowell played.



Cowell's efforts on behalf of other contemporary composers were many: he founded the New Music Society of California in 1925, and controlled the Pan American Association of Composers for much of its existence (1928–34). Through these and other organizations, he helped to promote concerts throughout America and Europe. In 1927, he founded the quarterly score publication *New Music*, which later expanded with an orchestra series, various special editions and a record label. Among the numerous composers to benefit from his activities were John J. Becker, Carlos Chávez, Ruth Crawford, Wallingford Riegger, Carl Ruggles, Varèse and particularly Ives, who (anonymously) financed both *New Music* and many of the concerts. Partly to bolster his promotional and publishing efforts, Cowell wrote a stream of articles, gave countless interviews and edited the symposium *American Composers on American Music* (Stanford, CA, 1933). He also taught, both publicly (for instance at New York's New School for Social Research) and privately: his students during this period included Cage, Lou Harrison and Gershwin.

In apparent contradiction to his ultra-Modernism, Cowell was interested in world musics. As a child, he had been exposed less to Western art music than to Appalachian, Irish, Chinese, Japanese and Tahitian music. Subsequently he became acquainted with Indian music, and from the late 1920s regularly taught courses, in New York and elsewhere, on 'Music of the World's Peoples'. In 1931 he was awarded a Guggenheim Foundation grant to study comparative musicology with Erich von Hornbostel in Berlin; he also studied gamelan with Raden Mas Jodjhana and Ramaleislan, and Carnatic theory with P. Sambamoorthy. His 1933 article 'Towards Neo-Primitivism' proved a turning-point in his career: as *Ostinato Pianissimo* (1934) and the String Quartet no.4 'United'

(1936) show, he increasingly followed his own advice in drawing on 'those materials common to the music of the peoples of the world, [in order] to build a new music particularly related to our own century'.

Despite his many professional successes, Cowell's private life was consistently unsatisfactory. A bisexual, he had twice been involved in serious (though tragic) relationships with women: Edna Smith was killed in a car accident in 1922, and Elsa Schmolke was unable to leave Hitler's Germany. He had also had relationships with men, including one at Halcyon in 1922; in May 1936, he was arrested at his Menlo Park home on a morals charge and spent the next four years in San Quentin Penitentiary, where he taught, composed, wrote two unpublished textbooks (*The Nature of Melody* and *Rhythm*) and rehearsed the prison band. In 1940, after a vigorous campaign led by his step-mother Olive Cowell and the folk-music scholar Sidney Hawkins Robertson, he was released on parole. After moving to White Plains, New York, as Percy Grainger's assistant, in September 1941 he married Robertson, who for the next 25 years provided the emotional security he had previously lacked. At the end of 1942 he was pardoned by California governor Cuthbert Olson, primarily to allow his promotion to Senior Music Editor within the overseas branch of the US Office of War Information.

Although now based on the East Coast, Cowell was able to pick up many of the threads of his earlier life. Having relinquished control of *New Music* in 1936, he edited it again for four years (1941–5). Teaching and related activities at the New School for Social Research (1941–63) were supplemented by positions at Columbia University (1949–65) and the Peabody Conservatory (1951–6), and by many guest lectureships; among his postwar pupils were Dick Higgins, Philip Corner and Burt Bacharach. A fresh stream of articles, many of them reviews (an indeterminate number of which were co- or ghost-written by his wife), appeared under Cowell's name. In 1955, the couple published *Charles Ives and His Music* (New York, 1955, rev. 3/1983) a classic study of a composer Cowell had championed for nearly 30 years. After the 1940s, Cowell's appearances as a concert pianist were increasingly rare, but in 1963 he recorded 20 of his piano works for Folkways Records. Although somewhat shunned by establishment performance bodies (who were perhaps flummoxed by the increasing eclecticism of his music) Cowell was lauded in other ways: he was the recipient of several honorary doctorates, was elected to the National Institute of Arts and Letters (1951, vice-president 1962), was president of the ACA (1951–5), and was awarded the Henry Hadley Medal by the National Association of American Composers and Conductors (1962).

Henry Cowell, 1959

Plagued by ill-health for much of his last decade, Cowell nevertheless pursued a punishing schedule. Nine of the 20 completed symphonies date from this period, as do nearly 150 other works, many of them substantial. The Cowells undertook a world tour in 1956–7, sponsored by the Rockefeller Foundation and the US State Department, which included lengthy stays in Iran, India and Japan; among the palpable results were the *Persian Set* (1957), Symphony no.13 'Madras' (1956–8) and *Ongaku* (1957). In 1961, Cowell returned to Iran and Japan as President John F. Kennedy's representative at the International Music Conference in Teheran, and the East-West Music Encounter in Tokyo. After his death in 1965, there was an increasing realization of his importance not only as a Modernist maverick, but also as a postmodern prophet. The centenary of his birth was celebrated at several major events, including a festival and conference in New York, and on 16 March 1997, Kofi Annan, secretary-general of the United Nations, paid tribute in a special address to his 'contributions to intercultural music'.

2. WORKS. Although Lichtenwanger's catalogue of Cowell's works lists 966 items, the precise number of his compositions is difficult to determine. Several catalogue entries are groups of separate works (e.g. the 14 *Ings*, 1917–55); some 'lost' pieces may be retitled versions of extant items (e.g. Three Pieces for Chamber Orchestra, 1928); and some works reflect Cowell's Handelian tendency towards recycling (e.g. Symphony no.15 'Thesis', 1960). Whatever the actual total, Cowell's prolificity – like that of his near-contemporaries Milhaud and Villa-Lobos – is inevitably linked to a certain unevenness of quality. Thus, balanced against his many fine and outstanding compositional achievements, are works that are incomplete, insubstantial, or inconsequential, though almost always possessing worthwhile or notable features.

Quantitative and qualitative issues notwithstanding, Seeger opined as early as 1940 that 'I can think of no composer whose work is more difficult to evaluate . . . To him, music . . . is a field, a *tabula rasa*, in which there are infinite possibilities of combination'. Cowell openly declared his lack of interest in creating a consistent and recognizable personal style: polystylism is thus an ever-present feature of his music, as works as different as *Resumé in Ten Movements* (1914) and the Trio in Nine Short Movements (1965) demonstrate. The former includes 'Savage [Music]', a 'Classic Sonate', 'Folk Music' and a 'Futurist' coda-cadenza; the latter, in microcosm,

runs a gamut of influences from diatonic to chromatic, serious to humorous, folk to art, and conservative to radical. Cowell was endlessly fascinated by the multitude of musical stimuli he encountered, and was increasingly drawn to those that lay beyond his immediate time and place. More importantly, he saw each as a colour to add to his compositional palette.

The crucial factor in Cowell's public acceptance was the degree to which his technical and aesthetic interests were congruent with those of the musical establishment. Until the 1930s, Cowell was best known for his ultra-Modern works, the innovations of which constituted a compendium of contemporary possibilities. Included are examples of extreme chromaticism (String Quartet no.1, 1916; *Seven Paragraphs*, 1925); extreme rhythmic complexity (*Quartet Romantic*, 1917); implied or actual polytempo or polymetre (*Quartet Euphometric*, 1919); innovative notational devices, including graphic notation (*Fabric*, 1920; *A Composition*, 1925); semi-improvised music (*Ensemble*, 1924, rev. 1956); and the investigation of new structural possibilities, both integral (String Quartet no.4, 'United', 1936) and indeterminate (*Mosaic Quartet*, 1935; works in elastic form, including the 'Ritournelle' from *Les mariés de la Tour Eiffel*, 1939). Particularly influential were his investigations of new timbral resources: he was an early exponent of proto-electronic instruments (the rhythmicon, developed in association with Lev Termen, was featured in the concerto of 1931); of non-Western and percussion instruments (thundersticks in *Ensemble*, 1924; percussion in *Ostinato Pianissimo*, 1934); and especially of extended piano techniques. Tone clusters first appeared in *Adventures in Harmony* (1913) and became a common feature after his encounter with Ornstein in 1916. Initially restricted to the piano, clusters were later used in chamber and orchestral contexts: examples include sections of the String Quartet no.5 (1956) and the fifth (1948) and sixth (1952) symphonies. Clusters serve two basic functions: in many works, including *The Tides of Manaunaun* (?1917), the song *Rest* (1933) and the first movement of *Rhythmicana* (1938), they act to colour material that is often diatonic and relatively simple. Elsewhere, clusters constitute the basic sonic resource, as in *Dynamic Motion* (1916), the Concerto for Piano and Orchestra (1928) and parts of *26 Simultaneous Mosaics* (1963). The effect, though often acerbic, can also be very beautiful, as the opening of the Piano Concerto's second movement demonstrates. A similar overall view can be taken of Cowell's manipulation of piano strings: the remarkable sounds produced by strumming, stroking, scraping, muting or hitting the strings is used both colouristically (*The Aeolian Harp*, *c*1923; *Sinister Resonance*, 1930) and as a more fundamental resource which timbrally often approaches electro-acoustic music (*The Banshee*, 1925; third movement of *A Composition*, 1925). Unrelated to the above, but equally remarkable, were Cowell's imaginative theatrical collaborations, including those for *The Building of Bamba* (1917), *Fanati* (1935), *Ritual of Wonder* (1937), *Trickster (Coyote)* (1941) and the various 'elastic' pieces composed for Martha Graham and others (whose lengths can be expanded or contracted to fit with the choreographic or theatrical needs).

Most of these new ideas were introduced during the period before Cowell's arrest, in a cultural climate which was broadly conducive to innovation and novelty. By 1940, however, much had changed. Cowell had already begun to move away from ultra-Modernism towards both populism (he had been a member of the left-wing Composers' Collective) and transculturalism, as the prefatory note to the String Quartet no.4 'United' (1936) and the article 'Towards Neo-Primitivism' make clear. After four years of comparative isolation in San Quentin, he found that the effects of Franklin D. Roosevelt's 'New Deal' and the outbreak of World War II made for a different America, less open to new ideas. Although he increasingly composed in traditional genres (concerto, symphony) and for conventional forces (band, orchestra), he seldom did so in expected or acceptable ways; thus he became increasingly marginalized. All of the later concertos are for unusual instruments (percussion, 1958; accordion, 1960; harmonica, 1962; *koto*, 1961–2; 1965; harp, 1965) and most of the symphonies from no.9 (1953) onwards are in five or more movements. Some recycle earlier music (no.15 'Thesis', 1960 is largely an orchestration of the *Mosaic Quartet*, 1935 and the Movement for String Quartet, 1928), while others rely on forms somewhat tangential to the Western symphonic tradition (jig, ballad and hymn and fuguing tune). Several symphonies incorporate transcultural elements (Indian music in no.13 'Madras', 1956–8; Icelandic music in no.16, 1962), as do many other works, both overtly (*Homage to Iran*, 1957) and covertly (*Set of Five*, 1952). Hymns and fuguing tunes – which Cowell variously described as 'frankly influenced by the early American style of [William] Billings and [William] Walker' and 'something slow followed by something fast' – abound. The numbered set of 18 (1944–64) includes keyboard and other solo works, chamber music, and pieces for orchestra and band; numerous other examples occur in such pieces as the Violin Sonata (1945–6), the String Quartet no.5 (1956), the Trio for flute, violin and harp (1962), and at least eight of the symphonies. A quite different side of Cowell's personality emerges in the substantial body of vocal music: the norm here is of unaffected warmth and lyricism. Typical examples include the songs *St. Agnes Morning* (*c*1914), *The Pasture* (1944) and *Firelight and Lamp* (1962), and the choral pieces *Luther's Carol for his Son* (1948) and *. . . if He please* (1955).

Cowell's musical legacy is twofold. First, many of his advanced ideas – not least as expounded in *New Musical Resources* – have been taken up by later composers, both in America and Europe. For instance, Nancarrow's complex rhythms and use of the player piano were both inspired by the book, and Stockhausen's scales of tempo in *Gruppen* are very similar to those proposed by Cowell. Second, Cowell's remarkable openness of mind, especially in relation to timbre and to non-Western musics – he once stated his desire 'to live in the *whole world* of music' – set an important precedent for his own students, such as Cage and Harrison, who in turn influenced many younger composers. As Goldman asserted in 1966, '[Cowell] helped two generations to see and think and hear, and he helped to create and build a foundation for "modern" music in America. This is not a small achievement; it is a gigantic one. . .'.

Cowell's MSS and sketches are in *US-Wc*, his papers and some MSS are held on deposit at *US-Nyp*.

WORKS

Catalogue: W. Lichtenwanger: *The Music of Henry Cowell: a Descriptive Catalog* (Brooklyn, NY, 1986)

Fragments, sketches, composition exercises and most lost and incomplete works are omitted, except where evidence of performance exists.

Numbers are from Lichtenwanger; letter suffixes denote arrangements, and numbers following a diagonal indicate a movement or part of a larger work.

To facilitate cross-references between sections letter prefixes have been added. Titles follow the forms in Lichtenwanger, except where indicated otherwise.

AP – *anniversary piece (Cowell composed 85 short pieces for his wife Sidney Robertson Cowell for various anniversaries beginning in 1941)*

pf-str – *piano strings (an indication that the part should be played directly on the strings of the piano)*

< – *arranged as/developed into*

> – *arranged from/developed from*

† – *works not appearing in Lichtenwanger*

‡ – *published work*

Index: A – Orchestral and band; B – Concertante; C – Choral; D – Solo vocal; E – 5 or more instruments; F – 3–4 instruments; G – 2 instruments; H – Solo instrumental; I – Keyboard; J – Music for dance and drama; K – Arrangements

DAVID NICHOLLS

Cowen, Sir **Frederic Hymen** [Hymen Frederick] (*b* Kingston, Jamaica, 29 Jan 1852; *d* London, 6 Oct 1935). English pianist, conductor and composer. He was brought to England in 1856. As a child he showed extraordinary precocity; he published a waltz at the age of six and two years later wrote an operetta, *Garibaldi*, to a libretto by his cousin Rosalind. The same year he began to study harmony with Goss and the piano with Benedict. As a young musician Cowen enjoyed the advantages of his father's position as both private secretary to the Earl of Dudley and treasurer to the Italian Opera at Her Majesty's Theatre. He gave his first piano recital in the concert room of Her Majesty's in December 1863, and at Dudley House in June 1864 he performed Mendelssohn's Concerto in D minor in a concert that also featured Joachim and Santley. The following year at Dudley House he appeared with Joachim and Pezze in his own Piano Trio in A.

In 1865 Cowen won the Mendelssohn Scholarship, but his parents would not give up their control of him (as demanded by the Scholarship Committee) and instead he studied independently in Leipzig, where he worked with Hauptmann, Moscheles, Plaidy, E.F. Richter and Reinecke. His String Quartet in C minor was performed at the Conservatorium in January 1866. After a brief period in England, during the Austro-Prussian war, he returned to Germany, this time to Berlin. In October 1867 he entered the Stern Conservatory, where he studied composition with Kiel and Taubert and the piano with Tausig and gained valuable experience as a conductor. During this period he met Liszt in Weimar, and Brahms, Hanslick and Hans Richter in Vienna. Returning to London in 1868, he took piano lessons with Charles Hallé and embarked on a career as a virtuoso, appearing at the Philharmonic Society and the Crystal Palace.

Cowen first established his reputation as a composer with a concert at St James's Hall on 9 December 1869 paid for by his father. The programme featured his First Symphony and Piano Concerto in A minor, works that elicited unanimous adulation from the press. His interest in opera led to employment as an accompanist for Mapleson's concert party which toured Britain and Ireland; he also wrote incidental music to *The Maid of Orleans* (1871), a 'comedietta' *One Too Many* (1874) and, for Carl Rosa, *Pauline* (1876). Choral commissions resulted in a cantata, *The Corsair* (1876), for Birmingham and *The Deluge* (1878) for Brighton.

During the 1870s he did much travelling, visiting Germany, Italy and the USA, and toured Scandinavia with the singer Trebelli on three occasions. These tours inspired his Third Symphony (the 'Scandinavian'), which was given at St James's Hall at a series of four concerts conducted by the composer in the winter of 1880. The work, colourfully orchestrated (with off-stage horns), well constructed and thematically distinctive, was an immediate success, brought Cowen's name to prominence and received performances in Budapest, Vienna, Prague,

Paris, Cologne, Stuttgart and Aix-la-Chapelle as well as in Britain and America. Hailed by *The Times* as 'the most important English symphony for many years', it played an important role in the establishment of a British symphonic tradition at the end of the 19th century.

Although he was on the staff of the National Training School for a short time as conductor of the orchestra class (1879–81), it was as a conductor that Cowen found his professional niche. He succeeded Sullivan as conductor of the Promenade Concerts in 1880 and soon began to conduct by invitation the Philharmonic Society, who then appointed him permanently in 1888. That year he went to Australia for six months at the invitation of the Victoria Government to direct the music for the Melbourne Centennial Exhibition, for which he was paid the handsome fee of £5000. On his return to London he took up his duties with the Philharmonic and worked with artists such as Borwick, Joachim, Janotha, Nordica, Pachmann, Paderewski and Ysaÿe. In 1892 he resigned after a disagreement over rehearsal time, but, was appointed again for a second term (1900–07). After the death of Hallé in 1895, he was appointed conductor of the Hallé Orchestra (until 1899). He was conductor of the Liverpool Philharmonic Society (1896–1913), the Bradford Festival Choral Society and subscription concerts (from 1897), the Bradford Permanent Orchestra (1899–1902), the Scarborough Festival (1899), the Scottish Orchestra (1900–10), the Cardiff Festival (1902–10) and the Handel Festival (1903–23). At the Philharmonic Cowen raised the standard of playing, was highly regarded by the press for the breadth of his programmes and improved the financial position of the society. His unostentatious style of conducting, criticized by Shaw but praised by Elgar, was widely respected, but it was in time superseded by the greater aplomb of Landon Ronald and Henry Wood.

In recognition of his contribution to English music he received the honorary doctorate from Cambridge in 1900 (at the same time as Elgar) and from Edinburgh in 1910. He received a knighthood the following year. Thereafter he wrote relatively little music and devoted his time to the production of literary works including a number of monographs on Haydn, Mendelssohn, Mozart and Rossini and his autobiography *My Art and My Friends* (1913).

As a composer Cowen entertained aspirations somewhat beyond the capacity of his musical gifts. Although his *Scandinavian Symphony* proved popular, this was largely due to the charm of the orchestral handling, notably in the lighter rhythmic and melodic directness of the inner movements. Uncomplicated scores such as the two suites *The Language of Flowers* (1880 and 1914), the ballet suite *In Fairyland* (1896), *The Butterfly's Ball* (1901) and the curious exoticism of the *Indian Rhapsody* (1903) reveal an adroitness that generally eluded him in his symphonies and choral works, though on occasion he could strike a deeper, more emotional note, as in his *Ode to the Passions* (1898). This tendency is also largely true of his contribution to opera. The diminutive canvas of his 'comedietta' *One Too Many* (1874) has a charm and subtlety that befits Cowen's natural sense of wit. His attempts at serious opera, on the other hand, were much less happy. His one *verismo* opera, *Signa* (1892), intended to follow the production of Sullivan's *Ivanhoe* at D'Oyly Carte's new Royal English Opera House, was performed twice at the Teatro Dal Verme, Milan, in November 1893 (reduced from four acts to three) and at Covent Garden in the summer of 1894 (reduced to two acts), where despite a royal performance before Queen Victoria, it was not a success. Cowen was also a prolific songwriter but regretted that his fame in this genre rested on popular ballads such as *It was a Dream* (made famous by Tietjens), *The Better Land* and *The Promise of Life*.

WORKS

printed works published in London unless otherwise stated

STAGE

all publications are vocal scores

Garibaldi, or The Rival Patriots (drawing-room operetta, 2, R. Cowen), 1860 (1860)
The Maid of Orleans (incid music), 1871
One Too Many (comedietta, 1, F.C. Burnand), London, St George's Hall, 24 June 1874 (1898)
Pauline (op, 4, H. Hersee, after Bulwer Lytton: *The Lady of Lyons*), London, Lyceum, 22 Nov 1876 (1876)
Thorgrim (op, 4, J. Bennett, after Icelandic saga: *Viglund the Fair*), London, Drury Lane, 22 April 1890 (1890)
Signa (op, 3, G.A. A'Beckett, H.A. Rudall and F.E. Weatherly, after Ouida), It., Milan, Dal Verme, 12 Nov 1893; reduced to 2 acts, London, CG, 30 June 1894 (1894)
Harold, or The Norman Conquest (op, 4, E. Malet), London, CG, 8 June 1895 (1895)
Monica's Blue Boy (pantomime), 1917
Cupid's Conspiracy (comedy ballet), 1918
The Enchanted Cottage (incid music, A.W. Pinero), London, Duke of York's, 1922

CHORAL AND VOCAL

all publications are vocal scores

The Rose Maiden, op.3 (cant., R.E. Francillon, after the German), 1870 (?1883)
The Corsair (cant., Francillon, after Byron), Birmingham Festival, 1876 (1876)
The Deluge (orat), Brighton Festival, 1878
St Ursula (cant., Francillon), Norwich Festival, 1881 (1881)
The Sleeping Beauty (cant., F. Hueffer), Birmingham Festival, 1885 (*c*1885)
Ruth (orat, J. Bennett), Worcester Festival, 1887 (*c*1887)

Cow horn. A bovine horn with the tip removed for blowing, used since antiquity by herdsmen and for sounding alarms and assemblies, and also in warfare. Remains exist of gold-mounted horns, and also of gold horns in the arcuate shape of a large ox horn, from Bronze Age northern Europe. For *Der Ring des Nibelungen*, Wagner required one *Stierhorn*, ('ox horn') to be sounded off-stage in *Die Walküre*, Act 2, written *c*; and in *Götterdämmerung*, Acts 2 and 3, three *Stierhörner* written *c*′, *d*♭′ and *d*′, but played an octave lower. A set of three special instruments is required to perform this, each consisting of a straight tube of brass (the C Horn is 104 cm long) with an exact conical bore which expands from a socket for a trombone mouthpiece at one end to an orifice 6 cm across at the other; there is no bell flare. Their fundamentals are sounded *fortissimo* by three trombonists in the wings. Wagner also used the cow horn for the night watchman in *Die Meistersinger*.

In the finale of his *Spring Symphony* (1949) Britten required a cow horn in *c*′ which was to sound grace notes from the 4th above and below, in addition to its fundamental; to produce this Boosey & Hawkes fitted two keys to a brass horn, which was sounded with a modern trumpet mouthpiece.

ANTHONY C. BAINES

Cowie, Edward (*b* Birmingham, 17 Aug 1943). English composer and painter. He studied with Fricker at Morley College, privately with Goehr, and at the universities of Southampton and Leeds; he also received advice and encouragement from Lutosławski in Warsaw. In 1973 he was appointed lecturer in music and composer-in-residence at the University of Lancaster. From 1983 to 1986 he was composer-in-residence to the Royal Liverpool PO. In 1983 he was appointed to the chair of creative arts at the University of Wollongong, New South Wales; from 1989 he was research professor and director of the Australian Arts Fusion Centre at James Cook University of North Queensland. While in Australia he also appeared frequently as a conductor, and founded the Australian Composers' Ensemble. He returned to England in 1995, and the following year was appointed director of research at Dartington College of Arts.

As the interdisciplinary nature of his teaching appointments since 1983 suggests, Cowie has a strong interest in the relationship between different art forms, and between artistic and scientific observation. As a painter he has exhibited in England, Australia and the USA; his paintings and compositions often share subject matter and formal concerns. Works by other artists have also been a fruitful source of inspiration: for example, Leonardo's studies of the movement of water in the Concerto for Orchestra; four paintings by Turner in the Choral Symphony; and the theories of Kandinsky in *Point and Line to Plane*.

Much of Cowie's work is inspired either by landscape paintings or directly by nature, sometimes through musical 'transcription' of specific sites. This involves not only onomatopoeic representation of natural sounds like birdsong, but also the derivation of forms, textures and melodic shapes from the landscape itself, and from movement and change within it. An outstanding example is *Gesangbuch* (1973–6), for wordless chorus and ensemble, in four movements corresponding to the four seasons in four northern English locations. Even the 'fantasy opera' *Commedia*, while based on the traditional characters of the *commedia dell'arte*, places a strong emphasis on the natural world. A second operatic project was suggested by Sidney Nolan's paintings of the outlaw Ned Kelly in the Australian landscape; this was planned in the early 1980s (before Cowie's departure for Australia) but subsequently abandoned – though not before generating, like *Commedia*, a group of satellite works.

Cowie's music is rarely entirely abstract in conception. Another regular starting-point has been architecture, for example in *Cathedral Music* and *The Roof of Heaven* (the latter, like several of Cowie's works, to his own text). Pre-existing music has less often been used as source material: but '48' is an extended sequence of miniatures paying homage to Bach's *Das wohltemperirte Clavier*; and the Cello Concerto, written in memory of a music-loving friend, includes quotations from Beethoven, Schubert and others.

After using serial techniques in his earliest works (up to 1973), Cowie developed a freely atonal language; tonal

centres are often suggested, however, by means of pedal-points and sometimes sustained common chords, to provide periods of repose during or at the end of works. In later works he has moved closer to tonality and modality. His sources of inspiration in the natural world result in forms which grow organically from their basic material, usually without reference to traditional structures; rhythms are intricate, often with a fluctuating pulse, and with some passages of loose coordination. Cowie's use of natural analogues also leads on occasions to textures of almost bewildering profusion, especially in his orchestral music. But his music of the 1990s, which includes a higher proportion of chamber works, shows a greater refinement of texture.

ANTHONY BURTON

Cowper [Cooper, Coupar, Couper], **Robert** (*b* *c*1474; *d* 1535–40). English composer. He was a clerk at King's College, Cambridge, from 1493 to 1495, and obtained the degrees of MusB and MusD at that university in 1493 and 1507. He is probably the Robert Cowper who was in the choir of the chapel of Lady Margaret Beaufort, mother of Henry VII, between about 1504 and 1509 (household accounts at St John's College, Cambridge). He was ordained a priest in 1498, and was rector of the free chapel of Snodhill, Herefordshire, from that year (vacated by 1514), and rector of Lydiard Tregoz, Gloucestershire, from 1499 to 1513. In 1516 he was granted two benefices from the Archbishop of Canterbury: East Horsley in Surrey and Latchington in Essex. He was rector of Snargate in Kent from 1526 to his death. According to Thomas Whythorne he was also 'of the Abbey at St. Edmondzbury'. In a letter dated 5 June 1525 William Cowper, dean of Bridgnorth, requested a benefice from Thomas Cromwell for his brother Robert, saying that he was 'well-disposed and virtuous and a good choirman' (see Brewer). This may have been the composer; wills of persons of this name were proved in 1541 and 1549.

Although the list of his extant works is small, he was admired by two later 16th-century writers: Thomas Morley mentioned him in his *Plaine and Easie Introduction* (London, 1597), and Francis Meres in his *Palladis Tamia* (London, 1598) listed him among the 'excellent musicians' of England. An inventory of 'Pryke Song' books belonging to King's College, Cambridge, in 1529 has an entry: '4 smaller books covered with leather having Cornyshs and Copers Masses'. King suggested that Cowper may have provided the music for the song 'Time to pass' in Rastell's interlude of the *Four Elements*: like Cowper, the surviving copy of the interlude seems to have had Bridgnorth connections.

DAVID GREER

Cowsins, Benjamin. *See* COSYN, BENJAMIN.

Cox, David (Vassall) (*b* Broadstairs, 4 Feb 1916; *d* Pratt's Bottom, London, 31 Jan 1997). English composer and writer on music. He studied with Howells and Benjamin at the RCM (1937–9) and also attended Oxford University (1937–40, MA, BMus), where he was organ scholar at Worcester College and then assistant organist at Christ Church Cathedral. After war service he worked mainly for the BBC, notably as external services music organizer

(1956–76) with responsibility for all music broadcasts on the overseas services (his orchestral arrangement of *Lilliburlero* has been the 'signature tune' of the BBC World Service English news bulletins for over 30 years). Cox's compositions follow in the English tradition from Tudor music and Purcell through to Holst and Britten, but also with strong French influences. Significant among them are a choral suite, *Out of Doors* (1969), an opera, *The Children in the Forest* (1968), and the Five Songs from John Milton (1974). As a writer and broadcaster he was best known for his sympathetic understanding of 20th-century French and English music. He wrote many articles and contributions to symposia as well as a BBC music guide, *Debussy Orchestral Music* (London, 1974), a history of the Promenade Concerts, *The Henry Wood Proms* (London, 1980) entries for the *New Grove Dictionary of Music and Musicians* (London, 1980), and co-edited *Peter Warlock: A Centenary Celebration* (London, 1994).

Principal publisher: OUP

ANDREW BURN

Cox, Harry Fred (*b* Pennygate, Barton Turf, Norfolk, 1885). English traditional singer and musician. Harry Cox's paternal grandfather and his father were noted singers in the community; his father also played the fiddle and Cox's mother sang. The seventh of 13 children, he left school at 13 years old to become a farm labourer. He worked, played music and sang with his father from whom he learnt most of his repertory; some of Cox's songs appear in his mother's collection of broadsides. During World War I he served in the Royal Navy. He married at the age of 40 years after which lived at Catfield Common, Norfolk.

Harry Cox performed traditional songs, played the fiddle, tin-whistle and melodeon, made dancing dolls and also step-danced. During the early 1920s he was 'discovered' by the composer and folksong collector E.J. MOERAN. Some of his material was subsequently published in the *Folk-Song Journal* (1923). From the late 1940s until shortly before he died, he was recorded by numerous song collectors including E.J. Moeran, Francis Collinson, Peter Kennedy and ALAN LOMAX. He made occasional appearances on radio and television.

Harry Cox is one of the most famous English traditional singers noted for the outstanding quality of his performances, his sense of timing and extensive repertory. Since the 1960s he has had a steadfast influence on traditional music enthusiasts within the Folk Revival.

REG HALL

Cox [née Prater], **Ida** (*b* Toccoa, GA, 25 Feb 1896; *d* Knoxville, TN, 10 Nov 1967). American blues singer. She joined a black minstrel show as a child and was singing in theatres at the age of 14. After several years on the T.O.B.A. circuit, she opened the Apollo Theater, Harlem, in 1929 with her *Raisin' Cain Revue* and continued on the road throughout the 1930s. On stage in the South she depended less on vaudeville songs, and most of her repertory consisted of blues in traditional form. The first of her many recordings, *Any Woman's Blues* (1923, Para.), was a composition by her pianist Lovie Austin and demonstrated the characteristic resonant, rather nasal quality of her singing. With appropriate material, particularly her own blues compositions, she was among the finest female singers. *Ida Cox's Lawdy Lawdy Blues* (1923, Para.) and *I've got the blues for Rampart Street* (1923, Para.), both with excellent accompaniment by Tommy Ladnier on the cornet and a trio including Austin, are strong yet relaxed. For several years Cox was accompanied professionally by the pianist Jesse Crump, who is heard playing a sombre organ setting in *Coffin Blues* (1925, Para.). After 1929, when she recorded *Jail House Blues* (Para.) with the trombonist Roy Palmer, Cox did not record for ten years. *Four Day Creep* (1939, Voc.), although recorded with a larger band than usual (including Hot Lips Page on the trumpet), showed that she was still in excellent form. Between then and 1950 she worked intermittently as a singer but made no recordings. In 1961 at the age of 65 she recorded a final session, including a remake of *Wild women don't have the blues* (on her album *Blues for Rampart Street*, Riv.). Her voice had lost its quality, however, and she retired from active performing thereafter.

PAUL OLIVER

Cox [Cocks, Cockx, Cokkes], **Richard** (*fl* mid-15th century). English composer. He may have been the Richard Cokkes who was a scholar of Eton College in 1440; this scholar himself is likely to have been the Cokkes who was a clerk of King's College, Cambridge, in 1457. Van den Borren claimed to have found Cox among the members of the choir of Antwerp Cathedral during the mastership of Barbireau (1448–91), but did not cite his evidence.

A three-voice *Missa Sine nomine* ascribed to 'Riquardus cockx' (ed. N. Sandon, Newton Abbot, 1989; also in

EECM, xxxiv, London, 1989) is the third in a group of five English mass cycles which form the opening section of the Burgundian manuscript *B-Br 5557*; the other masses are by Cox's contemporaries Walter Frye and John Plummer. The arrival of these works at the Burgundian court is likely to have been associated with the marriage of Charles the Bold and Margaret of York on 3 July 1468. No other music by Cox is known to survive.

Cox's five-movement mass (the Kyrie sets the prosula *Deus Creator*) is typical of those produced by the generation of English composers succeeding Power and Dunstaple. Each movement consists of several metrically contrasted sections; most of these sections consist of subsections scored alternately for three and two voices. The tenor and contratenor share the same clef and range a 5th below the superius and constantly cross each other; most of the duets are for superius and contratenor. As in the masses by Frye and Plummer the voices are more like each other in melodic and rhythmic style than was usual in English music of the previous generation, and the treatment of dissonance is more careful and consistent. On the other hand, Cox largely eschews imitative writing, and there is little sign of the profusion of ornamental detail which would become a feature of English style less than a generation later; in these respects Plummer's *Missa Sine nomine*, which precedes Cox's in this source, is considerably more forward-looking.

The movements of Cox's mass are interrelated through a tenor motif which recurs several times in each movement, and through a less systematic re-use of brief passages for two and three voices. None of the material resembles a plainchant cantus firmus, and none of it has been identified in any other polyphonic work. It is possible that Cox proceeded by constantly reworking freely invented material; this technique may have a precursor in John Benet's *Missa Sine nomine*, and evidently motivated a significant number of other three-voice masses, both English and continental, of the later 15th and early 16th centuries.

NICHOLAS SANDON

Coxe, William (*b* London, 7 March 1747; *d* Bemerton, 16 June 1828). English divine and historian. His father William Coxe (*d* 1760) was royal physician to George II. After his father's death, his mother (*d* 1785) married the composer John Christopher Smith, who, with Benjamin Stillingfleet, guided the education of her children. At King's College, Cambridge, Coxe was a private pupil of Joah Bates. From about 1773 he served as tutor or travelling companion to sons of various noblemen, and from 1788 he was rector of Bemerton. His biographical, historical and topographical writings were based upon material gathered during his travels or compiled from the archives of persons with whom he was connected. In the case of his *Anecdotes* and *Literary Life*, the information relating to music and music theory came directly from the participants themselves.

JAMIE C. KASSLER

Coxsun [Coxson], **Robert** (*b* 1489/90; *d* after 1548). English composer. He was a member of the choir of St Nicholas, Wallingford (Berkshire), in 1548, in which year he was aged 58. The presence of two organ works for the Latin liturgy in the earliest section of *GB-Lbl* Add.29996 suggests that he was active as a composer in London during the early 1540s. Both works are offertories (both ed. in EECM, x, 1969). The first, *Laetamini in Domino*, is for three widely spaced voices in the manner of Redford. The second, *Veritas mea*, is much more individual. The cantus firmus (uniquely in organ settings of Mass chants) is a faburden, slow-moving but richly embellished. Above it the right hand provides a florid counterpoint enlivened with ingenious cross-rhythms.

JOHN CALDWELL

Coya, Simone (*b* Gravina, nr Naples; *fl* 1679). Italian composer. He was living in Milan in 1679 when he published as his op.1 a volume of cantatas and serenatas, *L'amante impazzito* (which is the title of one of the pieces); they are for one and two voices, violins and continuo. Manuscript copies survive (at *F-Pn*) of motets that he is said to have published at Milan in 1681.

□

Coypeau, Charles. *See* DASSOUCY, CHARLES.

Coyssard, Michel (*b* Besse-en-Chandesse, 1547; *d* Lyons, 1623). French hymn writer and writer on music. He was active in the religious instruction of children, and taught at the new Jesuit colleges in Vienne and Lyons (Collège de la Trinité, 1579), later serving as rector in Tournon, Puy and Besançon. Following the instructions of the Council of Trent he became deeply involved in the Counter-Reformation movement in France. His determination to emulate the popularity of Lutheran chorales and Calvinist psalms in disseminating Christian doctrine through vernacular religious song led him to compile a collection of hymns and canticles, some new and others translated from Latin liturgical texts, mostly adopting the form of the rhymed quatrain which had proved so successful in the moralistic verses of Guy du Faur de Pibrac and Pierre Mathieu. Coyssard's *Hymnes sacrez & odes spirituelles* were first published as an appendix to his *Sommaire de la doctrine chrestienne* (Lyons, 1591) with an indication that they were to be sung before and after

the lessons of catechism. The hymns proved popular, and appeared in several later editions. 16 were reprinted in Lyons with anonymous four-part musical settings in a simple homophonic style (RISM 1592[6]); the title-page explains that the superius could be sung alone. Some of the music was criticized, however, and later editions printed in France and the Low Countries between 1594 and 1655 provided new musical settings; the music for one print published in Antwerp in 1600 was mostly composed by Virgile Le Blanc.

An enlarged edition of the *Hymnes* was published along with Coyssard's *Traicté du profit que toute personne tire de chanter ... les hymnes et chansons spirituelles en vulgaire* (Lyons, 1608; ed. in Pau), itself a revision of his (anonymously published) *Discours de l'utilité que toute personne tire de chanter en la doctrine chrestienne* (Tournon, 1596). The *Traicté* makes reference to the composer Anthoine de Bertrand, who also hailed from the Auvergne; a further, abridged edition of the *Hymnes* published in Lyons in 1608 includes a *Chanson contre la volupté mondaine* composed for 'M. Jan Pietro, joueur de lut, excellent'. In these and later editions Coyssard recommended the use of the music from the earlier Lyons and Antwerp publications or the use of familiar sacred or secular tunes, as he did for his *Odes et chansons spirituelles qu'on chante à saincte Ursule*, appended to another edition of the *Sommaire de la doctrine chrestienne* printed in Lyons in the last year of his life.

FRANK DOBBINS

Cozette, François. *See* COSSET, FRANÇOIS.

Cozio di Salabue, Count **Ignazio Alessandro** (*b* Casale Monferrato, 14 March 1755; *d* Salabue, 15 Dec 1840). Italian collector of violins. He was of noble birth and endowed with both a natural curiosity about violins and the means to satisfy it. His first great opportunity came in 1775–6 when he acquired ten Stradivari violins, together with tools, patterns and all that remained of Stradivari's violin-making equipment (now owned by the city of Cremona) from the master's son Paolo. For the next 50 years, with the assistance of the Mantegazza family, Cozio avidly traced and where possible purchased fine Italian violins of the Cremonese school, scrupulously noting down their details in his *Carteggio* (ed. R. Bacchetta, Milan, 1950; partial Eng. trans., 1987). He also gave much assistance and encouragement to many violin makers, including G.B. Guadagnini and Giacomo Rivolta.

Much of Cozio's collection was eventually acquired by another energetic enthusiast, LUIGI TARISIO. The instruments included the famous unused Stradivari of 1716 (later known as the 'Messiah'), sold to Tarisio in 1827 and donated by Hills to the Ashmolean Museum, Oxford.

CHARLES BEARE/CARLO CHIESA

Cozzella, Damiano (*b* São Paulo, 1930). Brazilian composer. At first self-taught in composition, he studied under Koellreutter after 1950 and in 1961 attended the Darmstadt summer courses. He belonged in the late 1950s and early 1960s to the group of São Paulo Música Nova, which called for total adherence to new aesthetics and techniques. From 1964 to 1970 he taught at the Escola Livre de Música, São Paulo, of which he had been a co-founder, and in 1971 he was appointed professor of music at the University of Brasilia. His output is very small. In works such as *Músicas I–IV* for various instrumental ensembles (1954–62) and the piano works *Catálogo* (1962) and *Discontinuo* (1963) he followed serial methods, but after about 1965 he turned to popular music as a composer and arranger.

GERARD BÉHAGUE

Cozzi, Carlo (*b* Parabiago, nr Milan; *d* Milan, *c*1658). Italian composer. He was at first a barber and seems to have come to music later in life. In 1649, according to the title-pages of his two publications, he was organist and choirmaster of S Simpliciano, Milan; he dedicated the first of them to Queen Maria Anna of Spain (the duchy of Milan was under Spanish rule). Both consist of mass and office music rather than motets and of the two motets in op.1, one is in fact by Michel'Angelo Grancini. Op.1 shows the conservative double-choir idiom still frequently adopted for such functional music; each choir has its own organ continuo. The other collection, a set of compline music, is for a more modest medium but has an optional fifth voice part. Most of the pieces are in triple time – a characteristic of mid-17th-century Italian music – but there is much rhythmic variety. Only the *Salve regina* antiphon is largely in 4/4, and it is also more motet-like in its declamatory vocal writing, good bass line and fairly predictable word-painting and chromaticism. (J. Roche: '*Musica diversa di Compietà*: Compline and its Music in 17th-Century Italy', *PRMA*, cix (1982–3), 60–79)

JEROME ROCHE/ELIZABETH ROCHE

Cozzolani, Chiara Margarita (*b* Milan, 27 Nov 1602; *d* Milan, 4 May 1676 – 20 April 1678). Italian singer and composer. In many ways, her life epitomizes the destiny of Milanese patrician women, most of whom became nuns in the early 17th century; some two-thirds of the 41 monasteries that housed them were renowned for music until the late 18th-century dissolutions. The youngest daughter of a wealthy merchant family, she entered the Benedictine monastery of S Radegonda. She professed final vows in 1620, taking 'Chiara' as her religious name. She is mentioned in documents from S Radegonda in connection with disputes over the regulation of music and

may have served as the *maestra di cappella* of one of the house's two choirs.

Cozzolani's first publication (1640) is lost, along with the continuo part to the 1648 solo motets. But enough music remains to mark her as one of the leading composers of mid-century Milan. The duets and solos in the 1642 *Concerti sacri* are among the first Milanese examples of the Lombard style pioneered by Gasparo Casati. These motets are characterized by highly affective texts, extended musical length by means of sequence, rapid declamation and irregularly spaced melismas, and by parallel 3rds. In contrast, the three- and four-voice pieces look back to earlier traditions; the Assumption Day dialogue *Psallite superes*, for instance, is a cantilena refrain motet.

The 1650 Vespers volume mixes two-choir antiphony (in the tuttis and frequent refrains) with concertato solo and duet writing for the verses. These Vespers are among the largest-scale (and least traditional) settings of mid-century Milan, although their liberal use of repetition and sequence tempers their appeal. The concertos in the 1650 book expand the characteristics of the 1642 collection in a more extended style; the duet *O quam bonus es*, for example, sets a double meditation (on the wounds of Christ and the milk of the Madonna) to balanced, well-crafted melodic periods in a multi-sectional form. A central genre in both prints is the dialogue; Cozzolani's 1650 dialogue on Mary Magdalene at the tomb stands apart among Milanese treatments by its apportioning of long phrases to the Magdalene's lament, its closing section unified by an ostinato cadential figure, and its language taken from the Song of Songs.

After 1650 Cozzolani's musical production seems to have slackened off, partly because of her duties at S Radegonda (she was abbess in 1658–9 and 1672–3, and prioress in the 1660s), and the crusade against music and 'irregularities' launched by Archbishop Alfonso Litta in the mid-1660s.

WORKS

Primavera di fiori musicali, 1–4vv, bc, op.1 (Milan, 1640), lost; cited in Picinelli, Armellini and *Zur Feier des Wohlthätenfestes im berlinischen Gymnasium zum grauen Kloster* (Berlin, 1856)

ROBERT L. KENDRICK

Crabbé, Armand (Charles) [Morin, Charles] (*b* Brussels, 23 April 1883; *d* Brussels, 24 July 1947). Belgian baritone. He used the name Charles Morin when appearing in small roles. He studied in Brussels and with Cottone in Milan and made his début at La Monnaie in 1904 as the Nightwatchman in *Die Meistersinger*. From 1906 to 1914 he sang at Covent Garden, where his roles included Valentin, Alfio, Silvio and Ford; he returned in 1937 as Gianni Schicchi. At La Scala he sang Rigoletto, Marcello, Beckmesser, Lescaut and the title role of Giordano's *Il re* (1929), which he created. He joined Hammerstein's Manhattan Opera in 1907 and appeared at Chicago (1910–14), and at the Teatro Colón, Buenos Aires, in the 1920s. One of his most successful roles was Mârouf, which Rabaud transposed for him from tenor to baritone. Crabbé continued to appear until the early 1940s, mainly in Antwerp. He published *Conseils sur l'art du chant* (Brussels, 1931) and *L'art d'Orphée* (Brussels, 1933). His recordings show his voice to have been typical of the French school in its forward tone and precise diction.

HAROLD ROSENTHAL/ALAN BLYTH

Crackle. A term used by Thomas Mace (*Musick's Monument*, London, 1676) for a short, staccato articulation of a chord in lute music that is achieved by quickly releasing the left-hand fingers which hold the notes of the chord (stops). Mace wrote

> To Crackle such 3 Part-Stops, (as abovesaid) is only to divide each stop, with your [right hand] Thumb, and 2 Fingers; so as not to loose Time; But give each Crotchet Its due Quantity; And to add Prittiness; Cause Them to Sobb, by Slacking your [left] Stopping Hand, so soon as They are Struck; yet not to unstop Them, but only so much as may Dead the Sound on a sudden. This gives Great Pleasure in such Cases.

Craen, Nicolaus [Claes, Nicolaes] (*b* ? Holland, *c*1440–50; *d* 's-Hertogenbosch, shortly after 29 March 1507). South Netherlandish composer. Only the last years of his life are documented: he served as *sangmeester* of the Confraternity of Our Lady in 's-Hertogenbosch from 8 June 1501 until his death in 1507. In 1504 the chapter of St Donatian, Bruges, tried without success to hire him as *maître de chapelle* in place of the departing Antonius Divitis, calling him 'worthy and highly praised'. Vander Straeten surmised that Craen might be the same person as Nicolò d'Olanda, a highly prized soprano singer in the chapel of Ercole I d'Este in Ferrara from soon after the duke's accession in 1471 until his chapel's disbandment in 1482. This cannot be proved, but it may be significant that the earliest sources of four of Craen's six works were printed by Petrucci in Venice – the Italian tradition of his music antedates its appearance in northern sources.

Although there are no sources before the beginning of the 1500s, the style of Craen's two three-part sacred pieces is congruent with that of other works dating from the 1470s. Their texture is generally full, the rhythm is animated, and there is much variety of phrase lengths. Imitation is common between two parts, much rarer among all three; there is frequent use of motivic repetition and sequence. Both works may have been textless in conception, as neither is provided with words beyond an incipit, but Smijers showed in his edition how the upward

scale (in imitation between discantus and tenor) at the opening of *Si ascendero* is followed by a striking downward scale (in imitation between discantus and contratenor) at the point where the words 'si descendero' would fall if the text of Psalm cxxxix, 8–9 is applied. *Ecce video* does not employ the melody of the antiphon that begins with the same words; but it is so closely related to the *secunda pars* of La Rue's *Sancta Maria virgo* that one must be a reworking of the other. Meylan and Meconi have argued that La Rue's is the prior work, but the evidence is inconclusive.

Ave Maria is probably of similar date to Craen's three-part works, as it shares the stylistic features mentioned above. It is constructed on a scaffolding melody in the altus, unrelated to any of the chants on the same words, which is imitated in the other parts only at the beginning and at the words 'fructum ventris tui'. The *Salve regina* seems somewhat later, as there is much more restraint in the use of repetition and sequence. The plainchant is paraphrased with increasing simplicity and prominence as the work progresses. *Tota pulcra es* is by far the most mature composition. The antiphon melody is paraphrased in an imitative structure involving all voices equally, and there is masterful control of pace and texture, with an impressive conclusion. Othmar Luscinius (*Musurgia seu praxis musicae*, 1536) praised Craen's 'outstanding qualities' and singled out *Tota pulcra es* as a forward-looking work.

Craen's only well-attested secular work, the Dutch song *Mins lefkins pruyn oghen*, survives only in a keyboard intabulation by Fridolin Sicher, so lightly arranged that the vocal original can easily be restored. In perfect tempus (triple metre) like the first two sections of the *Salve regina*, it shares with them a disregard for the regular succession of perfect breves, allowing imitations to begin and cadences to fall on any semibreve within the bar. The identical first, third and fourth phrases of the six-line monophonic song are stated clearly in the tenor or bass with anticipatory imitation in the other voices, whereas the other phrases are treated more freely.

WORKS

Ave Maria, 4vv, 1502[1] (anon.), ed. in SCMot, i (1991); kbd intabulation (attrib. Craen), *CH-SGs* 530 (ed. in SMd, viii, 1992)

JEFFREY DEAN

Crafft. *See* KRAFFT family.

Crafft, Georg Andreas von. *See* KRAFT, GEORG ANDREAS.

Craft, Robert (*b* Kingston, NY, 20 Oct 1923). American conductor and writer on music. He graduated from the Juilliard School (BA 1946), and conducted the Chamber Art Society in New York (1947–50). From 1950 to 1968 he was a conductor of the Evenings-on-the-Roof and the Monday Evening Concerts in Los Angeles and also appeared at the Ojai Festival. His main repertory interests were older music (e.g. Monteverdi, Schütz, Bach and Haydn) and contemporary music (e.g. the Second Viennese School, Stockhausen, Varèse and Boulez). His interest in the music of Gesualdo led to recordings (1959, 1962) that brought that composer to popular attention. He also directed the first recordings of the complete works of Webern (1957) and most of Schoenberg's music, for CBS (1963). He conducted the first performance of Varèse's *Nocturnal* and, with the Santa Fe Opera, the American premières of Berg's *Lulu* and Hindemith's *Cardillac*.

From 1948 Craft was closely allied with Igor Stravinsky, first as assistant, later in a closer, almost filial relationship. Over 23 years he shared more than 150 concerts with Stravinsky, collaborated on seven books, and conducted the world premières of a number of Stravinsky's later works, notably *In Memoriam Dylan Thomas* and *Requiem Canticles*. Besides his Stravinsky collaborations Craft has written extensively on music and literature, as both a critic and an essayist, mainly for the *New York Review of Books*. To his writing Craft has brought an individual style and a highly literate, if specialized, intelligence. His works include *Stravinsky: Chronicle of a Friendship* (1972), which includes sections, some reworked, from the collaborations, *Stravinsky in Pictures and Documents* (1978), and the collections of criticism *Prejudices in Disguise* (1974) and *Current Convictions* (1977). In 1976 Craft received an American Academy of Arts and Letters award for his criticism.

PATRICK J. SMITH/MAUREEN BUJA

Craig, Carl. American club DJ, record producer and electronic musician. His aliases include Paperclip People, Innerzone Orchestra, Psyche and BFC. While at school in Detroit, Craig listened to Derrick May's house music radio show and was inspired to train in both electronics and electronic music. Early experiments resulted in a collaboration for May's Transmat record label (*Neurotic Behaviour*, 1988). World-wide interest in the Detroit scene took Craig and May (as Rhythm is Rhythm) to Europe for live appearances and recordings in 1989. As a result Craig was involved in reworking Rhythm is Rhythm's *Strings of Life* and recorded early solo material (the *Crackdown* EP) for the influential Belgian label R&S. He founded the labels Retroactive (with Damon Booker) and Planet E Communications. Planet E releases incorporated jazz influences into Craig's work while working under the pseudonym Innerzone Orchestra. By the end of the 1990s he was touring Europe with an acid jazz/techno version of the Innerzone Orchestra. Success as a remixer (notably with a ten minute rework of Tori Amos's *God*) led to solo albums, including *Landcruising* (Blanco y Negro, 1995), a DJ mix session for the French label Studio K7 as *DJ Kicks, More Songs About Food & Revolutionary Art* (Planet, 1997) and *The Secret Tapes of Dr. Eich*, released under the more hardcore techno guise of Paperclip People.

IAN PEEL

Craig, Charles (James) (*b* London, 3 Dec 1919; *d* Banbury, 23 Jan 1997). English tenor. He first sang as part of an entertainment unit during war service. In 1947 he joined the chorus at Covent Garden and sang small roles with the company. Beecham, impressed with his voice, financed his further study (with Dino Borgioli) and engaged him as soloist for concerts in 1952. The following year Craig joined the Carl Rosa Opera Company, making his début as Rodolfo. He came to more general notice when he sang Des Grieux (*Manon Lescaut*) and a viscerally exciting Benvenuto Cellini with the company in 1957. He also sang with Sadler's Wells Opera (from 1956), appearing as Manrico, Samson, Luigi (*Il tabarro*), Cavaradossi and Andrea Chénier. In 1959 he appeared opposite Joan Hammond in *Rusalka* at Sadler's Wells. That was also the year of his Covent Garden début in a major role, Pinkerton to Jurinac's Butterfly. Turiddu followed in the famous Zeffirelli staging of *Cavalleria rusticana* and *Pagliacci* (later, Craig became an impassioned Canio). Other notable appearances were Arturo Talbot to Sutherland's Elvira (*I puritani*, 1964), Don Alvaro (in Sam Wanamaker's controversial staging of *La forza del destino*, 1962), Calaf, Radames, a wily Golitsïn in *Khovanshchina*, and Sergey in the British première of *Katerina Izmaylova*. In Paris in 1964 he sang Pollione to the Norma of Callas. For Scottish Opera he sang Siegmund, Florestan and his first Otello, the role he then sang all over Italy and Germany (and at Chicago in 1966) but not in London until 1981 with the ENO, and finally at Covent Garden in 1983. Probably the best English lyric-dramatic tenor of the postwar era, Craig sang all his roles with Italianate fervour and innately musical phrasing. Though his acting was never subtle it had rude sincerity and honest conviction. His moving Otello is preserved on a live recording under Elder (1983, in English); there are also recordings of extracts from *Un ballo in maschera*, from Scottish Opera, and *Madama Butterfly* in English with Marie Collier, a frequent stage partner.

ALAN BLYTH

Craig, Edward (Henry) Gordon (*b* Stevenage, 16 Jan 1872; *d* Vence, France, 29 July 1966). English stage designer. He was the son of the architect and designer E.W. Godwin and the actress Ellen Terry, and is best known for his revolutionary theories and scene projects which influenced virtually all 20th-century theatrical art. Like Adolphe Appia, he was among the first to design neutral, non-specific settings – screens 'painted' with light to meet the symbolic, poetic requirements of each moment – and in his 'Über-Marionette' theory he was the originator of the concept of the actor as a controlled instrument without egoism, the ideal tool of a higher directorial purpose.

Craig's earliest and arguably most artistically successful realized productions were those he directed from 1900 to 1903 for the Purcell Operatic Society, including Purcell's *Dido and Aeneas* and *The Masque of Love* (an adaptation of *Dioclesian*), and Handel's *Acis and Galatea*. These productions, which marked the beginning of the contemporary revival of English opera, aroused great interest. For *Dido and Aeneas* he created a proscenium of unusual proportions and, by abandoning wings and borders and using only a vast sky-cloth which disappeared out of view of the audience, gave the illusion for the first time of vast scale and space appropriate to the staging of lyric drama. In *Acis and Galatea* the giant was effectively suggested by a shadow projected by an offstage actor, moving in front of a naked electric light. Colour schemes and textures in the costumes and also uses of coloured light heralded reforms to be seen in opera in the next quarter-century. In all these productions, both soloists and chorus eschewed 19th-century conventions and were produced to act and move in a style consonant with the mood of the piece. Craig published his theories in *The Art of the Theatre* (Edinburgh, 1905) and further explained them in *On the Art of the Theatre* (London, 1911/*R*), *Towards a New Theatre* (London, 1913/*R*), *Scene* (London, 1923/*R*) and in the periodical *The Mask* (1908–29).

One of Craig's most remarkable projects, inspired by the influence of Martin Shaw, was Bach's *St Matthew Passion*, an idea that consumed his interest for over 14 years. He even constructed a model of the playing area, unsuited to any conventional theatre, with towering flights of steps, platforms and chambers on which the epic

could be enacted with stylized movement and changes of light.

PAUL SHEREN

Craighead, David (*b* Strasburg, PA, 24 Jan 1924). American organist. He studied with Clarence Mader in Los Angeles (1940–42) and with Alexander McCurdy at the Curtis Institute of Music in Philadelphia (1942–6). A brilliant and technically secure recitalist, he began touring in 1944 and played at several conventions of the American Guild of Organists as well as the International Congress of Organists. He has held important church and teaching posts: as organist at Pasadena Presbyterian Church (1946–55) and St Paul's Episcopal Church in Rochester, NY (from 1955); as faculty member at Westminster Choir College, Princeton (1945–6), Occidental College, Los Angeles (1948–55) and at Eastman School of Music in Rochester (1955–92), where he was professor of organ and co-chair of the keyboard department. A champion of 20th-century American organ music, he gave the first performance of Samuel Adler's Organ Concerto (1971) and Persichetti's *Parable VI* (1972); his recordings include William Albright's *Organbook I* and *III* and *The King of Instruments*, Lou Harrison's Concerto for Organ and Percussion and Persichetti's Organ Sonata. For 47 years he was married to the accomplished organist, Marian Reiff (*b* New Cumberland, PA, 1919; *d* Rochester, NY, 8 May 1996).

VERNON GOTWALS/CHARLES KRIGBAUM

Cramer. German family of musicians, active in England.

(1) **Wilhelm Cramer** (*b* Mannheim, bap. 2 June 1746; *d* London, 5 Oct 1799). Violinist of Silesian descent. The son of a Mannheim violinist, Jakob Cramer (1705–70), he was a precocious violin pupil. He studied with Johann Stamitz, Domenicus Basconi and Christian Cannabich, and in about 1752 joined the Mannheim orchestra, where he became known as one of the finest violinists of his day. He left Mannheim to work for the Duke of Württemberg in Stuttgart, and he soon obtained permission to travel to Paris and London. He appeared at the Concert Spirituel in Paris in 1769 and by 1772 he had arrived in London, where his success, and the encouragement of J.C. Bach, led him to decide to remain permanently in England.

For the next two decades Cramer was considered London's foremost violinist, lauded equally for the 'fire, tone, and certainty' of his solo playing (Burney) and for his authority as an orchestral leader. A particular speciality was his technique of off-the-string bowing, still unusual at the time: perhaps it was for this reason that his name became associated with one type of transitional violin bow. Certainly he brought the precision and firmness of Mannheim symphonic practice to London, as leader of the Bach–Abel concerts from 1773 and of succeeding series at the Hanover Square Rooms, including the Professional Concert (1785–93), of which he was one of the principal organizers. He led at the Italian Opera almost every season from 1777 to 1796, and became equally associated with the Handelian tradition, as leader at the Concert of Ancient Music and at numerous festivals in London and elsewhere (including the prestigious Handel Commemoration in 1784). The connection with Bach and Abel led to invitations to play chamber music at court, and around 1784 he was appointed leader of the Queen's Band (though not of the more ceremonial King's Band, as sometimes stated). Throughout this period he remained active as a concerto soloist, and he was also celebrated as a chamber music player; indeed he was London's first major quartet leader, appearing regularly with the same players at the Professional Concert.

Only in the 1790s did Cramer's star begin to wane, following the success of Salomon's concerts with Haydn and of Viotti's grander style of violin playing. The appointment of Viotti as leader of the Italian Opera in 1796 initiated a slide into financial insecurity: an attempt to revive the Professional Concert in 1799 met with a lukewarm response, and Cramer died later that year. He composed eight violin concertos and a number of chamber works for string instruments, but was little noted as a composer.

(2) **Johann** [John] **Baptist Cramer** (*b* Mannheim, 24 Feb 1771; *d* London, 16 April 1858). Composer, pianist and publisher, the eldest son of (1) Wilhelm Cramer. He was the most outstanding member of the family. As one of the most renowned piano performers of his day, he contributed directly to the formulation of an idiomatic piano style through his playing and his compositions. When he was about three years old he was taken to London by his mother to join his father, who had decided to establish himself in England. Wilhelm taught his son the violin from a very early age, but the child showed distinct precocity at the piano and at the age of seven was placed under the direction of J.D. Benser. He continued his studies with J.S. Schroeter from 1780 to 1783, when he was entrusted to Muzio Clementi. Although he studied with Clementi for only one year, the lessons were decisive in forming his artistic character. His formal training was completed with lessons in theory (from 1785) under C.F. Abel, through whom Cramer first came to know the writings of Kirnberger and Marpurg. His early training acquainted him with the works of the greatest keyboard composers of the century, and by the mid-1780s he had studied works of Clementi, Schröter, J.C. Bach, C.P.E. Bach, Domenico Scarlatti, Müthel, Paradies, Haydn and Mozart. He may have been introduced to *Das wohltemperirte Clavier* as early as 1787, and he developed a lifelong fascination for Bach. By the time Clementi left England for the Continent and Cramer's formal piano lessons were abruptly ended, he had already attracted attention as a performer in London. He made his formal début on 6 April 1781, appearing in his father's annual benefit concert. He performed occasionally during the next few years, at one concert (in 1784) playing a duet for two pianos with Clementi.

In 1788 Cramer undertook his first foreign tour and visited the major cities of France and Germany, including

Paris and Berlin. While in France he was given a number of J.S. Bach's manuscripts. His earliest compositions were also published during his stay in France. On his return to England in 1791 he immediately began an active performing career, and during the next nine seasons established himself as England's most remarkable young pianist, capable of providing stiff competition for the older virtuosos. He participated as a soloist in both major series, the Professional Concert and the Salomon Concerts, as well as appearing in numerous benefit concerts. He made the acquaintance of all the eminent artists who appeared in London during that decade, including Haydn, and he began to gain recognition as a composer and teacher.

Cramer left London in 1799 for a second journey that included the Netherlands, Germany and Austria. He met Beethoven in Vienna, initiating a warm and mutually rewarding relationship, and he renewed his friendly association with Haydn. On his return to England in 1800 he married almost immediately. The activities of his first 30 years had brought him into contact with nearly all the most prominent musicians of Europe, including Hummel, Dussek, Weber, Kalkbrenner, Cherubini and Wölfl, in addition to those already mentioned. In later years he came to know Ries, Czerny, Moscheles, Mendelssohn, Liszt and Berlioz. He championed with characteristic vigour the works of composers whom he admired; his performances of Bach and Mozart, in particular, created great excitement, and he helped to introduce Beethoven's sonatas to English audiences. His impact as a popularizer of music by other composers seems to have been felt as much by his playing at private gatherings as by his concert appearances, for he preferred private music-making, even when travelling abroad.

After 1800 Cramer's public career was centred almost entirely on England. He taught privately at least into the 1820s, commanding the top fee of one guinea per lesson. But he travelled again from 1816 to 1818, visiting Amsterdam and Mannheim. While abroad he continued to renew and expand his associations, but his public performances were apparently rare. His mature years in London were marked by many signs of high regard. To admiring English audiences he was their 'Glorious John', and his appearances continued to stir excitement until his formal retirement. He was one of the founders of the Philharmonic Society in 1813, and he was appointed to the board of the RAM on its foundation in 1822.

Following the very successful example of Clementi, Cramer entered the music publishing business. His earliest ventures included a partnership known as Cramer & Keys in 1805, and another partnership with Samuel Chappell (later of CHAPPELL) from 1810 to 1819. A more lasting firm was established in 1824 (when Cramer joined Robert Addison and T.F. Beale), at a later date known as J.B. CRAMER & co. ltd, which flourished from its first days and still exists.

Cramer married for the second time in 1829, and he retired officially from public life after a gala farewell concert in 1835. His next decade included visits to Munich and Vienna and a long residence in Paris (seeillustration), but he returned again to England in 1845 and remained there for the rest of his life. He died at his house in Kensington and was buried in the Brompton Cemetery.

The large volume of Cramer's compositions is only part of his musical achievement. His playing left a permanent impression on several generations of early 19th-century pianists. He received almost universal admiration for his playing; even Beethoven considered him the finest pianist of the day, according to Ries. His expressive legato touch, which later became a stylistic norm among pianists, was especially admired: in Moscheles's words, his legato 'almost transforms a Mozart Andante into a vocal piece'. His refinement in improvisation and the remarkable independence of his fingers were equally renowned; they are also evidence of his Classical ideals and distinguish him from more dramatically inclined later generations. By the end of his long career his playing may have become somewhat outmoded. Certainly Wilhelm von Lenz found his playing in the 1840s dry and harsh, though at the same time August Gathy contradicted Lenz's judgment. Cramer himself noted the changing fashions when he described earlier playing as 'fort bien' ('very good') and the newer style as 'bien fort' ('very strong').

Johann Baptist Cramer: portrait by Firmin Salabert, pastel, 1844 (Royal College of Music, London)

Many aspects of Cramer's compositional style are strikingly conservative. He apparently liked to view himself as a latter-day Mozartian, preserving Mozart's grace, elegance and clarity. His music is generally less dramatic than Clementi's, less rich than Dussek's, less sentimental than Field's. The originality of his genius appears principally in his combination of a conservative bias with the most advanced, idiomatically pianistic passage-work. Although there is an inconsistency in the quality of his works that was observed even by critics of his day, his music is nearly always skilful, pleasant and sophisticated, and his ingenuity in passage-work expanded the vocabulary of colourful and evocative sonorities available to the piano.

Cramer's affinity for certain Classical ideas did not prevent him from assimilating the newer musical forms that became popular in the early 19th century, and his own work accurately reflects the changing tastes of the period. Nearly all his 117 sonatas, for example, were written before 1820, and his production of didactic works, capriccios, fantasias and small pieces based on popular tunes increased markedly after 1810. He supplied so much music for the dilettante that by the end of the century his name was used in France as a pseudonym for musical trifles.

Of all Cramer's works, the one that has had the greatest enduring value is his celebrated set of 84 studies for the piano, published in two sets of 42 each in 1804 and 1810 as *Studio per il pianoforte*. This collection has long been considered a cornerstone of pianistic technique and is the only work of Cramer's that is generally known today. Clementi claimed for himself the idea of such a comprehensive technical volume, accusing Cramer of having stolen the idea and title for the *Studio*. Cramer's work inspired many similar efforts, some being mere imitations. Soon after its appearance, Steibelt and Wölfl produced sets of studies, and Clementi eventually published his *Gradus ad Parnassum*. Nevertheless, Cramer's *Studio* was the most widely used and admired collection in the early 19th century. Beethoven annotated 21 of the studies for his nephew's use (published in an edition by J.S. Shedlock in 1893) and considered them 'the best preparation for his own works'. Schumann described the *Studio* as the finest training 'for head and hand'. The studies are structurally simple; each is based on a characteristic pattern or mechanical problem, and although the shadows of Bach and Domenico Scarlatti are often apparent, the harmonic colouring and figurational variety in the *Studio* are eminently modern and entirely suited to the piano. The success of the studies led Cramer to produce many more methods, including the *Anweisung das Pianoforte zu spielen*, which includes rules for fingering and the use of the pedals. Some of the later studies were given individual descriptive titles, in keeping with the fashion, but none of them matched the *Studio* in usefulness and artistic merit.

The scope and seriousness of Cramer's compositions often varies widely within a single category; even among the sonatas and concertos the range is considerable. The best of the shorter pieces anticipate the general features of the character piece in form and expressiveness, while many works were plainly directed to the unsophisticated amateur. The sonatas, in spite of their diminishing numbers in Cramer's later years, contain some of his most impressive achievements. There is some evidence that Beethoven occasionally borrowed from Cramer's sonatas, and Schumann considered Cramer and Moscheles the only outstanding sonata composers of their generation.

The accompanied sonatas, which comprise less than half the total number, are generally lighter and more popular in character than the solo sonatas. After 1800 Cramer showed a clear preference for solo works, although some of the later solo sonatas still have some popular features, such as the inclusion of 'favourite airs'. The sonatas written after 1810 are more consistently serious and contain more prominent Romantic characteristics. Several have descriptive titles (*Il mezzo*, *Le retour à Londres*) and a highly flexible, dramatic approach to the use of compass and texture. In harmonic daring they show the impact of Beethoven, and they abound in sweeping, colouristic accompanimental patterns. Cramer's late sonatas were occasionally reprinted in the 19th century, but they have passed into obscurity in more recent times.

WORKS

dates are those of publication; first published in London unless otherwise stated; for clarification of conflicting opus numbers, esp. opp.17–49, see Milligan (1994)

(3) **Franz** [François] **Cramer** (*b* Schwetzingen, nr Mannheim, 12 June 1772; *d* London, 1 Aug 1848). Violinist, son of (1) Wilhelm Cramer and brother of (2) Johann Baptist Cramer. His family moved to London when he was about two years old, but left Franz with his grandfather until about 1777. He was taught the violin primarily by his father, and after 1790 he frequently appeared in concerts with his father, his brother, or both. He enjoyed singular success as an orchestral musician, becoming the leading violinist of the Ancient Concerts and the Philharmonic Concerts, as well as leading the orchestra at many provincial festivals. He served as Master of the King's Music, and was leader of the band at the coronation of William IV. He was not noted as a composer, though he may have composed some vocal music. Only one of his works is known, an *Album Leaf* for violin.

SIMON McVEIGH (1), JERALD C. GRAUE/THOMAS B. MILLIGAN (2–3)

Cramer, Anna (Merkje) (*b* Amsterdam, 15 July 1873; *d* Blaricum, 4 June 1968). Dutch composer. She studied piano at the Amsterdam Conservatory, graduating in 1897. While a student she was already composing songs, and at the end of 1897 she went to Berlin, where she studied composition with Wilhelm Berger. In 1903 her song *Wenn die Linde blüht* was published by the magazine *Die Woche*, and in 1906 Ludwig Wüllner included some of her lieder in his recital in the Concertgebouw in Amsterdam. The following year two collections of songs, the humorous *Fünf Gedichte von Klaus Groth* and the *Fünf Gedichte von O.J. Bierbaum*, were published by Fürstner of Berlin. She then studied in Munich (1907–8), where her *14 Volkstümliche Lieder* were published. In 1909 she toured the Netherlands, accompanying the baritone Gerard Zalsman and the soprano Jeanne Broek-Landré in 22 of her own lieder. She also gave concerts in Paris and Berlin. In 1917 she was living again in Munich, and in 1925 she moved to Vienna, where she worked closely with Walter Simlinger, a singer and composer. He wrote the librettos for her two operas *Der letzte Tanz* and *Dr. Pipalumbo*. In 1930, after encountering financial problems, she returned to the Netherlands, where she lived as a recluse. By 1958 she had been forcibly moved to a psychiatric nursing home in Blaricum, where she died, totally forgotten.

Cramer's lieder are mostly either diatonic or chromatic. The diatonic kind is represented by the *14 Volkstümliche Lieder*, which have a folk-like, lyrical quality and are often strophic. The chromatic lieder, which are through-composed, are lacking in obvious melodic appeal but are dramatically expressive, harmonically complex and full of dissonances, and have almost orchestrally conceived piano accompaniments. A number of lieder express poignant grief in love. Her longest and most dramatic, *Erwachen in den grellen Tag* (on a text by Bierbaum), expresses extreme anger. Some songs, apparently dating from her Viennese period, are cabaret-like. Cramer's music was rediscovered after her death by Willem Noske, and Dutch interest in her music has grown, with both critics and public highly enthusiastic.

WORKS
(*selective list*)

Op: Der letzte Tanz (1, W. Simlinger, after M. Giese-Itzenplitz: *Ihr letzter Tanz*), c1926–7; Dr. Pipalumbo (comic op, 3, Simlinger)
Other: 5 Gedichte (K. Groth), op.1, 1v, pf, 1907; 5 Gedichte (O.J. Bierbaum), op.2, 1v, pf, 1907; 14 Volkstümliche Lieder (J. Roger and others), op.3, 1v, pf, 1908; 6 Lieder (O.J. Bierbaum, K. Stieler, L.H.C. Hölty, C. Busse), op.4, 1v, pf, 1910; Episode (M. Rosenfeld), T, pf; 7 Gedichte aus 'Die Ewige Hochzeit' (M. Dauthendey) T, pf; 10 Gedichte (D. von Liliencron), Bar, pf; 2 notturno's (Simlinger), Bar, pf; Serenata, Bar, pf; Serenata, T, orch [from Der letzte Tanz]; Trinklied, orch [from Der letzte Tanz]; Troubadour-ständchen (Simlinger), Bar, pf; Zigeunerlied (B. Zaleski) T, SATB, vn, orch

HELEN METZELAAR

Cramer, Carl Friedrich (*b* Quedlinburg, 7 March 1752; *d* Paris, 8 Dec 1807). German linguist, publisher, writer on music and composer. He was the eldest son of Johann

Andreas Cramer, a noted professor of theology and later chancellor at Kiel University, and in 1775 became professor of Greek and oriental languages at the same university. His sympathies with French Republican forces led to his removal from this office in 1794. He stayed briefly in Hamburg, then in late 1795 emigrated to Paris and became a printer and bookseller there by 1797.

From the 1770s Cramer was in close contact with various musicians of the North German school, especially C.P.E. Bach. Beginning in 1782 he edited a series of vocal scores, first advertised (at Leipzig and Dessau) under the collective title *Polyhymnia*; these include Salieri's *Armida* (1783), J.G. Naumann's *Orpheus og Euridike* (1787), J.A.P. Schulz's *Aline, reine de Golconde* (1790) and F.L.A. Kunzen's *Holger Danske* (n.d.). Cramer also edited and published *Flora* (Kiel, 1787), a collection of songs and keyboard pieces by C.P.E. Bach, Gluck, Gräven, A.C. and F.L.A. Kunzen, Reichardt and Schwanenberger. Perhaps his greatest importance to music lies in his periodical *Magazin der Musik* (Hamburg, 1783–6/*R*, continued as *Musik*, Copenhagen, 1789); in addition to lists of new publications by genre, criticism of concerts and essays on music theory, it provided descriptions of concert programmes and performers at various European cities as well as the personnel in several contemporary orchestras (Bonn, Kassel, Dresden). 41 of his German translations of psalms were set by C.P.E. Bach in 1774, and in 1801 his translation into French of Rochlitz's 'Verbürgte Anekdoten aus Wolfgang Gottlieb Mozart Leben' (*AMZ*, i, 1798–9) appeared in Paris. He especially admired the music of Bach, Mozart and Haydn, and the writings of Klopstock. His original works include a *Kurze Übersicht der Geschichte der französischen Musik* (Berlin, 1786) and various keyboard pieces and songs mostly written for the *Magazin der Musik*.

SHELLEY DAVIS

Cramer, David (*b* ?1590–95; *d* probably at Hamburg, before 1666). German violinist and composer. Rist, writing in 1666, referred to him as dead and mentioned that he had been an assistant to William Brade at Hamburg, which might mean that he had also been Brade's pupil; since Brade was in the service of the city of Hamburg from 1608 to 1610 and from 1613 to 1615, Cramer was associated with him presumably during those years. Nothing is known of his later activities, though as a skilful violinist and able composer he seems to have belonged to the Hamburg school of violinists and composers founded by Brade and continued by such men as Nicolaus Bruhns, Johann Schop (i) and Nathanael Schnittelbach. He published a volume of four-part pieces for strings, *Allerhand musicalische Stücke von Pavanen, Couranten, Intraden, Balletten ... auff 3 Discant Violinen und ein Violdgamba* (Hamburg, 1631), the last surviving copy of which was lost in World War II (*D-Hs*). Apart from suites, it included a number of pieces with such titles as *Melancholia*, *Patientia*, *Inconstantia*, *Avaritia*, *Gaudium* and *Tristitia*, which suggest that they were used for allegorical ballets. Rist stated he published 'fine pieces ... to accompany comedies and tragedies'. It is not possible to confirm whether this was indeed so, especially since, according to the dedication, the 1631 collection was intended 'to exercise the beginner', but from its title, *Herodis Auszug* ('Herod's March'), another piece in it, could have been written for a tragedy. It and *Avaritia* (both ed. in Eitner) are lively pieces, with varying rhythms and changes of time. Moser mentioned an *Intrada morionis* that included diminutions on the melody of the song *Von den zarten Jungfräwlein*. In this piece Cramer used double stopping in 3rds, and in no.21, *Speculator*, he had double and triple stopping in all the violins simultaneously.

GEORG KARSTÄDT

Cramer, J.B. English firm of music publishers and, formerly, piano manufacturers active in London. The firm was founded as Cramer, Addison & Beale in 1824 when the pianist and composer J.B. Cramer (*see* CRAMER, §2) joined the partnership of Robert Addison (*d* London, 17 Jan 1868) and Thomas Frederick Beale (*b* ?1804 or 1805; *d* Chislehurst, 26 June 1863). With the addition of Cramer's name the publication of piano music became the firm's chief interest, and in 1830 it bought many of the plates of the Royal Harmonic Institution, which gave it works by Beethoven, Clementi, Dussek, Haydn, Hummel, Mozart, Steibelt and others. Italian songs and duets and English operas by composers such as Balfe and Benedict were soon added to the catalogue.

In 1844 Addison retired and was succeeded by William Chappell (*see* CHAPPELL), and the firm then became known as Cramer, Beale & Chappell, or Cramer, Beale & Co. In 1847 Beale also became the manager and director of the Royal Italian Opera at the rebuilt Covent Garden Theatre. After the death of Cramer in 1858 and Chappell's retirement in 1861 George Wood (*b* ?1812 or 1813; *d* Hove, 22 Feb 1893), who was related to the Scottish music publishers, became Beale's partner; the firm then traded as Cramer, Beale & Wood, and also began the manufacture of pianos. After Beale's death Wood continued the business as Cramer & Co. (later

Cramer, Wood & Co., and J.B. Cramer & Co.), and the piano-making side of the firm became predominant. A major sale of engraved plates and copyrights took place in 1875. His nephews, John Wood and George Muir Wood, succeeded to the business on his death. The firm was turned into a limited company in 1897. Many successful ballads appeared under the firm's imprint at the end of the century, and a series of ballad concerts was run by L.J. Saville from 1912 until World War II. The publishing firm of METZLER was acquired in 1931. In the 20th century publishing became the firm's main activity once again with an emphasis on choral, piano and organ music; the piano business passed to Kemble & Co. in 1964.

CHARLES H. PURDAY/WILLIAM C. SMITH/PETER WARD JONES

Crane, William (*d* 7 July 1545). English musician, actor and businessman. By 1506 he was a Gentleman of the Chapel Royal and was listed among the Fraternity of St Nicholas, London. In 1523 he succeeded William Cornysh (ii) as Master of the Children of the Chapel, a post he held for 22 years. There is no evidence that he composed. While he was a member of the chapel he was much concerned with theatrical presentations. During the early years of Henry VIII's reign he was one of the chief actors in many pageants and disguisings, including *The Golldyn Arber* (1511), *Le fortresse dangerus* (1512) and the *Pavyllon un the plas parlos* (1514). Later, after his appointment as Master of the Children, Crane and his charges were regularly rewarded for playing before the king each Christmas season. Whether Crane, like Cornysh, composed any of the material performed by the children is not known.

Crane was also an active businessman, holding such posts as controller of the petty customs of the port of London from 1514; he also supervised the fitting-out of three ships for Henry VIII's campaign to France in 1513. In 1525 he was made a freeman of the Mercers' Company. He had a house in Greenwich and leased other property in London, Kent and Essex.

His will (*GB-Lpro* PROB11/31, f.7) is dated 6 July 1545 and was proved on 6 April 1546. He was buried in the chancel of St Helen Bishopsgate.

JOHN M. WARD/ANDREW ASHBEE

Cranesteyn, Gasparo. *See* PIETRAGRUA FAMILY, (1).

Cranford, Thomas. English church musician, possibly related to WILLIAM CRANFORD.

Cranford [Cranforth], **William** (*b* late 16th century; *d* ?*c*1645). English composer and singer. The naming of his psalm tune 'Ely' in Ravenscroft's 1621 psalter, and Dudley North's remark from Kirtling, Cambridgeshire (1658), concerning 'Mr. Cranford, whom I knew, a sober, plain-looking Man', may indicate that Cranford came from East Anglia (where the name is well known), but his family has not been traced. Cranford's six-voice elegy *Weep, Brittaynes, weep* (*GB-Och* 56–60) was occasioned by the death of Prince Henry in 1612; its context suggests he was already in London and part of a musical circle involving the St Paul's Cathedral clergy and others living nearby. Significantly the other contributors to Ravenscroft's 1621 psalter belonged to this group. Probably Cranford was already vicar-choral at St Paul's Cathedral, a post he is known to have held by 1624 and in which he served until the Civil War. He may be the 'William Cranford' in a list of deliquents (royalist supporters) in 1643, but he is not named among 'the four vicars choral' in July 1645.

Monson argues that the manuscript *Och* 56–60, perhaps associated with the Fanshawe family, was completed by 1625. Apart from *Weep, Brittaynes, weep*, it contains Cranford's sacred madrigal *Woods, rocks and mountains* and his verse anthem *My sinful soul. O Lord, make thy servant Charles*, also known as *The king shall rejoice*, was apparently his most popular work of this kind: it is in a simple, semi-polyphonic style, rather in the manner of Adrian Batten. Most of Cranford's church music survives in imperfect or fragmentary form, especially in sources linked with St Paul's, such as the 'Barnard' set (*Lcm* 1045–51) and the 'Batten' organ book (*Ob* Tenbury 791). His three-voice catches had an extended life through Hilton's and Playford's publications. According to Hawkins, Purcell put the words to Cranford's music for *Let's live good honest lives* (zD102). An association with the composer Simon Ives (i), who also belonged to the London musical circle, is evident in two three-voice catches – *Boy go down* and *Boy come back* – the one by Ives and the other by Cranford.

All but four of Cranford's 20 surviving instrumental consorts occur in the manuscript *IRL-Dm* Z3.4.7–12, a source now believed to have originated in London in the 1630s, and he is also well represented in a manuscript formerly owned by Sir Nicholas Le Strange of Hunstanton, Norfolk (*GB-Lbl* Add.39550–4). Three pieces for two lyra viols (*Ob* Mus. Sch. D.245–6) were copied by John Merro of Gloucester (*d* 1639). Cranford's consorts belong to the Caroline era and commentators have remarked on his individual style. Gordon Dodd notes 'the fewer the parts, the more pointilliste . . . The harmony is distinctly strange and the texture is often mechanical'. Dudley North draws attention to Cranford's 'pieces mixed with Majesty, Gravity, Honey-dew Spirit and Variety': striking contrasts are an important element within pieces. Though somewhat idiosyncratic, Cranford is revealed as a competent if relatively minor composer; it is unfortunate that much of his church music survives only in a fragmented state.

It is not known whether the composer was related to Thomas Cranford, vicar-choral at St Paul's, or to the eccentric Presbyterian divine James Cranford (1592–1657).

ANDREW ASHBEE

Crang & Hancock. London firm of instrument makers. It was formed of a partnership between John Crang and James Hancock (*d* nr Maidstone, 1792). Crang came from North Devon and is traditionally said to have been apprenticed to the Loosemore family. Crang's earliest noted work is a claviorgan dated 1745. His address in 1763 was Great Queen Street, Lincoln's Inn Fields, London. He is said to have been largely concerned with converting old Echo organs into Swells. He undertook repair work or alterations at St Peter upon Cornhill (1751) and St Paul's Cathedral (1757). He provided organs for Stoneleigh Abbey (1761), St Peter and St Paul, Barnstaple (1764), and Fonthill Tremens, Wiltshire (*c*1765). The splendid case of the latter went to Towcester Church in 1817, was damaged by fire in recent years, and has been restored by the Victoria and Albert Museum, London. The partnership with Hancock was established about 1772: Crang is noted as working *solus* at Holy Trinity Minories, London, in that year; and in the same year the partnership is noted at St Peter upon Cornhill. The partnership of Crang & Hancock lasted until the early 1780s when Crang retired. Their most important new organ was that supplied to St Vedast-alias-Foster, Foster Lane, London (1774). A piano, labelled and dated 1782, is in the Colt Clavier Collection, Bethersden, Kent. There is confusion about how many Hancocks were organ builders. James Hancock was working in Chelmsford in 1772 with a John Hancock, possibly his brother; one of these was reputedly a good reed voicer. James Hancock is listed on his own in the trade directories from 1783, at Wych Street, Temple Bar, London; in 1790 he was working at the collegiate church, Maidstone. He was married to Crang's sister; their son James Crang Hancock is first noticed in 1783 with a labelled organ now in Brighton Pavilion. His address in the early 1790s was 32 Parliament Street, London. By about 1800 he had moved to Bristol, working at Berkely Place. There is little evidence of his work, but he enlarged the organ at St Sepulchre, Holborn, London, in 1817. He is almost certainly the James Hancock who is known to have been working until about 1820.

DAVID C. WICKENS

Cranko, John (*b* Rustenburg, South Africa, 15 Aug 1927; *d* Dublin, 26 June 1973). British choreographer. *See* BALLET, §3(iv).

Cranz, August. German firm of music publishers. It was founded by August Heinrich Cranz (*b* Berlin, 1789; *d* Hamburg, 1870) in 1814 in Hamburg. His son Alwin Cranz (*b* Hamburg, 1834; *d* Vevey, 10 April 1923) took over the music publishing house in 1857 and acquired the Viennese publishing firm C.A. Spina in 1876. August Cranz was the original publisher of many works by Josef, Eduard and Johann Strauss (father and son), including *Die Fledermaus*, *Der Zigeunerbaron* and *Eine Nacht in Venedig*. Viennese operettas and light music (e.g. Lanner, Suppé, Millöcker) played a large part in the publishing programme. Oskar Cranz, a partner from 1896, moved the firm to Leipzig in 1897. The August Cranz publishing house lost most of its stock in 1943; the rebuilding of the firm was carried out at first in Munich and from 1949 in Wiesbaden. In 1965 the firm began producing tapes and records. The firm August Cranz of Wiesbaden had branches in Brussels, London, Paris and Vienna and was represented by agents in several countries. It was acquired by Schott in 1992.

HANS-MARTIN PLESSKE

Crappius, Andreas (*b* Lüneburg, *c*1542; *d* Hanover, 8 Jan 1623). German composer and theorist. He matriculated at the University of Wittenberg on 12 July 1565, but he took no degree. On 28 March 1568 he was appointed Kantor of the Lateinschule and of the Marktkirche, the two most important musical positions in Hanover, and he held them until he retired in 1616. His output reflects his activities in these posts. His three masses, which are parody masses, and his motets (1572 and 1581) show that he was a competent composer of polyphony, and his three-part songs (1594) are more contrapuntal than such pieces often were. His primer of 1599, dedicated to 54 of his pupils, including the infant Melchior Schildt, contains 14 canons as exercises.

KLAUS WOLFGANG NIEMÖLLER

Craquer (Fr.: 'to snap'). In string playing, a type of bowing where two (or more) notes are played in one bowstroke but with each note distinctly articulated. *Craquer*, which

is usually performed up-bow and in fast time, is indicated by dots under a slur, the length of the slur showing the number of notes in one bowstroke (ex.1). The term is first

found in Georg Muffat's codification of the bowing rules of Lully's orchestra (*Florilegium secundum*, Passau, 1698).

See also Bow, §II, 2(ii).

DAVID D. BOYDEN/PETER WALLS

Cras, Jean (Emile Paul) (*b* Brest, 22 May, 1879; *d* Brest, 14 Sept 1932). French composer. The son of a distinguished naval surgeon, his gifts were nurtured in a musical home, but, following in the family tradition he enlisted at the naval academy in 1896. After settling in Paris in 1900, he met Duparc, who immediately recognized his gifts. Through three months of almost daily instruction during 1900, Duparc provided the only formal training in composition Cras received, an experience crucial to his development and to their life-long friendship; Duparc would later call Cras his 'spiritual son'.

Cras had four children. His second daughter Colette, an excellent pianist, married Alexandre Tansman; she later premièred Cras's Piano Concerto (1931). Unlike his friend Roussel, Cras sustained a brilliant naval career all his life, rising to rear-admiral and receiving numerous decorations for heroism during World War I.

His works remained relatively unknown until his opera *Polyphème* won the First Prize in the 'Concours musical de la Ville de Paris' in 1921, and was produced at the Opéra-Comique in December 1922. From this time, his works were performed by leading interpreters and he was befriended by many of the most prominent musical, literary and political figures of the time. His death inspired hundreds of poignant eulogies and the commission of a monument overlooking the harbour at Brest.

Although naval obligations necessitated his absence from Paris for much of his life, Cras remained fully aware of artistic developments, but maintained a passionately creative independence. Schooled in the Beethovenian structural principles instilled in him by Duparc, he championed cyclic form and motivic development. From an initially Franckian idiom, Cras evolved an eclectic Impressionism, combining Celtic folk and sacred elements with exoticisms inspired by his travels. Cras composed 77 songs, giving primacy to the text and adapting his style to a generally restrained narrative tessitura. He first embraced symbolist poetry and, after setting Samain's *Polyphème*, his vocal compositions were the products of fruitful collaborations with living post-Parnassian poets whom he knew well. Cras's legacy of chamber music is one of the century's finest and demonstrates an acutely sophisticated understanding of instrumentation and nuance.

A prodigious intellect steeped in the religious writings of Léon Bloy, Cras expressed his deep Catholic faith and introspective spirituality (often fiercely self-critical) through diaries and voluminous correspondence. Honoured by the French Academy of Science, Cras's patented inventions include his *règle-rapporteur*, a navigational ruler-compass still used by the French Navy. Only in the 1990s has his musical importance begun fully to emerge.

WORKS

Stage: Echo (idylle antique, 2, A. Droin), 1896; Polyphème (drame lyrique, Samain), 1912–18; La tour de Penhouat (incid music), 1921; Trois Noëls (L. Chancerel), solo vv, actors, chbr choir, pf/orch, 1929 Le chevalier étranger (incid music, T. Malmanche), 1932

Orch: Impromptu pastoral, 1900; Andante religieux, 1901; Marche nuptiale, 1904; Ames d'enfants, 1918; La villa des pinsons, 1923; Prélude et danse, 1924; Journal de bord, Sym. suite, 1927; Légende, vc, orch, 1929; Conc., pf, orch, 1931

Chbr: Marche funebre, 1894; Ballade, vn, pf, 1894; Morceau, vc, pf, 1984; Voyage Symbolique (Trio no.1), vn, vc, pf, 1899; Sonata, vn, pf, 1900; Sonata, va, pf, 1900; Sonata, vc, pf, 1901; Largo, vc, pf, 1903; Largo, vc, pf, 1904; Pf Trio, C, 1907; Str Qt no.1, 1909; Interlude de Polyphème, vn, pf, 1918; Pf Qnt, 1922; Sax Qt, 1924; 2 Impromptus, hp, 1925; Str Trio, 1926; Air varié, Habanera, Evocation, Eglogue, vn, pf, 1926–9; Suite en duo, fl, hp, 1927; La Flûte de Pan (L. Jacques), 1v, fl, vn, va, vc, 1928; Quinetette, fl, vn, va, vc, hp, 1928

Pf: Trois valses, 1893; A la lumière des lustres, 1894; Marche nuptiale, org, 1894; Impromptu pastoral, 1900; Petite pièce, F, 1901; Scherzo, 1901; La Cloche, 1901; 5 Poèmes intimes, 1902–11; Valse en mi, 1904; Str Qt, 4 hands, 1909; 4 Danze, 1917; 2 Paysages, 1917; Ames d'enfants, 1918, pf, 6 hands and 4 hands, 1918; Interlude de Polyphème, 1918; Premier anniversaire, 1919 Aux étoiles, 4 hands

Choral: O Salutaris Ostia, 1v, org, 1894; Chorale, org, 1899; Panis angelicus, 1v, org, 1899; Mass, 4vv, org, 1904; Grande marche nuptiale, org, 1904; Ave verum, 1v, vn, org, 1905; Mass, 4vv, 1908; Regina coeli, vv, org, 1909; Ave Maria, 1v, org, 1910; Hymne en l'honneur d'une sainte, female vv, org, 1925; Le chant des nations, 1930

Songs (all for 1v, pf unless otherwise stated): Premières mélodies, 1892–9; A l'automne, 2vv, pf, 1899; La Tour, 1900; 7 mélodies (C. Baudelaire, A. Droin, G. Rodenbach, P. Verlaine), 1900–05, arr. 1v, str qt; Elégies (A. Samain), 1910, arr. 1v, orch; L'offrande lyrique (R. Tagore, trans. A. Gide), 1920, arr. 1v, orch; Image (E. Schneider), 1921; Fontaines (L. Jacques), 1923, arr. 1v, orch; 5 robaïyats (trans. F. Toussaint), 1924; Dans la montagne, 5 male choruses (M. Boucher), 1925; Vocalise-étude, 1928; Soir sur la mer (V. Hériot), 1929; Trois chansons bretonnes (J. Cras), 1932

PAUL-ANDRÉ BEMPÉCHAT

Crass, Franz (*b* Wipperfürth, 9 Feb 1928). German bass-baritone. He made his first appearance at the age of 11 as the Second Boy in *Die Zauberflöte*. He then studied singing at the Cologne Musikhochschule, and made his début at Krefeld in 1954 as the King in *Aida*. Engagements followed at Hanover (1956–62) and Cologne (1962–4); after 1964 he divided his time between Hamburg, Munich, Frankfurt and Vienna, with guest appearances in most leading European theatres. Crass first appeared at Bayreuth in 1959 as King Henry in *Lohengrin* and returned each year until 1973, singing the Dutchman, Biterolf, Fasolt, King Mark and Gurnemanz. He also appeared at Salzburg, as Rocco and Sarastro, and at La Scala from 1960, when he sang Don Fernando (*Fidelio*). In 1966 he sang Barak in the British première of *Die Frau ohne Schatten*, given by the Hamburg Staatsoper at Sadler's

Wells. His repertory also included the roles of Philip II, Nicolai's Falstaff and Bartók's Bluebeard. He retired from the stage in 1980. Klemperer chose him to sing in the *Missa solemnis* in London in 1960 and in Mozart's Requiem in 1964. His large concert repertory included works by Bach, Handel, Haydn and Janáček. Crass possessed a well-schooled bass-baritone voice of lyric rather than dramatic quality, which can be heard at its best in his recordings of Sarastro, Rocco and the Dutchman.

HAROLD ROSENTHAL/R

Crasselius [Crasselt], **Bartholomäus** (*b* Wernsdorf, nr Glauchau, Saxony, 21 Feb 1667; *d* Düsseldorf, 10 Nov 1724). German theologian and hymn writer. His family name was Crasselt, which he later latinized. He was probably instructed in poetry by the learned Wernsdorf pastor and Poet Laureate Johann Poelitz. He appears later to have been tutor to the Schönburg family at Schloss Glauchau. He then moved to Halle and joined the circle of pupils around August Hermann Francke, through whom he became a convinced Pietist. He stayed for a time with his brother, who was the minister at Saara, Saxe-Altenburg, but was obliged to leave after preaching one Sunday on a free text in the Pietist manner. In 1701 he became deacon at Nidda, Wetterau. From 1708 until his death he was a clergyman at Düsseldorf. He was one of the most consistent pioneers of Pietism and his uncompromising championship of it involved him on several occasions in violent disputes with authority. It is uncertain whether the melodies to the hymns in Freylinghausen's songbook are by him. *Dir, dir, Jehova*, deeply felt and technically accomplished, became world-famous and is one of the most beautiful and moving of Protestant hymns. The best-known melody for it is by Bach (BWV299 and 452).

WORKS

WALTER HÜTTEL

Crassot, Richard (*b* Nantes, *c*1530; *d* after 1580). French composer. In 1556 he was *maître des enfans* of a church in Troyes, and is known to have been a resident of Lyons by 1566, where his four-voice settings of the complete Huguenot Psalter based upon traditional melodies were issued by Thomas de Straton in 1564. In his preface to this print Crassot insisted on the need for using the traditional melody exactly as it stood, and he did no more than add three voices to the tune in a note-against-note style. His harmonizations were published in choirbook format (in contrast to the customary partbooks used in other early editions of the Huguenot polyphonic Psalter), with the official melody given both musical pride of place in the uppermost voice and graphical distinction through the use of marginal symbols. It has been suggested that his books were thus suitable both for monophonic congregational singing and polyphonic perfomance in domestic settings. Similar formats were also used in Claude Goudimel's and Hugues Sureau's books of harmonizations issued in 1565 (in Geneva and Rouen, respectively). Crassot's Psalms are framed by the central prose texts found in many early French Protestant Psalters: epistles on the Psalms themselves by Calvin and Théodore de Béze, and the *Confessions de foy*. Despite his apparent alignment with the Protestant movement, Crassot did not leave France (or, it seems, the Catholic Church) in the years following the St Bartholomew's Day Massacre in 1572. In 1581 he held an appointment at St Martin in Tours. He may also be identifiable with the Richard Grasset who was *maître de chant* at Orléans in 1572.

Craven, Elizabeth. *See* ANSPACH, ELIZABETH.

Cravo (Port.). *See* HARPSICHORD. More rarely, the term signifies CLAVICHORD.

Crawford, Jesse (*b* Woodland, CA, 2 Dec 1895; *d* Sherman Oaks, CA, 27 May 1962). American theatre organist. He grew up in Washington and Oregon orphanages and was entirely self-taught. He made his career first by playing for silent films and later as a performer on network radio and in the recording studio. His first success followed his appointment in 1917 to Sid Grauman's theatre in Los Angeles. In 1921 Balaban & Katz brought him to the Chicago Theatre, where he met Helen Anderson (1899–1943), a cinema organist, whom he married; a second four-manual console was installed in the theatre so that they could perform as a duo. From 1926 to 1932 they appeared together at the Paramount Theatre in New York and in 1933 Jesse Crawford appeared at the Chicago World's Fair. After his wife's death he continued as a solo performer of popular tunes. He later taught in New York and, after 1952, in Los Angeles. A writer for *Music: the AGO Magazine* (1962) considered his playing to represent 'a perfection seldom found, in the realm of the theatre, the church or the concert hall'.

VERNON GOTWALS

Crawford, Richard (Arthur) (*b* Detroit, 12 May 1935). American musicologist. He studied at the University of Michigan with Hans T. David and H. Wiley Hitchcock (BM 1958, MM 1959), taking the doctorate in 1965 with

a dissertation on Andrew Law. He began teaching at Michigan in 1962, becoming professor in 1975. He was a senior research fellow at Brooklyn College, CUNY, 1973–4, and Ernest Bloch Professor of Music at the University of California, Berkeley, in 1985. He was president of the AMS from 1982 to 1984. Crawford's main area of study is music in the United States. He is editor-in-chief of *Music of the United States of America*, a national series of scholarly editions. His writings have ranged from early American psalmody to jazz discography in the first half of the 20th century.

PAULA MORGAN

Crawford, Robert MacArthur (*b* Dawson, YT, 27 July 1899; *d* New York, 12 March 1961). American baritone, composer, lyricist and conductor of Canadian birth. As a boy he studied the violin and piano, and took part in musical and theatrical productions. One of his first songs, *My Northland*, became the theme song of the Alaskan Pioneers (his family had moved to Fairbanks in 1904). He studied at Princeton University (graduated 1925) and during the summers at the American Conservatory in Fontainebleau (1924, 1925) with Nadia Boulanger (composition) and André Bloch (conducting), among others. He later pursued singing at the Juilliard School of Music. From 1936 to 1939 he taught at Juilliard and conducted symphonies, operas and ballets in the New York area.

While still a student at Princeton, Crawford learned to fly and in 1932 *Time Magazine* dubbed him 'The Flying Baritone'. His song *Off We Go into the Wild Blue Yonder* was chosen as the theme song of the US Air Corps in 1939. During World War II he flew for the Air Transport Command, entertained Allied troops and composed songs relating to his military experiences. Other works, including the orchestral suite *Alaskania*, were based on his Alaskan boyhood.

WORKS

VOCAL

texts by Crawford, unless otherwise stated

Stage: The Scarlet Coat, Princeton, NJ, 1924

Songs: Dear Heart (anon.), 1913; If I were King, 1913; My Northland (1915); To an Idal, 1915; Coleen's Eyes (1919); In memoriam 'To Woodrow Wilson' (Crawford, R. Browning), 1924; Nadège, 1924; 3 Songs (M.A. Taylor), 1925; The Heavenward Way, 1926; When Jesus Came to Bethlehem (S.A. Stoddard Kennedy), 1937; The Army Air Corps, 1938 [title changed to US Air Force Song, 1951]; Behold What Manner of Love to Every Man (Bible, J. Oxenham) (1938); Thank God We're Over Here (1940); Thank God We've Found the Man (1940); Trees and Men, 1941, arr. SATB; Remember the Hills, 1942; Cadets of the Army Air Corps, 1943; Born to the Sky (1945); My Gal, My Plane and I, 1947; My Miami (F.F. Criley, Crawford), 1947; The Army History, 1948; Let's Send Harry Back to the Farm (W.L. Daniel), 1948; Everything Reminds Me of You, 1949; Too Much Pepper, 1950; Alma mater, 1951; The Loyal Legionnaire, 1951, arr. orch/band; By the Dawn's Early Light (D. Shupe), 1954, arr. SATB (1959); Alaska to Thee (1956); My Very Own, 1956; My Spacious Love (1958); Saddle Strings (K.J. Kennedy) (1958); Sons of Marco Polo (1959), orchd; Wagon Wheels, orchd; Stand Fast (L. Thomas, Crawford); Rust on the Moon, orchd; Send Her Along (trad. Fr. Can.), arr. SATB

Choral: Drakes Drum, SATB, orch, 1920; Drink to Me Only (1923), arr. B, SATB; Nocturne, S, SATB, 2 hn, str, 2 hp, 1926; Romany Rye (Gypsy Gentlemen) (T.A. Daly), SATB (1930); Nocturne (A. Rubin), 1937; We're Over Here, 1940; Trees and Men, 1941; Kill the Bastards (1944); Greenbrier Hill, SSA (1945); Winds of the Mountains, SATB, orchd 1956; The Ox's 5's, 1958; De Lawd's Baptizin'; Send her on Along; By the Dawn's Early Light, SATB (1959); Who Built the Ark?

INSTRUMENTAL

Les étoiles, 1933; Les soir, vc, orch, 1933; Prelude and Fugue, 1936 [arr. of J.S. Bach: Prelude and Fugue, e]; Lost in Your Arms, 1939; Alaskania, 1957 [based on trad. Alaskan native and Inuit themes]; Prohibition Ballet, pf, 1960

SUZANNE SUMMERVILLE

Crawford (Seeger), Ruth (Porter) (*b* East Liverpool, OH, 3 July 1901; *d* Chevy Chase, MD, 18 Nov 1953). American composer and folk music specialist. She had two important careers in a relatively short lifetime: as a composer, she was an outstanding figure among early American modernists in the 1920s and early 1930s; as a specialist in American traditional music, she transcribed, edited and arranged important anthologies in the 1940s and early 1950s.

Crawford received her earliest musical training while living in Jacksonville, Florida, between 1912 and 1921. Piano lessons with Madame Valborg Collett (a pupil of Agathe Grøndahl) from 1917 to 1920 led to further study at the American Conservatory of Music in Chicago with Heniot Levy (1921–3) and Louise Robyn (1921–4). She gained skill in composition from Adolph Weidig (*c*1923–1929). Equally formative were her piano studies from about 1925 to 1927 with the Canadian teacher Djane Lavoie Herz, a disciple of Skryabin. Through Madame

Herz, Crawford came into contact with Cowell and Rudhyar. By 1926 she was also acquainted with the leading Chicago poet Carl Sandburg, contributing folk-song arrangements to his landmark anthology *The American Songbag* and absorbing his poetic and philosophical ideals.

Crawford's career flourished in the 1920s within the confines of the small modernist movement existing outside New York. In 1926 Cowell named her for the board of his New Music Society and later published several of her works in the *New Music Quarterly*. In the mid-1920s she became a board member of the Pro Musica Society and in 1928 a founder member of the Chicago chapter of the International Society for Contemporary Music (ISCM). Between 1924 and 1929 she composed almost two-thirds of her output, receiving several notable performances from new-music groups. The first professional performance of her music was given in New York in November 1925 by Gitta Gradova (another pupil of Lavoie Herz), who performed her second Piano Prelude. In 1927 her Violin Sonata was played at a League of Composers concert of music by six 'Young Americans' (including Copland and Blitzstein); the following year it was performed at the inaugural concert of the Chicago chapter of the ISCM. Buhlig included three piano preludes by her in a recital on 6 May 1928 in the Copland–Sessions series in New York.

In autumn 1929, after spending the summer at the MacDowell Colony in New Hampshire, Crawford left Chicago for New York to study dissonant counterpoint with the composer and musicologist Charles Seeger. There she joined Cowell's circle of 'ultra-moderns', which included Seeger's close friend Carl Ruggles. She became a protégée of Seeger and was influential in helping him to revise *Tradition and Experiment in New Music and a Manual on Dissonant Counterpoint* for publication. His ideas were crucial to the development of her second-style period (1930–33), a few short but fruitful years.

Ruth Crawford: portrait from life by Carl Bohnen, charcoal, mid-1920s (private collection)

In 1930 Crawford was awarded a Guggenheim Fellowship in composition; she was the first woman to be named and one of only five in the next 15 years. She spent her year abroad mostly in Berlin (autumn 1930 to April 1931) and in Paris (June to early November 1931). 'In Berlin I studied with no-one', she later wrote (alluding to her lack of contact with Schoenberg). Yet she regarded her encounters with Bartók and Berg as high points of what was the most productive year of her life. Virgil Thomson later described the String Quartet '1931' as 'in every way a distinguished, a noble piece of work'. Crawford returned to New York in November 1931 and married Charles Seeger the following year. In the early 1930s her music was performed at the New School for Social Research, where both Seeger and Cowell were on the faculty. Her Three Songs for voice, oboe, percussion and strings represented the USA at the 1933 ISCM Festival in Amsterdam.

In 1936 the Seegers moved to Washington, DC: Charles was appointed to the music division of the Resettlement Agency (a federal New Deal organization), while Ruth worked closely with John and Alan Lomax at the Archive of American Folk Song at the Library of Congress, her interests having shifted from composition to the preservation and dissemination of American folk music. The Seegers became one of the most important 'families' in the folk music revival of the late 1930s and the 1940s. Her stepson Pete Seeger was the leading folk revival performer in the USA; her children Mike and Peggy also became professional musicians. Her only original composition during this period was *Rissolty Rossolty*, an 'American Fantasia for Orchestra' based on folk tunes, commissioned by CBS for its radio series American School of the Air.

With the publication of *Our Singing Country* (1941), Crawford became well known for her transcriptions. Later she developed music programmes utilizing folk music for progressive private schools in the Washington area. Compiled in 1941–6, the classic *American Folksongs for Children* (1948) won praise from both composers and music educators; it was followed by *Animal Folksongs for Children* (1950) and *American Folk Songs for Christmas* (1953). The Suite for Wind Quintet (1952) marked a return to composition.

Crawford's original music falls into two style periods. Her Chicago compositions (1924–9) reveal her predilection for dissonance and for post-tonal harmonies influenced by Skryabin, as well as her fondness for irregular rhythms and metres. Unpublished diaries and poems suggest the influence of an eclectic legacy of philosophical and literary sources common to many American artists and writers of the early 20th century. Among these were theosophy and Eastern mysticism, and American literary transcendentalism, as well as the imaginative traditions of Walt Whitman and Sandburg, the latter supplying the texts for almost all of her vocal compositions.

However, Crawford's reputation as an innovative and experimental composer rests mainly on her New York

compositions (1930–33), in which she concerned herself with dissonant counterpoint and indigenous American serial techniques. She was one of the earliest composers to extend serial controls to parameters other than pitch and to develop formal plans based on serial operations. As a folksong arranger, she was no less original and skilful. Her folksong transcriptions were praised as impeccable and her arrangements as faithful to both the soul and the spirit of the original field recordings that were so often their source. She summed up her credo as a desire to give people 'a taste for the thing itself'.

JUDITH TICK

Crawley, Clifford (*b* Dagenham, London, 29 Jan 1929). Canadian composer, conductor and music educator of English origin. He received the MMus from Durham University, and became a Fellow of Trinity College of Music (London) and an Associate of the RCM. His composition teachers included Arthur Hutchings, Lennox Berkeley and Humphrey Searle. After teaching in England for 20 years, he moved to Canada in 1973 to take up a post as professor of composition and music education at Queen's University (Kingston, Ontario). In addition to his university responsibilities he conducted amateur orchestras and choral groups, was an examiner for the Royal Conservatory (Toronto), adjudicated at music festivals, and participated in 'Creative Artists in the Classroom' programmes. He also served as a music consultant in Honduras and Malaysia for Canadian Executive Service Overseas.

Crawley's extensive output includes operas, orchestral works, chamber music, music for large vocal ensembles, solo songs and keyboard works. His vocal works display a special skill in writing for children and amateur musicians. These compositions, many written for schools, range from simple songs to the musical *Porky, Snorky and Corky* (1983). His several operas, such as *Slaughter of the Innocents* (1974) and *Bernardo Boy* (1981) create

performance opportunities for large numbers of amateur-level participants, requiring comparatively few professional-level players and singers. Crawley's musical idiom is both accessible and eclectic, following in the tradition of Benjamin Britten and Malcolm Arnold.

F.R.C. CLARKE

Craxton, (Thomas) Harold (Hunt) (*b* London, 30 April 1885; *d* London, 30 March 1971). English pianist, accompanist and teacher. He was a pupil of Matthay and Cuthbert Whitemore at the Matthay School, becoming a professor there in 1914. He also taught at the RAM, 1919–61. In his varied career he gave recitals as a solo pianist, especially of early English music, and spent two years as Albani's accompanist and afterwards 12 as Clara Butt's; he was then in great demand to accompany leading singers and instrumentalists. A fine teacher, he numbered among his pupils Denis Matthews, Peter Katin, Nina Milkina, Alan Richardson, John Hunt and Noel Mewton-Wood. He edited, with Tovey, the Associated Board edition of Beethoven's sonatas and published many transcriptions of early English music, as well as a few original piano pieces and songs. His recordings include Delius's Cello Sonata with Beatrice Harrison. He was made an OBE in 1960.

FRANK DAWES

Craxton, Janet (*b* London, 17 May 1929; *d* London, 18 July 1981). English oboist, daughter of HAROLD CRAXTON. After studying at the RAM (1945–8) and at the Paris Conservatoire (1948–9), she became principal oboe of the Hallé Orchestra in 1949. She also served as principal of the London Mozart Players (1952–4) and the BBC SO (1954–63). In 1967 she formed the London Oboe Quartet, which gave many concerts and broadcasts; she was also a member of the London Sinfonietta and played in the Da Vina Trio and in a duo with her husband Alan Richardson. A polished and reliable artist, with a particular gift for chamber music, she was entrusted with the first performance of works by Vaughan Williams (*Ten Blake Songs*), Berkeley, Rawsthorne, Lutyens, Maconchy and Rainier, and made a number of recordings. At the time of her death she was principal oboe at Covent Garden and professor at the RAM; to the latter institution she left a collection of music, including autograph manuscripts and marked parts of works in her repertory.

JOHN WARRACK/R

Cray, Robert (*b* Columbus, GA, 1 Aug 1953). American blues and soul guitarist, singer and songwriter. The most assured composer among a younger generation of black American guitarists, Cray's influences included the veteran blues player Albert Collins and also the blues rock guitarists Jimi Hendrix and Peter Green, and Steve Cropper, the soul music specialist of Booker T and the M.Gs. From the formation of the first Robert Cray Band (1974) he leavened his fluent blues guitar cadences with a vocal style which owed more to soul than blues. In 1985 he recorded the album *Showdown!* with Albert Collins, one of his early heroes, and the blues guitarist and singer Johnny Copeland. Cray's first international recognition came with the album *Strong Persuader* (1986). This was followed by *Don't Be Afraid of the Dark* (1988) and *Midnight Stroll* (1990), where Cray was accompanied by the Memphis Horns, who had done many soul recordings for the Stax label. By 1999 and the album *Take Your Shoes Off*, he had evolved a new stylistic synthesis which paid equal tribute to the Southern soul stylist O.V. Wright and the blues guitarist B.B. King. His compositions *Bad Influence* and *Phone Booth* have been recorded by Eric Clapton and Albert Collins respectively; he co-wrote *Old Love* with Clapton and has recorded vocal duets with Tina Turner.

DAVE LAING

Cream. English rock group. It was formed in London in 1966 by Ginger Baker (*b* London, 19 Aug 1940; drums), Jack Bruce (*b* Glasgow, 14 May 1943; bass guitar, vocals and harmonica) and ERIC CLAPTON (electric guitar and vocals). Each member came to the group as an established virtuoso: Clapton from John Mayall's Bluesbreakers, Baker from the Graham Bond Organisation and Bruce from Manfred Mann. The name Cream was a boast about their collective talents. The group played blues, covering such standards as Willie Dixon's *Spoonful* and Robert Johnson's *Crossroads*, but Clapton was the only blues purist in the group and even he acknowledged the need to move in other directions, especially after hearing Hendrix. The group's most enduring songs are those in which a new rock style was forged: blues-based riffs, often played in octaves by Clapton and Bruce (as in *Sunshine of Your Love*), slow tempos, and a heavy bass and drum sound. There is also a type of Cream song that can be considered a model for progressive rock, breaking out of conventional forms, employing more complex harmonies and in some cases further instrumentation; some of the studio songs on *Wheels of Fire* fall into this category. As the group's principal songwriter, Bruce collaborated with the London poet Pete Brown, whose psychedelic lyrics in songs such as *White Room* and *SWLABR* are also a trademark of the band.

Bruce's lead vocal style was substantially different from that of later rock singers: his clean timbre, relatively low range juxtaposed with his use of falsetto (which he employed for contrasting sections of songs including *White Room* and *Strange Brew*), vibrato and rubato style are derived more from jazz than from blues shouters, who were so influential in shaping other rock singers. Baker was an inventive drummer, comparable to Led Zeppelin's John Bonham in terms of power (especially the kick drum sound), but generally busier. One example of Baker's subtlety can be heard in *Politician* (especially the live version on *Goodbye*), in which his syncopated accentuation of the riff sometimes suggests a change in metre. It has been remarked that in the studio and in live performances Cream was in fact two different bands. In the latter situation, they would indulge in extended improvisation, either as individuals or collectively; 'Spoonful' from *Wheels of Fire* is a particularly good example of their collective improvisation.

Before disbanding in 1968, the group recorded two studio albums, *Fresh Cream* (1966) and *Disraeli Gears* (1967), and two that combined studio and live tracks, *Wheels of Fire* (1968) and *Goodbye* (1969), all for Polydor records. Two further live recordings were also released in 1970 and 1972. Cream was important to the history of rock because of their emphasis on virtuosity,

and as the first power trio, upon which subsequent rock bands such as the Police and Rush were based.

SUSAN FAST

Creation. British record company. It was set up in 1984 by Alan McGee, a former British Rail clerk, and Dick Green. Creation's first signing was the Jesus and Mary Chain, whose single *Upside Down* sold more than 50,000 copies in Britain, a sizable hit for a fledgling independent label. Creation acquired a reputation for developing the hottest indie bands with Primal Scream, Ride and My Bloody Valentine their main acts. However, by 1993 the label had debts of over £1 million, and McGee and Green sold a 49% stake of the company to Sony for £3.5 million, assuring the label's future. That same year McGee saw a support gig by the unknown band Oasis in 1993 and signed the band on the spot; Oasis became the label's leading group and by 1998 had sold more than 27 million records. Apart from the hit indie band Super Furry Animals, all the band's new talent was discovered by McGee and the label remained very much driven by his passions. In the late 1990s McGee became a powerful voice within the industry and participated in a number of think-tanks such as the Creative Industries Taskforce and the Music Industry Forum, which advise the government on issues affecting the British music industry. By the late 1990s Creation had also founded its own dance label, Eruption, run by the disc jockey and journalist Kris Needs. In July 2000 Creation closed down after McGee left to form a new label, Poptones.

DAVID BUCKLEY

Crébillon, Prosper Jolyot de (*b* Dijon, 13 Jan 1674; *d* Paris, 17 June 1762). French dramatist. He studied law at Dijon and by 1703 was living in Paris. He became a member of the Académie Française in 1731 and was appointed theatre censor in 1735. His nine tragedies, based on subjects from classical antiquity, are melodramatic and exploit violence and romantic entanglements; they were highly regarded during his lifetime. *Idoménée* (1705), his first work, was a source for Campra and Danchet's *Idoménée*, which in turn served for Mozart and Varesco's *Idomeneo*. His masterpiece, *Rhadamiste et Zénobie*, was first performed in 1711; there are notable similarities between it and Metastasio's *Zenobia*, as also between Crébillon's *Xerces* (1714) and Metastasio's *Artaserse*. Other plays by Crébillon on which operas were based were *Semiramis* and *Pyrrhus*. Crébillon's son Claude-Prosper (1707–77) was also a playwright; he was theatre censor from 1774 to 1777.

ALISON STONEHOUSE

Crécelle (Fr.). *See* RATCHET.

Crecquillon [Crequillon, Cricquillon, Crequillonis, Carchillion, Krequilon etc.], **Thomas** (*b c*1505–15; *d* ?Béthune, ? early 1557). Franco-Flemish composer. He was one of the leading Franco-Flemish composers of the post-Josquin generation.

1. LIFE. Crecquillon was a priest and an MA. He spent most of his known career as a member of the Emperor Charles V's grand chapel. His activities before he joined the chapel are unknown, though it has been stated (*BNB*) that he taught music at Regensburg and that it appeared he had charge of certain musical functions at the choir-school of the church of Our Lady, Antwerp. These statements cannot now be confirmed, although some motets are consistent with his having worked in Antwerp. Other pieces give grounds for supposing that he may also have worked in the vicinity of Tournai at some period before his imperial service.

The earliest document to mention Crecquillon is a list (dated December 1540) of court and chapel members in order of precedence for benefices within the imperial gift (now in the Archives Générales du Royaume de Belgique, Brussels). Crecquillon is named as 'maistre de la chapelle' three times and had apparently succeeded Adrian Thibault *dit* Pickart at some time after August 1538. His position is also stated on the title-page of Susato's *Tiers livre de chansons* (RISM 1544[11]). The suggestion that he succeeded Gombert as *maître des enfants* is unfounded. It appears that the imperial chapel was reorganized in 1545, and Crecquillon probably then relinquished the position of *maître de chapelle*, which was united with that of *maître des enfants*, with Cornelius Canis assuming the combined role. In the later 1540s Crecquillon was officially a singer and a chaplain (one of the most senior members of the chapel); he seems also to have been recognized as unofficial court composer, like Gombert some years earlier. The documentary record suggests strongly that Crecquillon retired from service in 1550; he had definitely done so by 1555, when he was described as a former singer of the chapel.

According to the 1540 list, Crecquillon was granted a benefice in Termonde and expectatives in Béthune and Turnhout. Vander Straeten cited a document of 1550 concerning a benefice at St Pierre, Leuven, and Fétis described archival notices that recorded Crecquillon's resignation in 1552 as canon of St Aubain, Namur, in favour of a canonicate at Termonde. That in turn was vacated in 1555, when he gained a canonicate at Béthune. He probably died early in 1557, for in March of that year his successor in Béthune was named. Crecquillon may have fallen victim to the plague that ravaged the city at that time, although the date of his retirement together with his probable age suggest that his health was poor. He was certainly dead by 1566, when Guicciardini (*Descritione di tutti i Paesi Bassi*) listed him among deceased musicians.

Crecquillon's date of birth may be estimated from several circumstances. The earliest known appearance of a work by his is in a manuscript dated 1536–40 (*D-Mu* 4° Art.401), but the publication of many of his works by Susato from 1543 onwards suggests a well-established

composer, as do several of his most mature works, which date from no later than 1545–6, and his apparent retirement in 1550. However, Jakob Paix, in a collection (RISM 1589[17]) in which the motets were printed 'in the order in which the composers lived' (though with some anomalies), placed him following Clemens non Papa and Hollander, both thought to have been born about 1510–15. Crecquillon's place of birth is unknown, although his motet *Quaeramus cum pastoribus* may suggest a connection with France (see below).

As a member of the imperial chapel, Crecquillon would have travelled with Charles V's entourage on the emperor's extensive peregrinations. He is likely, therefore, to have been in Spain from November 1541 to May 1543, and he is known to have been in the German parts of the empire in 1545 and in 1546–8. Those journeys may have assisted the wide dissemination of his music.

2. Works. Crecquillon's vast output includes 12 masses, over 200 chansons, and approximately 125 motets (including two Lamentations cycles). During his lifetime only one volume devoted to his music was published, Susato's *Tiers livre de chansons* (RISM 1544[11]), which also contains a *réponse* by Jean Lecocq to one of Crecquillon's chansons. After his death, Phalèse published two volumes of motets (Leuven, 1559, 4/1572; Leuven and Antwerp, 1576). The rest of his works appeared in printed anthologies and manuscripts (usually derived from printed sources) from the 1540s to the mid-17th century. After Clemens non Papa, his works probably circulated more widely than those of any other Netherlandish composer of his generation.

Crecquillon is best known as a composer of French chansons, most often for four or five voices. Several were among the most widely disseminated of the 16th century, especially *Alix avoit aux dens*, *Pis ne me peult venir*, *Pour ung plaisir* and *Ung gay bergier*. Susato and Phalèse published more by him than by any other composer, ranking him above Lassus, Manchicourt, Gombert and Clemens as a composer of secular music. Styles range from the essentially chordal, declamatory pieces in the manner cultivated in France (e.g. *Amour partez je vous donne*) to typically Netherlandish contrapuntal works in which each line begins with its own point of imitation (e.g. *Contentement combien que soit*). Most often a mixture of the two styles is found. They were viewed as ideal models for instrumental canzonas during the second half of the 16th century; *Ung gay bergier* survives in 28 arrangements for lute or keyboard. *Toutes les nuictz* appears in a copy of a painting by Hieronymus Bosch, *Concert dans l'oeuf*, in the Musée des Beaux-Arts, Lille.

The texts of Crequillon's chansons repay attention. 36 poems by 11 poets have been identified. The most prominent are Clément Marot (13 chansons), his father Jean Marot (12) and Mellin de Saint-Gelais (3). The authors of most of the poems, however, are unknown. The chanson texts are often excerpted from longer poems such as rondeaux, but the borrowing may be less straightforward than simply using a refrain; it is often a stanza from within a poem or a selection of lines from various stanzas, not necessarily in order. Details may likewise be altered to adapt a poem for some specific purpose: for example, Clément Marot's *Dedans Paris ville jolie* becomes *Dedens Tournay ville jolie*. In other cases obscene texts have been cleaned up; for instance, in *Alix avoit aux dens* a gentleman proposes an unorthodox treatment for his lady's toothache; in the parent poem the theme was developed at greater length and specificity. These and other details suggest that chansons were written for particular occasions or for individuals whose identities are not usually discernible. At least 38 chansons belong to *chanson–réponse* pairs, sometimes with yet a third piece, a *réplique*. In some cases these are all by Crecquillon, but often another composer wrote one of the chansons. There are usually musical or textual similarities, sometimes quite subtle ones.

No less important than his chansons are Crecquillon's motets, which are paradigmatic of the mid-16th-century contrapuntal style. Nearly all are constructed of a series of points of imitation, one for each segment of text. They range from three to eight voices, although four- and especially five-voice works predominate. Among them three were especially widely disseminated: *Domine, da nobis auxilium* and *Domine deus omnipotens* for six voices, and *Pater, peccavi in caelum* for eight. Most are based upon biblical or liturgical texts, but these are sometimes altered, apparently to suit them for a special purpose. A number of motets employ the repetition scheme *aBcB* characteristic of responsories, widespread in the mid-16th century, but most do not involve exact repetition. Cantus-firmus motets are rare, but occasionally a chant is either paraphrased or quoted. Dissonance is at times used expressively, and some motets display a sense of form that transcends the basic method of construction (e.g. *Adiuva nos Deus*). More homophonic passages are used in a few motets to great effect, demonstrating a developed harmonic sense. A number of Crecquillon's motets appeared in collections ordered by mode; however, as with many of his contemporaries, the extent to which he used mode for affective or other purposes is unclear. A few motets celebrate individuals, for example *Caesaris auspiciis magni* (lament for a general in Charles V's army) and *Cur Fernande pater* (in memory of the Polish Queen Elisabeth, daughter of Ferdinand I). Others may be linked to events within the imperial circle, such as *Philippe qui videt me*, *Quis te victorem dicat* and *Honor virtus*, all probably written for formal entries during Philip of Spain's tour of the Low Countries in 1549. Several motets call for peace, apparently reflecting Charles V's long quest for internal and external tranquillity. In *Ave byssus castitatis*, up to the last line the words are in alphabetical order.

With the exception of the *Missa 'Kain [Adler] in der Welt so schon'*, based upon a lied cantus firmus, Crecquillon's masses are parodies of chansons and motets. The earlier ones, such as the four-voice works published by Susato in 1545 and 1546, tend to alternate more or less literal quotations with freely composed material. In later works borrowed material is treated more flexibly and is more carefully integrated with new music. Probably his finest masses are the *Missa 'Domine da nobis auxilium'* and *Missa 'Domine Deus omnipotens'*, both for six voices. The *Missa 'Kain [Adler] in der Welt'*, in common with the 12-voice chanson *Belles sans per* and a number of motets by Canis, Manchicourt, Appenzeller and others, uses a cantus firmus with Habsburg associations. It seems highly probable that these works were written for the marriage of Philip of Spain to Doña Maria of Portugal in 1543.

Although Crecquillon spent all of his documented career at the court of Charles V, his music has links with

the French court. In addition to poems by Jean and Clément Marot and Saint-Gelais, he set François I's own poem *Las qu'on cogneust*. Of particular interest is *Se Salamandre en flamme vit*: the salamander was a particular emblem of François I, though the poem itself is a translation of an Italian sonnet by Serafino dall'Aquila. Several chansons borrow musical material for words set by Claudin de Sermisy (e.g. *Il me suffit*) and other French composers. Finally, the six-voice motet *Quaeramus cum pastoribus* is a parody of Jean Mouton's four-voice composition on that text. Most of these French connections may have arisen from the requirements of Charles V's diplomacy or from the emperor's family relations, but the last gives some reason to consider a more direct personal link with Crecquillon.

Crecquillon was recognized by his contemporaries, among them Hermann Finck, Coclico and Venegas de Henestrosa, as one of the most important Franco-Flemish composers between Josquin and Lassus. As late as the beginning of the 17th century, Cerone praised Crecquillon along with Rore and Willaert as composers worthy of emulation. His works were adopted as models for parody masses by such composers as Guerrero, La Hèle, Lassus or Vaet, Lockenburg (twice), Paix, Rogier and Szadek. Along with Gombert, Clemens non Papa and Willaert, Crecquillon belongs to the group of musicians who made pervading imitation the central musical technique of the 16th century. Although some works sound pedestrian, his best rank with the finest of his distinguished contemporaries. They deserve more attention from scholars and performers.

WORKS

Editions: *Thomas Crecquillon: Opera omnia*, ed. B. Hudson and others, CMM, lxiii– (1974–) [H]

The Four-Voice Motets of Thomas Crecquillon, ed. H.L. Marshall (Brooklyn, NY, 1970–71) [M]

MASSES

Missa 'Congratulamini', 4vv, H ii, 18 (on Sermisy's motet)
Missa 'D'amours me plains', 4vv, H i, 1 (on Pathie's chanson)
Missa 'Domine da nobis auxilium', 6vv, H iv, 1 (on his own motet)
Missa 'Domine Deus omnipotens', 6vv, H iv, 43 (on his own motet)
Missa 'Doulce memoire', 4vv, H ii, 1 (on Sandrin's chanson)
Missa 'D'ung petit mot', 5vv, H iii, 90
Missa 'Je prens en grê', 4vv, H i, 73 (on ?Clemens's chanson)
Missa 'Kain [Adler] in der Welt so schon', 4vv, H i, 25 (c.f. T of a lied)
Missa 'Las il fauldra', 4vv, H i, 53 (on his own chanson)
Missa 'Mort m'a privé', 5vv, H iii, 1 (on his own chanson)
Missa 'Pis ne me peult venir', 5vv, H iii, 33 (on his own chanson)
Missa 'Se dire je l'osoie', 5vv, H iii, 61 (on Appenzeller's chanson)

MOTETS

Liber septimus cantionum sacrarum, 4vv (Leuven, 1559, 4/1572) [1559]

BARTON HUDSON, MARTIN HAM

Credo (Lat.; Eng. 'Creed'). Affirmation of Christian belief, sung as part of the Latin Mass between the Gospel and the Offertory. Three Latin Creeds have come down to us ('Apostles'', 'Nicene', 'Athanasian'), but the history of the texts is complex; the one used at Mass is that usually called 'Nicene'.

The original liturgical use of the Credo was at baptism, at a time when the articles of faith were delivered to the catechumens as part of their reception into the Church. (The use of the first person, 'I believe', is ascribed to these circumstances, for the phrase seems inappropriate to a communal affirmation at Mass.) The baptismal use of the Credo, or *Symbolum* as it was called in this function, lasted throughout the Middle Ages, and was incidentally responsible for the persistence of a Greek text in Latin manuscripts representing practices in northern France and Germany.

The Credo, in the so-called 'Nicene' (or 'Nicea-Constantinople') version (so called because it sums up the doctrines agreed at the Councils of Nicea, 325, and Constantinople, 381), was introduced into the eucharistic liturgy in the east early in the 6th century and soon afterwards into the Visigothic rite by the Council of Toledo (589). In both cases its introduction occurred in

the wake of doctrinal controversies, and with the intent of clarifying the belief to be shared by all participating in the Eucharist. Furthermore, in neither case was the Credo placed at its received position after the Gospel; in the Visigothic rite it preceded the *Pater noster*, and was to be said, not sung.

As part of the major revision of western liturgies and doctrine undertaken in the Carolingian reforms, the Council of Aix-la-Chapelle in 798 required the Credo to be sung at Mass, between the Gospel and the Offertory. For this purpose Alcuin (Charlemagne's liturgical adviser) pressed into use a new Latin translation that had just been made by Paulinus of Aquileia in 796; but Alcuin may well have had the idea for a sung Credo at Mass from an Irish practice of the 7th–8th centuries (which Alcuin would have known at York – see Capelle).

Smaragdus told how, when Charlemagne inquired of Pope Leo III, the latter sanctioned this use for the Franks, while taking exception to the addition of the 'filioque' which Charlemagne felt was necessary (the issue is still with us). The Credo was not actually incorporated into the Roman Mass, however, until the German Emperor Henry II required it of Pope Benedict VIII in 1014.

With characteristic enthusiasm and optimism for widespread liturgical reform, Charlemagne (or Alcuin) apparently envisaged the singing of the Credo in Latin specifically by the people. As has been pointed out, the singing of the long, complex Latin text, in a new version, by the northern peoples was an impossibility at first, and must have remained only an ideal in many places for centuries to come; but there is evidence of attempts at accommodation, including vernacular substitutes.

In any event, from 798 a new musical setting had to be provided, presumably that represented by the 'authentic' tone of Credo I in the *Liber usualis*. Huglo has shown that the melody of a Greek Credo, preserved in a 14th-century Cologne manuscript (*D-KNu* W.105), has certain important points of resemblance with Credo I and may have been its source. This is in itself believable, for a Carolingian adapter could have had access to a melody traditionally associated with the Greek text used at baptism; there are obscurities not yet explained, however, for manuscripts of the 10th and 11th centuries apparently preserve different melodies for the Greek Credo. Alternatively, the melody may have come straight from Aquileia along with Paulinus's text.

The tone for Credo I is documented first in the 11th century, and the connections between it and the antecedent of Huglo's melody current in 800 may well have been complex. Credos II, V and VI preserve variants – some more or less remote – of the formulae in Credo I and represent other medieval traditions of this common melody. Indeed, there are relatively few medieval settings that are completely new, a fact that reflects the persistence of the Carolingian ideal of a universal sung Credo.

Credo I recites on *g*, with an intonation rising from *e*; this first phrase is linked to a second by moving through *d*; the second phrase involves a rise to *a–b*♭; the terminal cadence, incorporated into the second phrase or placed in a separate third phrase as needed, is on *f–a–g*; but the last cadence (Amen) falls to *e* through a Carolingian Gloria in excelsis formula (Gloria I). The bipartite melodic formula is used throughout the text, but neither the formula itself nor the technique of adaptation bears much resemblance to 'psalm tones' as used for psalmody in the Franco-Roman Office; they are more closely related to the techniques of Gloria settings. And the nucleus (*e*) *g* (*a*) of the tone may be part of the old eucharistic G-tone postulated by Levy.

Paulinus of Aquileia's new text replaced the previous plural opening 'Credimus' with the singular 'Credo'. Vatican VI opens with 'Credimus' in the 11th-century source from which it was taken for the modern edition, *F-Pn* lat.887. So also does another member of the same melodic family found in the 11th-century *Pn* lat.776 (ed. D. Hiley, *Western Plainchant*, Oxford, 1993, p.170).

Credo IV, also known as the 'Credo cardinalis', is often found in manuscripts and printed books of the 15th century onwards with mensural notation (see illustration in Tack, 50).

The Credo is very rarely notated in early chant books, and in the manuscript tradition it remained apart for many centuries from the other chants of the Mass Ordinary. Unlike these chants, it was not usually susceptible to being troped. In the early 13th-century Circumcision Offices of Sens (*F-SEm* 46; ed. H. Villetard, *Office de Pierre de Corbeil (Office de la Circoncision) improprement appelé 'Office des fous'*, Paris, 1907) and Beauvais (*GB-Lbl* Egerton 2615; ed. W. Arlt, *Ein Festoffizium des Mittelalters aus Beauvais in seiner liturgischen und musikalischen Bedeutung*, Cologne, 1970), the Credo is farsed, that is, supplemented by phrases drawn from other liturgical chants, performed antiphonally with the phrases of the Credo. Credo VII of the Vatican edition is, in fact, the Sens Circumcision Credo stripped of its farse verses.

During the 14th century, however, the Credo seems to have acquired equal status with the other movements as far as polyphonic settings are concerned. There are polyphonic Credos in the so-called masses of Tournai, Toulouse and Barcelona, in Machaut's *Messe de Nostre Dame*, and in such collections as the Apt, Ivrea Codex and Old Hall manuscripts (*F-APT 16bis*, *I-IV*, *GB-Lbl* Add.57950).

For reasons not yet clear, the number of monophonic plainchant settings increased dramatically from the 15th century onwards. Miazga's catalogue (1976) lists 701, with over 400 new melodies in the 18th century alone. The fashion seems to have been particularly strong in Italy, Germany and Poland, principally among the religious orders. As many as 30 composers' names are known. The best known melodies are perhaps those in Henry Du Mont's *Cinq messes en plain-chant* (Paris, 1669; see Tack, 64–5). Many melodies bear names denoting their reputed place of origin or the pre-existing melody on which they are based. Many are mensural.

The two other Credo texts have less liturgical importance. The Athanasian Creed, *Quicumque vult salvus esse*, is said, not sung, at Prime. The Apostle's Creed, *Credo in Deum, patrem omnipotentem, creatorem caeli et terrae*, is a text for baptism dating back to the 3rd century; legend attributes its composition to the apostles themselves, each of whom contributed a phrase. The Apostle's Creed was said before Matins and Prime and again after Compline. Medieval musical settings are unknown except for a farsed setting in the Sens Circumcision Office. A memorable 13-voice canonic setting was made at the beginning of the 16th century by Robert Wilkinson of Eton College, where the text of the 12 apostles is combined with the start of the Compline

antiphon *Jesus autem transiens* (ed. F. Ll. Harrison, MB, xii, 1961).

RICHARD L. CROCKER/DAVID HILEY

Creedence Clearwater Revival. American rock group. Its original members were John Fogerty (*b* Berkeley, 28 May 1945; vocals, lead guitar and keyboards), his brother Tom Fogerty (*b* Berkeley, 9 Nov 1941; *d* Scottsdale, AZ, 6 Sept 1990; rhythm guitar), Stu Cook (*b* Oakland, CA, 25 April 1945; bass guitar) and Doug Clifford (*b* Palo Alto, CA, 24 April 1945; drums). The group was formed by Tom Fogerty in El Cerrito, California, in 1959 as the Blue Velvets; the name Creedence Clearwater Revival was adopted in 1967. John Fogerty, the group's principal songwriter and by this time its leader, reacted against what he saw as the specious cult of instrumental virtuosity and mystical vagueness associated with psychedelic rock; he produced short, tightly arranged songs which drew on the early rock and roll, blues and country styles of Fats Domino, Carl Perkins, Elvis Presley, Howlin' Wolf and Little Richard. Fogerty's lyrics took the American South as a metaphor for freedom, and delineated an ethic of responsibility and compassion to counteract psychedelic hedonism. His singing, rough in style but fervently committed, and resonant guitar playing, with hard, distinct rhythms in fast tempos, characterized the music. The two albums *Creedence Clearwater Revival* (1968) and *Green River* (1969) presented a far-seeing account of the limitations and opportunities of American life.

Between 1969 and 1972 Creedence Clearwater Revival enjoyed considerable commercial success: it performed at the Woodstock Festival, toured Europe and made nine singles and five albums that reached the US top ten. The group disbanded in 1972, after which John Fogerty pursued a solo careeer.

GREIL MARCUS

Crehore, Benjamin (*b* Milton, MA, ?18 Feb 1765; *d* Milton, 14 Oct 1831). American maker of string and keyboard instruments. He was especially noted for his pianos (which he was making by the 1790s), and may be said to be the founder of the New England piano industry. His earliest surviving instrument, however, is a large cello (or 'bass viol'), which, according to its label, was made by him in 1788.

Crehore lived and worked in Milton where, in a modest shop, he produced his instruments and trained the piano builders Lewis and Alphaeus Babcock and William and Adam Bent. Peter von Hagen, with his son, was Crehore's partner in music publishing, and in the sale and tuning of pianos, from May 1798 to June 1799. Von Hagen advertised the availability of a grand piano built by Crehore in 1799, one of the earliest documented instances of an American-made piano of this type. In 1801 Francis Mallet and Gottlieb Graupner advertised 'a large assortment of American Piano Fortes, manufactured by Benjamin Crehore', and in 1807 Graupner advertised a piano with a transposing keyboard 'made, under his direction, after a plan of the Germans, by Messrs Crehore and Babcock of Milton'. Crehore entered into a short-lived agreement with W.M. Goodrich in 1804 to make hybrid piano-organs. From about 1810 to 1814 he worked with the Babcocks and about two years later may have been semi-retired.

At least six cellos and seven square pianos by Crehore survive. The cellos have distinctive scrolls and body outlines. The five square pianos are similar in construction to English instruments of the period. Representative instruments are at the Museum of Fine Arts, Boston.

CYNTHIA ADAMS HOOVER/DARCY KURONEN

Creighton, (Mary) Helen (*b* Dartmouth, NS, 5 Sept 1899; *d* Halifax, NS, 12 Dec 1989). Canadian folksong collector. She studied music for a short period at McGill University and was later a social worker and teacher in Guadalajara, Mexico. Inspired by her fellow Nova Scotian, W.R. Mackenzie, she began collecting maritime traditional folksongs in 1928, sometimes travelling on foot into remote areas to meet performers. In the 1930s Creighton was assisted with the musical transcriptions by the English musician Doreen Senior. During the 1940s Creighton studied at Indiana University and received three grants from the Rockefeller Foundation; she then worked for the National Museum of Canada (1947–67). An ardent preservationist, she recorded over 4000 songs in English, French, Gaelic, Micmac and German (see 'Canada's Maritime Provinces: an Ethnomusicological Survey', *EthM*, xvi, 1972, 404–14) and compiled folksong collections (*Gaelic Songs in Nova Scotia*, Ottawa, 1964/*R*; *Folksongs from Southern New Brunswick*, Ottawa,

1971). She also helped popularize folk traditions, organizing concerts of traditional music and encouraging performers such as the popular Redden family to appear in public. An expert on maritime folklore generally, Creighton was recognized for her work by numerous honours, including having an annual folk festival in Dartmouth named after her. Creighton's papers are in the public archives of Nova Scotia, Halifax and a list of writings was published in her autobiography *A Life in Folklore: Helen Creighton* (Toronto, 1975).

GORDON E. SMITH

Creighton [Crichton, Creyghton], **Robert** (*b* 1636/7; *d* Wells, 17 Feb 1734). English ecclesiastic and amateur composer. He was the son of Robert Creighton (1593–1672), professor of Greek at Cambridge, then Dean of Wells (1660) and finally Bishop of Bath and Wells (1670). The elder Creighton was probably the 'R. Cr.' who signed several pieces in a keyboard manuscript in the Bibliothèque Nationale (1186; *c*1635–8) and was responsible for compiling the volume. The younger Creighton was educated at Trinity College, Cambridge, becoming Fellow (1659) and professor of Greek (1666–72). From 1667 he was a prebendary of Wells Cathedral and held several benefices before and after he became precentor in 1674. He was also one of the king's Chaplains in Ordinary, and received the DD degree in 1678.

As precentor of Wells, Creighton was well placed to indulge his talents as a church composer. Though an amateur, he was scarcely inferior to the general run of his contemporaries, and thus comparable with Henry Aldrich, at least as a composer of services, of which there are nine. These services exist in a variety of sources and await careful reconstruction (see Bumpus and Warren). His E♭ service was printed in Rimbault's *Cathedral Music* (1847), the service in B♭ in Ouseley's *Cathedral Services* (1853). Both are respectable examples of the genre. The anthem *I will arise* has also been highly praised, though possibly because it is a canon 3 in 1 rather than for any other musical qualities. The 3- and 4-part instrumental pieces in the autograph manuscript *GB-Lbl* Add.37074 are written in C and D major and appear to be in the nature of composition exercises. On this evidence it is fairly clear that Creighton needed a text to provide structural and imaginative dimensions to his music.

WORKS

SERVICES

surviving sources have been grouped by key without trying to determine which of two possible services they belong to

[Full and/or Verse] Service, B♭ (TeD, Jub, San, Ky, Cr, Mag, Nunc), *GB-Cu* (inc.), *Lbl*, *Lcm*, (inc.), *Och* (inc.)
[Full and/or Verse] Service, C (TeD, Jub, San, Ky, Cr, Mag, Nunc), *Ckc* (inc.), *Lbl*, *Lcm* ('Short Service' inc.), *Y*
[Full and/or Verse] Service, D, *Ob*
[Longer and shorter] Service, E♭ (TeD, Jub, San, Ky, Dox, Cr, Mag, Nunc), *IRL-Dcc*, *GB-Ckc*, *DRc* (inc.), *EXcl* (inc.), *GL* (inc.), *Lbl*, *Lsp* (inc.), *LF* (inc.), *Ob*, *Och*, *WB* (inc.), *Y*

Crema, Giovanni Maria da. *See* GIOVANNI MARIA DA CREMA.

Crembalum (Lat.). *See* JEW'S HARP.

Cremer, Lothar (Winfried) (*b* Munich, 16 Aug 1905; *d* Miesbach, 16 Oct 1990). German acoustician. He studied mechanical and electrical engineering at the Technical University of Berlin, gaining his doctorate in 1932 for a thesis on sound absorption by porous surfaces. Cremer subsequently engaged in acoustical research at the Technical University and the Heinrich Hertz Institute in Berlin. In 1945 he obtained a teaching post at the University of Munich, and in 1946 established an acoustical consultancy firm in Munich. He was appointed director of the Institut für Technische Akustik at the Technical University in 1954 and of the acoustics division of the Heinrich Hertz Institute in 1955. Retiring in 1973, he remained active in teaching and research until his death. Cremer made many important contributions to the solution of practical problems in noise control and building acoustics. He was acoustics consultant for a number of major halls including the Berlin Philharmonie, the Sydney Opera House and the Madrid Concert Hall. A skilled amateur pianist and violinist, in the 1930s he was an enthusiastic exponent of the trautonium, an early electronic instrument. Cremer later became interested in violin acoustics and was one of the leading figures in the Catgut Acoustical Society. His book *Physik der Geige* (1981) laid a solid foundation for subsequent work on the acoustics of bowed string instruments. The Acoustical Society of America awarded him the Wallace Clement Sabine Medal in 1974 and the Gold Medal in 1989.

MURRAY CAMPBELL

Cremona (i). City in the Lombardy region of Italy. The history of Cremona is characterized by the lack of a local court to subsidize its musical activities. In the Middle Ages musical life was organized around the 12th-century cathedral, whose *Statuta canonicorum* (1247) regulated the performance of music during religious services. Various singers from among the cathedral canons of different eras are mentioned in the *Obituario cremonese*, including Adam, a cantor (1098), Iohannes Bonus de Geroldis, appointed as bishop in 1248, and Magister Prepositinus, chancellor of the Sorbonne between 1206 and 1210. The liturgical repertory of the cathedral is recorded in a gradual (three volumes), an antiphoner (eight volumes) and a psalter and hymnal, all dating from the 15th century and lavishly illuminated; there are other manuscripts which survive from Augustinian and Franciscan convents. The first information on the construction of an organ by Pantaleone de Marchis and Lorenzo Antonio da Bologna dates from 1482; the earliest organists include Bartolomeo de Piperaris, Jacomino de Fixeraghis and Battista de Ferrariis. The organ was reconstructed in 1542–7 by Giovanni Battista Facchetti and became renowned for the brilliance of its sound, due in part to its being tuned to a high pitch, which led in 1582 to a famous dispute involving the Cremona organ builder Giovanni Francesco Maineri and the *maestro di cappella* Marc'Antonio Ingegneri. Information on musical activities before 1526 is fragmentary; on 19 March of that year there is a payment slip in the *Libri provisionum* (*I-CRd*) for the *maestro di cappella* Cesare Zocco and 12 singers. Even for subsequent periods, however, there are few records, partly because of an administrative peculiarity of the cathedral: the board of trustees was responsible for an inclusive payment made to the *maestro di cappella*, who in turn was responsible for paying the individual cantors (the *socii cantores*) and the instrumentalists; this administrative practice was adopted in other Cremona churches such as S Agata which appointed Rodiana Barera on 2 January 1586 together with 'seven persons, including singers and players' (*I-CRas*, Notarile, G.B. Torresini, series 2186). This clearly makes it impossible to determine the names of the various *socii cantores*; in addition, during the mid-16th century it was often the case that the names of the *maestri* appointed were not indicated in the *Libri provisionum*, and their pay was not recorded. Names that are recorded include Ettore Vidua, who died in 1571, and Ippolito Chamaterò, a record of whose service to the cathedral of Cremona is preserved in his settings of the *Magnificat* for eight, nine and 12 voices of 1575.

In the second half of the 16th century the ideals of the Counter-Reformation concerning the renewal of church music had an ardent supporter in Bishop Nicolò Sfondrato of Cremona (elected Pope Gregory XIV in 1590), an admirer and patron of music to whom Ingegneri dedicated his first book of motets (1576) and three other collections of masses and motets. Ingegneri was the most important figure in the city's musical life in the second half of the 16th century. Born in Verona, he was resident in Cremona from at least 1566 at the prelature of Sant'Abbondio. Ingegneri was *maestro di cappella* at the cathedral from 1576 at the latest; although described as cantor, he was responsible for paying all the other regular musicians, including a cornett player, and for organizing the *diversos concentus* of voices and instruments for special occasions. The young Monteverdi probably received his first musical training at the cathedral under Ingegneri, and lived in Cremona until 1591.

From 1596 the Cappella delle Laudi in the cathedral became an important place for Marian devotions and musical activities when the Compagnia delle Laudi del Sabato del Duomo di Cremona was formed; thus there grew up the practice of having a *maestro di cappella* and an organist for this music performed every Saturday evening and on the six feasts of Our Lady. These included Barera (*maestro di cappella*, 1595–1622), Omobono Morsolino (organist, 1596–1611), Nicolò Corradini (organist from 1611 and *maestro di cappella* from 1635 to 1646), Tarquinio Merula (*maestro di cappella*, 1627–30, 1633–5, 1646–55), as well as the cornett player Guilio Cesare Bianchi. Among the various important musicians and theorists of the period born in Cremona and working in other cities were Costanzo Porta, Camillo Angleria, Agostino Licino, Lucrezio Quinzani, Tiburtio Massaino and Benedetto Pallavicino.

The musico-literary Accademia degli Animosi was founded in 1560 with Bishop Sfondrato's endorsement. After an interruption of its activities in 1586, it was reconstituted by Count C. Stanga in 1607 and remained active until 1642 in stimulating the performance of secular music in the city; Monteverdi became a member in 1607. Reconstituted once more in 1644, it continued its activities until about 1692, though with less vigour, particularly after 1675 when it had to compete with the Accademia dei Disuniti, which included mostly commoners. In about 1720 this academy became incorporated with the Accademia degli Arcadi. An exclusively musical academy, the Accademia Musicale, was founded in 1735. Its members, having taken an entrance examination, met twice monthly and soon organized an instrumental ensemble that had the exclusive right of performance in religious and private festive events.

A society that stimulated Cremonese musical life in the first half of the 19th century was the Società Filarmonica, inaugurated in 1816 with a performance of Haydn's *The Creation*. Its statutes prescribed the performance of at least 30 concerts a year, usually held on Friday evenings. Among its members were Donizetti (1816), Rossini (1817) and Bellini (1830). After 1830 it was known as the Casino dei Nobili, since it included mostly members of the local aristocracy who advocated independence from Austrian rule; as a result the society was harassed by Austrian police, particularly after 1838. Following the city's unification with Italy in 1859 the society ceased to exist. In 1908 the Società dei Concerti was founded to promote symphonic and chamber concerts. The city's only professional instrumental ensemble, the Camerata di Cremona, was formed by Ennio Gerelli in 1960.

Cremonese theatrical life suffered from a comparatively late start. In 1670 the Marchioness Giulia Ariberti had a small theatre built for the nobility. It ceased its activities in 1714 and was transformed into a church. The initiative for the construction of a new theatre was taken in 1745 by the Casino di Conversazione, a society of noblemen founded in 1738. The theatre, designed by G.B. Zaist, was a wooden structure with four tiers totalling 100 boxes; it was named Teatro Nazari after its owner, the Marquis G.B. Nazari, and was inaugurated on 26 December 1747 with a performance of a Bolognese comic opera. During its Carnival season and until 1765 comic

operas, frequently brought by Bolognese impresarios, were predominant there. From 1785 to 1806, when it burnt down, the theatre was managed by the Nobile Società del Teatro and renamed Teatro della Nobile Associazione. Another theatre, the Teatro della Concordia, was then built to a design by L. Canonica, modelled after Milan's Teatro Carcano. It was inaugurated on 26 December 1808 with Paer's *Il principe di Taranto* and mostly staged works of the Milanese repertory until it burnt down in January 1824. The new theatre, constructed in stone by L. Voghera and F. Rodi, was inaugurated on 9 September 1824 with Rossini's *La donna del lago*. In the 1890s it featured numerous operas by Ponchielli who was born in Cremona. Named the Teatro Ponchielli in 1892, it was renovated in 1969 and again in 1986.

Stimulated by the musicological heritage of Gaetano Cesari, a native of Cremona who donated his large library to the city administration, the Civico Istituto di Musicologia was instituted in 1949. The Scuola di Paleografia e Filologica Musicale, affiliated to the University of Parma until 1971 and then to the University of Pavia, has been active since 1952; it offers degree courses in musicology, musical education and musical palaeography, and postgraduate courses in musical philology.

Cremona has been universally celebrated since the 16th century for the manufacture of excellent musical instruments, especially string instruments. The tradition was established in the early 16th century by the Amati family, whose craftsmanship led to the design of the modern violin. By 1530 they had already set up a shop in Cremona under the leadership of Andrea. Until well into the 18th century the family constructed string instruments of elegant shape and capable of producing a remarkably mellow tone. Its most illustrious member was Nicolò, who probably trained Antonio Stradivari and Andrea Guarneri. Stradivari was particularly successful in constructing instruments perfectly balanced in design, size and finish. The Guarneri family (especially Giuseppe) concentrated instead on developing a massive build and powerful tone for their instruments. Members of the Bergonzi family were active as instrument makers throughout the 18th century. The Scuola Internazionale di Liuteria helps to maintain the fine Cremonese traditions. The Museo di Organologia A. Stradivari, in the Museo Civico, houses a collection of rare early instruments as well as numerous documents concerning the history of musical instruments.

ELVIDIO SURIAN/RODOBALDO TIBALDI

Cremona (ii). *See under* ORGAN STOP (*Cromorne*).

Cremonese, Ambrosio (*b* ?Cremona, early 17th century). Italian composer. In 1636 he was choirmaster at Ortona Cathedral. In that year he published at Venice *Madrigali concertati a 2–6 voci . . . libro primo* op.1, whose contents show that he was an able composer. The two-part madrigal *Ahi, come un vago sol*, for example, includes some imaginative vocal writing and effective contrasts between imitation and expressive homophony. The first imitative point seems uncomfortably long, however, and the piece is cast in *ABB* form in which the second *B* section is an almost literal repeat of the first. There are three other known pieces by him (two in RISM 1646[3] and one in 1646[4]).

JOHN WHENHAM

Crepitaculum (Lat.). A synonym for SISTRUM. *See also* CYBELE.

Crequillon, Thomas. *See* CRECQUILLON, THOMAS.

Crescendo (It.: 'growing', 'becoming louder'; gerund of *crescere*, to grow). A performance instruction appearing in sources from the 18th century on, abbreviated in earlier sources *cres.* but now *cresc.* and sometimes expressed by means of a 'hairpin'. The forms *crescendo il forte* ('increasing in loudness') and *crescendo sin'al forte* ('growing to *forte*') also appear. The effect is one normal to musical performance though it was rarely indicated in notation until the 17th century, when words and signs for it gradually became common (*see* TEMPO AND EXPRESSION MARKS). Domenico Mazzocchi, in the preface to his *Madrigali* (Rome, 1638), stated that the signs there used for *piano* (*P*) and *forte* (*F*), etc, were for 'common things, known to everyone'; his use of *forte* followed by *piano* and then by *pianissimo* to indicate a decrescendo, and in reverse order a crescendo, was or became a familiar practice, as explained by W.M. Mylius in his *Rudimenta musices* (Gotha, 1686, p.49). Locke used the expression 'Lowder by degrees' (1675). The terms 'crescendo' and 'decrescendo' are in Leopold Mozart's standard list of terms (*Violinschule*, 1756).

The customary 'hairpin' signs for *crescendo* and *decrescendo* became prevalent in the 18th century (at

Hairpin signs for crescendo and decrescendo found in some 18th- and 19th-century sources

least from Giovanni Antonio Piani's op.1, Paris, 1712); and in spite of the evidence for an early beginning to expressive playing it is likely that the very layout of Baroque ensemble music made such swelling a relatively peripheral phenomenon before that date. Sometimes, as in Gluck's and Rossini's printed scores, the 'hairpin' forms appeared as in the illustration. The opinion expressed by Burney (*The Present State of Music in Germany*, 1773, i, p.94) that '*crescendo* and *diminuendo* had their birth' under Stamitz in the Mannheim school is incorrect: both Corelli and Lully had similar reputations in the previous century. But the particular problem solved by the Mannheim orchestra, according to J.F. Reichardt (*Ueber die Pflichten des Ripien-Violinisten*, 1776), was to develop an ensemble capable of graduating dynamics with the sensitivity and accuracy of a soloist. It is possible that even the style of the Mannheim orchestra was derived from that of NICOLÒ JOMMELLI in Stuttgart. A later famous exponent of a particularly long and sustained crescendo was Rossini. What attracted attention in all such cases was not so much the crescendo itself as the precision and persistence with which it was executed, and the systematic deliberation with which it was introduced. So also, some idea of the difference between a natural crescendo (whose history must be limitless) and the studiedly affective crescendo appears in the well-known piece of musicians' lore which says that *crescendo* means 'quiet': it cannot make its point strongly unless the player or players make a deliberate effort to begin quietly.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

ROBERT DONINGTON

Crescentini, Girolamo (*b* Urbania, 2 Feb 1762; *d* Naples, 24 April 1846). Italian soprano castrato and composer. After his studies in Bologna under Lorenzo Gibelli he made his début in 1776, in Fano, in female roles, then in Pisa (1777) and Rome (1778–9). In 1781 he played, for the first time, the role of primo uomo in Treviso. He sang in Naples (1787–9) and in the most important Italian theatres, in London (1785) and from 1798 to 1803 in Lisbon, where he was also manager of the Teatro de S Carlos. He sang in the first performances of *Catone in Utica* by Paisiello (1789, Naples), *Amleto* by Andreozzi (1792, Padua) and *Gli Orazi ed i Curiazi* by Cimarosa (1796, Venice). In 1805 he was in Vienna and from 1806 to 1812 in Paris at Napoleon I's court as singing teacher to the royal family. When he returned to Italy he was appointed singing teacher at the Bologna Conservatory and from 1825 at the Real Collegio di Musica, Naples. His style can be placed in the general return to *patetico* at the end of the 18th century and his ornamentation was never immoderate. Stendhal said that no composer could have written the infinitely small nuances that formed the perfection of Crescentini's singing in his aria 'Ombra adorata aspetta', inserted into Zingarelli's *Giulietta e Romeo*. Isabella Colbran was among his pupils.

Besides his operatic arias he composed didactic and vocal chamber works, which were famous throughout the 19th century. His *vocalizzi* were reprinted (by Ricordi and Lucca) up to the last decade of the century, and were used extensively by singing teachers in conservatories throughout Italy. He was a member of the Accademia di S Cecilia (Rome) and the Accademia Filarmonica of Bologna.

WORKS

Collections: XXII ariettes italiennes, v, hpd/pf (Vienna, 1797); VI ariettes, v, pf/gui (Bonn, 1803); 8 pezzi di canto, v, pf (Paris, n.d.); 6 ariette inedite, v, pf (Milan and Florence, n.d.); 3 cavatine, v, pf (Bologna, n.d.); 6 cantate e 18 ariette, v, pf (Bologna, n.d.); 12 canzonette, v, pf/hp (Paris, n.d.); 8 arie, S, pf, *I-Rsc*; 6 canzoncine, pf acc., *Mc*; Duetti notturni, S, bc, *PAc*, *US-Wc*

NICOLA LUCARELLI

Crescere e scemare di voce (It.). *See* ORNAMENTS, §4.

Cresci, Orazio. *See* CRISCI, ORATIO.

Creshevsky, Noah (Ephraim) (*b* Rochester, NY, 31 Jan 1945). American composer. After early musical studies at the Eastman School (1950–61), he studied with Boulanger at the Ecole Normale de Musique (1963–4), with Thomson at SUNY, Buffalo (BFA 1966) and with Berio at the Juilliard School (MS 1968). In 1969 Creshevsky joined the faculty of Brooklyn College, CUNY, later becoming director of the Center for Computer Music (1994) and professor. He has held teaching positions at Juilliard and Hunter College and was visiting professor at Princeton (1987–8). He has received grants from NEA, ASCAP and other organizations.

By subjecting familiar fragments of words, songs and instrumental music to a variety of electronic processes, Creshevsky projects his music into the region between acoustic and electronic sounds. The boundaries of real and imaginary ensembles are obscured through the fusion of opposites, both in the extreme and unpredictable juxtapositions of iconographic source material in his pop-art text-sound compositions and in later pieces, in which the integration of electronic and acoustic sources produces

'superperformers', hypothetical virtuosos with unattainable performance capabilities. In his compositions of the late 1990s he suggests musical environments which are simultaneously Western and non-Western, ancient and modern, and familiar and unfamiliar, by combining fragmented and reconstructed pre-existing music with new synthetic and acoustic sounds.

□

Crespel, Jean (*fl* 16th century). Flemish composer. Only a few of his works survive complete. Four motets were published by Susato in Antwerp (RISM 1553[16], 1554[8], 1554[9]), and another by Berg & Neuber in Nuremberg (1564[1]); nine chansons by Susato (1549[29], 1552[8], 1552[9], 1555[11]) and 21 by Phalèse in Leuven (1552[12], 1552[13], 1552[14], 1552[15], 1553[24], 1553[25], 1554[22], 1554[23]). A motet and six chansons survive in manuscript (*PL-WRu* and *D-Mbs* respectively).

P. ANDRIESSEN

Régine Crespin as Kundry in Wagner's 'Parsifal'

Crespin, Régine (*b* Marseilles, 23 Feb 1927). French soprano. She studied with Jouatte and Cabanel at the Paris Conservatoire, and made her operatic début at Mulhouse in 1950, as Elsa, the role of her Paris Opéra début the same year. In the next six years, despite further appearances in Paris (as Vita in d'Indy's *L'étranger*, Desdemona and Gounod's Marguerite), her career was more successfully advanced in the provinces, in French opera (Salome in Massenet's *Hérodiade*, Brunehild in Reyer's *Sigurd*), and also in the German and Italian roles, sung in French, with which her international reputation was later made – notably Sieglinde, the Marschallin and Tosca. In 1956 she returned to the Opéra as Weber's Rezia; subsequent successes there led to engagements at Bayreuth, as Wieland Wagner's 'Mediterranean enchantress' Kundry (1958–60), and Sieglinde (1961); and at Glyndebourne (1959–60), as the Marschallin. In this role, an aristocratic, rather melancholy elegance of style and a delicate mastery of nuance, both vocal and dramatic, won her wide praise, particularly in Berlin, Vienna and New York (Metropolitan début 1962). At Covent Garden she played the Marschallin (début 1960), Tosca, Elsa and, less happily, Beethoven's Leonore. She undertook her first Ariadne in Chicago (1964), and her first *Walküre* Brünnhilde at the 1967 Salzburg Easter Festival; but, with the onset of vocal difficulties marked by unease in her highest register, she relinquished the latter role. Having retrained her voice with the German teacher Rudolf Bautz, she began to undertake mezzo roles such as Carmen, Poulenc's Madame de Croissy and (on disc) Massenet's Dulcinée. When she retired in 1989 she had already gained a considerable reputation as a singing teacher at the Paris Conservatoire.

Crespin was the first French singer after Germaine Lubin to command the heroic roles of German and French opera with equal authority; in addition to the idiomatic assurance of her Wagner, she was distinguished for the classical nobility of style in such French roles as Julia in *La vestale*, Berlioz's Dido, and the titular heroines of *Iphigénie en Tauride* and Fauré's *Pénélope*. She was Madame Lidoine at the Paris première of *Dialogues des Carmélites* (1957), and Phaedra in the 1959 La Scala revival of Pizzetti's opera. Although her vocal timbre was not ideally suited to Italian opera, she was a moving Amelia (*Un ballo in maschera*), Desdemona and Tosca. Her singing, in opera and concert, was notable for a remarkable finesse of diction, phrase shaping and tone-colour, capable of transforming a powerful but flawed dramatic soprano into an instrument of smooth, lustrous beauty; in her prime, the eloquence of her soft high phrases was matched by few other singers. A recitalist of great accomplishment, she performed Wolf subtly, and Poulenc and Offenbach with irresistible wit. Her recorded roles include Offenbach's Métella, Grand-Duchess and Périchole, Madame Lidoine, the Marschallin, Sieglinde, the *Walküre* Brünnhilde and Carmen; and, among other works, haunting accounts of Berlioz's *Nuits d'été* and Ravel's *Shéhérazade*. She has published a frank and moving account of her life and career, *La vie et l'amour d'une femme* (Paris, 1982; Eng. trans., rev., 1997, as *On Stage, Off Stage*).

MAX LOPPERT

Creston, Paul [Guttoveggio, Giuseppe] (*b* New York, 10 Oct 1906; *d* San Diego, CA, 24 Aug 1985). American composer of Italian parentage. Born into a poor immigrant family, he had no training in theory or composition although he did take piano and organ lessons with Gaston Dethier and Pietro Yon respectively. He did not decide on a career in composition until 1932. In 1938 he received a Guggenheim Fellowship and in 1941 the New York Music Critics' Circle Award for his Symphony no.1, propelling him to national prominence.

Creston made rhythm the keystone of his style, his technique depending primarily on constantly shifting subdivisions of a regular meter and on irregular ostinato patterns. He cultivated a lush, robust harmonic language derived from Impressionist techniques, using sequences of expanded dominant-quality chords to avoid the establishment of tonal centres while minimizing the perception of dissonance. His forms are clear, concise and well organized, displaying remarkable ingenuity in thematic development, while the music often conveys an impression of brash, hearty spontaneity.

Creston was at his best in large-scale works in which a formal concept is derived from an extrinsic generative idea. An example is the Second Symphony, probably his most distinctive and most representative composition, which won widespread popularity after its première by the New York PO in 1945. This two-movement work embodies Creston's principle that all music is at root either song or dance; several other pieces in two-part form also illustrate this idea. In addition to the Second Symphony, his most important compositions include the Fifth, the symphonic poems *Walt Whitman*, *Corinthians: XIII* and *Chthonic Ode*, and *Metamorphoses* and *Three Narratives* for solo piano.

While such works find Creston setting and meeting a variety of compositional challenges that stretched the parameters of his style, he tended in other genres to restrict his expressive range to conventional formulae. For example, his many virtuoso pieces display a light-hearted exuberance whose tone at times suggests commercial idioms. The best known are those that highlight unconventional solo instruments. He was one of the first composers to produce serious concert works for the saxophone, and featured the marimba, accordion and trombone in solo pieces as well. His many chamber works exhibit a genial insouciance and warm vitality, combining Baroque forms with Impressionist harmony in a manner suggestive of Ibert or Françaix.

During the 1940s and 50s Creston was among the most widely performed American composers, although his work went into eclipse during the 1960s with the ascendancy of more radically modernist approaches. However, with the revival of interest in the American symphonic school, his music has found a new following. Creston received many awards and commissions; he was president of the National Association for American Composers and Conductors (1956–60) and was a director of ASCAP (1960–68). From 1968 to 1975 he was professor of music and composer-in-residence at Central Washington State College, Ellensburg. He was the author of *Principles of Rhythm* (New York, 1964), *Rational Metric Notation* (Hicksville, NY, 1979) and numerous articles. In his writing he analysed four centuries of rhythmic practice, and proposed revisions in notation aimed at eliminating irrationalities and inconsistencies.

WORKS
(*selective list*)

ORCHESTRAL

Partita, op.12, fl, vn, str, 1937; 2 Choric Dances, op.17, 1938; Threnody, op.16, 1938; Mar Concertino, op.21, 1940; Sym. no.1, op.20, 1940; Sax Conc., op.26, 1941; Fantasy, pf, orch, op.32, 1942; Legend, op.31, band, 1942; Frontiers, op.34, 1943; Sym. no.2, op.35, 1944; Poem, op.39, hp, orch, 1945; Zanoni, op.40, band, 1946; Fantasy, op.42, trbn, orch, 1947; Pf Conc., op.43, 1949

Sym. no.3, op.48, 1950; 2-Pf Conc., op.50, 1951; Sym. no.4, op.52, 1951; Walt Whitman, op.53, 1952; Invocation and Dance, op.58, 1953; Celebration Ov., op.61, band, 1954; Dance Ov., op.62, 1954; Sym. no.5, op.64, 1955; Lydian Ode, op.67, 1956; Vn Conc. no.1, op.65, 1956; Toccata, op.68, 1957; Accdn Conc., op.75, 1958; Janus, op.77, 1959; Prelude and Dance, op.76, band, 1959

Vn Conc. no.2, op.78, 1960; Corinthians: XIII, op.82, 1963; Choreografic Suite, op.86, 1965; Chthonic Ode, op.90, 1966; Pavane Variations, op.89, 1966; Jubilee, op.102, band, 1971; Thanatopsis, op.101, 1971; Liberty Song, op.107, band, 1975; Suite, op.109, str, 1978; Festive Ov., op.116, band, 1980; Sādhanā, op.117, vc, orch, 1981; Sym. no.6, op.118, org, orch, 1981; *c*15 other works

VOCAL

4 Songs (R. Tagore), op.7, 1v, pf, 1935; 3 Chorales (Tagore), op.11, SATB, 1936; 3 Sonnets (A. Ficke), op.10, 1v, pf, 1936; Requiem, op.15, TB, org, 1938; Ps xxiii, op.37, S, SATB, pf, 1945; Missa solemnis, op.44, SATB/TTBB, org/orch, 1949; Mass 'Adoro te', op.54, SA/SATB, pf, 1952; The Celestial Vision (Dante, W. Whitman, Arjuna), op.60, TTBB, 1954; Isaiah's Prophecy (Christmas Oratorio), op.80, 1962

Nocturne (W.H. Auden), op.83, S, wind qnt, str qnt, pf, 1964; The Psalmist, op.91, A, orch, 1967; Mass 'Cum jubilo', op.97, SATB, 1968; Hyas Illahee, op.98, SATB, orch, 1969; Leaves of Grass (Whitman), op.100, SATB, pf, 1970; Calamus (Whitman), op.104, TTBB, brass, perc, 1972; *c*15 other solo and choral works

CHAMBER AND SOLO INSTRUMENTAL

5 Dances, op.1, pf, 1932; 7 Theses, op.3, pf, 1933; 3 poems from Walt Whitman, op.4, vc, pf, 1934; Suite, op.6, sax, pf, 1935; Pf Sonata, op.9, 1936; Str Qt, op.8, 1936; 5 2-part inventions, op.14, pf, 1937; Suite, op.13, va, pf, 1937; Sonata, op.19, sax, pf, 1939; Suite, op.18, vn, pf, 1939; 6 Preludes, op.38, pf, 1945; Suite, op.56, fl, va, pf, 1952; Suite, op.66, vc, pf, 1956

3 Narratives, op.79, pf, 1962; Metamorphoses, op.84, pf, 1964; Concertino, op.99, pf, wind qnt, 1969; Ceremonial, op.103, perc ens, 1972; Rapsodie, op.108, sax, pf/org, 1976; Rhythmicon 1–10, 123 studies, pf, 1977; Pf Trio, op.112, 1979; Suite, op.111, sax qt, 1979; other works incl. solo pf, band, inst pieces

WALTER G. SIMMONS

Cresswell, Lyell (Richard) (*b* Wellington, 13 Oct 1944). New Zealand composer. He came from a strong Salvation Army background, and began his extensive musical studies at Victoria University of Wellington with Frederick Page and Douglas Lilburn (BMus 1968) and continued with a Commonwealth Scholarship, at Toronto University (MMus 1970), Aberdeen University (PhD 1974) and a Netherlands government bursary at the Institute of Sonology in Utrecht (1974–5). From 1976 to 1978 he taught at Glasgow University, and between 1980 and 1982 he was Forman Fellow in Composition at Edinburgh, in the final year taking a computer music course at MIT. He was Cramb Fellow in Composition at Glasgow University (1982–5) and then worked as a freelance composer based in Edinburgh, which involved numerous European and antipodean cultural visits. He has been closely associated with the BBC Scottish SO which has given premières of several of his works, notably the Cello Concerto (1984).

Cresswell has a strong response to the natural landscape and ethos of New Zealand. He writes: 'A young country should be able to stimulate a fresh, vigorous and optimistic approach in its artists rather than one of pessimism and cynicism ... it is possible for the New Zealand (and Australian) composer to create a distinct alternative to the various European and American branches of their tradition'. His major works include *Salm* for orchestra (1977), *O!* for orchestra (1982), to mark the centenary of the Salvation Army Band in New Zealand, and *Dragspil* (1994–5), a concerto for accordion and orchestra commissioned for the BBC Promenade concerts. *A Modern Ecstasy* (1986) is a contemporary parable for mezzo-soprano, baritone and orchestra, described by Ian Robertson (*Times Educational Supplement*, 12 May 1989) as 'a masterpiece, the most powerful union of music and words in a plea for sanity since Britten's *War Requiem*'.

WORKS
(*selective list*)

Orch: Salm, 1977; O!, 1982; Vc Conc., 1984; Speak for Us, Great Sea, 1985; Ylur, 1990–91; Dragspil, conc., accdn, orch, 1994–5

Vocal: To aspro pano sto aspro [White on White] (Y. Ritsos), chorus, 1985; A Modern Ecstasy (P. Maguire), Mez, Bar, orch, 1986; Voices of Ocean Winds (C. Brasch), chorus, orch, 1989; Il suono di enormi distanze (M. Bucchieri), Mez, large ens, 1992–3

Chbr and solo inst: The Silver Pipes of Ur, wind qnt, 1981; Str Qt, 1981; The Pumpkin Massacre, 12 solo str, 1987; Passacaglia, large ens, 1988; Sextet, brass, 1988; Atta, vc, 1993

Crevel, Marcus van (*b* Zeist, 16 June 1890; *d* Budel, 1 Sept 1974). Dutch music teacher and musicologist. He took lessons in singing, the violin and keyboard instruments; later, as a teacher, he studied the piano with Dirk Schäfer and theory with Johann Wagenaar. As a headmaster in The Hague he was concerned with the problems of musical education and music for young people; this brought him into contact with Fritz Jöde and other like-minded music teachers abroad. His activities as a music educationist include the founding of a society for folk music and folkdancing (1930), and through his work on a state commission for school music teaching (1946–8) he contributed to the renewal of music for young people in the Netherlands after the war.

In 1940 he received the doctorate at the University of Utrecht with a dissertation on Coclico which he prepared under Smijers. On the latter's death in 1957 he was commissioned by the Vereniging voor Nederlandse Muziekgeschiedenis to complete the second edition of the complete works of Obrecht. Van Crevel's musicological interests covered the central problems of Renaissance music. His work on Coclico contains a critical examination of the problems of *musica reservata* and *musica ficta*, and the latter question is again taken up in his criticism of Lowinsky's *Secret Chromatic Art*. In the controversial prefaces to his two Obrecht mass volumes he advanced a method of transcription, based on a new theory of *tactus*, through which he had discovered a cabalistic numerological symbolism in those works. (*MGG1*, M. van Crevel)

Crisci, Oratio [Cresci, Orazio] (*b* Vasto; *fl* 1581–9). Italian organist and composer. He was a pupil of Ippolito Sabino whose *Secondo libro de madrigali* (RISM 1581[11]) he edited. From the dedication it is clear that he was living in Vasto in 1581. It is not known when he travelled north to Mantua, but he appears to have spent much of his later life there, employed as cathedral organist. All of his known works were published in collections devoted largely to the works of Sabino (1581[11], 1587[13], 1589[16]).

PATRICIA ANN MYERS

Crismann, Franz Xaver. *See* CHRISMANN, FRANZ XAVER.

Crispi, Pietro Maria (*b* Rome, *c*1737; *d* Rome, 16 June 1797). Italian composer and organist. In 1762 he became

a member of the Congregazione dei Musici di S Cecilia. From 1772 until his death he was organist at S Luigi dei Francesi. He was also music tutor to the Marescotti family and was *maestro di cappella* (from 1778) and organist (from 1779) at the Oratorio di S Girolamo della Carità. He composed a large amount of instrumental music, almost none of which was published, also several oratorios and comic intermezzos, most of which are lost although librettos survive. He held a musical *accademia* in his home every Friday evening, at which instrumental and vocal music was performed; his wife, the singer Lucia Puschi, took part, and Crispi himself played the harpsichord. Burney attended those evenings between 23 September and 16 November 1770; during this time his originally lukewarm opinion of Crispi's playing and composition improved.

WORKS

Operas (perf. Rome): Despina serva astuta (farsa, A. Gatti), Pallacorda, 1763; La villegiatura di Rocca Cannuccia (farsa), Pallacorda, 1763; La caccia reale e Gli prodigi di Atlanta (ints, A. Pioli), Tordinona, 1765; Le gare delli amanti (farsa), Pace, 1765; Il marchese a forza (int, 2, Pioli), Tordinona, 1777, *D-Dl*

Sacred orats and cants. (perf. Rome): Oratorio della Passione, *I-Rcsg*; La nuvoletta di Elia (G. Pizzi), 1760; Ester, 1761; Isacco figura del Redentore (P. Metastasio), 1762; La morte d'Abel (Metastasio), 1763; La gara divota (Pizzi), 1763; Oratorio per l'assunzione della Maria Vergine (G. Puiati), 1763; La Giuditta (Pizzi), 1764; Per la festività dell'assunzione di Maria Vergine (G. Ercolani), 1766; La caduta di Gerico (G.C. Pasquini), 1766; Oratorio per S Girolamo Miano (C. Varisco), 1768; La passione di nostro signore Gesù Cristo (Metastasio), 1775; La passione del Redentore (?Metastasio), 1778; Il trasporta dell'arca in Sion (L.A. Lanzi)

GUIDO SALVETTI

Crispin van Stappen. *See* STAPPEN, CRISPIN VAN.

Crist, Bainbridge (*b* Lawrenceburg, IN, 13 Feb 1883; *d* Barnstable, MA, 7 Feb 1969). American composer. He received the LLB degree from George Washington University and practised law in Boston for six years, composing in his spare time. In 1912 he went to Europe to study theory and orchestration in Berlin with Paul Juon and in London with Claude Landi, and singing with William Shakespeare, Charles W. Clark and Franz Emerich. He taught singing in Boston (1915–21) and Washington, DC (1922–3), then returned to Europe and taught until 1927 in Florence, Paris, Lucerne and Berlin. After returning to Washington and teaching there, he settled finally in South Yarmouth, Massachusetts, in 1939. Nearly 200 of Crist's works were published, including 29 for orchestra (mostly with voice), three stage works, 13 for chorus, and many songs. The last were for a time frequently performed and broadcast and are noteworthy for the skilful handling of the voice, the sensitivity of the melodic line, and the aptness and variety of harmony; a number of them (like some of the smaller instrumental works) reflect an interest in the Orient (*Chinese Mother Goose Rhymes*, *Drolleries from an Oriental Doll's House*, *Colored Stars*). Crist published *The Art of Setting Words to Music* (New York, 1944).

WORKS
(*selective list*)

Stage: Le pied de la momie, choreographic drama, 1913; Pregiwa's Marriage, Javanese ballet, 1922; The Sorceress, choreographic drama, 1926

H. WILEY HITCHCOCK

Cristiani, Lisa (Barbier) (*b* Paris, 24 Dec 1827; *d* Tobolsk, 1853). French cellist, possibly of Italian descent. She achieved fame as a performer, at a time when women performers were rare, and as the owner of the very fine Stradivari cello of 1700 which still bears her name. She made tours of Europe and Russia and was enthusiastically received, though her beauty and personal charm undoubtedly contributed to her success. She is said to have performed her repertory of salon pieces sympathetically and elegantly, with small tone but precise intonation. Mendelssohn accompanied her at a concert in Leipzig on 18 October 1845; his *Song without Words* op.109 no.38 (posthumous) was written the same year and dedicated to her. The King of Denmark appointed her 'Chamber Virtuosa'. In 1853 she travelled east on tour; she contracted cholera in Siberia and died within a few days.

LYNDA MACGREGOR

Cristo, Luís de. *See* CHRISTO, LUIZ DE.

Cristo, Pedro de (*b* Coimbra, *c*1550; *d* Coimbra, 16 Dec 1618). Portuguese composer. One source states that his father, António Nunes, was a foreigner, while another tells us that both parents were from Coimbra; his baptismal name was Domingos. On 4 September 1571 he took his vows at the Augustinian monastery of S Cruz in Coimbra, and probably studied with the *mestre de capela* Francisco de Santa Maria. There are signs of the latter's influence within Pedro de Cristo's music, including a fondness for narrow overall ranges (16 notes being typical in the works of Francisco de Santa Maria and in the early part of Pedro de Cristo's surviving output), syllabic declamation in crotchets, and the simultaneous use of a cambiata figure in one part and passing notes in another.

Pedro de Cristo succeeded Francisco de Santa Maria as *mestre de capela* at S Cruz, and held the same position at its principal sister house, S Vicente de Fóra in Lisbon. Although the details of his movements between the two

houses are unknown, the *Capitulo Geral* ordered him to move from S Vicente to S Cruz in 1605, while in 1615 his request to return to S Vicente was granted. A manuscript obituary states that, in addition to his compositions (he was renowned especially for his skill at *chansonetas* and other spirited music), he played keyboard instruments, harp, flute and dulcian.

It is not easy to establish the extent of Pedro de Cristo's surviving output. Four manuscript choirbooks preserved in the Biblioteca Geral of Coimbra University (MM 8, 18, 33 and 36) were copied wholly or in part by the composer. However, he rarely provided an attribution, and, although most of the pieces involved are attributable to him on the basis of style, some are clearly not his work. Looking beyond the autograph copies, a number of items preserved anonymously in *P-Cug* 8, 18, 26 and 53, and in *P-Ln* L.C.57, may be attributed to Pedro de Cristo on stylistic and other grounds (although uncertainties remain, rendering the work-lists below subject to future revision). A striking feature of the surviving output is the dearth of Masses – just one complete Ordinary setting, one ferial Mass and a separate Gloria.

The bulk of two of the autograph choirbooks – *P-Cug* 33 and 36 – was copied early in the composer's career, while work began on *P-Cug* 8 and 18 towards the end of his life. Many motets in *P-Cug* 33 suggest a novice composer, capable but unimaginative in his handling of the *stile antico*. A large proportion of these pieces employ unusually bunched clef combinations (such as C1, C1, C2, C3) and correspondingly narrow ranges. In the other sources one can trace the emergence of more distinctive stylistic traits, particularly in the field of rhythm, where Pedro de Cristo developed the above-mentioned penchant for declamation (and, occasionally, harmonic motion) in crotchets, which was relatively rare in Portugal at that period; this characteristic is found particularly in polychoral works such as the 8th-tone setting of the *Magnificat* and the hymn *Sanctorum meritis* in *P-Cug* 18. The majority of Pedro de Cristo's surviving works are, however, written for four or five voices and in a predominantly imitative style (although homophony is the basic texture in the settings of responsories and psalms, and short homorhythmic passages are common in other works). Among the composer's hallmarks, besides those already mentioned, are concision (the average length of the motets in *P-Cug* 33 is a mere 55 breves) and a fondness for sequence (both melodic and harmonic).

WORKS

in P-Cug unless otherwise stated; only works specifically attributed to the composer, or which bear his clear stylistic hallmarks, are included in this first list

Ecce vidimus eum, 4vv (2 settings, 1 inc. (2vv surviving) in *Ln* L.C.57); Ego sum panis vivus, 4vv, S 31–9; Elegit te Dominus, 4vv; Eram quasi agnus, 4vv (2 settings, 1 in *Ln* L.C.57); Erant autem ibi, 4vv; Es nascido, 4vv, ed. in PM, xxix, 29–34; Fatalis olim, 4vv; Fidelis servus, 4vv; Filiae Jerusalem, 4vv; Fuit homo missus a Deo, 4vv; Gaudeamus omnes fideles, 4vv; Gaudeamus omnes in Domino, 4vv; Gloria in excelsis Deo, 5vv; Gloria laus et honor, 4vv; Gloria patri, 5vv

Hei mihi Domine, 4vv; Hic est beatissimus evangelista, 4vv; Hodie completi sunt, 4vv; Hodie nata est, 4vv; Hodie nobis caelorum rex, 5vv; Hodie nobis de caelo, 4vv (2 settings); Hoy se manda a pregonar, 4vv; Incipit lamentatio, 4vv (2 settings); In exitu Israel, 4vv (2 settings); In ferventis olei, 4vv (2 settings); In illo tempore, 4vv, *Ln* L.C.57; In manus tuas, 3vv; In manus tuas, 4vv; In manus tuas, 5vv; In monte Oliveti oravit, 4vv; In te Domine speravi, 4vv; Inter natos mulierum, 5vv; Inter vestibulum, 4vv, *Ln* L.C.57; Iste est Joannes, 4vv; Iste sanctus pro lege Dei, 4vv

Jesu corona virginum, 4vv; Jesum tradidit impius, 4vv (3 settings, 1 in *Ln* L.C.57); Judas mercator pessimus, 4vv (3 settings); Lachrimans sitivit anima mea, 4vv; Laetatus sum, 4vv (3 settings); Lauda Jerusalem, 4vv (2 settings); Laudate Dominum, 4vv (2 settings); Laudate pueri, 4vv (5 settings); Levavi oculos meos, 4vv (2 settings); Levita Laurentius, 4vv; Lumen ad revelationem gentium, 4vv

Magi viderunt stellam, 5vv; Magnificat, 4vv (7 settings), 1 in M, ix, 8–10, x, 11, xi, 10–11; Magnificat, 8vv; Magnum hereditatis mysterium, 4vv; Mass, 4vv (Ky, San, Ag); Miserere mei Domine, 4vv, M, ii, 9–10; Miserere mihi Domine, 5vv; Miserere mihi Domine, 8vv; Missa Salve regina, 4vv, Ky in S 53–64; Mulier quae erat in civitate, 4vv; Nisi Dominus, 4vv; Non in terrestri, 4vv

O beati viri Benedicti, 4vv; O beatum virum Martinum, 4vv; O crux venerabilis, 4vv; O lux beata Trinitas, 4vv; O magnum mysterium, 4vv (2 settings), 1 in S 1–10; Omnes amici mei, 4vv (2 settings, 1 in *Ln* L.C.57); O praeclara stella maris, 4vv; O quam gloriosum, 4vv; O sacramentum pietatis, 4vv; O sacrum convivium, 4vv (3 settings); Osanna filio David, 5vv

Pange lingua, 4vv; Panis iste verus est, 4vv; Panis quem ego dabo, 4vv (2 settings), 1 in S 40–52; Parce mihi Domine, 4vv; Parce mihi Domine, 8vv; Passion (St John), 3vv (2 settings); Passion (St John), 4vv; Passion (St Luke), 3vv; Passion (St Mark), 3vv; Passion (St Mark), 4vv; Passion (St Matthew), 4vv; Pastorsico porque no vienes, 3vv; Pastorsico porque no vienes, 6vv, ed. Pinho, *Santa Cruz de Coimbra* (Coimbra, 1970), 212–14; Pater peccavi, 4vv, *Ln* L.C.57; Postquam consummati sunt, 4vv; Princeps gloriosissime, 4vv (2 settings)

Quae est ista, 5vv; Quaeramus cum pastoribus, 4vv, S 21–30, ed. B. Turner (London, 1978); Quem vidistis pastores, 4vv; Qui Lazarum resuscitasti, 4vv; Regem cui omnia vivunt, 5vv; Regina caeli, 4vv (3 settings); Salva nos Domine, 8vv; Salve regina, 4vv; Sancta et immaculata, 4vv; Sanctissimi quinque martires, 4vv; Sanctorum meritis, 8vv; Seniores populi, 4vv, *Ln* L.C.57; Similabo eum, 4vv; Si puede el hombre a Deus comer, 4vv; Solus inter apostolos, 4vv; Stabat mater, 4vv; Stella ista, 4vv

Tanquam ad latronem, 4vv (2 settings, 1 in *Ln* L.C.57); Te Deum, 4vv; Tenebrae factae sunt, 4vv (2 settings, 1 in *Ln* L.C.57); [textless: Jesu redemptor?], 3vv (*Cug* 53); [textless], 4vv (*Cug* 36); Thesaurizate vobis, 4vv; Tradiderunt me, 4vv (2 settings, 1 in *Ln* L.C.57); Tristis est anima mea, 4vv; Tristis est anima mea, 8vv; Tristis est anima mea (inc.: 2vv out of a probable 4), *Ln* L.C.57; Tua est potentia, 5vv

Unus ex discipulis, 4vv (2 settings, 1 in *Ln* L.C.57); Una hora, 4vv (3 settings); Ut queant laxis, 4vv; Valde honorandus est, 4vv; Valde honorandus est, 5vv; Velum templi, 4vv (3 settings, 1 in *Ln* L.C.57); Veni creator Spiritus, 4vv; Venite adoremus, 4vv; Vidi aquam, 4vv; Vinea mea, 4vv (2 settings, 1 in *Ln* L.C.57); Virgo prudentissima, 4vv (3 settings)

DOUBTFUL WORKS

included in this list are unattributed works which bear no clear stylistic fingerprints of the composer, but which survive in autograph copies. Other unattributed works in Cug 8, 18 and 53 may well be by Pedro de Cristo

Beata Dei genitrix, 5vv; Dum transisset Sabbatum, 5vv; Incipiunt lamentationes, 4vv; In monte Oliveti dixit, 4vv; Jesu redemptor, 4vv (attrib. to Pedro de Cristo erased in *Cug 53*); Libera me Domine, 4vv; Miserere mei Deus, 4vv (2 settings); Miserere mei Deus, 5vv; Responses, 4vv (2 sets); Responses, 6vv; Te lucis ante terminum, 4vv; Te lucis ante terminum, 5vv

OWEN REES

Cristoforeanu, Florica (*b* Rîmnicu Sărat, 16 May 1887; *d* Rio de Janeiro, 1 March 1960). Romanian soprano. She studied the piano, and later singing, in Bucharest and Milan (at the Giuseppe Verdi Conservatory, with Vanerí Filippi and Bodrilla), making her début as Lucia at Capodistria in 1908. After touring widely in western Europe she returned to Bucharest for performances in operetta (1910–13). Growing international fame led to her appearances at opera houses throughout Europe, notably at Barcelona, and also at the Teatro Colón, Buenos Aires. She made her début as Santuzza at La Scala, where she also appeared from 1928 to 1932 as Salome under Strauss, as Mariola in the première of Pizzetti's *Fra Gherardo* (1928), and as Carmen and Charlotte (*Werther*). By the time she retired she had mastered a repertory of more than 90 roles, embracing mezzo, dramatic, lyric and coloratura parts in opera and operetta. In Bucharest her Cio-Cio-San, Minnie (*La fanciulla del West*), Kundry and Adriana Lecouvreur were especially admired. Her range, both vocal and dramatic, was exceptional, enhanced by a richly coloured timbre and an intense commitment to all her roles. After her death her memoirs *Amintiri din cariera mea lirică* were published (Bucharest, 1964).

VIOREL COSMA

Cristofori, Bartolomeo (*b* Padua, 4 May 1655; *d* Florence, 27 Jan 1732). Italian maker of pianos and harpsichords. He is best known for the invention of the piano. He received an appointment to the Florentine court of Grand Prince Ferdinando de' Medici in 1688 to tune and maintain harpsichords. By 1716 he had become *custode* (steward) of the Medici collection of musical instruments and was working out of rented quarters, independent of the Uffizi artisan workshops. Nothing is known of his early career, but his Florentine years are richly documented. Expense records from Prince Ferdinando's treasury establish the dates of Cristofori's engagement and also his parity with the court musicians. During his first ten years of service he received a monthly stipend and reimbursements for his rent, but after 1698 the prince fell into financial difficulties and payments lagged. Some of Cristofori's invoices survive from the period 1690–98 and from 1711, documenting his duties and expenses. His shop employed at least two assistants, one of whom is known to have been Giovanni Ferrini. Throughout his 44-year career in Florence, Cristofori never joined the Università di Por san Piero e Fabbricanti, the guild to which generations of Florentine harpsichord makers had traditionally belonged. Perhaps this was because he came from Padua where he seems to have owned property and, according to his wills, to which he always wished to return.

By 1700 Cristofori had developed a hammer-action keyboard instrument capable of dynamic gradations. Exactly when he began working on a piano design is not known. Perhaps early efforts caught the attention of Grand Prince Ferdinando and precipitated Cristofori's appointment, or perhaps his first work on it was not until the late 1690s. The earliest known reference to a Cristofori piano is the anonymous Medici inventory of 1700. It describes a harpsichord-like instrument ('arpicimbalo'), 'newly invented by Bartolomeo Cristofori', with hammers and dampers and two 8′ choirs, having a range of four octaves, *C–c‴*;. Whether Cristofori's work on the piano was part of his court responsibilities or was to some degree independent of the Medicis is an open question (the spurious yet often cited *memoria* of Francesco Mannucci, known only from Fabbri, cannot credibly serve as contemporary testimony). In 1711 the Italian poet Scippione Maffei published an illustrated description of Cristofori's piano. In the draft to that article Maffei wrote that Cristofori had worked only on his own volition, contradicting a modern theory that the piano was developed at the behest of Grand Prince Ferdinando. Whatever the prince's interests, Cristofori's invention found widespread currency outside the Medici courts. Maffei wrote that by 1709 two pianos had been sold in Florence and another was owned by Cardinal Ottoboni in Rome. A 1725 translation of Maffei's article circulated north of the Alps, where it was probably read by Gottfried Silbermann, whose own pianos were closely modelled on a Cristofori prototype and later introduced to J.S. Bach. By 1732 Silbermann had come to know a Cristofori piano at first hand; he may have purchased it himself, or it could have been brought to Dresden by Antonio Lotti. Eventually Cristofori's instruments became familiar to Queen Maria Barbara of Spain, the patron of Domenico Scarlatti. Lodovico Giustini's 12 sonatas of 1732, *da cimbalo di piano, e forte, detto volgarmente di martelletti*, are the earliest pieces written specifically for the piano and were dedicated to the queen's uncle, Don Antonio of Portugal, a pupil of Scarlatti.

Surviving instruments, harpsichords as well as pianos, exhibit Cristofori's tremendous ingenuity. He had grasped the technical crux of piano engineering, incorporating intermediary levers between hammer and keylever, backchecks, the separation of soundboard from stress-bearing functions of the case sides and hitchpin rails, as well as many other technical subtleties (*see* PIANOFORTE, §I, 2). Cristofori had also developed spinet designs (such as the *spinnetone*, and the so-called oval spinet of 1698 described in his bills and now in Leipzig) having multiple choirs enhancing their theatre use. His instruments ranged from the conventional to those variously employing 4′ and 2′ choirs, shifting keyboards, distinctive closed-top jacks, a variety of registration mechanisms, unique stringband configurations, floating hitchpin rails, double bentsides, and in one case – the 1698 oval spinet – a double, criss-crossing balance rail. Only three Cristofori pianos are extant (of 1720, in New York; 1722, in Rome; and 1726,

in Leipzig, illustrated in PIANOFORTE, fig.2), all made after his Medici patrons had died.

MICHAEL O'BRIEN

Criticism. Music criticism may be defined broadly or narrowly. Understood narrowly, it is a genre of professional writing, typically created for prompt publication, evaluating aspects of music and musical life. Musical commentary in newspapers and other periodical publications is criticism in this sense. More broadly, it is a kind of thought that can occur in professional critical writing but also appears in many other settings. In this broader sense, music criticism is a type of thought that evaluates music and formulates descriptions that are relevant to evaluation; such thought figures in music teaching, conversation about music, private reflection, and various genres of writing including music history, music theory and biography.

I. General issues. II. History to 1945. III. Since 1945.

I. General issues

1. Definition. 2. Subjectivity and objectivity. 3. Critical language. 4. Objects. 5. The historical phenomenon. 6. Limits and the future.

1. DEFINITION. Although many references to music criticism imply the narrow definition, it is important to understand criticism broadly in order to see the continuity among various activities of musical interpretation and evaluation. Professional journalistic criticism is a specialized, if highly visible, instance of a more widespread phenomenon. Members of an audience discussing a classical performance during an interval, piano teachers persuading their students to favour certain styles of performance and composition teachers responding to student projects all engage in music-critical discourse, just as fully as the paid critic whose words will appear in a newspaper or magazine. Again, a composer working on a score, a performer preparing a performance or a listener at a concert will typically engage in critical thought, even though they may not speak their thoughts or even formulate their critical ideas linguistically.

Music criticism does not include every kind of evaluation of music. Music serves many different purposes, such as worship, advertising, therapy, social dancing, enhancement of public and commercial spaces and technical development of performance students. Judgments of the usefulness of music for those purposes fall outside music criticism, as normally conceived. But the concept is flexible and it would be rash to delimit it rigidly. And some purposes, uses or functions of music are relevant to criticism; purposes such as representation and emotional expression have often figured in music criticism.

European traditions of music criticism centring on concert music and opera typically treat music as an art, as do critical traditions worldwide that derive from European models. In such discourse, music is one of several art forms along with literature, visual art, architecture, theatre and dance; this assumption reflects a conceptual formation that is historically and geographically specific. Often, in music criticism, the central goal is to evaluate and describe music as art, or as an object of aesthetic experience. Thus the concept of music criticism links with concepts of art and the aesthetic that are important in European and European-derived cultures but which have been persistently controversial and difficult within those cultures. Much complex debate in philosophical discussions of art concerns appropriate definitions of art and aesthetic experience, and these discussions bear directly on the nature of criticism (*see* PHILOSOPHY OF MUSIC).

2. SUBJECTIVITY AND OBJECTIVITY. Music criticism presupposes cultural competence, or what one can call an 'insider' role. Someone who makes critical judgments about music, whether as a professional critic or not, must think about music as a member of some community to which the music 'belongs', a community in which the music is important. Membership in a musical community is a criterion of the validity of critical thought about the music of that community. This criterion, although essential, is vague, leaving room for dispute about whether, for instance, someone with extensive literary experience may be qualified to evaluate music by virtue of generalizable expertise in the arts, or whether a more specifically musical background is crucial. But, however construed in detail, the fact that critical thought originates in the sensibility of members of a musical or artistic community distinguishes it sharply from objective or scientific approaches to music, which should be open to practice by anyone, regardless of musical sensibility. Further, the primary audience of critical discourse is also delimited by membership in an appropriate community. Critics write about the music of their own group, for other members of that group.

Critical judgments of music originate in experiences. They depend on experience of the object of criticism, whether a composition, a performance, or some broader phenomenon such as a style. ENLIGHTENMENT thought, which remains influential for current conceptions of criticism (especially in philosophical aesthetics), tended to emphasize the separateness and autonomy of individuals. Enlightenment thinkers, not surprisingly, emphasized the origin of artistic or aesthetic judgments in the experiences of distinct individuals and then found puzzles

in the relationship between individual subjectivity and the normative character of the judgment: it is not easy to see how one individual's personal experience can lead to a claim that is valid for others, a claim that has something like the authority of a statement of fact. If the critical authority is legitimate, it seems there must be something special about the critic, or about the experience, that explains the authority.

Some accounts of critical authority, from the Enlightenment on, focus on the disinterested quality of aesthetic experience: aesthetic experiences can lead to normative judgments because no personal, contingent, variable traits of the critic have affected the judgment. Someone who makes a critical judgment can act as a good representative of a larger audience, able to articulate judgments for them by eliminating the distinctive feelings that separate the critic from others. Immanuel Kant, in the best-regarded account of this type, stressed the absence of desire in aesthetic contemplation as a way of explaining how aesthetic judgments could be universal. Kant emphasized the contrast between a mere report of personal pleasure and a judgment of beauty, the latter being free from desire and therefore deriving from shared, non-contingent human nature. Although experiences of pleasure and beauty are both subjective, only the judgment of beauty, because of its freedom from individual idiosyncrasy, carries the implication that others should reach the same conclusion. Eduard Hanslick followed this tradition in his arguments that emotional and bodily responses to music, since they vary with different individuals, cannot contribute to musical beauty.

Another approach focusses on the special knowledge and training that support a critical judgment, as when knowledge of music theory and music history are said to be essential qualifications, for a professional music critic. The music critic, so conceived, becomes a representative of experienced or cultivated musicians, and can act as an educator in relation to a larger, diverse audience. A tension arises between these two approaches, one grounding critical authority in the absence of individualization, the other grounding critical authority in special knowledge and training that distinguish the critic from many other people. Issues about critical authority are not just issues about the proper philosophical account of the practice. Such issues are internal to musical culture, creating a characteristic ambivalence about music criticism, not least in its professional forms. Audience members may wonder why one listener has the authority to make public judgments, and musicians may wonder why someone who is not a distinguished practising musician has the authority to judge musicians' work. Ambivalence about the adequacy of linguistic communication about music casts further doubt on the authority of criticism.

Music criticism in its professional, public forms emphasizes and perhaps exaggerates the individualistic aspect of critical thought, separating one person from the rest of the community, giving a voice to that person and, temporarily at least, silencing others. Like Enlightenment aesthetics, professional criticism creates an on-going drama of the isolation of an individual thinker from the rest of the musical audience and draws attention to puzzles about their relationship. This extreme individualism is probably misleading as a basis for general reflections on critical thought; attention to the on-going evaluative and descriptive practices that pervade other parts of musical life might provide a useful balance. In many aspects of music education, for instance, teachers communicate critical judgments as established, communally shared views rather than as products of individual thought. And critical interpretation and judgment often take place in informal conversations, through shared development and adjustment of thought rather than isolated reflection. However, the individualistic conception of criticism matches some other aspects of European and European-derived musical culture. Critics resemble composers, solo performers and conductors in their presentation of articulated, individualized products to a larger community. All these practices create and sustain shared conceptions of individualized subjectivity. While critical thought need not be as individualistic and isolating as Enlightenment theory or professional criticism suggest, the most individualized kinds of criticism are ideologically congruent with other components of classical music culture.

3. Critical language. Critical thought can shape experience, performance or composition without reaching explicit verbal formulation, and can find direct expression in performance, composition or purchase of concert tickets or recordings. But professional music criticism usually appears in writing, and other kinds of criticism find linguistic expression as well.

Music criticism may balance evaluation and description, or it may emphasize one over the other. Journalistic criticism will almost certainly include clear evaluative judgments, along with variable amounts of description. Academic discourse, which often values impersonality, may describe and interpret aspects of music while withholding explicit evaluation; nonetheless the implicit evaluations are often obvious, and the interpretative goals of, for instance, analytical writing often qualify it as a genre of music criticism.

Interpretative and evaluative language about music are variable and can become topics of debate. Terms of praise and disparagement change, and choices reflect historical contingencies of evaluation. Enlightenment writers' discussions of 'beauty' and 'sublimity', or Hanslick's theoretical focus on 'beauty', give their treatments a specific character, raising certain issues at the cost of others, as do Donald Tovey's discussions of 'infinity' or Schoenberg's 'idea'. The same is true of the range of evaluative terms in any critic's practice.

Descriptive and interpretative language in criticism ranges from technical analysis, to attributions of affect or expression, to the many diverse possibilities of figurative language. Beyond issues of vocabulary there are broader literary options, such as Schumann's critical essay in the form of conversations among fictional characters, or the attribution of programmatic content beyond a composer's authorization. Critical language used in interpretation of music can itself become a topic for interpretation; the interpretative issues include, on one hand, the relation of the critical language to the music and to listeners' experiences, and on the other hand, the relation of the language to other discourses of arts criticism, literature, philosophy and so on.

4. Objects. Music criticism often describes and evaluates musical works, compositions. But there are ambiguities and complexities in criticism of musical works, and often criticism concerns itself with other objects. Musical

works are not identical with performances or scores; they are, perhaps, abstract entities that can be apprehended through performance and that have their identity fixed through scores. Some music criticism, possibly in imitation of literary criticism, treats musical works as the basic units for critical evaluation and interpretation; this was true, for instance, of scholarly criticism as pursued by some North American musicologists in the 1980s. However, the central role of performance in musical life does not match any aspect of prose fiction or poetry, and criticism that centres on musical works often neglects the contribution of performance.

Music criticism has often shown a particularly intense concern with a canon of musical works, evaluating new compositions in light of their potential contribution to the existing canon (*see* CANON (iii)). On one hand, since the musical canon is commonly understood to be a collection of musical works, this approach may reinforce the emphasis on works as the primary objects of criticism. But on the other hand, as performances of old, critically accepted compositions have become the norm in 20th-century concerts, criticism of performance has often been the dominant kind of professional critical discourse.

Thus, paradoxically, the complete domination of concert life by an established canon can direct attention away from the individual works in the canon and towards the performances of them; or, in a further twist, attention may turn to the developing careers and characteristics of individual performers, who themselves take on the aesthetic qualities of a work of art, inviting study, appreciation and interpretation on their own. Thus, rather than writing an appreciation of a particular composition, a critic may write primarily about Horowitz or Callas. Within professional criticism, such a focus on performers and performances has been more characteristic of journalistic writers than of academic ones; in the last years of the 20th century, however, musical performance also became a significant topic within scholarly musicology.

Music criticism can also take musical styles, encompassing many individual works, as a central topic. In fact, changes of style have historically been a basic concern of professional criticism, as the historical portions of this article show clearly. The tradition continues to the present, though journalists' persistent declarations of the death of serialism may lack the currency and intensity of earlier stylistic debates.

Finally, new technology has introduced recordings as a distinct object of critical consideration. For some types of music, including much popular music and almost all electronic music, recordings are obviously the appropriate object of judgment, not only because they are the marketed objects about which musical consumers make decisions but because the musical work is itself a work created in sound: in such cases, recordings do not document performances but, instead, present the work directly. But for more traditional classical music – that is, music where scores determine the identity of works and performers offer live and recorded performances – recordings also threaten to eclipse other, more traditional objects of critical attention.

5. THE HISTORICAL PHENOMENON. The historical sections of this article that follow are concerned with European and North American music criticism, and for the most part they begin their chronicles in the 18th or 19th centuries. This focus may seem limiting, but more probably it reveals that music criticism as a distinct form of thought is geographically and historically specific.

Plausibly, the existence of criticism requires particular conceptions, institutions and practices. This interdependence of criticism with other contingent aspects of musical life is clear for professional music criticism (which, for example, depends on the existence of public concerts and, more recently, the circulation of recordings) but may extend, more broadly, to critical judgment as a whole. Perhaps music criticism, as a distinct form of thought, depends on many of the historically specific phenomena already mentioned, such as the conception of a system of art forms; the high value placed on individual experience, along with ambivalence about the authority of public critics; the complex dialectic between common humanity and a special, exclusive musical training; the interactions among scores, performances and works; the development of a musical canon; and the notion of music history as a succession of stylistic transformations (*see* RECEPTION). Perhaps one can imagine a music criticism that lacks most of these historical attributes, perhaps not; it would be different from criticism as musicians and audiences in European traditions have come to know it.

6. LIMITS AND THE FUTURE. Like any specific type of thought, music criticism is suited for certain goals and unhelpful for others. As a form of thought shared among members of a musical community, criticism promises to intensify an awareness of shared musical experience, circulate influential models for musical listening and creating, and also, through the formulation of discrepant evaluations and interpretations, enhance awareness of diversity within a musical community. Because of its emphasis on individual experience as the source of insight, and on membership in a musical community as a criterion of critical validity, music criticism is less suited to gaining knowledge of remote cultures. It may seem irrelevant or even offensive for an ethnomusicologist to evaluate the music of a foreign culture in critical terms. However, some recent approaches to ethnography and ethnomusicology decrease the starkness of the contrast with criticism.

The traditional notion of the ethnomusicologist as an outsider to a culture, and the related notion of ethnographic objectivity, may need revision. If ethnography is conceived as an individual person coming, through a continuing series of interactions, to share the lives and musical experiences of other people, ethnomusicology may come closer to music criticism than one might have expected. Still, even if one writes ethnomusicological texts by weaving together cultural description with one's own experiences, including musical experiences, the results will lack many of the distinctive traits of traditional music criticism. In particular, an ethnomusicologist's personal descriptions of musical experiences in the field will lack the critic's authoritative tone; instead, the ethnomusicologist will present one perspective, a distinctly finite one, on musical phenomena for which other perspectives, based on more extensive experience, are also possible.

Such a refusal of critical authority is also possible within one's own culture. Some recent ethnographic studies have mapped attitudes of ordinary people or musical fans, in a democratic spirit that grants the writer no special critical standing.

Even more radically, some writers have challenged the validity and self-understanding of criticism quite

generally; Theodor Adorno and Pierre Bourdieu have offered especially sustained, troubling accounts. Adorno argued that the lack of individual freedom in modern life, along with the commodification of music, left no-one in a position to make the kind of free, individual aesthetic judgment that Enlightenment thinkers described. The Enlightenment conception of aesthetic evaluation persists, according to Adorno, only as an ideology that covers the reality of commercial exploitation of musical consumers. Bourdieu argued that musical and other artistic tastes served primarily as a medium of social signification, specifically a means of locating oneself within hierarchies of economic class, employment and education. Philosophical accounts that ground taste in a special artistic sensitivity are, according to Bourdieu, an ideology that hides the more mundane operations of taste as a marker of social location. The claims of these influential writers might suggest that one cannot, in honesty, continue to practise traditional musical criticism. Readers who find their diagnoses insightful but exaggerated are left with the task of assessing how one might, in light of Adorno's or Bourdieu's best ideas, continue to pursue some kind of critical discourse.

Some recent writing has explored more specific conceptions of subjectivity, creating a discourse that resembles criticism without aspiring to general validity. Arguably, criticism that claims to represent the shared experiences of a musical community is more likely, in fact, to represent the subjectivity of some privileged group within that community. Feminist critics have suggested that the privileged perspective of critical discourse is masculine; gay and lesbian critics have suggested that mainstream critical discourse assumes a heterosexual orientation. Feminist, gay and lesbian writers have often shown sensitivity in negotiating the relation between individual and collective experiences: while suggesting that dominant discourses have excluded some voices, they offer alternative perspectives poised between individual statements and more general representation of the minorities for which they hope to speak (*see* FEMINISM and GAY AND LESBIAN MUSIC).

Criticism of POPULAR MUSIC has been one of the most accomplished and productive areas of recent professional criticism. Several writers, notably Simon Frith and Greil Marcus, have moved between journalistic criticism and sustained scholarly writing with remarkable ease and success. Frith has argued that evaluation of popular music draws on a range of different criteria, including the individualistic artistic standards of art music, the more collectively orientated standards of folk music and the commercially inflected standards of pop itself. In its blend of contrasting criteria, such discourse may exemplify valuable extensions beyond traditional music criticism. Marcus has produced several bold studies that shift provocatively among personal description, critical judgment and imaginative historical narrative.

The figure of the isolated, prestigious professional music critic, while congruent with the individualistic aspects of some musical cultures, is also, to some extent, a product of limited technologies. As new technologies reduce the importance of print communication, notions of music criticism may shift as well. Electronic communication, through sites on the World Wide Web, electronic mail distribution lists and newsgroups have already permitted an enormous increase in communication among people with shared musical interests; the effects are particularly striking for popular music fans, who have accepted the new media avidly. Online, they can share information and opinions rapidly and can quote and discuss print reviews as soon as they appear. Electronic communication allows many people to circulate critical thought to an interested audience, an opportunity previously available only to select professional critics. It also allows for fast-paced exchange, and for the formation of opinion and perception through the interactions of conversation, always a possibility in face-to-face interactions but now occurring on a much larger scale.

II. History to 1945

1. Germany and Austria. 2. France and Belgium. 3. Britain. 4. Italy. 5. Russia. 6. USA and Canada.

1. GERMANY AND AUSTRIA.

(i) 18th century. Johann Mattheson inaugurated the German critical tradition, publishing several periodicals in Hamburg between 1713 and 1740. The prologue to the most important of them, *Critica musica* (1722–5), defines criticism as 'the precise examination and evaluation of ... opinions and arguments in old and new literature about music ... for the elimination of all possible primitive [*grob*] errors and to promote greater growth in the science of pure harmony'. Mattheson published annotated translations of English and French

authors, and wrote lengthy reviews of foreign and German writings on music as well as essays on theoretical, compositional and aesthetic problems. His criticism includes neither performance reviews nor critiques of entire compositions as integral works of art, though specific works are occasionally criticized in order to demonstrate technical errors (principally in part-writing) and stylistic weaknesses.

Mattheson's emphasis on rhetorical principles for formal organization and for a unity of affect and figure motivated his inflammatory criticism of word repetitions in J.S. Bach's cantata *Ich hatte viel Bekümmernis* (*Des poetischen Vorhofes*, ii, pt 8, p.368). This and other equally polemical attacks, for example on Handel's St John Passion, established a model for the disputatious tone of much subsequent German criticism. Mattheson argued for dramatic church music; advocated a new melodic style – practised by himself, Telemann and Handel – as opposed to strict 'German' polyphony; and, although wary of the 'unnatural patchworks' in Italian instrumental music, called for a 'mixed taste' incorporating aspects of both French and Italian music. The question of national styles and tastes dominated critical discourse for much of the 18th century.

Mattheson's approach, expressed in a turgid literary style, was essentially scientific, and it was soon challenged by new critical perspectives. Leading the way was *Der critische Musikus* (Hamburg, 1737–40), a 'moral weekly' that was somewhat less scholarly than Mattheson's journals and directed towards a broader public. Its editor, Johann Adolph Scheibe, a disciple of Johann Christian Gottsched, prescribed a critical view informed 'only' by 'good taste' (preface to vol.ii), that was predicated on French classical-rhetorical ideals of rationalism and simplicity, the imitation of nature and truth of expression. Although Scheibe's (acknowledged) debts to Gottsched are deep, he and later critics with similar values did not support Gottsched's denial (based on a reading of Batteux's *Les beaux arts reduits*) of the legitimacy of instrumental music. Criticizing the 'blind imitators of the Italians', Scheibe distinguished between 'taste' and 'style' and advocated a 'purity of national [i.e. German] style' that preserved the principles of French good taste (Cowart, 1981, p.135). This led him to deplore the 'unnatural' qualities in Bach's music, which he admired in many other respects. In emphasizing expression and good taste, rather than imitation and affect, Scheibe's writings marked a distinct break with Baroque musical thought.

By 1750 Berlin had replaced Hamburg as the leading centre for criticism. (Only in the 19th century did music journalism and criticism become permanently established in southern Germany and Austria.) Topical essays and reviews of scholarly publications retained their importance, and criticism continued to be preoccupied with the relative merits of the French and Italian styles, and with the broader questions of musical taste, unity and meaning. The francophile Friedrich Wilhelm Marpurg (*Der kritischer Musikus an der Spree*, 1750) and Johann Friedrich Agricola, who championed Italy, engaged in bitter polemic. Quantz pleaded in his essay on flute playing (1752) for a 'mixed taste', but most Berlin critics were conservative, anti-Italian and wary of the emerging Classical styles, with their increased emphases on contrasts and virtuosity. In the last decades of the century, critics such as Johann Nikolaus Forkel and Johann Friedrich Reichardt approached the music of Haydn and Mozart (and even sometimes the exemplary C.P.E. Bach) with caution, acknowledging its virtues but warning against the dangers of the style in the hands of less accomplished or more radical composers. Beethoven's early works confirmed their fears. Although these critics shared many views with their mid-18th-century counterparts, they did not consistently invoke such concepts as taste and national style; however, they did maintain an emphasis on such traditional categories as naturalness, unity and expressiveness. In the 1770s and 80s Gluck's operas became the subject of a major debate. Conservatives (especially those connected with the Berlin court) decried Gluck's lack of invention and expression, and compared him unfavourably with Graun and J.A. Hasse; other Berlin critics (such as Carl Friedrich Zelter and Reichardt) championed his reforms. Forkel devoted 150 pages of the first volume of his *Musikalisch-kritische Bibliothek* (1776) to polemics against Gluck by various authors. The attacks on the claims made by Gluck's supporters that his music was (or should become) a model for the German nation anticipated arguments *contra* Wagner a century later.

In part because critical writing in the 18th century focussed on style rather than on individual works, criticism regularly appeared in non-journalistic publications such as treatises on performance, counterpoint (Fux, *Gradus ad Parnassum*, 1725) and thorough bass (Heinichen, *Der General-Bass*, 1728), and later in encyclopaedias (Sulzer, *Allgemeine Theorie*, 1775), aesthetic writings and compositional treatises (Koch, *Versuch einer Anleitung zur Composition*, 1782). After about 1750 critical writing by non-musicians such as K.W. Ramler, Nicolai and Lessing appeared in publications of a general scholarly and aesthetic nature; their work, together with the minimal but slowly increasing coverage of music and musical life in daily newspapers in major northern cities, introduced the critical discussion of music to the non-professional reader in Germany.

Johann Adam Hiller's *Wöchentliche Nachrichten und Anmerkungen, die Musik betreffend* (Leipzig, 1766) laid the groundwork for future music journalism and criticism by introducing non-critical information about new books and printed music, musicians, public concerts, and musical activities at courts and churches; performance critiques (usually sympathetic); and brief evaluative commentary (usually positive) on new compositions, as well as occasional long reviews of operas or instrumental works. In later criticism such commentary often fell under the rubric *Rezension*, a term earlier critics had used for reviews of scholarly literature. Hiller relied on reports by correspondents in German and foreign cities; he focussed on newsworthiness as well as scholarship, and even in the more learned articles a concern for intelligibility and popularity is evident. Forkel and Reichardt (*Musikalisches Kunstmagazin*, Berlin, 1782 and 1791, and later publications) placed even more emphasis on detailed work critiques that included musical examples, and which were often harshly judgmental. Nonetheless, their reviews rarely delved deeply into the music, eschewing analysis and relying instead on vague aesthetic argumentation of a general nature. One notable exception is Forkel's review of Benda's *Ariadne auf Naxos* (*Musikalisch-kritische Bibliothek*, iii, 250–85), in which he made minor revisions to selected passages in the opera and compared them to

Benda's originals in order to demonstrate their shortcomings. Operas, church music, keyboard music and song collections were the preferred genres for criticism.

(ii) 19th century.

(a) Music journals and books. The *Allgemeine musikalische Zeitung of Leipzig*, often considered the first modern music journal and the first organ for modern music criticism, was neither. Friedrich Rochlitz, its founder (1798) and long-time editor, consolidated the innovations begun by Hiller, adding more work and performance criticism by drawing on primarily amateur correspondents in many cities (particularly for concert reviews) across German-Austrian territories and abroad. The journal's success and influence derived in part from its ability to meet the needs of a growing musically literate public (both amateur and professional) in a time of rapid expansion of published music and public concerts. It became a model for the music journals that proliferated in German-speaking Europe and contributed significantly to the development of a modern musical culture.

The *Rezension* continued to be the major forum for work criticism in the 19th century. Such criticism had three distinct emphases: explication of a work's structure and style – the forerunner of modern analysis; evaluation of a work's artistic success, with or without an explanation of the critic's own aesthetics and stylistic preferences; and interpretation of a work's content (*Inhalt*), ideas (*Idee*) or spirit (*Geist*) – a type of inquiry described today as hermeneutic. Early in the century criticism in the last category often relied on generally descriptive language, later, and continuing into the 20th century, poetic allusions and programmes were common.

The challenges posed by Beethoven's music provided a major stimulus to the development of German music criticism. E.T.A Hoffmann's celebrated review of the Fifth Symphony (*AMZ*, 1810) began a tradition of serious Beethoven criticism in Germany and elsewhere. As the century progressed, Beethoven interprtation drove a wedge between the practitioners of 'absolute' criticism focussing on form and style and those favouring biographical and programmatic modes of explanation. It was the 'newness' of Beethoven's music, its often startling departures from stylistic conventions, that required explanation and interpretation. At the same time, explanations were required for the music of J.S. Bach and other Baroque and Renaissance composers, who had in the 18th century attracted the attention of historically orientated critics (Forkel on Bach, Herder on Palestrina). This music, which gradually became more widely known through occasional performance and publication, was for contemporary listener also startlingly new in its historical distance, its very oldness. Marx's discussion of the *St Matthew Passion* in the *Berliner allgemeine musikalische Zeitung* in the weeks leading up to its revival under Mendelssohn in March 1829 was a critical milestone. Rochlitz also made a significant contribution to historical criticism with his book *Für Freunde der Tonkunst* (1824); it contained essays on Bach (notably the *St John Passion*), Handel and other composers, some of which first appeared in the *AMZ*. Rochlitz's discussion of Bach's style – notably his appreciation for Bach's counterpoint in the *AMZ* essay *Vom Geschmack an Sebastian Bachs Compositionen besonders für das Clavier* – displays remarkable insights clearly expressed and free from Romantic gushing. Schumann, Wagner, Eduard Hanslick and many other critics also republished their music journalism in book form. Collections of essays, biographies and work-orientated monographs became important vehicles for criticism in the 19th century.

(b) Newspaper criticism and feuilletons. In the late 18th century the *Vossische Zeitung*, a political newspaper in Berlin, began regular coverage of music with an emphasis on performance. Its first distinguished critic was J.C.F. Rellstab; his son, Ludwig, became the paper's music editor in 1826. The rapid growth of music journalism, especially after the relaxation of censorship laws in the mid-1800s, gave rise to a new critical genre, the *feuilleton*, derived from French journalistic practice (see 2(*i*), below). The writer of the *feuilleton* could exercise great power. Wagner, a master feuilletonist and opponent of most criticism, wrote: 'It is the *feuilleton* that creates music'. Newspaper criticism was largely non-technical, focussing on stylistic and aesthetic questions and emphasizing pithy evaluation rather than elucidation. Hugo Wolf's remark, in a review of Liszt's symphonic poems, that there was 'more intelligence and sensibility in a single cymbal crash in a work of Liszt than in all of Brahms's three symphonies' (*Wiener Salonblatt*, 27 April 1884) illustrates the sarcastic and often cutting tone adopted by many feuilletonists. Wolf's broadside was aimed as much at Eduard Hanslick, opponent of Liszt and Brahm's leading critical advocate, as at the composer himself.

A new critical approach that considered musical works in relation to social institutions, socially determined cultural values and political trends developed in the *feuilleton* and in journals devoted to general culture (e.g. *Zeitung für die elegante Welt*), as well as in popular and scholarly music journals. Heinrich Heine's essays on Mendelssohn and Liszt for the Augsburg *Allgemeine Zeitung* in the 1830s are among the first and best of their kind. Wagner attracted particular attention from such critics as early as the 1840s: themes of nationalism, religion and philosophy, and anti-Semitism (in the operas and the essays) in all prbability more interesting to readers of the general press than questions of musical style, structure and aesthetics. As early as the 1820s, and increasingly in the years leading up to the revolutions of 1848, cultural and national destiny were viewed by critics such as A.B. Marx and Franz Brendel as a symbiosis. In the decade after World War I the controversy between the Weimar liberal Paul Bekker and the reactionary nationalist Hans Pfitzner about the future of German music reflected a wider debate about the future of German society. The feuilletonistic tradition was the wellspring for the music criticism of Theodor Adorno, who combined social theory (and journalistic wit) with detailed discussion of immanent music content. However, the scholarly complexity of Adorno's writing was worlds apart from the *feuilleton*.

(c) Critiques of criticism. Until the advent of fascism, German music criticism had two continuing preoccupations: criticism itself, and the concept and problem of progress (*Fortschritt*) (see §(*d*), below). The legitimacy of criticism *per se* was closely linked to the question of criteria and standards. As early as 1752 Quantz in the *Versuch einer Anweisung die Flöte traversiere zu spielen* described the arbitrary way criticism was usually practised. In 1802 H.G. Nägeli published a long essay in the *AMZ*, addressed to reviewers for the journal, in which he attempted to determine norms for sound and fair criticism.

Others discussed difficult questions of the legitimacy of anonymous reviews, of reviews of works published by the firms that also published the journals in which the review appeared, and of achieving a balance of subjectivity and objective standards (if, in light of Kant's critical writings, any notion of objective standards could be maintained). Under the influence of Kant, Reichardt printed numerous music examples in his work critiques so that musically literate readers could assess the basis of his judgments and form their own. He also published excerpts from Kant's *Kritik der reiner Vernunft* on the problem of a theory of artistic taste (*Musikalisches Kunstmagazin*, ii, 1791, p.65). The Hegelians Marx and Brendel solved the problem of subjectivity by appealing to the objectivity of historical progress. In the first issue of the *Berliner allgemeine musikalische Zeitung* Marx justified a new music journal by arguing that the Kantian perspective of the *AMZ* had outlived its usefulness. Nevertheless, Marx acknowledged the essential subjectivity of criticism by publishing several reviews of the same work, a practice also adopted in the important journal *Caecilia* (1824–48).

The *Neue Zeitschrift für Musik* was conceived in part as a critique of criticism: Schumann founded the journal in 1834 to combat the conservatism and low critical standards of his personal antagonist Heinrich Fink, Rochlitz's successor at the *AMZ*. Under the rubric 'Journalschau', the first ten issues of the *Neue Zeitschrift* reviewed the work of its competitors. In his announcement of the new journal (*Der Planet*, 21 March 1834) Schumann issued a summary judgment:

> What, then, are the few present musical journals? Nothing but playgrounds for ossified systems, from which, even with the best of will, hardly a drop of the sap of life can be pressed, nothing but relics of aged doctrines to which adherence is more and more openly denied, nothing but one-sidedness and rigidity ... individual, eccentric opinions, prejudices, fruitless personal bickering and partisanship so loathsome to the better young artists. None of this number, with the possible exception of the *Caecilia*, is capable of promoting the true interests of music.

Schumann's emphasis on professionalism – that is, on musicians rather than dilettantes as critics – influenced the increasing trend in this direction after 1850. It was further bolstered by the development of academic positions in music, with professors such as Hanslick doubling as critics. In the late 1800s Hanslick and other professional critics wielded far more power than writers for music trade journals in shaping public opinion and influencing the establishment of permanent repertories. Notwithstanding the literary qualities and the musical acumen of Schumann's criticism, both his originality and his contributions to the development of music criticism have been overemphasized; his literary conceits belonged more to the past than to the future of criticism.

As the influence of critics increased, composers and performers grew ever more sensitive to the real or imagined impact criticism could have on their careers. The *Gazette musicale de Paris* (which reported on and was read in Germany) was founded in 1834 by the publisher Maurice Schlesinger to give composers a chance to write criticism; in the first number Liszt attacked critics as shallow and ignorant and suggested they be subjected to knowledge and ability tests. In the late 1840s a commission was formed by the Berlin Tonkünstler-Verein to consider appeals from musicians who felt that they had been treated unfairly by critics; its judgments were printed in the *Neue Berliner Musikzeitung* (Kirchmeyer, 1965, p.237).

(d) The question of progress. The concern with progress is closely associated with the critical agendas of Wagner and Brendel, Schumann's successor at the *Neue Zeitschrift für Musik*, champion of Wagner and Liszt, proponent of New German music drama and programme music, enemy of Brahms and Hanslick. Wagner's criticism constitutes not only a defence of his own music and theory but also a critique of contemporary German musical culture – musical style and values, notably with respect to opera, performing practice, and musical and theatrical institutions – with unequivocal recommendations for their reform. (Marx and other liberal mid-century writers also called for a reform of musical institutions.) Brendel utilized the historical style-critical essay, rather than the work *Rezension*, to make Hegelian arguments about the exhaustion of tradition and the historical necessity of the genres and styles that he and his colleagues advocated. Brendel's influence was great; he did much to polarize German musical thought, yet also helped to identify the primary aesthetic and stylistic problems in the decades after 1850.

The debate about progress began in the 1820s and 30s with the praise for Weber and attacks on Spontini, as well as a less polemical discussion calling for reform of operatic institutions and the creation of a truly German opera. Marx, like Brendel and Wagner, posited Beethoven as a model for a future German music that had to adjust to new social conditions and recognize the stylistic and aesthetic advances he had achieved. Even Marx's criticism of earlier music was informed by a view of history and progress: he declared Graun's *Der Tod Jesu* (which had never disappeared from the concert repertory) inappropriate for a new musical and social period, in contrast to Handel's oratorios and Bach's Passions which had retained their value. Schumann's campaign against the empty virtuosity of contemporary pianists (and the lack of a serious critical voice opposing them) was driven by a concern for the future of German music in the wake of Beethoven's and Schubert's deaths, and the consciousness that a period in German music had come to an end. Yet Schumann, too, viewed Beethoven as the primary source from which music could continue to rejuvenate itself. The dominance of the idea of progress at mid-century can be measured by two examples: in 1846 Otto Lange, a lead writer for the *Neue Berliner Musikzeitung*, proclaimed progress as the standard for criticism (although a year later he attacked *Rienzi* for being too radical), while the young Hanslick, invoking *Fortschritt*, praised *Tannhäuser* and proclaimed Wagner 'the greatest dramatic talent among the living composers' (*Wiener allgemeine musikalische Zeitung*, vi, 1846, p.590), words he no doubt later regretted.

For Lange, and for conservative critics such as the mature Hanslick and his student Robert Hirschfeld, who was more sympathetic to Wagner, stylistic innovation that disregarded the preservation of supra-historical structural principles and aesthetic values, embodied principally in the music of Beethoven and Mozart, did not constitute progress. The historical relativism of this view, especially evident in Hanslick's dislike for most pre-Classical music, either did not occur to the conservatives or did not disturb them.

(iii) 1900–1945. The problem of progress assumed increased urgency towards the turn of the century, when the mature works of Strauss and Mahler began to appear, and intensified after Zemlinsky and other radical innovators emerged. General newspapers were the most significant arena for the often bitter debate about new music, in which composers themselves sometimes joined (e.g. Schoenberg's essay on 'Brahms the progressive'). In larger cities, notably Berlin and Vienna, critics engaged in intracity polemics with political dimensions: those writing for liberal and leftist newspapers (many of them Jews) generally sympathized with new styles (although the atonal and 12-note music of the Schoenberg group presented problems for such writers as Guido Adler, Bekker and Alfred Einstein), while critics of right-leaning newspapers opposed the musical avant garde and not infrequently supported their attacks with nationalistic arguments and anti-Semitic invective (see Botstein, 1985, p.1298 on Mahler criticism in Vienna). In 'Arnold Schönberg, der musikalische Reaktionär' (1924), Hans Eisler opposed the formalism and bourgeois character of the music of his former teacher; the essay inaugurated the German Marxist critique of the musical avant garde, which after World War II found its principal home in the German Democratic Republic. Ernst Bloch (who also lived in the east after his return from exile) and Adorno (who returned to West Germany) were the principal practitioners of an idiosyncratically Marxist music criticism and philosophy associated with the 'Frankfurt School' of social research.

Because of their immediacy, performance reviews of new works in general newspapers were at least as important as *Rezensionen*; the latter appeared more commonly in specialist publications. Yet even scholarly journals did not ignore the controversies, and new publications such as *Melos* and *Musikblätter des Anbruch* advanced the modernist cause. *Melos* was founded in 1920 by Hermann Scherchen, who wrote a thunderous denunciation of Pfitzner in the first volume, yet encouraged dissenting views as long as they remained within a general philosophical consensus; the journal became a forum for the Schoenberg-Stravinsky debate that occasioned Adorno's first published venture into music criticism ('Über die gesellschaftliche Lage der Musik', *Zeitschrift für soziale Forschung*, 1932), in which he argued that the cultural critique inherent in Schoenberg's music constituted a progressive element (contrasting with the reactionary character of Stravinsky's music) independent of the composer's personal political convictions or his professional associations with mainstream cultural institutions.

In the years following the Nazis' seizure of power in 1933, leftist, liberal and Jewish music critics and academicians lost their jobs at newspapers and universities; many of the most prominent liberal and Marxist critics (Adorno, Bloch, Bekker, Einstein, Eisler, Stuckenschmidt, Weill) went into forced or voluntary exile (*see* NAZISM). Non-Fascist German music criticism survived principally in the USA in the form of the scholarly critical essay. Thomas Mann's essay 'Leiden und Grösse Richard Wagners', first given as a lecture in Munich in February 1933 and published in Germany in April of that year, which precipitated a storm of protest leading to Mann's exile, was one of the few public expressions of opposition to the regime. *Melos*, which like other music journals and newspapers adopted an increasingly conservative standpoint, was renamed *Neues Musikblatt* in 1925; despite its support for Hindemith in the early 1930s, it succumbed to *Gleichschaltung*, the centralization of every aspect of cultural life in the Third Reich. To facilitate control by the Party, and also to save money, other musicological journals were merged.

For the most part, active intervention by the regime in journalism and criticism was not necessary; the academic backgrounds of many non-Nazi music critics inclined them to musical conservatism, from which perspective many found sufficient common ground with the reactionary nature of Nazi cultural politics to cooperate (Lovisa, 1993, p.21). Despite the departure of the great majority of critics intolerable to the Nazis, in 1936 Joseph Goebbels issued his *Kritikverbot* requiring a positive discussion of German music and musical life. National Socialist critics had no business condemning the efforts of National Socialist musicians; constructive criticism was permissible, but divisiveness was inimical to the unity of purpose that should motivate every cultural activity, and was therefore embarrassing to the regime. On the other hand, critical vigilance against the decadence of modernism and Jewish, Bolshevik, African-American and all other non-Aryan musics was to be maintained as a bulwark against influences that had formerly undermined the purity of German music. All writing about music, popular and scholarly, was (or was supposed to be) critical; it was (or was supposed to be) informed by an evaluative racial theory, a belief in Aryan cultural superiority and a commitment to a National Socialist revolution. With its mission of educating the population (*Volksbildung*) in light of this commitment, music criticism in the Nazi period perverted – but in its perversion continued – a 200-year tradition.

2. FRANCE AND BELGIUM.

(i) General. Tinctoris's evaluations of his predecessors and contemporaries, as presented in his 15th-century treatises, mark the start of a rich tradition of criticism in France and Belgium. Nevertheless, music criticism *per se* was sporadiz before about 1700; thereafter the dominant media for comment were the polemic pamphlet, encyclopaedia and newspaper articles, and music histories. In the 19th century the polemic pamphlet was absorbed into the increasingly popular genre of the newspaper *feuilleton*, an often witty essay on a topical subject which filled the lowest part of one or more pages. The sudden proliferation of the specialist musical press immediately before and during the July Monarchy (1830–48) served to define most of the parameters and functions of music criticism up to 1945. Periodicals devoted to piano music, church music, the orphéon repertory, composition, children's musical education and the *café-concert* appeared between 1833 and 1870.

Detailed comments on performed interpretations became common only in the 1850s, and were often intimately linked with questions regarding the upholding of the performance traditions of works in the canon. Journals such as *Le ménestrel*, *La revue et gazette musicale* and, in Belgium, *Le guide musical* blurred the boundaries between music criticism, aesthetics, concert reviewing, music theory and analysis, and provided a forum for a discipline which gained autonomy in the early 20th century: historical musicology. Jules Combarieu's *Revue d'histoire et de critique musicales*, begun in 1901, marks a transitional stage in the separation of criticism and

musicology within the periodical literature. The first musicological journal, in the modern sense, was *L'année musicale* (1911–13).

Until 1820 the concept of the professonal music critic hardly existed. *Littérateurs* and philosophers such as Diderot and Raguenet routinely included music in their purview, as did the musically illiterate Geoffroy, the 'inventor' of the newspaper *feuilleton* who wrote for the *Journal des débats* between 1800 and 1812. It was Castil-Blaze, critic of the *Journal des débats* from 1820, who proclaimed it necessary that a critic possess specialist musical credentials, an issue later taken up by François-Joseph Fétis. The phenomenon of the composer-critic, which stretched from Berlioz to Poulenc and beyond, reinforced the professional status of music criticism in the early 19th century. However, Romanticism's emphasis on the interpenetration of the arts ensured the survival of the amateur or artist-critic, and professional and non-professional streams in music criticism co-existed until the advent of strictly musicological journals.

The roots of modern French music criticism in debates dominated by *littérateurs* encouraged a literary mode of presentation which continued through the 19th century in the criticism of Baudelaire and Champfleury, and into the 20th. The title of Raguenet's *Parallèle des Italiens et des Français* (1702) was modelled on that of a famous work in the 17th-century literary battle of the ancients and the moderns: Charles Perrault's *Parallèle des anciens et des modernes* (1692). The dialogue form of Le Cerf's anonymous response (see below) was rooted in a French literary tradition also used by Claude Perrault in his *De la musique des anciens* (1680), and which later reappeared in pieces as diverse as Diderot's *Le neveu de Rameau* (*c*1760) and Wagner's *Une soirée heureuse* (1841). The use of rhetorical and poetic prose characterized not only elaborate polemic outbursts but also daily opera and concert reviews. In particular, towards the end of the 18th century a rhetoric had to be devised for absolute music in a country in which texted music had long prevailed. Writers in the early 19th century dramatized the symphonies of Haydn in prose laden with metaphorical images intended to stimulate an appreciation of the expressive content of the music, and Hoffmannesque tales became a medium for music criticism in the early 1830s. By contrast, early professional critics such as Fétis cultivated a selfconsciously arid style in which displays of rhetorical prowess were subordinated to detailed technical description. A fusion of both approaches may be seen in the work of Berlioz, which served as a model still detectable in the criticism of Florent Schmitt in the 1920s.

(ii) National identities and styles. The importance of critical debate as a part of the assimilation process was aptly expressed by Jean Chantavoine in the aftermath of Stravinsky's *Le sacre du printemps*: 'In France, music has often been less an object of immediate pleasure, as in Italy or Germany, than a subject of controversy. It is often by means of their influence on people's minds, the ideas which they have suggested and the debates which they have aroused, that particular works have become established' (*L'année musicale*, 1913, p.287). Important debates concerned the aesthetics of composition, the relationship of music and technology, and the use of jazz in art music. From the reign of Louis XIV, however, most major debates related in some way to the upholding of French tradition in contradistinction to those of first Italy and then Germany. After Belgium's independence in 1830, such isolationist attitudes were most pronounced in work published in Flemish. Francophone critics such as Fétis and Paul Collaer, who divided their time between Belgium and France, represented a more internationalist viewpoint. Fétis's short-lived *Gazette musicale de la Belgique* (1833–4) contained a news section on musical life in Belgium but was otherwise almost indistinguishable from the French *Revue musicale*. It was succeeded by journals that emphasized Belgium's national musics, though a strong injection of Wagnerism characterized Maurice Kufferath's directorship of *Le guide musical* from 1890, and by the outbreak of World War II Belgian journals were leading the way in the production of multilingual, internationalist criticism.

The polemic on the relative merits of French and Italian operatic styles, which began in the late 17th century with the writings of Perrin and De Callières, dominated the 18th century and spilled over into the 19th. Raguenet's pro-Italian *Parallèle* praised the French use of the bass voice and dramatic recitative, and the elegance of their ballets, while somewhat inconsistently apologizing for the dramatic, harmonic and orchestral boldness of the Italian style, the supremacy of the castrato voice and the superiority of Italian staging. Le Cerf responded by defending the classic qualities of Lullian opera, allying himself with the literary 'ancients'. Nationalist factionalism based on similar arguments returned with the Querelle des Bouffons of 1752–4. Traditionally ascribed to the catalyzing effect of performances of Pergolesi's *La serva padrona* in 1752, the debate exploded only the following year, after the première of Mondonville's *Titon et l'Aurore*. Pro-Italians included Grimm, Rousseau and Diderot; the pro-French camp counted Jourdan, Fréron, Laugier and – tardily but decisively – Rameau. The third major critical quarrel with Italy, centring on Gluck's final visit to Paris in 1777, was foreshadowed by an exchange between Du Roullet and Gluck in the *Mercure de France* in 1772. Du Roullet presented Gluck as a staunch francophile in matters of operatic aesthetics, while Gluck denied any partisan allegiance. Nevertheless, in the late 1770s Gluck cast himself as the upholder of French standards of dramatic realism which the Piccinnistes, among them Marmontel and La Harpe, decried as entailing the sacrifice of the highest ideals of symmetrical periodicity and pleasing melody.

New genres of absolute music reached France from Germanic lands in the late 18th century. Early criticism such as that in Garcin's *Traité du mélo-drame* (1772) focussed on an issue that characterized writings on German music throughout the 19th and early 20th centuries: its harmonic complexity. Haydn and Mozart, among the first composers after Lully to retain their place in the French repertory after their deaths, became test-cases in the critical formulation of a canon of masterworks whose conditions of entry were hotly debated thereafter. General acceptance from 1759 of Haydn as a symphonist and composer of chamber music did not extend, later in the century, to Mozart. During and after the Revolution, Republican critics on the far left argued for the abolition of all music which had flourished under monarchical absolutism. Conservatives and pro-Italians such as Geoffroy found Mozart's operas too symphonic, too complex, and over-charged with melodic ideas that were not truly lyrical; yet Geoffroy recognized the fusion of Italian and

German principles that Mozart's operatic style represented. German-Italian polarization was revealed again in Stendhal's writings and in Joseph d'Ortigue's critique of Rossini (1829), which pitted Italian superficiality against the German profundity epitomized by Beethoven. Such squabbles did little to mask critical unease regarding the value of Franco-Belgian music, particularly opera, where the perception of national styles of *opéra comique* and grand opera which sat squarely between the Italian and the German, avoiding the excesses of each, gained a strong philosophical underpinning only during the eclectic period of the July Monarchy.

(iii) Beethoven and Wagner. The mixed early critical response to Beethoven was encapsulated in a comment of 1811 in the rabidly pro-Italian journal *Les tablettes de Polymnie* that his music 'harboured doves and crocodiles together'. Intense and protracted debate was sparked only in 1828, with the re-institution of regular concerts at the Paris Conservatoire. Fétis (*Revue musicale*), Castil-Blaze (*Journal des débats*) and, later, Berlioz (*Gazette musicale*) were instrumental in moulding public opinion regarding Beethoven's orchestral music; concentrated discussion of the late chamber music, promoted by the Pierre Maurin quartet, did not appear until the 1850s.

Fétis was the central figure in Franco-Belgian music criticism from 1827 to well after the Franco-Prussian War. A Belgian who divided his career between Paris and Brussels, he had a decisive influence on the discipline in both countries. His eclectic aesthetic, which resulted in support for Meyerbeer, Mendelssohn and Halévy, was antipathetic to the Romantic view of his main critical rival, Berlioz, though he is remembered chiefly for his writings on music of which he disapproved (Berlioz, Wagner) or about which he was ambivalent (Beethoven, Liszt). Fétis's work on Wagner illustrates how his writing could shape an entire controversy. He opened the Wagner debate in 1852 with an assessment of the composer's writings rather than his music, much of which he had not heard. His view that *Tannhäuser* and *Lohengrin* were the product of Wagner's theories as stated in *Oper und Drama* fundamentally affected the terms in which both adversaries and supporters of Wagner couched their reviews of the Paris *Tannhäuser*.

The various stages of the Wagner debate, which took on a particularly nationalist allure after 1870, 1914 and 1939, were notable for their tendency to concentrate on an idea of Wagner, rather than on the operas and music dramas themselves. Linguistic limitations meant that Dujardin's *Revue wagnérienne*, which brought together symbolist poets including Mallarmé, could engage only tentatively or at second hand with Wagner's writings and librettos, few of which were available in translation. The result was a highly idiosyncratic view of Wagner which was almost inevitably disappointed with the reality of the French première of *Lohengrin* in 1887. *Fin-de-siècle* Wagnerism was better served in Belgium by the writings of Kufferath.

In France, critical reaction against Wagner at the end of the 19th century and the beginning of the 20th involved two disparate groups: conservatives and followers of the Saint-Saëns school, including Arthur Pougin and Camille Bellaigue, who argued the pernicious nature of Wagner's influence on French and Belgian music and the resultant degeneracy of national culture; and those who believed they had found Wagner's antithesis in Debussy, particularly after *Pelléas et Mélisande* (1902), which found an immediate and improbable supporter in Vincent d'Indy and became a symbol of national solidarity during both world wars. The nationalist poetics of Debussy's own criticism, particularly his article on Frenchness in Rameau, undoubtedly helped cement such attitudes. Debussy's music prompted new critical questions concerned primarily with perceived national character traits (restraint and clarity) and a new emphasis on colour. With Debussy, 'matière sonore' first became a parameter of composition worthy of critical attention. Yet his status as a saviour of the French from Wagner was never safe from attack, and it was not only members of the old guard who labelled him a decadent threat to French composition.

(iv) 1900–1945. The most widely acclaimed foreign music to reach France in the first decade of the 20th century was that of the Russian 'Five' and their successors. Here, as Emile Vuillermoz explained in 1905, was a vibrant music untouched by the 'mal du siècle' which dogged other composers, Debussy included. By the 1920s critics such as Schmitt were apt to view both Debussy and The Five as killers of the Bayreuth giant. The presence in Paris of the Ballets Russes from 1909 onwards ensured regular attention to new Russian music in the period up to 1914, climaxing with what *Le ménestrel* dubbed 'Le massacre du printemps' in June 1913. Other foreign composers attracting attention before 1914 included Strauss, Mahler and composers of *verismo* opera, who drew nearly universal condemnation. Strauss was particularly problematic to French critics, who oscillated, often in a single article, between revulsion from the banality and tastelessness of his primary material, and admiration for the opulent originality of its presentation. In times of heightened nationalism, Strauss, as Wagner's successor and the incarnation of German artistic values, was among the first whose 'quarantine', to use Gaston Carraud's term, was demanded. Nationalist concerns were pre-eminent during and after World War I, with critics such as Carraud preaching isolationism even from the music of France's allies. Among music journals, *La musique pendant la guerre* (1915–17), headed by Francis Casadesus, most closely approached propaganda.

Among the new topics of criticism that surfaced in the interwar years was the relationship of music and technology in the forms of cinema and the gramophone. As early as 1903 Jules Combarieu welcomed the gramophone and lamented its invention after the deaths of Falcon, Mario and Rubini; record reviews date only from the late 1920s. Cinema music was more contentious, provoking aesthetic debates concerning the problem of adapting pre-existing music to moving images, and prompting critics, among them Gabriel Bernard in *Le courrier musical* and Jean d'Udine in *Le ménestrel*, to call for dedicated film music composed in the tradition of the symphonic poem. A second new strand of criticism dating from around 1920 reflected an interest in the socio-political contexts of new music; it focussed initially on Bolshevik Russia and broadened in the 1930s to take in Germany, Italy and democratic nation-states. While editors such as Henry Prunières prided themselves on an apolitical stance, journals such as *Le courrier musical* in France and *La revue internationale de musique* in Belgium, provided a forum for socio-political criticism of music and its institutional bases.

A third brand of criticism, dating from the 1920s, concerned jazz, whose reception was characterized by a sectarianism among critics which was unknown in other areas of music criticism. Specialist jazz magazines with a strong American flavour and sometimes bilingual format appeared from 1930, their critics jealously defending their specialist status in contradistinction to writers in mainstream art-music periodicals such as the *Revue musicale*, which printed several positive articles on jazz from 1927, of which one was written by the acknowledged leader of jazz criticism in France-Hugues Panassié, whose style of writing could hardly have been further removed from that of his jazz-magazine supporters. For Panassié, defining 'swing' adequately and defending the status of the jazz musician as a creative and technically sophisticated artist were necessary preconditions for the legitimation of jazz, which, until the first concert of 'hot' jazz at the Paris Hot-Club in 1933, the French art-music world had experienced only through dance bands and the music of Krenek, Weill and Gershwin. In the later 1930s, attention focussed on the increase of white influence (a row catalysed by the perceived status of Benny Goodman in comparison with that of black clarinettists) and its attendant slick commercialism, which writers such as Joost van Praag (*Le jazz-hot*) saw as portentous of a loss of the 'authenticity' of the black style.

In the 1920s Jean Cocteau's aesthetic as promulgated by 'Les Six' received a warm welcome from critics such as J.-M. Lizotte, who detected in it a return to the simplicity of line and texture, health and clarity of quintessentially French music – features that were also attributed to Ravel in contrast to Debussy. Among the international musical styles presented to critics in the interwar years, that of the Second Viennese School caused the most heated debate. Conservative journals such as *Le ménestrel* poured scorn upon Schoenberg, the 'integral cubism' of whose music was, even by supportive modernist journals such as Prunières' *La revue musicale* and *La revue internationale de musique*, compared unfavourably to that of Berg. Only Schmitt proved a consistent champion of Schoenberg and Webern, calling *Pierrot lunaire* 'compressed beauty'. The increasingly virulent criticism of Modernist styles caused concern among composers. A sense of cultural crisis is apparent in the opening numbers of *Musica viva* (1936), a multilingual modernist journal published in Brussels which attracted articles from Krenek, Martin, Busoni, Markevitch and Closson. In France more pressing nationalist concerns came to the fore after the outbreak of World War II, prompting Collaer and others to delve deep into French cultural history and highlight elements of French civilization that demanded protection and renewal. The German occupation caused more complex difficulties. According to Robert Bernard, *La revue musicale* closed down in 1940 because it was no longer free to support composers such as Milhaud, Hindemith and Schoenberg. *Le ménestrel* and *La revue internationale de musique* also suspended publication, the former permanently. In 1940 Bernard set up *L'information musicale*, his aims (as revealed in the first post-war issue of the *Revue Musicale*) being to devote most of his space to French composers and to ensure as frequent mention of prohibited figures as was consistent with retaining permission to print. Despite its subversive content, it was the only specialist music periodical published during the occupation.

3. BRITAIN.

(i) To 1890. Among the earliest British writers who consciously sought to persuade readers of a musical point of view are the philosopher John Case and the composer-editor Thomas Morley. In *Apologia musices* (1588) Case was concerned to establish music's utility in every aspect of life, as well as to analyse its categories and conventional modes. He defended music in the theatre and instrumental music in religious practice, and praised contemporary English composers including Byrd, Morley and Dowland. Morley himself stands out as a propagandist for Italian styles in his *Plaine and Easie Introduction to Practicall Musicke* (1597), which became a standard textbook of modern composition.

Throughout most of the 17th century, however, the correct uses of music remained a matter for debate. Henry Peacham appealed to moderation in *The Compleat Gentleman* (1622), advocating music in both church and home on grounds of historical precedent and efficacy, but also warning against too serious a devotion to it. Charles Butler's *Principles of Musik* (1636) likewise pleaded the cause in both sacred and secular contexts, while sermon and pamphlet writers weighed in on the Puritan side, firmly rejecting any music but congregational psalm singing. The issue continued to exercise polemicists after the Restoration, linked with a newer threat to national identity – music on the stage, especially Italian opera. Meanwhile conservatism of a different kind surfaced in the treatise by Thomas Mace, *Musick's Monument* (1676), which, among other things, pointed out the decline in performance standards at churches and cathedrals, and criticized the new French instrumental style that was displacing traditional English forms. (John Evelyn's diary expressed similar thoughts.) Despite their critical intent, however, none of these writers deserves the name of music critic as fully as Roger North, whose range of interests, musical perception and literary approach were unrivalled. In *Memoires of Musick* and *The Musicall Grammarian* (written *c*1695–1728; both unpublished at his death) he treated musical life from the Commonwealth to Purcell and Corelli, as well as musical aesthetics, the nature of harmony, and musical styles appropriate to church, chamber and theatre. North filled a comprehensive gap in criticism, though he lacked a contemporary readership.

Some writers felt antipathy toward theatre music in particular. Arthur Bedford's *The Great Abuse of Musick* (1711) is a notorious example, although his argument for the renovation of music, and hence morals, hinged on a revival of earlier religious styles and composers: at heart what he distrusted was modern music. Among commentators better placed to treat the genuine artistic problems of English opera, Davenant, Motteux, and especially Dryden and Addison had important things to say, based on neo-classical doctrine and practical experience. These are found not only in prefaces to their librettos (1656–1708), discussing conflicting claims of music and poetry, and language in speech, song and recitative, but also, for the first time, in public journals. Both Motteux's *Gentleman's Journal* (1692–4) and Addison's *Spectator* (1711–12; 1714) contain critical opinion on opera as a genre. (The *Spectator*'s shrewd mix of social observation and criticism touched popular and religious music as well, and, as a new approach to public discussion, influenced Johann Mattheson in his founding of *Critica musica*.) In

this context Addison is best known for his satirical treatment of the extravagances of Italian opera – new to London in 1705 – yet he was by no means insensitive to the possibilities for an eloquent accommodation between music and poetry, for a rational opera in English. By comparison his friend Richard Steele was reactionary and xenophobic; in his plays and verse, and his essays in *The Tatler* (1709–11), Steele ridiculed every association of opera, from castratos and the supposed effeminacy of the form to imagined threats against English spoken drama and the Anglican Church. Despite its early detractors, Italian opera established itself and found articulate support throughout the 18th century; John Brown's *Letters upon the Poetry and Music of the Italian Opera* (1789) made convincing reading well into the 19th century.

Apart from moral, political and practical concerns about music-making, various 18th-century writers addressed music philosophically, as an agent of meaning and emotion in human experience (*see also* PHILOSOPHY OF MUSIC, §III, 1). Following in the wake of John Locke but also echoing the theory of the affects, these critics sought to explain music's position in relation to painting and poetry, to investigate its closeness to nature, and to account for its ability both to give pleasure and to represent or stir emotions. James Harris, Charles Avison, James Beattie, Daniel Webb, Archibald Alison and Adam Smith all contributed to the discussion (some would say confusion) about these points, usually under the headings 'imitation' and 'expression' (*see* EXPRESSION, §I, 1). Despite differences of position, terminology and example, however, none actually moved very far beyond the concept of mimesis: that is, at the end of the 18th century music still had to mediate to the listener some kind of precisely defined content. Smith (1795) allowed, fleetingly, that instrumental music could activate memory and produce 'considerable effects' without imitation, but even he placed such music beneath vocal music in its powers over the heart. Theoretically, at least, the idea of music as an autonomous art was still some way off.

Avison's *Essay on Musical Expression* (1753) made a greater mark in its attempt at systematic description of the musical factors ordinary listeners should consider when assessing a style or composition. His aim was educative, and his goal good taste; the book attracted attention. Not everyone agreed with his exemplars – he appeared to favour Marcello and Geminiani over Handel – but the resulting controversy increased Avison's celebrity and the circulation of his ideas, among them that harmony and counterpoint were more vital to good music than the currently fashionable emphasis on melody. Like Pepusch and later Hawkins, Avison sided with the 'ancients', or Renaissance-Baroque polyphonists, in the larger 18th-century debate over musical style. While Charles Burney thought Avison's judgment 'warped' in this regard, he later praised him as a kind of founding practitioner of English music criticism. Burney himself was the ultimate spokesman for the glories of modern Italian opera and the new instrumental and symphonic style, especially Haydn's. In his published tours about contemporary European music (1771, 1773) as well as in his *General History of Music* (1776–89) – all undertaken to put music on a firm, progressive historical footing precisely in order that its criticism could be well informed – he wrote frankly of the principles behind his own taste; these he also invoked as a professional music-book reviewer for London journals in the 1780s and 90s. Hawkins, too, aimed at a solid basis for criticism with his more scientific approach to the facts of music history, but he wanted to remove the element of 'capricious' personal taste that Burney advocated. In the end it was Burney, much more than any other writer, who raised the subject of music in British public estimation, giving it intellectual respectability and literary elegance.

The burgeoning commercial market for music in the 18th century was bound to be reflected in the periodical press. Philosophical discussions about style and taste were one thing, the purchase of musical goods quite another. The musician John Potter wrote theatre and oratorio reviews in the *Public Ledger* as early as the 1760s. Between the early 1780s and 1795 several London newspapers catered for the fashionable 'rage for music' by publishing headed concert reviews. Anonymous and frequently susceptible to influence, however, these are a less reliable guide to public taste than careful analysis of other musical data in the papers, such as advertisements. More relevant as criticism are the pioneering music review sections in the monthly magazines, notably the *European Magazine* (where Samuel Arnold wrote on new music publications from May 1784 to June 1785), the *Analytical Review* (to which Mary Wollstonecraft contributed music-book reviews from 1789 to 1792), the *Monthly Magazine* (where Thomas Busby reviewed new printed music from 1796 to 1816) and the *British Critic* (for which John Wall Callcott covered music from 1800 to 1805). The earliest English music periodical with a dedicated critical section was *Musical Miscellanies* (September–December 1784), whose monthly 'Review of New Musical Publications' covered printed music and some books. Conducted by J.C. Heck, this journal had special praise for C.P.E. Bach and Haydn.

In the 19th century consumers and other interested readers increasingly turned to the press for guidance about what to see and hear, what to sing and play, what to think: the gap between public access to hearing great music and the ability to read about it now became huge. This was because, for economic and social reasons, the British press grew and diversified sooner than musical culture did. Indeed it was largely the need for copy in this new journalizing age that created musical writers in the first place; some were genuinely able as critics, others completely inept. In the 1820s, for the first time, serious music journals had enough buyers to keep going for more than a few months, and by the 1830s and 40s general news- and arts papers had to have a music column to keep pace with competitors. The occupation of music critic varied in status with the repute of the journal, but at least it offered a viable professional outlet for a skilled writer with musical knowledge, or a would-be musician unable to pursue performance or composition. Many critics worked peripatetically, some contributing to more than one paper at a time. Critical responses were often coloured by private motives; opinions could, and did, change over time. A continual flux and variety of views was characteristic of the age. Broadly speaking, reviews of music publications migrated in two directions – book coverage to the new quarterly literary reviews and printed music to specialized music journals. Reviews of performances dominated the music columns in weekly and daily newspapers, and also appeared selectively in the music

press. Extended essays on aesthetic issues or 'advocacy' topics, such as the increased emotional power of music or calls for an English national opera, appeared first in the magazines and literary reviews, then increasingly in the music press. Style-critical discussions were rare until after about 1850.

The audience for all this material was naturally mixed in social level and musical sophistication. In Britain articulate critical opinion on music was never the preserve of music specialists; still less did the nation have a leading composer-critic as representative spokesman, or even a continuing creative tradition that could validate critical authority. Yet any charge of backwardness in 19th-century British music criticism is surely naive, and stems from overemphasis on the two most selfconscious 'taste-makers' working in London at mid-century, Henry Chorley and J.W. Davison. Although neither had much musical training, they managed through literary connections to get and keep long attachments to major papers (though both the *Athenaeum* and *The Times* were outstripped in circulation figures by other publications, notably the *Daily Telegraph*). Their clear authorial identities (in an environment that was predominantly freelance and anonymous), strong prejudices and trenchant language (confirmed and repeated in their published memoirs) simply made them easy targets for a later generation. It is true that their classical inclinations left them resistant to much new music; their purview was anyway often limited to performance commentary. The degree to which Chorley and Davison actually directed popular taste is another question, however: their strictures on Verdi, for example, seem to have had little impact on the vitality of his operas in London.

Throughout the century a number of less visible but highly skilled journalists worked as music critics. Of those who could be called true musical amateurs with a literary sensibility, Leigh Hunt, Richard Mackenzie Bacon and Thomas Love Peacock were especially perceptive about English and Italian vocal music. In Norwich, Bacon founded and edited the first English journal devoted entirely to music literature and criticism, the *Quarterly Musical Magazine and Review* (1818–30), and also wrote on music for two London monthlies. T.M. Alsager brought a keen mind and open ear to his early crusade for Beethoven in *The Times*, while George Hogarth contributed criticism to more than a dozen journals with diverse readerships. Later, G.B. Shaw, passionate about Mozart and Wagner, equipped with a biting wit and intent on social reform, aimed above all to provoke; no other critic approached him in assurance, though his failure to detect real musical merit (notably in Brahms) was a limitation.

Still more numerous were the music professionals – performers, teachers and administrators – who, if rather earnest and overly concerned with educating, nevertheless made substantial contributions to the diffusion of musical ideas in Britain. William Ayrton on the Italian opera and Edward Taylor on the English madrigal, Henry Gauntlett on Beethoven and Bach, Joseph Bennett on choral music, Edward Dannreuther and Francis Hueffer on Wagner, F.G. Edwards on Mendelssohn and J.A. Fuller Maitland on early music are only a few examples. Remarkable by virtue of his intellectual qualities, elegant style and wide sympathies – from Palestrina to Berlioz – was Edward Holmes, who wrote for seven journals, including the *Atlas* and *Musical Times*, besides producing a landmark book on Mozart. Holmes combined rare musical penetration with humanistic feeling. On the ever-burning question of whether the English were a musical people, he argued convincingly that, at least by the 1850s, the nation still could not claim to love music for its own sake.

After a lull in the 1860s and 70s, the British musical press exploded in the 80s and 90s. Regional criticism bloomed and concert life underwent a transformation. In the field of aesthetics, there was a world of difference between the early 19th-century categorizing of a music academic like William Crotch (whose sublime, beautiful and ornamental styles corresponded roughly to Baroque, Classical and Romantic music, in descending order of greatness) and newer speculative thinking about the origin and evolution of music. The latter topic occupied not only the philosopher Herbert Spencer from the late 1850s but Edmund Gurney, whose collected essays in *The Power of Sound* (1880) comprise the most substantial English musical treatise of the century. Gurney offered remarkable insights into the structure of melody and the psychology of musical perception. The writer James Sully took Spencer's ideas further, trying to account for the rising emotional power of music after Beethoven and Wagner. The dichotomy underlying this debate, between form and content, structure and expression, was addressed with insight by John Stainer in his Oxford professorial lecture (1892); it continued to challenge musical thinkers in Britain and elsewhere for decades.

(ii) 1890–1945. In the early 20th century the quantity and diversity of outlets for criticism in Britain rose dramatically. While almost every other department of musical life became increasingly professionalized, criticism remained largely the domain of semi-amateurs and the part-time pursuit of composers, academics and teachers. The established broadsheet newspapers, *The Times*, the *Sunday Times*, *The Observer*, the *Daily Telegraph* and the *Morning Post* (amalgamated with the *Daily Telegraph* in 1937), continued to provide substantial coverage of musical events and associated issues while the newer tabloids favoured brief opera and concert notices. Among provincial newspapers the *Birmingham Post* and the *Manchester Guardian* were most significant, containing contributions from Ernest Newman, Eric Blom and Neville Cardus.

Shaw relinquished his position as music critic in 1894, a year that marked a watershed in British music criticism. A performance of the *St Matthew Passion* conducted by Stanford in March of that year was severely criticized by Vernon Blackburn in the *Pall Mall Gazette*. Five members of the musical establishment (Mackenzie, Grove, Goldschmidt, Parratt and Parry) responded with a controversial letter to the press that attacked Blackburn's 'sheer inepitude' and initiated a debate on the function of criticism. John Runciman of the *Saturday Review* (1894–1916) supported Blackburn and became the self-appointed leader of the 'New Criticism', which extended Shavian lines of argument. It was also in 1894 that Ernest Newman's first articles were published in the *New Quarterly Musical Review*.

The numerous music journals that sprang up from the 1890s reflected the move towards greater plurality throughout British society. Few, however, could compete with those supported by publishing businesses (the *Musical Times*, the *Musical Standard*, the *Monthly Musical Record*) and by advertising revenue (*Musical*

Opinion and *Music Trade Review*). Music criticism also continued to feature prominently in literary reviews and political journals, including the *English Review*, *The Academy*, the *Nation and the Athenaeum* and the *New Statesman*. From the 1920s the broadcasting and recording industries provided further outlets, including the *Radio Times* and *The Listener*. The cultivated minority audience of the 19th century that read the old-style reviews, such as the *Edinburgh* or the *Fortnightly*, gave way to a new and diverse 'mass' readership.

The market for music books also expanded, owing in part to the increase of music education at all levels, the popularity of domestic music-making and amateur groups, the widening of audiences, the declining cost of books and the establishment of public libraries. Short histories, composer studies published in series such as Dent's Master Musicians, and collections of analytical programme notes, notably Donald Tovey's *Essays in Musical Analysis* (1935–9), held widespread appeal. The volume of collected journalistic essays, such as Newman's *A Musical Motley* (1919) or Blom's *A Musical Postbag* (1941), gave the critic's work a greater permanence and also became the standard posthumous tribute.

Before 1914 a pro-German stronghold was maintained by a group of critics with Oxford connections, including Hubert Parry, W.H. Hadow, Tovey, Ernest Walker and H.C. Colles, who dominated the production of reference and didactic works, particularly *Grove's Dictionary* and the Oxford History of Music. Their shared articles of critical faith included the view that the laws of evolution accounted for the development of musical style; that absolute music represented the greatest contribution to the art; that sonata form was the highest structural ideal; and that the German masters from Bach to Brahms represented the true classic tradition. They maintained that criticism must rely on the formal description of music in order to present an evaluation of aesthetic merit and consequently emphasized its style and structure. These critics laid the foundation for the rise of musicology in Britain; in the next generation Dent, Westrup and others turned away from journalism towards academia.

Two new trends emerged after World War I. The first, a reaction against the German repertory, focussed on Stravinsky and the composers associated with Diaghilev's Ballets Russes. In line with an aesthetic view which set France against Germany, Classicism against Romanticism and Paris against Vienna, Edwin Evans, the most prominent literary advocate of contemporary music in the interwar period, set the virtues of Stravinskian neoclassicism against the atonality and serialism of Schoenberg. Leigh Henry represented a younger generation and aligned himself with the aesthetic of Jean Cocteau's *Le coq et l'arlequin* in his journal *Fanfare* and elsewhere. A second and more conservative tendency was represented in the 1920s by two composer-critics associated with Philip Heseltine's (Peter Warlock's) journal *The Sackbut*: Cecil Gray and K.S. Sorabji. Like the poet-critic W.J. Turner, they found the notion of 'popularizing' classical music distasteful and shared the hostility towards mass culture that was common among the British intelligentsia during the inter-war years. For them, music was the romantic art *par excellence*. They rejected Stravinsky and made provocative claims for composers seen to be outside the mainstream, including Busoni, Mahler, Sibelius and Delius. Many elements of their thought were expressed by Constant Lambert in *Music, Ho!* (1934), the most important British critique of contemporary music written between the wars.

The most influential and arguably the most widely read critic of the period was Ernest Newman. As a rationalist he came under the influence of J.M. Robertson, whose *Essays Towards a Critical Method* (1889, 1897) argued for a scientific approach to critical theory. Robertson's work also informed Michel-Dimitri Calvocoressi's *The Principles and Methods of Musical Criticism* (1923), which marked an important advance over earlier discussions. While Calvocoressi took a relativist position, Newman's absolutism demanded that aesthetic judgments be argued from a basis of objective fact and not from personal taste. His disillusionment with the apparent chaos of criticism in its response to contemporary music led to a study of the critical process in *A Musical Critic's Holiday* (1925), and to a series of articles expounding a 'physiology' of criticism.

The polemical criticism which sought to come to terms with Modernist aesthetics mirrored the transitional stage through which European music was passing. The Oxford critics maintained a pro-German stance after 1918, when Franco-Russian Modernism was in the ascendant, and gave little consideration to new music from countries other than Britain, providing one source of the friction that was characteristic of the period. The rise of Modernism inevitably brought with it a factional music press. While most contemporary composers found some degree of support, the serial music of the Second Viennese School proved a particular stumbling-block for British critics. It was left to Edward Clark at the BBC, and to émigré composers and critics such as Egon Wellesz, Mosco Carner and Erwin Stein, to counteract the widespread critical suspicion that tended to greet new developments in Britain.

By the 1940s arguments that had dominated the early decades of the century – concerning the evaluation of programme music, the nature of national musical identity and the relevance of folksong, the validity of returning to Classical models, the nature of objectivity in criticism and the causes of divergent opinion – ceased to invite further consideration. A younger generation of critics, including Martin Cooper, Wilfrid Mellers and Peter Heyworth, and somewhat later Hans Keller and Donald Mitchell, developed new lines of argument in journals of an international perspective such as *Tempo*, the *Music Review*, *The Score* and *Music Survey*. A strain of conservatism remained – Newman continued to write for the *Sunday Times* until 1958 and Blom for *The Observer* until 1959 – but after 1945 the way was open for a reassessment of values.

4. Italy.

(i) To 1890. In the first quarter of the 19th century, especially in the Napoleonic period, music criticism in Italy was a sporadic phenomenon, the work of journalists, theatre chroniclers and occasional commentators who contributed to official gazettes and, less frequently, literary periodicals. Because the level of literacy was low, periodicals had limited distribution and, being heavily censored, consisted largely of news reports and encomia; contributors were rarely allowed to sign their articles. It was the rapid rise of Rossini, which sparked a more widespread and lively interest in music (particularly opera), that marked the birth of music criticism in Italy. The attention that the composer received bordered on

fanaticism, going far beyond the limited circle of specialists or opera lovers. Yet it was still writers rather than musicians who took up their pens to praise or criticize Rossini's art, beginning with Michele Leoni in the columns of the Florentine *Antologia*; Stendhal, whose biography of the composer (1824) aroused controversy when it was immediately translated into Italian; and Giuseppe Carpani, whose study of Haydn (1812) was followed by *Le rossiniane, ossia Lettere musico-teatrali* (1824). Literature on Rossini ranged from questions of interpretation to gossip, from satire to essays, and from polemics to moralism. In this context Giuseppe Baini's work on liturgical music, on the life and works of Palestrina in particular, was exceptional in its emphasis on scholarship rather than critical judgments.

Rossini's success, the establishment of an operatic repertory, and the construction of opera houses in both large and small cities formed the basis for the rapid growth of opera consumption (which an acute observer, Carlo Cattaneo, termed the 'industrialization of opera'). The same factors gave rise to the creation of the first periodicals devoted to opera in Bologna, Venice and Naples. Almost all were short-lived expressions of a journalistic specialization which had not yet been consolidated. Peter Lichtenthal, who believed that 'true musical criticism assumes great, profound knowledge of the art and exquisite taste', lamented that 'most of our modern-day Aristarchuses do not even know what a chord is, or at most possess very superficial knowledge of the art upon which they write'.

Polemical or 'militant' criticism, associated principally with the 'artistic' journals, began to increase in the 1820s in conjunction with the growth of the publishing industry. This was concentrated in Milan, the former capital of the Napoleonic Italian kingdom, which gradually replaced Venice, the cradle of theatre criticism, and Bologna, traditionally the centre of the theatrical marketplace. Technological advances and the restructuring of publishing allowed Milan to consolidate its leading position in the evolutionary process which during the 19th century transformed Italian journalism from a trade into a profession. At the same time musical and theatrical commerce began to merge as music publishers, led by Giovanni Ricordi and Francesco Lucca, arrived on the scene as both journalists and impresarios. The periodical *I teatri*, which Giacinto Battaglia and Gaetano Barbieri founded in 1827, served as a model for numerous theatre and music journals which flourished during the 1830s. *Censore universale dei teatri*, *Fama*, *Figaro*, *Pirata* and others were soon associated with theatrical agencies.

The almost complete dominance of opera meant that journalistic criticism was still considered a literary exercise; its earliest practitioners were writers such as Enrico Montazio and Geremia Vitali, and poet-librettists such as Luigi Previdali, Antonio Piazza, Felice Romani, Antonio Ghislanzoni and M.M. Marcello. All the most influential Italian journalists in the mid-19th century were literary figures, among them Giuseppe Rovani of the *Gazzetta di Milano*, a Rossinian and defender of the unity of the arts, and Tommaso Locatelli of the *Gazzetta di Venezia*. From the 1840s however, music publishers began to bring out journals of their own, in Milan, Florence and Naples. After collaboration with the Milanese periodical *Glissons, n'appuyons pas*, Ricordi published the *Gazzetta musicale di Milano* from 1842 until the beginning of the 20th century. Lucca followed with *L'Italia musicale*, Guidi with the *Gazzetta musicale di Firenze* (later *Armonia*) and the Stabilimento Musicale Partenopeo with the *Gazzetta di Napoli*. These specialist periodicals invited contributions from musicians, who expanded the scope of criticism to include analysis and historical research. Several figures came to the fore: Alberto Mazzucato and Raimondo Boucheron (and later, for a short period, Arrigo Boito) in Milan; Pasquale Trisolini and Michele Ruta in Naples; and, most importantly, musicians working in Florence, the capital of a grand duchy where instrumental and chamber music were cultivated assiduously despite the predominance of opera: Abramo Basevi, L.F. Casamorata, G.A. Biaggi, Ermanno Picchi and Luigi Picchianti. It was they who laid the methodological foundations for criticism increasingly predicated on technical knowledge – Basevi's *Studio sulle opere di Giuseppe Verdi* (1859) is fundamental in this regard – and gave a decisive thrust in the direction of theoretical debate and scholarly research. Among writers on music whose approach was primarily philosophical or theoretical, the leading figures were Giuseppe Mazzini (*La filosofia della musica*, 1836), Nicola Marselli (*Ragione della musica moderna*, 1859), Antonio Tari (*Saggi di estetica e metafisica*, 1911) and, more marginally, Giovanni Bovio.

When Italy attained political unity (1860–61), and with it freedom of publication, theatre periodicals were more or less transformed into house organs of various theatrical and artistic agencies. With a few exceptions such as *Boccherini* in Florence, *Il mondo artistico* and *Il teatro illustrato* in Milan, *Paganini* in Genoa and *Napoli musicale*, as well as periodicals of mainly musical interest, their function was limited in large part to providing information and advertising. Music criticism moved to journals of opinion, and thus began the age of the great commentators such as Filippo Filippi, Francesco D'Arcais, Amintore Galli and Cesare Dall'Olio. They were joined by theatre critics and literary figures (some of whom were also active in the theatre as librettists or impresarios) such as Enrico Panzacchi in Bologna, Leone Fortis, Aldo Noseda, Carlo d'Ormeville and Alessandro Fano in Milan, Giulio Piccini (Jarro) in Florence, Giuseppe Depanis, L.A. Villanis and Ippolito Valetta in Turin, and Eugenio Checchi and Gino Monaldi in Rome.

In the second half of the 19th century there was increasingly lively debate prompted by the crisis in Italian opera (which only Verdi seemed able to overcome), the ideas of the new generation (from Boito and Gomes to the young Puccini), the growing presence of French opera (Meyerbeer, Gounod, Massenet) and above all the appearance of Wagner, who had in Filippi, Depanis and Panzacchi his first supporters in Italy. The ensuing controversies over the 'opera of the future', Italian versus German music, and vocal versus instrumental music coincided with the growth of non-operatic music, in particular the work of the Società del Quartetto and the various orchestral societies, and with the debate on sacred music reform. In this environment, critics, whether 'progressives' (Filippi, Panzacchi, Galli, Valetta), moderates (d'Arcais, Villanis), pragmatists (Fortis) or defenders of the so-called Italian tradition (Checchi, Monaldi), became a driving force behind the modernization of the repertory particularly in instrumental music. Specialist critics exerted a growing influence on the development of new music even as the field of historical research

broadened. Outstanding musicologist-critics like Francesco Florimo, Alberto Cametti, Alfredo Soffredini, Giovanni Tebaldini, Giuseppe Gallignani and Oscar Chilesotti, whose work appeared regularly in the *Gazzetta musicale di Milano*, found new outlets, however short-lived, in periodicals such as *Paganini*, *La musica popolare*, *Musica sacra* and above all *Archivio musicale*, which accepted contributions from authoritative foreign critics and can be considered the first Italian musicological journal.

(ii) 1890–1945. Daily newspapers catering for large national readerships and characterized by a simple, concise prose style began to appear in Italy in the 1860s. This phenomenon went hand in hand with the development in universal education which, in the last decades of the century, increased the readership of both newspapers and magazines. From being a tool of the élite, periodicals quickly evolved into forms that led towards progressive 'democratization'; they used new techniques for reproducing illustrations and exploited less complex, more attractive means of communication. At the same time music criticism split into cultivated, sophisticated writing intended purely for specialists, and more popular material aimed at the mass of enthusiasts. As the function and importance of periodicals changed, the most well-established critics gradually abandoned them in favour of the daily press; among these were Arrigo Boito, Eugenio Checchi (who wrote under the pseudonym 'Tom'), Achille De Marzi, Giuseppe Depanis, Amintore Galli, Gino Monaldi, Aldo Noseda (who wrote under the pseudonym 'Il misovulgo', 'against the herd'), Primo Levi, Giovanni Battista Nappi, Enrico Panzacchi, Lorenzo Parodi, Alfredo Soffredini, Michele Uda and Ippolito Valetta (the pseudonym of Ippolito Franchi Verney).

Partly as a result of these journalistic developments, criticism of everyday events was increasingly separated from musicological and historical commentary; the latter found a home at the end of the century in Italy's first musicological journals: *Archivio musicale* (1882–4) in Naples, *Rivista musicale italiana* (1894–1955) in Turin and later Milan, and *Cronaca musicale* (1896–1917) in Pesaro. A new critical attitude to the current state of Italian music began to take root: the increase in historical studies, as well as the influence of music and musical thinking from abroad, stimulated a reappraisal of the Italian music of the previous 100 years. A reaction against the monopoly of Italian opera had been developing since the mid-1800s; by the end of the century French and German operas were regularly performed in Italian theatres, musicological studies on pre-18th-century Italian music were progressing, and instrumental music was widely heard. This new sensibility translated into a fierce condemnation by some critics of contemporary Italian opera, which was seen as having degenerated into 'commercialism' and capitulated to 'popular' taste. This was the atmosphere in which Fausto Torrefranca's famous pamphlet *Giacomo Puccini e l'opera internazionale* (1912), attacking contemporary Italian opera and its leading exponent, appeared. Italian critics were divided between those who welcomed these 'popular' tendencies in the operatic and instrumental repertories, and those who championed a fairly radical renovation of Italian music, taking a generally élite view of culture. The former gravitated towards daily papers and magazines with high circulations, while the latter tended to express themselves within the limits of the specialist review.

This critical debate was echoed in the pages of the *Rivista musicale italiana*. The pro-Wagner, anti-verismo viewpoint of the journal's first editor Luigi Torchi (author of the first Italian monograph on Wagner, in 1890) gave way, under the editorship of Torrefranca, to a nationalistic view of Italian music which accorded with Torrefranca's musicological research on instrumental music in Italy and the Italian origins of Romanticism in music. This critical reorientation reflected a partial change in the ideology of the *Rivista*; while its outlook remained essentially positivist, it was not unaffected by idealistic influences. Italian music criticism of the first half of the 20th century was sustained by these tensions between opposing philosophies, as well as by the growing political and cultural nationalism of the period.

La voce, a literary review of fundamental importance for Italian culture was founded in Florence in 1908. An anti-positivist journal close to the idealism of the philosopher Benedetto Croce, it published regular contributions from such distinguished musicologists and musicians as Torrefranca, Giannotto Bastianelli and Ildebrando Pizzetti. All were united against verismo opera and in favour of reviving the pre-19th-century Italian musical tradition and reappraising instrumental music. The themes explored and developed in this and other Florentine literary journals influenced the new music journals that proliferated in the second decade of the century, notably *Ars nova*, the journal of the Società Italiana di Musica Moderna, founded in Rome in 1916 by Alfredo Casella, Ippolito Pizzetti, Gian Francesco Malipiero, Carlo Perinello, Vittorio Gui and Vincenzo Tommasini. The leading role played by these and other professional musicians in 20th-century Italian music criticism was a striking departure from 19th-century tradition, which assigned the exercise of music criticism principally to commentators with literary backgrounds and varying levels of musical knowledge. Militant criticism almost inevitably complemented the creative output of such composers as Pizzetti, Casella, Malipiero, Mario Castelnuovo-Tedesco, and later Luigi Dallapiccola and Gianandrea Gavazzeni.

In the early 20th century as well, Milan was overtaken by Turin as the centre of music periodical publication, and so of criticism. The *Rivista musicale italiana* and *La riforma musicale*, founded in Turin in 1913, were joined in 1920 by *Il pianoforte*, which later (under the title *Rassegna musicale*) became the most important Italian music journal of the first half of the 20th century. Edited by Guido Maggiorino Gatti, it initially concentrated exclusively on the piano but soon embraced a wide range of theoretical, historical and aesthetic topics, providing considerable information on international musical life and trends. *Il pianoforte* was anti-nationalist, having many authoritative foreign correspondents, and close to Croce's idealism. One of its contributors was Giuseppe Radiciotti, who published his impressive monograph on Rossini in 1927–9. When the journal changed its name to *Rassegna musicale* in 1928, the editorial standpoint was further refined, showing an openness both to idealist influences and to Modernist, European tendencies, while remaining unattracted by nationalism. In the 1930s and 40s, under the leadership of Guido M. Gatti, the *Rassegna* was the most culturally advanced and inquiring Italian music journal. The cream of Italian critics were among its

contributors, including Ferdinando Ballo, Casella, Attilio Cimbro, Andrea Della Corte, Gavazzeni, Malipiero, Alberto Mantelli, Guido Pannain, Alfredo Parente, Gino Roncaglia, Luigi Ronga and Gastone Rossi-Doria, as well as Massimo Mila and Fedele D'Amico, the leading figures in Italian music criticism after World War II.

The Fascist regime that came to power in 1921 had little influence on the stances taken by composers, despite the official approval bestowed on some music (generally post-verismo in origin) and composers whose nationalism was gradually sinking into pure provincialism. Nor did fascism impinge to any great extent on critics' freedom of expression. Allegiance to the regime was all that was expected; the price for failing to conform was paid mostly in curbs on space and resources. This situation sanctified the traditional political and civil disengagement of the Italian intellectual; it also demonstrated that the roots of Italian musical culture, even at its most Modernist, lay in the petit-bourgeois idealism which also gave birth to fascism. Although the regime drew on the vital strength of FUTURISM and initially supported Casella's avant-garde ventures, in the 1930s it embarked on a programme of censorship and cultural centralization whose aim was to contain the various trends within the straitjacket of extreme reactionary rhetoric and demagogy.

Nevertheless, less orthodox ventures and ideas continued to find outlets for expression – for example the wave of anti-idealist internationalism which Luigi Rognoni brought to the *Rivista musicale italiana* in 1936 when it took avant-garde music and jazz on board. (As a result of this extreme polemical impulse Rognoni was forced to resign as editor of the journal.) During the same period the *Rassegna musicale* also published notably forward-looking criticism by Ballo, D'Amico, Dallapiccola, Mantelli and Mila in particular. Generally speaking, by the late 1930s music criticism which was not strictly idealist or which contained sociological or political observations was to be read only 'between the lines' in such periodicals as the journal *Corrente* and such daily papers as *L'ambrosiano*. Yet anomalies persisted even at the height of the war: in 1942, when the music of Alban Berg had long been banned in Germany as 'degenerate art', *Wozzeck* received its first performance in Italy, in Rome of all places, to great acclaim from audiences and critics of all political persuasions.

5. RUSSIA. Distinctions between the educational, chronicling, propagandistic and evaluative functions of writing about music are not easily drawn when examining Russian music criticism. Beginning at a time when Russian musical life was itself as yet on a small scale, criticism started at a correspondingly low level. In the late 18th century and the first half of the 19th much of the music performed in Russia was imported, so that critics bent their efforts to assessing the relative merits of different masters (as was the case with the debate about Mozart and Rossini as composers of opera that was conducted in Moscow in the early 1820s). In the absence of controversy about the worth of the compositions of foreign masters (whose quality was felt to be guaranteed by their provenance and foreign successes), attention was focussed on comparing the strengths and weaknesses of particular executants, who again were often international virtuosos visiting Russia for more or less short periods. In this context the books of A.D. Ulïbïshev, *Nouvelle biographie de Mozart* (Moscow, 1843) and *Beethoven, ses critiques et ses glossateurs* (Leipzig and Paris, 1857), stand out, the former especially, as attempts to interpret and assess the compositions of their subjects.

As indigenous composers emerged and won a degree of renown, however, their champions took to the columns of the newspapers to laud their achievements. A major issue considered by Russia's 19th-century critics, then, was the right of repertories composed by Russians to exist alongside the imports, chiefly theatre music from Italy and France and instrumental music from Germany. At least in the earlier part of the century, this was considered more important than determining the virtues and defects of new Russian compositions. Although debate on this issue developed momentum with the appearance of Glinka's *A Life for the Tsar* in 1836, it had already arisen with Verstovsky's ventures in opera in the 1820s.

The first people to write about music in Russia tended to be those who wrote on other subjects and thus had access to the press. This is the case with Ya.M. Neverov, O.I. Senkovsky, N.A. Mel'gunov, V.F. Odoyevsky and other contributors to the discussion about Glinka's opera. In many cases their reactions display insight and commitment, but also an inability to describe the music on a technical level; there were also venal journalists who wrote with ignorant malevolence about music, as about other subjects. The newspaper article was the principal medium for music criticism, whether in the form of the *feuilleton* (see §2(i) above) or of the report. The lengthy discursive article in a 'thick journal' (*tolstïy zhurnal*) was also a significant vehicle for music criticism. Even contributions to newspapers could extend over several issues and thus assume substantial proportions (as is the case with F.M. Tolstoy's 'analysis' of Dargomïzhsky's *Rusalka* which spread over four numbers of the *Northern Bee* in the summer of 1856, or Hermann Laroche's *Glinka i yego znacheniye v istorii muzïki* ('Glinka and his significance in the history of music') which came out in four issues of the *Russkiy vestnik* in 1867–8.

The great length at which Russian critics wrote about music in the 19th century is explained by several factors. First, the question of what marked Russian national identity was at the centre of many people's thinking, not only in music. Secondly, as Russian music consisted disproportionately of operas, many on Russian subjects, its consideration brought into play questions about the interpretation of history and its personages which often (in conditions of censorship) touched implicitly on present-day matters; authenticity of behaviour, costume and scenery were also examined. Thirdly, many critics took their role to be to outline and reflect upon in great detail not only a composition's wider context but also its particular content, as in Rimsky-Korsakov's review of Cui's *William Ratcliff* (1869). A fourth element, evident with special virulence in the case of Aleksandr Serov, is the pedantic exposing of every error allegedly committed by previous venturers into the field; V.V. Stasov's article '"A Life for the Tsar" and "Ruslan and Lyudmila"' (1860) illustrates the heavy sarcasm with which such criticism was often laced. Press controversy about music in the 1860s was, if not a matter of life and death, at least something which affected careers, as critics (sometimes doubling as composers) sought performances of the works they favoured.

The extent to which critics wrote in a *parti pris* manner varied, as did their level of technical attainment. Stasov

and Cui served on the whole as spokesmen for the Balakirev circle of composers, and Stasov later for those of the Belyayev circle; from 1858 Serov combined his championship of Wagner with continuing support in principle for Russian music, though not for all its manifestations. Laroche was the critic best equipped with musical knowledge; he showed most sympathy with the compositions of Tchaikovsky, much less for those of Rimsky-Korsakov and especially Musorgsky, and followed some of Eduard Hanslick's thinking, notably in his questioning of the basis of programme music and in his opposition to Wagner's ideas of the relationship between music and drama in opera. N.K. Kashkin wrote about musical events in Moscow from 1862 until the next century. Like A.S. Famintsïn, who served as a critic in St Petersburg from 1868, he found his main employment in the conservatory; these institutions founded in the 1860s enhanced musical life through the development of musical scholarship and in many other respects.

Specialist music journals in the 19th century often had brief or undistinguished lives, as was the case with Serov's *Muzïka i teatr* (1867–8). The professionalism encouraged by the development of Russian society in general, and in music by the expansion of the conservatories, made possible the publication in St Petersburg from 1894 to 1918 of the *Russkaya muzïkal'naya gazeta* edited by N.F. Findeyzen, among whose contributors was A.V. Ossovsky; this healthy process continued with *Muzïka*, edited in Moscow by V.V. Derzhanovsky from 1910 to 1916; and *Muzïkal'nïy sovremennik* ('Musical contemporary') in Petrograd from 1915 to 1917 under the editorship of A.N. Rimsky-Korsakov. Indeed, the Silver Age of Russian poetry, the World of Art movement and the efflorescence of the theatre arts around the turn of the century were combined with developments in Russian art music which drew it into the mainstream of the Western tradition for the first time. Neither Skryabin nor Stravinsky wrote criticism (the latter at least not in his Russian years), but their compositions elicited sympathetic criticism from L.L. Sabaneyev, Yu.D. Engel' and V.G. Karatïgin. The last, a leading protagonist of musical Modernism and of Musorgsky, died young in 1925. Nikolai Myaskovsky and Boris Asaf'yev had made their débuts as critics before 1917; both were also active as composers. Asaf'yev went on to become the most influential figure in musicology in the USSR until his death in 1949, writing and speaking prolifically on an immense variety of musical subjects. A critic who exerted a strong influence on his friend Shostakovich was Ivan Sollertinsky, a prodigiously gifted linguist and theatre specialist who was a central figure in Leningrad from the 1920s until his untimely death in 1944.

The cultural vitality of the early 20th century extended into the Soviet era, albeit in straitened economic conditions and a new political framework. New publications sought to give voice to the aspirations of, and to speak to, the newly enfranchised segments of society. As time went on political considerations became increasingly burdensome, making the expression of ideas outside the conceptual framework of Marxism-Leninism difficult if not impossible (*see* MARXISM). Attention was directed towards the 'classics' of Russian music, contemporary Soviet compositions in a conservative idiom, and such other music as was not held to be 'formalist' or in some other way unhelpful to the building of socialist society (*see* SOCIALIST REALISM). All existing arts organizations were shut down in the first half of the 1930s and replaced by state-run artistic unions, including a Composers' Union (which also admitted musicologists). The union's official organ *Sovetskaya muzïka* was published, generally monthly, from 1933. The constraints of a narrowed repertory, the severing of international links, the enforcement of received opinion and the denial of expression to nonconformist views resulted in a climate in which it was exceptionally difficult to practise criticism. Much Russian writing about music in the decade or so up to 1945 (and beyond) is significant, but it demands alert reading between the lines.

6. USA AND CANADA. Newspaper coverage of performances of classical music dates back to colonial times in the USA: Oscar Sonneck cited as the earliest known example a notice in the *South Carolina Gazette* of 21–8 October 1732. Before about 1820, most such journalism was confined to brief news stories in ornate language rather than critical reviewing. Even Washington Irving, who frequently reviewed concerts for New York newspapers between 1800 and 1810, wrote desultory 'fan' observations rather than criticism.

Until the early 19th century, most Americans assumed that classical music meant church music; the critic W.S.B. Mathews observed that the public understood 'the broadest function of music to be that of exemplifying gospel teachings'. Thomas Hastings, the author of the first American text on music criticism (*Dissertation on Musical Taste*, 1822), found even oratorio too vulgar to be artistic. But in the 1820s, as professional opera companies began to perform regularly in New York and other large cities, weekly newspapers such as the *Albion* in New York started printing unsigned reviews that treated music as art. At first these commentaries said more about the toilette and social prominence of the audience than about the quality of the music. Most of the anonymous writers artfully concealed their lack of musical understanding in florid but empty verbal encomia. But with the founding of such daily penny papers as the *New York Herald* and *New York Sun* in the early 1830s, music reviews gradually became more professional. The *Herald*'s founder, James Gordon Bennett, was himself a music lover who had previously written criticism for the *New-York Enquirer*. The penny papers' circulations were many times greater than those of the weeklies that had preceded them, and their reviews brought music coverage for the first time to a large, socially diverse audience.

William Henry Fry, a political journalist who was also a talented composer, wrote perceptive and musically knowledgeable reviews of performances of Beethoven and other then-advanced composers in the daily Philadelphia *National Gazette* (1836–41) and the *New York Tribune* (1852–64). In the 1840s the British-born Henry C. Watson began to write reviews for several daily and weekly newspapers in New York. Watson, a former boy soprano and a well-trained musician, was probably the first person to make a full-time living as a music critic in America (Fry had independent wealth) and was one of the first newspaper critics to eschew vacuous verbiage and write analytically. Watson's tone was constructive but occasionally severe; he too continued his career into the 1860s. Other competent critics whose writings first appeared before 1850 include Richard Grant White and Nathaniel Parker Willis in New York and George Peck in Boston.

All these writers attest the shoddy quality of much orchestra playing in the USA before about 1875, even in some large cities. Before 1850, neither Mozart nor Beethoven was regarded as canonical, and Verdi was received less enthusiastically than Bellini and Rossini. Professional collegiality and civility among critics of rival papers did not exist; libel lawsuits and even physical threats were not uncommon. The practice of distributing complimentary tickets to a press list began in the 1840s; nevertheless, graft was widespread. Not only was the concert presenter's purchase of newspaper advertising considered a precondition for review coverage, but critics accepted bribes for puff pieces.

Although the earliest known American musical magazine dates from the late 1700s, the first prominent such publications appeared in Boston in the 1830s (and were free from graft). General magazines such as the *Dial* and the *Harbinger*, published by the New England transcendentalists in the 1840s, ran copious articles about music by Emerson, Margaret Fuller, George William Curtis, Charles Anderson Dana and other intellectuals who were not music critics. It was common throughout the 19th century for American writers and intellectuals to promote classical music appreciation either through writing about it or by hosting small concerts in their homes. Walt Whitman wrote extensive opera criticism for the *Brooklyn Eagle* newspaper in the 1840s and 50s, and such writers as Irving, Longfellow, Sidney Lanier, Owen Wister and William Dean Howells wrote articles about classical music or held musicales.

The most influential critic to emerge from magazines was John Sullivan Dwight, a Boston-born Harvard graduate, lapsed minister (like Emerson) and amateur musician who had difficulty following an orchestral score. In his writings the transcendentalist-influenced Dwight became the first American cleric fully to affirm appreciation of art music as separate from religion (he dubbed music critics 'missionaries of art'), though he tended to fall back into religious metaphor in writing about Beethoven ('not formal prayer, I grant, but earnest deep unspeakable aspiration'). After writing for the *Dial* and the *Harbinger*, Dwight published his own magazine from 1852 to 1881. *Dwight's Journal of Music* carried reviews of concerts from all over the USA by Dwight and his correspondents. Notwithstanding his worship of Beethoven, Dwight was a discerning and objective critic, more open-minded than some commentators have credited.

After the Civil War, musical activity in Chicago and Cincinnati caught up with that in the eastern cities and was covered by such critics as George Upton (Chicago) and W.S.B. Mathews (Chicago and elsewhere). Literary magazines such as *Century Illustrated*, *Atlantic Monthly*, *Harper's*, and *Scribner's*, emulating the transcendentalist magazines of the 1840s, published many articles and essays about music, by both literary figures and newspaper critics.

The leading New York newspapers sent correspondents to cover the first Bayreuth Festival in 1876. By the last quarter of the 19th century the writings of music critics began to have a demonstrable effect on public policies. Dwight's advocacy of university chairs in music was followed by the first such appointment in the USA, that of John Knowles Paine at Harvard; Upton's championship led city fathers to found the Chicago SO under the baton of Theodore Thomas. The founding of the Boston SO in 1881 and the Metropolitan Opera in 1883 roughly coincided with the emergence of a new generation of critics who remained influential into the 1930s. In New York the big four were Henry E. Krehbiel at the *New York Tribune* (1884–1923), William J. Henderson at the *New York Times* (1887–1902) and *New York Sun* (1902–37), Henry T. Finck at the *New York Post* (1881–1924; many of Finck's reviews were ghost-written by his wife, Abbie Cushman) and James Gibbons Huneker, a well-trained pianist who wrote about music, theatre, literature and painting for many newspapers and magazines from the 1880s to 1921. In Boston the leaders were William F. Apthorp, who wrote primarily for the *Boston Evening Transcript* (1881–1903), Philip Hale of the *Boston Herald* (1903–33), Louis Elson of the *Boston Daily Advertiser* (1886–1920) and H.T. Parker of the *Evening Transcript* (1905–34). Krehbiel, a brilliant autodidact who never attended college, was a physically imposing man noted for his humourless pontificality; he believed that not only intonation but correctness of phrasing and balance of tone in an orchestra were 'matters of fact'. Henderson, also brilliant though an especially caustic reviewer, was considered the ultimate authority in the USA on operatic singing. In contrast to Krehbiel and Henderson, Finck was amiable and rarely destructive. All three were militant Wagner enthusiasts who helped establish the composer's success in the USA. Of the Boston critics, Apthorp was closest to Finck in relaxed prose style and lack of dogmatism, while Elson's reviews were like witty critiques of bad grammar. Hale became best known for his mammoth programme notes for the Boston SO, and Parker's musically untutored impressionism was somewhat akin to Huneker's style. The writings of these New York and Boston critics did much to consolidate a consensus on the canon of great composers.

From around the 1880s to World War I, the 'Gilded Age', when opera reached its peak of popularity and prima donnas were viewed like movie stars, critics attained a celebrity they never again enjoyed in the USA. The opera-going public followed their reviews as if they were reading sports scores; Krehbiel even appeared in billboard advertising for the *New York Tribune*. At critics' funerals tributes poured in even from the conductors and singers they had reviewed. Although the Gilded Age critics sometimes fraternized with musicians, they stopped taking graft as many of their predecessors had done. Poorly paid, almost all had to supplement their incomes by writing music appreciation books, giving lectures and teaching.

Huneker differed substantially from his colleagues in his forward-looking attitudes toward such avant-garde composers as Debussy, Strauss and even Schoenberg, in his polymathic grasp of other art forms, and in his highly literary, poetic prose. The mantle of Huneker's iconoclasm was inherited by the journalist H.L. Mencken, who wrote opinionated and verbally vibrant criticism for the *Baltimore Sun* and the *American Mercury*, as well as programme notes for the Baltimore SO. The heirs to Huneker's avant-garde sympathies were Carl Van Vechten and Paul Rosenfeld, who wrote for various newspapers and magazines from the 1910s. Both were influenced by Huneker's rich prose style, as were Hale and Lawrence Gilman of the *New York Herald Tribune* (1923–39). However, the new cultural magazines that appeared in the 1910s and 20s were less committed to classical music appreciation than their predecessors, and as a result

classical music began to fade from general cultural discourse in American magazines.

After World War I, the Gilded Age critics were gradually replaced by such leaner prose stylists as Olin Downes (*New York Times*, 1924–55) and the composers Deems Taylor (*New York World*, 1921–5 and *New York American*, 1931–2) and Virgil Thomson (*New York Herald Tribune*, 1940–54). The down-to-earth Downes, a champion of Sibelius, helped convince many American men that a love of classical music was not effete. The outspoken Thomson demolished received opinion and sacred cows in almost every review. Taylor, a brilliant explicator, achieved his greatest impact through his radio broadcasts, reaching a greater audience than any classical music critic before or since. Alfred Frankenstein in San Francisco and Claudia Cassidy in Chicago also achieved national reputations. The first important woman critic on a major metropolitan paper to write under her own name was the pianist Olga Samaroff (*New York Post*, 1926–8). African-Americans began contributing classical music criticism in black-owned magazines and newspapers around 1900. One black music critic, Cleveland Allen, also wrote for the mainstream press *Musical America* in the 1920s. A late 20th-century trend in American criticism was presaged when Gilbert Seldes, classical music critic at the *Philadelphia Evening Ledger* in 1914–5, bestowed classical music's intellectual cachet on certain forms of popular music in his book *The Seven Lively Arts* (1924). In the 1930s such established newspaper critics as Irving Kolodin and Bernard Haggin began to review phonograph recordings. Meanwhile, American avant-garde composers published their own music criticism in the quarterly magazine *Modern Music* (1924–46), which was assiduously read by the New York and Boston critics.

In Canada classical music criticism has been written in both English and French. The first highly competent Canadian critic, the composer and church musician Guillaume Couture, wrote in both languages in the late 19th century, chiefly for Montreal newspapers. English-language newspapers in Montreal, Toronto, Winnipeg, Vancouver and Victoria all had classical music critics in the first half of the 20th century. The outstanding Canadian critic immediately before World War II was the pianist-composer Léo-Pol Morin, who wrote in French, primarily in Quebec City.

III. Since 1945

1. Introduction. 2. 1945–65. 3. 1965–80. 4. Since 1980.

1. INTRODUCTION. Superficially, music criticism during the second half of the 20th century conformed to models developed 100 years earlier. Critics for newspapers and magazines were expected to inform readers about a composition or performance by using appropriate metaphors, images and adjectives, with only occasional reference to analytical detail. The dominant critical method was comparison: juxtaposing a particular performance with others by the same artist or with performances of the same composition by different artists, or juxtaposing a new work with others by the same composer or in a similar style. Criticism thus continued to be preoccupied with issues of tradition.

On a deeper level, however, criticism changed dramatically during this period because the world around it changed. Immediately after World War II the European Classical tradition was the unchallenged focus of high musical aspiration; the Romantic performing tradition remained vital, with some of its most eminent avatars still active. By the end of the century, the main critical controversies no longer concerned new music or performance styles, but whether classical music had a greater claim on any culture's attention than other forms of music and entertainment. This shift in circumstances and attitudes affected critics' reactions to music and redefined their relationships with other segments of the music world.

The critic's relationship with the music audience changed because readers could no longer be assumed to share a similar background of musical experience. Pop music and world music became more dominant, challenging the boundaries and claims of classical-music criticism.

The critic's relationship with composers changed because the notion of musical progress had become obsolete. The avant garde no longer had the power to shock, indeed its rebellious gestures had become familiar mannerisms. A genial eclecticism ruled the international scene. Critics were no longer presumed to articulate 'advanced' tastes, and neither composers not critics issued manifestos of the sort once associated with musical Modernism.

The critic's relationship with performers changed because the bulk of the concert-hall repertory had long since solidified into a slowly mutating canon of basic works. Every new performance competed with almost a century of recorded repertory. Novelty often meant not

unfamiliar music but theatrical concert lighting or 'crossover' programming in which pop selections were interwoven with art-music pieces.

The critic's relationship with the music business changed because there were fewer virtuoso performers whose high fees were justified by their ability consistently to fill large concert halls. Most classical recording companies were taken over by large corporations that were ever more concerned about bottom-line earnings and the disparity between classical and popular recording sales. As marketing pressures increased on both artists and record labels, the music business and its impact on performance and composition became a larger part of the critic's brief.

Critics were also influenced by trends in music scholarship, in particular the growing emphasis on the political and cultural contexts of music and music-making. These in turn related to such far-reaching cultural transformations as the spread of the classical tradition in Asia, the increasing importance of the USA as the centre of the music business, diminishing state support for classical music and opera in Europe, and political changes that altered the institutions and cultural orientation of the former Soviet bloc countries. In reshaping the traditions that formed the critic's touchstones, these developments affected the critic's role in and perspective on the music world.

2. 1945–65. During the years after the Second World War, the vigour of the musical scene included an unquestioned commitment to music criticism by newspapers and magazines, along with an active readership. Criticism, both in the United States and in Europe, was often energetic and contentious, indicating a sense that something important was at stake in the music being heard. But there were also fault lines in the musical scene that hinted at larger problems. By the 1950s, what Virgil Thomson called 'the "modern music" war' led to an almost complete disengagement, in both Europe and the USA, between mainstream concert audiences and the major strands of contemporary composition. Symphony orchestras, led for the most part by conductors trained in pre-war Europe, tended to focus on 19th-century masterworks. In Darmstadt, Cologne and other centres of the modernist avant garde, new institutions and audiences evolved out of those associated with Modernist composers after World War I. American experimentalists such as John Cage, Harry Partch and Conlon Nancarrow attracted their own groups of players, supporters and listeners. The mainstream audiences tended to resist the lures of what was called 'modern music', preferring 19th century repertory, or 20th century works by such composers as Britten, Rachmaninoff and Menotti, whose musical language was rooted in late Romantic tonality.

Critics responded variously to these developments. Some blamed performers for failing to introduce listeners to new music; others argued that 'middlebrow' audience taste was the nub of the problem. Some criticized composers who asserted that musical composition was neither dependent on nor answerable to audience acclaim; others faulted composers (and fellow critics) for championing music that intentionally shocked the very listeners that were supposedly being courted. Defenders of Modernism pointed out that rejection of contemporary music by audiences and critics was nothing new. In his *Lexicon of Musical Invective* (1953), Nicholas Slonimsky adduced examples from history in support of his view that 'unfamiliar' music typically took 40 years to win acceptance.

The pro-modernist position came under attack by populist critics, notably Henry Pleasants, who in *The Agony of Modern Music* (1955) dismissed the classical-music critic as an 'effete descendant of a warrior clan decimated in battle and discredited by history' (p.59). Pleasants predicted the 'end of the European musical tradition' and the ascendancy of pop music and jazz. Indeed, a romanticism of the 'folk' developed alongside and in opposition to Modernism; it was characterized by expressions of admiration for the supposedly more natural, less rational musical idioms of non-Western cultures and jazz. The impulse had been strong even earlier in the century among art-music composers like Stravinsky and Bartók. Now it became associated with pop music and rock 'n roll which found large and enthusiastic audiences who were either suspicious of or uninterested in the intellectual complexities of 'highbrow' music. By the 1980s folk romanticism, with its slightly condescending gaze at what Olin Downes called 'the genius of the simple people', blossomed into fully fledged multiculturalism, which rejected any claim of superiority, and questioned any claim of uniqueness, for the Western classical tradition.

Despite these growing tensions, the music world in the immediate postwar decades appeared to be in the flush of health. Critics wrote at length and to an interested public about the débuts of new artists; orchestras expanded their schedules; touring soloists sold out concert halls. Horowitz and Heifetz, Reiner and Szell, Casals and Rubinstein possessed unquestioned prestige as masters of their respective arts; they became cultural icons, appearing on the covers of news magazines without appearing to be mere entertainers courting popular acclaim. This vigorous performing culture, with its multiple performances of a limited repertory had an impact on the style of criticism: reviews tended to focus more on the event and on the details of performance style rather than on the music and its construction. But there were also critics, who came to their maturity in the 1950s, and combined advocacy for favoured new styles with close attention to scores. The musicologist Paul Henry Lang, who wrote for the *New York Herald-Tribune*, served as editor of the journal, *Musical Quarterly* and was known for his catholic tastes and refined assessments. In Germany, Hans Heinz Stuckenschmidt continued his long career as an enthusiastic analyst of new music. In Switzerland, Willi Schuh, writing for the *Neue Züricher Zeitung* wrote broadly on 20th century music. In England, Neville Cardus, at the *Manchester Guardian*, wrote polemical dissents, arguing that criticism had become sterile in its advocacy for atonal and serial musical styles. But composers also became active as critics, sometimes writing polemically, sometimes analytically, explaining their tastes and styles. Boulez, Carter, Stockhausen, Rorem and others were active during this period; Stravinsky appeared as an acerbic and mordant critic in the books of conversations written by Robert Craft.

There were also many distinguished critics who approached the contemporary musical scene with a scholar's temperament and specialized knowledge who were important figures for several decades. In England, Ernest Newman, the most celebrated British critic of the century

and author of a magisterial biography of Wagner, finished his career in 1958, retiring from the *Sunday Times*. Martin Cooper, as critic for the *Daily Telegraph* and editor of the *Musical Times*, combined expertise in French and Russian repertory with an urbane style; Winton Dean helped shape modern understanding of Handle, but was also known for his writing on French and Italian opera. Stanley Sadie, who was just beginning his career at the time, later extended the tradition of the critic-scholar on an unusual scale, by editing the various editions of this dictionary. Other critics of the period included Guido Pannain in Italy, who wrote for the *Rassegna musicale*, and Stefan Kisielewski in Poland, editor of the musical weekly, *Ruch muzyczny*.

But as the canonical repertory congealed and recordings proliferated, some critics also began to question whether music could be treated as an autonomous art form that could be discussed in relative isolation from surrounding political and cultural forces. The musicologist Joseph Kerman, in his influential book *Opera as Drama* (1956), argued that opera should be treated as unity of disparate arts, none of which could be split off from the whole. Beginning in the 1960s, the Marxist critic Theodor Adorno began to have a greater influence on other scholars with his densely packed social and political analyses of music that rebelled against the notion of musical autonomy. Later, under the influence of literary theory, which was starting to examine the nature of texts and their interpretation, critics began to describe music in a different way. The French literary critic, Roland Barthes, wrote about the challenge of separating music criticism from its reliance on the 'adjective' and attempted to evoke the musical experience by examining such notions as the 'grain' of a voice, or contemplating the difference between playing music and listening to it. Other literary approaches were used in such journals as *Musique en jeu*. By the 1980s, French literary theory had influenced the vocabulary and style of much musical scholarship.

Among journalistic critics, Virgil Thomson stood out for relating music to its economic, social and political surroundings. His writing combined graceful prose, supple and often startling musical descriptions, and an insider's awareness of the music world. In the 1962 edition of *The State of Music* (first published in 1939), Thomson wrote that 'What music needs right now is the sociological treatment, a documented study of its place in business, in policy and culture'.

3. 1965–80. In the mid-1960s, with the advent of an international counterculture foreshadowed by Chuck Berry's song *Roll over Beethoven*, sociology did become more important to musical culture, criticism and scholarship. Not only Beethoven had to roll over, but high art and culture as conceived by the majority of classical composers and critics. Folk romanticism, populist, egalitarian politics and an increasing focus on youth culture all played a part in this revolution. In the USA such critics as Robert Christgau, Greil Marcus, John Rockwell, Whitney Balliett and Nat Hentoff wrote about rock music and jazz with the same seriousness as their classical colleagues. In addition, new currents were transforming the classical tradition from within. Composers like Philip Glass and Steve Reich were influenced by non-Western cultures in which a composition was viewed not as a narrative drama, complete with thematic characters and a picaresque tale of transformations, but as a meditative experience involving slow-paced evolution or quirky rhythmic variations. In the theatrical events known as 'happenings', the point was not the sound itself but the deliberately dadaist or shocking uses to which it was put. Hans Werner Henze, Cornelius Cardew and others wrote music of an explicitly political nature which could not be judged by exclusively musical criteria.

These developments posed a challenge to journalistic criticism, which for the most part remained focussed on the debates about audiences and modernist music. Some critics, such as William Mann, Andrew Porter and Desmond Shawe-Taylor in England, chronicled the evolution of various avant gardes and their musical techniques. In the USA Leighton Kerner, Tom Johnson and Kyle Gann devoted sympathetic attention to new music, while Michael Steinberg, Martin Bernheimer and a few others wrote lengthy and serious appraisals of the changing musical scene, mixing scholarly acuteness with passionate assessments. A prominent conservative voice was that of Harold C. Schonberg, chief critic of the *New York Times* from 1960 to 1981. An expert in the history of piano performance, he favoured strong virtuoso personalities and became a thoroughly schooled representative of mainstream audience tastes.

In England, where musicology and music journalism were less strictly segregated than in the USA, the tradition of the critic-scholar included such figures as Ernest Newman, Martin Cooper, Winton Dean and Stanley Sadie, all of whom regularly took note of musicological news and discoveries. Among their counterparts in the USA were the pianist Charles Rosen, the musicologist Joseph Kerman and Andrew Porter, a South African long resident in England who in 1972 became music critic of the *New Yorker* magazine. Unlike most American critics, Porter saw himself as an active participant in the musical project rather than a detached observer. He treated each event as part of an elaborately evolving tradition of composition and interpretation. In his leisurely *feuilleton*-like essays, Porter stressed place and tradition in music at a time in American culture when both had become subsidiary to impact and effect.

4. Since 1980. By the 1980s Modernism and serialism were increasingly under attack from composers as well as critics. In the USA, the dismantlement of school orchestras and music education produced a generation of younger listeners who found the entire debate about modern music irrelevant because the classical tradition itself was becoming alien. This decline in centrality anticipated by about a decade signs of shifting emphasis in Europe as well. With the weakening of public support for the arts in Europe, the development of a worldwide pop industry and the burgeoning of multi-cultural communities throughout the West, many of the problems first defined in American criticism began to be raised elsewhere. Ironically, the only countries where the European classical tradition retained its prestige were those in which it had become important after World War II: Japan and South Korea, which by the 1980s had also become the world's largest manufacturers of the quintessentially Western instrument, the piano.

Much criticism often examined the unusual condition of art music, its relationship to the public, and the dominance of recordings over live concerts. In Czechoslovakia, the musicologist and critic Ivan Vojtěch continued Adorno's project in discussions of the political meanings of music. Joachim Kaiser, writing for the

Suddeutsche Zeitung in Germany, and Gérard Condé writing for *Le monde* in France were highly respected critics with a wide range. While in the Eastern bloc, until the fall of Communism, the classical art music tradition was preserved as if in amber from the forces of commercial and pop culture, elsewhere changes were unmistakable, particularly in the USA. In the 1980s and 90s, many of the American Music magazines that had regularly run essays on music and record reviews, including *High Fidelity, Ovation, Keynote, Opus, Musical America* and *FI*, ceased publication, and journalistic coverage of classical music was greatly diminished – symptomatic of the weakening of the art music traditions in all Western countries. Many British magazines like *Gramophone* and *HiFi News and Record Review* continued to thrive, their number even increasing with the introduction of the BBC Music Magazine, but this was more a reflection of the different economics of English magazine distribution and advertising than a reflection of a British Renaissance in art music culture. Specialist magazines dealing with particular instruments or performance styles also continued publication, benefiting from a dedicated, if small, readership. But at many American newspapers, music criticism fell on particularly hard times. The expectation at some was that concerts would be written about only if they were repeated, so the review could serve explicitly as a consumer guide. The declining importance of classical-music criticism became a regular subject of anxious conversation among critics. This decline, though, also signaled a shift in cultural interests which for some, were not entirely unwelcome. John Rockwell, who wrote sympathetically about almost all genres of music, argued that 'a "music critic" had no business excluding entire traditions that most of the world thought of as "music" just because they didn't conform to his own cultural prejudices'. He celebrated eclecticism, refusing to draw clearcut aesthetic distinctions among performance artists like Laurie Anderson, rock groups like the Rolling Stones and composers like Philip Glass. At the opposite end of the spectrum, Samuel Lipman, a fiercely polemical critic whose tastes were a mixture of conservative populism and intellectual elitism, attacked critics for lacking conviction, audiences for embracing 'easy listening' music and government patronage for turning 'art into entertainment'. Another viewpoint was articulated by Edward Rothstein, who suggested that the chasm between audiences and composers resulted from the kinds of meaning music created and the different social and cultural purposes it served. He argued that critics could assess different kinds of music on their own terms, while also comparing them and making aesthetic judgments.

Controversies over musical meaning, politics and élite culture also became more central to the academic study of music. Kerman (1985) argued that musicologists' preoccupation with 'analysis' had 'produced relatively little of intellectual interest' because it completely ignored the question of 'artistic value'; he urged them to adopt the wider stance of 'criticism'. Over the next decade musical scholarship did undergo a major change; however, the emphasis was not on artistic value but on the sociology of music, its political meanings and its cultural contexts. Musicologists followed literary theorists in asking questions about the kinds of ideas music promotes and why they succeed. Some scholars rejected aesthetic distinctions altogether and treated music as a coded tract concerning sexuality and politics; scholarly papers on the iconography of the pop star Madonna became as common as studies of the Classical style. In the 1990s it sometimes seemed that criticism in the broadest sense had become a goal of musicology, while journalistic criticism often retreated to the comfort of 'reviewing'. One major exception to this trend was in the former USSR, where such critics as Lev Lebedinsky, Leo Mazel' and Aleksander Ivashkin defined a new role for themselves in the post-Communist era, reinterpreting the history of Soviet music and evaluating the effects of freedom on art.

Two other major issues that engaged critics at the end of the 20th century arose from the early music movement and the proliferation of digital recordings on compact disc. In the long-running debate over historical 'authenticity', some critics found period-instrument performances on the whole dry, distorted and reductive, while others held that they cleansed the accumulated manners of Romanticism from pre-Classical music. In many ways the arguments echoed the long debate over taste begun by advocates of various avant gardes objecting to mainstream Romantic tastes. For much of the 1980s and 90s this was an important issue of contention in discussions of musical performance in general, particularly when claims of authenticity were pressed too far (the more cautious term 'historically informed' came to be preferred). In the digital era that began in the late 1970s, a number of music and audio critics devoted special attention to the impact of electronics on music and subtly analysed the nuances of digital sound and fine audio equipment like oenophiles discussing the effect of grape fungus. Much of this criticism focused on the limitations of digital recording, ultimately spurring engineers to develop refinements in the technology.

Technology was also having a profound effect on the ways in which criticism and ideas about music were communicated. With the popularization of the Internet in the late 1990s, many of the companies providing Internet access, like America Online, which had 23 million subscribers by 2000, included numerous 'discussion groups', 'bulletin boards' or 'forums' devoted to music. Messages were posted by anybody who joined the forum – ordinary listeners, fans, performers and even professional critics – reacting to recordings, concerts, reviews, or news from the music business. At best, these forums made criticism a social activity in which alternate reactions to a musical event could be shared and discussed with ease. More professional musical organizations, like the American Musicological Society, also encouraged the establishment of 'mailing lists' of specialists in different musical fields ranging from musical to ethnomusicology. Any scholar sending an e-mail message automatically reached several hundred colleagues with similar interests; research queries were posted and answered, often within a day by scholars, unhampered by geographical limitations. The discussions could turn banal and petty, but more often they took on the character of criticism in progress, as posted responses expanded upon earlier comments and led to 'threads' of continuing discussion. In addition, the availability of international newspapers on the Internet made it possible to read reviews from Germany, England, France, the United States, or Japan, at the same time as the readers of the local newspapers. This, along with international scholarly discussions, increased the sense that a world music culture was taking

shape, as similar issues and debates took place without reference to national borders.

Despite these changes, though, at the beginning of the 21st century the future of traditional music criticism was more uncertain than it had ever been. The profession of music critic no longer implied an intense devotion to and understanding of the Western classical tradition. The power of critics to influence acceptance of new composition or the careers of performers also seemed much weaker than before, particularly in comparison with the forces of mass marketing. Few critics believed that vast portions of the repertory would ever be of interest to a wide public. Younger critics, like Alex Ross at *The New Yorker*, who were trying to restore critical vigour by loosening the boundaries isolating the classical tradition from the world of politics and popular culture, resisted pessimism. But many critics felt that the state of criticism would not improve until new relationships developed between composers and audiences, listeners and critics; no one knew, though, how such a change might occur. Peculiarly enough, as music criticism became less central, musicology – with its attentiveness to political influence, musical meanings and reputations – took on some of the broader ambitions that once were the province of music criticism. As the 21st century began, it was increasingly clear that the future nature of music criticism was increasingly unclear, leaving feelings of dismay along with hope for as yet unforeseen possibilities.

Crivellati, Cesare (*b* Viterbo; *fl* 1624). Italian doctor and music theorist, probably the brother of Domenico Crivellati. He practised as a doctor in his native town. According to Pitoni he studied music with Frescobaldi, but his only certain connection with music is that in 1624 he published at Viterbo *Discorsi musicali, nelli quali si contengono non solo cose pertinenti alla teorica, ma etiandio alla pratica; mediante le quali si potrà con facilità pervenire all'acquisto di così honorata scientia. Raccolti da diversi buoni autori* . . .. As he admitted, his book is a compilation: it draws heavily on theorists of the past, ranging from Guido of Arezzo through Pietro Aaron to Zarlino and beyond, and it is predominantly concerned with the traditional materials of music – modes, proportions, ligatures and so on. However, not only the nature of his selections from the past but also his occasional views on the music of his own time tell the reader something of his own ideas. He was, for example (pp.60–61), enthusiastic about monodic and operatic music and believed, like so many writers, that the music of his own day was best able to move the affections. In the last of his 54 chapters he offered sensible advice to singers.

NIGEL FORTUNE

Crivellati, Domenico (*b* Viterbo; *fl* 1628–9). Italian composer, probably the brother of Cesare Crivellati. He seems to have lived at Viterbo and to have been an amateur composer. Apart from a solo song (RISM 1629[9]) he is known only by *Cantate diverse*, for one to three voices and continuo (Rome, 1628). Of its contents only two sets of madrigalian strophic variations are at all like what was normally thought of as a cantata in the 1620s. Apart from a madrigal the other solo songs, 12 in number, and the few duets and trios are all simple strophic pieces of no great musical interest, though the solo *Io pur saper vorrei* is attractive enough (there are five duets, but all except one seem to be settings of four verses of the same poem). The main interest of the book resides in the unusually full

directions for performance, especially by instruments; for example, the players are told to repeat a verse purely instrumentally after the singer has sung it. There is also one tempo direction.

NIGEL FORTUNE

Crivelli [Crivello, Cribelli], **Arcangelo** (*b* Bergamo, 21 April 1546; *d* Rome, 4 March 1617). Italian composer. He was brought up in Bergamo. In October 1567 he left for Parma to study with Pietro Pontio, whom he succeeded in April 1568 as singer, and in March 1569 as *maestro di cappella* at the church of the Madonna della Steccata. He remained there until September 1575. From 1 August 1578 until 30 April 1583 he served as a tenor in the Cappella Giulia under Palestrina. He was then admitted to the papal choir where he remained as a tenor until his death, serving as *maestro di cappella* in 1601. He returned to the Cappella Giulia during 1597–9 as assistant to Ruggiero Giovanelli, looking after the boys and acting as an extra conductor for polychoral music on major feasts, and continued as a supernumerary singer there until 1615. His contribution to the madrigal collection *Le Gioe* (RISM 1589[7]), devoted to music of the 'musici della Compagnia di Roma', implies membership of that body.

Although Crivelli published only two collections, one of masses and one of madrigals, a large number of masses, psalm settings and motets were copied into Cappella Sistina choirbooks during his lifetime and survive there; further motets and secular works gained wide circulation in printed anthologies. He was typical of the more conservative Roman composers associated with the papal choir at the turn of the 17th century; his sacred music adhered largely to the Roman *stile antico*, though he did publish one concertato Christmas dialogue, *Quem vidistis, pastores* for four voices and independent organ bass, in 1616. Unusually for a singer, his text underlay is often arbitrary and seems almost to have been added afterwards. The masses use a smooth, often melismatic, style while his double-choir psalms and motets show a good contrast of textures with sonorous tuttis.

The madrigals of Crivelli's *Primo libro* are also conservative in style and somewhat staid taking into account their date; indeed, at least one of the madrigals in this book was composed in the 1580s: *Sovr'un verde riva* first appeared in *Le Gioe* of 1589.

WORKS

SACRED

Liber primus missarum, 4–6vv (Rome, 1615)
Liber [secundus] missarum, 4–6vv, *I-Rvat*
2 Laude, 1599[6]
Motets in 1582[3], 1588[10], 1600[4], 1607[2], 1614[3], 1616[1], *D-Bsb*, *GB-Lbl*, *Ob*, *I-Bc*, *Rvat*
7 psalms in 1615[1], 1620[1], *D-Bsb*, *I-Rvat*

SECULAR

Primo libro de madrigali, 5–8vv (Venice, 1606); l ed. N. Pirrotta, *I musici di Roma e il madrigale* (Lucca, 1993)
3 bicinia, *I-Bc*
1 canzonetta, 1589[11] (repr. with ger. text in 1608[22])
5 madrigals, 4–5vv, 1582[4], 1585[29], 1589[7], 1590[15], 1595[5]
1 spiritual madrigal, 1604[8]

JEROME ROCHE/NOEL O'REGAN

Crivelli, Gaetano (*b* Brescia, 20 Oct 1768; *d* Brescia, 16 July 1836). Italian tenor. After making his début at Brescia in 1794, he appeared at Verona, Palermo, Venice and Naples, where he studied with Nozzari and Aprile. At La Scala he created roles in Mayr's *Eraldo ed Emma* (1805), Pavesi's *Il trionfo di Emilia* (1805) and Pacini's *Il falegname di Livonia* (1819). He appeared in Paris in 1811 in Paisiello's *Pirro* and as Don Ottavio in *Don Giovanni*. He made his London début at the King's Theatre in 1817 as Ulysses in Cimarosa's *Penelope*. He also sang in Paer's *Griselda*, in the first London performance of *Don Giovanni*, and in *Così fan tutte* and *La clemenza di Tito*. Returning to Italy, he appeared at La Fenice where he sang Adriano in the first performance of Meyerbeer's *Il crociato in Egitto* (1824). Adriano became his favourite role and he sang it at his farewell in 1831.

His son Domenico (*b* Brescia, 7 June 1793; *d* London, 11 November 1851) was a singing teacher and composer who settled in London; he wrote a treatise, *The Art of Singing and New Solfeggios for the Cultivation of the Bass Voice* (London, 2/1844).

ELIZABETH FORBES

Crivelli, Giovanni Battista (*b* Scandiano, nr Modena; *d* Modena, March 1652). Italian composer. He was organist of the cathedral at Reggio nell'Emilia from 24 September 1614 to 24 October 1619, and in 1626 was director of music at the Accademia dello Spirito Santo, Ferrara. In 1635, while *maestro di cappella* of the Madonna della Ghiara at Reggio nell'Emilia, he petitioned for citizenship there. He was a musician in the service of Duke Maximilian I of Bavaria, and *maestro di cappella* of Milan Cathedral from 1638 to January 1642, when he was appointed to a similar positon at S Maria Maggiore, Bergamo, which he held until 1648 (his successor was appointed on 21 September in that year). He built up the choir to a strength it had lacked since before the plague of 1630 and assembled musicians he had met in Ferrara and Milan to perform at the exceptionally opulent Assumption Day celebrations in 1642. In 1651–2 he was director of music to the Duke of Modena.

Crivelli was one of the most talented lesser composers to adopt the new concertato style for motets and madrigals. His very attractive music shows the choice that composers faced in the 1620s between an expressive idiom with emphasis on melodic beauty and an approach in which subtleties of musical structure were more important. In the motet collection (which was popular enough to be reprinted twice) the latter is well exemplified in *Ut flos ut rosa* for two tenors and continuo, which is in an *ABA* form in which *B* is in triple time and *A* is varied when it returns; attractive melodies and balanced form are combined in the five-part *O Maria mater gratiae*. This volume also contains three very well conceived dialogues. In the madrigal collection, duets for equal voices are the commonest texture; again there are imaginative melodies

and some chromaticism as well. Crivelli also contributed to opera, writing three scenes for the composite *La finta savia*.

WORKS

Il primo libro delli motetti concertati, 2–5vv, bc (Venice, 1626)
Il primo libro delli madrigali concertati, 2–4vv, bc (Venice, 1626)
3 scenes from La finta savia (Venice, 1643)
Motets in 1629[5], 1649[1], 1653[1]

JEROME ROCHE/ELIZABETH ROCHE

Croatia. Country in south-east Europe. Once the ancient Roman province of Illyricum, it was settled at the beginning of the 7th century by Slavs, who were converted to western Christianity by the end of the 8th century. Medieval principalities were quickly formed, and a kingdom of Croatia existed from 925 (the dynasty of Trpimirović) to the end of the 11th century. In 1102 Croatia entered into a personal royal union with Hungary; in 1527 it became part of the Habsburg Empire by electing Ferdinand King of Croatia. This political, cultural and social union with Hungary and Austria lasted until 1918. Between 1409 and 1797, however, the Croatian maritime provinces of Istria and Dalmatia were under Venetian control, and from 1526 to 1699 other parts (e.g. the continental province of Slavonia) were conquered by the Ottoman Empire. The region comprising the Republic of Dubrovnik claimed autonomy until 1808. During 1918–41 and 1945–91 Croatia consecutively was made part of the Kingdom of the Serbs, Croats and Slovenes, the Kingdom of Yugoslavia, and the Socialist Federal Republic of Yugoslavia. There was strong German and Italian influence from 1941 to 1945. Since 1991 the Republic of Croatia has been an independent state.

I. Art music. II. Traditional music.

I. Art music

1. Medieval and Renaissance. 2. Baroque. 3. Classical. 4. Romantic. 5. 20th-century.

1. MEDIEVAL AND RENAISSANCE. The earliest sources are in the form of Gregorian chant. Several hundred neumed codices and fragments, dating from the 11th century to the 15th, exist in archives and libraries within Croatia (Dubrovnik, Split, Trogir, Šibenik, Zagreb) and beyond (Oxford, the Vatican, Berlin). Some originated in domestic scriptoria (Osor, Zadar, Split, Dubrovnik); others were imported from Italy, Austria, France or Hungary. Numerous illustrations from the 11th century onwards show musical instruments and scenes of music-making along western European iconographical lines. The first performers to be named are the 13th-century 'kitharists' Andrija and Čestivoj, who were in the service of a Croatian noble; the earliest composers may probably be placed in the next century (e.g. Augustin Kažotić, bishop of Zagreb). During this period organs were erected in Zadar (13th century), Zagreb (by 1359) and Dubrovnik (1384). The Rector's Chapel in Dubrovnik, founded in 1301, was active until the fall of the Republic of Dubrovnik in 1808.

In the 16th century 80% of Croatian territory was lost to the Ottomans and the rest divided between Habsburg and Venetian administrations. Music suffered. All the Croatian composers known to us were active abroad, and their compositions and theoretical writings were published abroad, though they probably also wrote and performed at home. The earliest of these composers were Franjo Bosanac (Franciscus Bossinensis) and Andrija Motovunjanin (Andrea Antico da Montona), who composed frottole and ricercari in Venice in the early 16th century and were also engaged in music printing. Their successors included Andrija Petris (Andrea Patritio) from the northern Adriatic island of Cres and Julije Skjatević (Giulio Schiavetti) from Šibenik, responsible respectively for madrigals (Venice, 1550) and *greghesche*, madrigals and motets (Venice, 1564–5). Henrik and Lambert Courtois published in 1580 madrigals dedicated to members of the Ragusan noble families of Bunić (Bona), Gundulić (Gondola) and Baziljević (Baseglio).

The works of the above composers constitute the entire known corpus of Croatian Renaissance music: the presumably rich repertory of Dubrovnik, known to have been produced by such composers as Secundo Brugnoli, Gavro Temparičić (Tamparizza), Benedikt Babić (Baba), Emanuel Zlatarić, Nikola Gaudencije (Gaudentius) and Antun Tudrović, seems to have been destroyed in the earthquake of 1667. Of other Renaissance material, the first notated folktunes survive in Petar Hektorović's *Ribanje i ribarsko prigovaranje* ('Fishing and Fishermen's Debates', 1568), and music is considered in the writings of Federik Grisogono-Bartolačić and Luigi Bassano from Zadar, Matija Vlačić Ilirik (Mathias Flacius Illyricus) from Labin, Frane Petris (Franciscus Patritius) from Cres, Nikola Vitov Gučetić (Niccolò Vito di Gozze) and Miho Monaldi from Dubrovnik, and Faust Vrančić (Faustus Verantius) from Šibenik.

2. BAROQUE. Somewhat unexpectedly, the first half of the 17th century was a golden age for Croatian art music. Several hundred compositions in early Baroque style are extant, the most significant composers being the Franciscan Ivan Lukačić of Šibenik (*Sacrae cantiones*, Venice, 1620) and Vincenz Jelić, also a cleric, from Rijeka (*Parnassia militia*, *Arion primus* and *Arion secundus*, Strasbourg, 1622, 1628). In the multicultural provinces of Dalmatia and Istria, some Italian-born composers were at work, including Gabriello Puliti, Damianus Nembri and, above all, Tomaso Cecchini, who in addition to collections of masses, motets and madrigals (published 1612–35) produced the first Baroque instrumental music in Croatia: sonatas, ritornellos and ballettos. He spent most of his life in Hvar, which appears to have been a strong cultural centre: one of the first theatres in modern Europe, built there in 1612, is still in operation, and the Chapter Library has a violin tablature dated 1625 by Gabriele Pervaneo as well as treatises by Zacconi and Artusi.

The consequences of the country's division continued to be felt. While the coastal regions displayed features typical of a remote Venetian province, the hinterland was immersed in the Habsburg Counter-Reformation. One result was that until the second half of the 18th century music in northern Croatia consisted of simple pious songs in Croatian dialects, related to both local idioms and international models, and intended to foster Catholic spirituality throughout the population: examples include

Atanazije Grgičević-Georgiceo's *Pisni za najpoglavitije ... dni godišća* ('Songs for the Most Important ... Days of the Year', 1635), Nikola Krajačević-Sartorius's *Molitvene knjižice* ('The Prayer Books', 1640) and the anonymous Pauline songbook (1644). There is also evidence of music at the new Jesuit colleges in Zagreb, Varaždin, Požega, Rijeka, Dubrovnik and elsewhere, but the revival of the art among the nobility, gentry and urban middle class had to await the withdrawal of the Ottomans (1680–1730) and the subsequent economic recovery.

Music theory was apparently of less concern that it had been in the 16th century, but some treatises survive, including the *Asserta musicalia* (1656) of the pan-Slavonic visionary Juraj Križanić (Crisanius) and *Dialogo* (1619) of Giorgio Alberti of Split. Gjuro Baglivi, the most famous physician of Dubrovnik, published several texts in the 1690s and 1700s treating the therapeutic properties of music, and Krsto Ivanović of Budva, author of the first printed history of Venetian opera (*Minerva al tavolino*, Venice, 1681), was almost certainly of Croatian origin. Dictionaries from this period, by Jacobus Micaglia (1651), Juraj Habdelić (1670) and Ivan Belostenec (1670–75), include entries in three Croatian dialects for approximately 1300 musical terms.

Among composers working abroad, Ivan Šibenčanin (Giovanni Sebenico), from Šibenik, studied with Legrenzi, worked at the Chapel Royal of Charles II, and had at least three operas staged in Turin and Venice between 1673 and 1692: *L'Atalanta*, *L'Oppresso sollerato* and *Leonida in Sparta* (all lost).

3. CLASSICAL. During the 18th century the centre of musical life gradually shifted to the northern, interior part of the country, though the coastal regions continued to give birth to remarkable composers. From around 1750 to 1820 Croatian musical culture was marked by two features: the activity of several circles of composers in Split, Dubrovnik and Varaždin, and a keen interest in instrumental music, composed mostly by musicians living abroad. In Split, Benedetto Pellizzari, Julije (Giulio) Bajamonti and Ante Alberti were *maestri di cappella* at the cathedral, and in Varaždin Ivan Werner, Leopold Ebner and occasionally Johann Baptist Vanhal served parish and monastic churches. Composers in Dubrovnik, though, were traditionally closer to secular authorities and so produced more instrumental chamber music than was usual at this time in Croatia; those concerned included Tommaso Resti, Angiolo Maria Frezza, Giuseppe Zaboglio, Juraj Kraljić, Angelo Bonifazi and Juraj Murat. Specially important were several members of the aristocratic Sorkočević (Sorgo) family: in 1754 Luka, then 20, wrote seven fine symphonies; his son Antun, last ambassador of the Republic of Dubrovnik to Paris, composed instrumental music; and Elena di Pozza-Sorgo wrote some early Romantic songs.

Other major figures worked abroad, and included Amando Ivančić, a Pauline monk, who wrote symphonies, divertimentos and trio sonatas as well as church music, the Split nobleman Stjepan (Stephano) N. detto Spadina, author of sonatas, Ivan Jarnović (Giovanni Giornovichi), a famous traveller and violin virtuoso whose works include 17 violin concertos and much chamber music, and Josip Mihovil (Giuseppe Michele) Stratico, first violinist of the Tartini orchestra in Padua, who left more than 60 violin concertos, 30 symphonies and many trio sonatas. Towards the end of the 18th century the Croatian aristocracy, now risen again to relative prosperity and joined by foreign nobility settled in the recently reconquered province of Slavonia, enjoyed a last period of glory. This was reflected musically in the presence at the courts of Patačić, Drašković, Erdödy and Prandau, among others, of such musicians as Michael Haydn, Vanhal and Dittersdorf.

4. ROMANTIC. The spirit of the 18th century lasted well into the 19th; solid foundations for concert life and musical education were then laid with the foundation of a Musikverein in each of the cities of Zagreb (1827), Varaždin (1827) and Osijek (1830). The early Romantic era coincided with a national revival, the Illyrian movement (1835–48), though music benefited less than literature and political thought. Composers of the Illyrian period (Ferdo Wiesner-Livadić, Ivan Padovec, Josip Runjanin, Ferdo Rusan and others) concentrated on patriotic songs, whose aesthetic value is often inversely proportional to their political commitment and success at the time: these composers strove for music based on folksong, but failed because they had insufficient knowledge of folklore and were technically inadequate. More important than any other Illyrian was Vatroslav Lisinski (1819–54), the tragic figure of Croatian Romanticism, who was harrassed throughout his short life by the pro-Habsburg establishment in Zagreb and had no opportunity to develop his exceptional talent – though he did compose the first Croatian opera (*Ljubav i zloba*, 'Love and Malice', staged 1846), besides songs, choral pieces and orchestral music.

During the ensuing creative lull (*c*1850–70), occasioned by the unfavourable social climate resulting from the post-1848 Habsburg oppression, musical life was restructured. Singing societies were established in Karlovac (Zora, 1858) and Zagreb (Kolo, 1862), and the Zagreb Musikverein came under state support and was Croaticized in 1861 as the Narodni Zemaljski Glazbeni Zavod.

The late Romantic period was dominated by the composer Ivan Zajc (1832–1914) and the musicologist Franjo Ksaver Kuhač (1834–1911). Trained in Italy, Zajc arrived in Zagreb in 1870 after a successful career as an operetta composer in Vienna to become both the first director of the newly founded Croatian National Opera (1870–89) and director of the Glazbeni Zavod music school (1870–1904). He left a large output in all genres, but most important were his many stage works, among which his masterpiece, the opera *Nikola Šubić Zrinjski*, is an emblem of Croatian patriotism. Other composers of this period – Antun Schwartz, Đuro Eisenhuth, Vilko Novak, Antun Vancaš, Vatroslav Kolander – were outshone. Franjo Kuhač, the founder of Croatian musicology and musical historiography, provided a solid basis both for ethnomusicology in the country and for the national style cultivated by composers in the 1920s and 1930s.

5. 20TH-CENTURY. The 20th century was an extraordinary period of increasing professionalism and creative diversity, with radical turning points in 1916 and 1961. Compensation for the lack of a mature musical nationalism in the 19th century, and a counterbalance to Zajc's rather bland internationalism, came in the work of a well trained generation of composers born in the 1870s and 1880s, some inclining to late Romanticism and modernism (Blagoje Bersa, Franjo Dugan, Josip Hatze, Dora

Pejačević), some to the use of folklore (Antun Dobronić, Ivan Matetić-Ronjgov). These two streams persisted until the 1960s, represented by such later composers as Fran Lhotka, Krešimir Baranović, Krsto Odak, Božidar Širola and Jakov Gotovac (folklore idioms) and Josip Štolcer Slavenski, Božidar Kunc and Ivo Parać (international styles).

After the first Zagreb Biennale for Contemporary Music (1961) came a period of pluralism. Some composers never abandoned tonality (Boris Papandopulo, Ivan Brkanović, Stjepan Šulek, Bruno Bjelinski, Andjelko Klobučar), others began to evolve (Milo Cipra, Natko Devčić, Branimir Sakač), and still others were immediately associated with the radical avant garde (Milko Kelemen, active in Germany, Ivo Malec, working in France, Stanko Horvat, Ruben Radica, Dubravko Detoni, Igor Kuljerić, Davorin Kempf). Younger composers, born between the 1940s and 1960s, were educated within the avant-garde atmosphere and have introduced a postmodern sensibility; they include Silvio Foretić (living in Germany), Marko Ruždjak, Frano Parać, Berislav Šipuš, Mladen Tarbuk and Srdjan Dedić.

Outstanding performers have included Milka Trnina, Zinka Milanov, Lovro von Matačić, the Italian-born Antonio Janigro, Zlatko Baloković, Dunja Vejzović, Ivo Pogorelich and Radovan Vlatković; among teachers have been Václav Huml, Svetislav Stančić and Rudolf Matz. The country has four opera houses (in Zagreb, Split, Osijek and Rijeka), several symphony and chamber orchestras (notably in Zagreb and Dubrovnik), festivals, choirs, etc. Croatian musicologists since Kuhač have worked on national musical history (Božidar Širola, Josip Andreis, Lovro Županović) and some have received international recognition (Dragan Plamenac, Ivo Supičić).

II. Traditional music

1. CONTEXTS. Music-making in traditional communities was, and to a certain extent still is, an integral part of everyday working life. Various songs are performed during labour and rest-periods, and also after work (such as harvesting and hoeing) for entertainment. Outdoors, where people are physically separated by distance, short dialogue songs (the *samica*, *rozgalica*, *vojkavica*) establish communication. Separation also contributed to the development of the songs and music of solitary travellers, and shepherds who play their solo instruments, the *dvojnice* and *tambura* (see §2 below), passing the time spent with their livestock at pasture.

Music is also performed during leisure time, at public gatherings, for example, such as the *kolo* or round-dance socials organized on Sundays and saints' days. Short songs based on 10-syllable couplets (for example the *poskočnice*) are also sung to express emotions, to convey a particular message and to comment or criticize. The jocular character of these songs allows expression of what is sanctioned in ordinary conversation. Young people participating at public dance parties have the opportunity to observe and choose future spouses, particularly in the *biračko kolo* (a round-dance).

Young children absorb their first experience of music from lullabies and songs sung to them by their mothers and grandmothers. As well as calming children before sleep, these songs play a role in enculturation. Older children satisfy their need for play, structured movement and musical expression by performing *brojalice* (counting-rhymes), various games with movement, mimicking games etc.

In the marking of life cycle events, music plays its most important part in wedding customs. In the past, members of the wedding party sang songs that had a ritual function, while during the 20th century they were gradually replaced by musicians. Among customs connected with death are the practice of ringing bells that announce the gender and age of the deceased, and the performance of laments (*naricanje*). In some regions (Turopolje, Kordun) professional female lamenters were engaged, but it is more usual for laments to be sung by close female relatives. Although not considered music, the performance of laments has poetic and musical elements.

Music-making is an integral part of calendar rituals, performed by organized groups in processions at Christmas and New Year, Carnival, or on saints' days etc. They go from door to door performing songs expressing good wishes to the households. The tunes and their sometimes strictly set performing styles were believed to have magical powers. For example, Carnival dances with foot-stamping and high leaps were thought to enhance the turnip and

flax crops. Socializing and entertainment of the participants in the calendar rituals are additional motives for taking part, and they could also count on considerable material gain. These rituals occasionally survive today as expressions of local cultural identity.

The use of signalling and noise-making instruments – bells, trumpets, rattles, whistles and drums – is connected with door-to-door rounds. They mark the beginning and end of the rituals, and mark the separate identities of the performers. Previously such instruments had other purposes, such as bellringing and mortar-firing to drive away hail-bearing clouds, while a system of *klepala* (wooden clappers) at military outposts alerted the community to danger. In northern Croatia heralds can still be found who beat old Austrian military drums to announce news. However, today noise-making instruments are more often used by sports fans and Zagreb high school students on their last day of school.

Elements of traditional secular music are found in Roman Catholic liturgical and paraliturgical singing in Croatia, particularly in Glagolitic singing which has been transmitted by oral tradition (*see* GLAGOLITIC MASS, GLAGOLITIC CHANT). Lay singing in church is often led by the more gifted singers, giving them high standing in their communities. On special occasions, such as festivals and celebrations, traditional bellringing (*kampananje, trnačenje*) takes place.

There is much less historical data available on music-making by the aristocracy and the bourgeoisie. From the end of the 17th century there have been wine-drinking societies which come together on St Martin's Day (when the must is baptized) and on New Year's Eve. *Napitnice* (drinking songs) are a typical genre connected with their social gatherings.

Because of the greater role of broadcasting and recorded Media in musical culture, people today usually listen to music rather than make it. Spontaneous music-making is much less a part of everyday working life but is practised at private parties, birthday celebrations, weddings, on excursions and other gatherings.

The presentation of music outside of its traditional context arose particularly at the time of the national movements during the 19th century, and it was widespread during the 20th century. From the 1920s, folklore festivals began to emerge. They were first organized by the Seljačka Sloga (Peasant Unity), the cultural branch of the Croatian Peasants Party, the strongest political party during the 1930s. Its platform raised national self-awareness as a form of resistance to centralizing pressures within Yugoslavia, of which Croatia was a part. Folklore festivals largely follow the concept of presenting local folklore tradition without much adaptation. Music is only part of the total programme, in which dance predominates. There are some 70 festivals, the main one held in Zagreb during the summer (since 1966 as the International Folklore Festival). There are around 600 amateur folklore groups, found mainly in rural areas. Urban groups were founded after 1945 and they perform choreographed dances of various Croatian regions. The only professional folkdance and music ensemble is the Lado, established in 1949. Croatian Radio also has its own Tambura Orchestra, established in 1941. Festivals devoted to traditional music and not to dance are a rarity, one being the Dalmatian Klapa Festival held in Omiš since 1967.

Arranged traditional music was performed during the 1960s and 70s, mostly by pop and opera singers; since the 1980s there have been isolated attempts at jazz and rock fusions; while throughout the 1990s many traditional tunes have been reinterpreted in styles related to trends in world music.

Recording companies show modest interest in traditional music (about 10% of output, usually in adapted form, with a smaller amount of field recordings). Neo-traditional music is given more attention (about 20% of output). There is a similar degree of representation on TV programmes (about 90 minutes per week on state TV); while it is much higher on radio programmes (some 27 and a half hours per week on state radio stations).

During the 1960s, the appearance of popular music festivals was accompanied by the rise of regional song festivals in which certain traditional elements were used in popular music styles. Many of these songs have been absorbed into regional repertories primarily due to their texts (dialect and vocabulary) and the use of traditional instruments like the *tambura*. They are performed by pop singers with orchestral accompaniment, and their popularity is usually limited to a particular region. Amateur groups perform at the Omiš festival and also sing compositions closer to the traditional models.

From the 1960s to the 90s, so-called 'newly composed folk songs' produced mostly in the eastern parts of Yugoslavia also had an audience and were produced in Croatia. Although there had been previous resistance to these songs, it became much stronger after the war with Serbia in 1991, when they were identified with the enemy. Since then 'neo-traditional' songs with a *tambura* ensemble accompaniment have been booming in Croatia. *Tambura* music has been promoted as a symbol of national musical identity. There has also been a strengthening of popular music in regional idioms.

'Neo-traditional' music is only part of popular music culture in Croatia, which is dominated by other international and domestic genres.

2. REGIONS. The profusion and variety of styles existing in traditional music in Croatia are the result of the overlapping of different cultures: central-European (Pannonian and sub-Alpine), Mediterranean and Balkan.

(i) Eastern Croatia. In Pannonian areas (Slavonija, Baranja and Srijem) diatonic two-part singing, with four- to six-note melodic groupings, is found. The upper leading part, delivered by a soloist, ends mostly on the second degree, while the accompanying part, sung by a group, concludes in unison (in the older tradition; ex.1), or a

Ex.1 Ritual song, Otok, Slavonia; rec. I Trišler (Lovrětic, 1897: 404)

perfect 5th below the upper part (in the newer tradition; ex.2). Sometimes, when the group of singers is larger, the lead voice is obscured by the accompanying voices. Part-singing usually comprises a drone (in older tunes) or remnants of a drone combined with parallel movement

(mostly in 3rds). In the 20th century the newer style – *na bas* singing – has been widespread throughout various Croatian regions, but is most common in eastern parts, where it originated in the late 19th century. Apart from lyrical and ballad songs with longer texts, short songs are also found (based on 10-syllable couplets and known as *svatovac*, *bećarac* and *poskočica*).

Ex.2 Two-part song, Vinkovci, Slavonia; rec. S. Janković (Žganec-Sremec, eds., 1951: 185)

Until the beginning of the 20th century the *gajde* (bagpipe), a single-reed instrument with double chanter and a drone pipe fixed to a bellows, and the *dude* (bagpipe with triple chanter, found in western Slavonia) were the main instruments which accompanied dance. They were superseded by *tambura* ensembles. The *tambura*, a long-necked lute, was brought to the Balkans by the Turks in the 14th and 15th centuries. Through migrations caused by Ottoman incursions, the *tambura* was brought to Slavonian areas in the 17th and 18th centuries, where it was gradually adopted. At first it was a solo instrument (*samica*), but from the mid-19th century *tamburas* were also brought together in small groups. Today *tamburas* are widespread throughout Croatia, existing in various shapes, with varying number of strings (usually four), and in various tunings. The present standard combination of the *tambura* ensemble includes: two *bisernica* (small instruments which play the melody), two *brač* (for melodic and harmonic parts), a *bugarija* (of medium size for accompaniment in chords), and the *berde* (the largest and lowest in pitch for the bass line).

In eastern Croatia many dances, often in the form of closed circle (*kolo* or round-dances), are accompanied by singing. Today most of them are also accompanied by *tambura* ensembles. The most famous *kolo* dance, known as *Šokačko kolo*, *Slavonsko kolo* or simply the *Kolo*, has become a symbol of the identity of the people of eastern Croatia. The music and dancing is interrupted by the dancers who sing couplets improvised on the spot.

(ii) Northern Croatia. The Medimurje and upper Podravina regions have unison tunes with melodies of a wider range, often based on medieval modes (especially the Dorian, ex.4, Aeolian and Phrygian modes) and anhemitonic pentatonic scales (ex.3). They are frequently in mixed and asymmetrical metres with unequal bar units,

Ex.3 Song about a bird, Mursko Središce, Medimurje; rec. V. Žganec (Žganec, 1990: 60)

Ex.4 Old humorous song, Donji Vidovec, Medimurje; rec. V. Žganec (Žganec-Sremec, eds., 1951: 157)

or are developed in free (parlando-rubato) rhythm. Lyrical texts (often concerning love) are performed to these tunes. Typical instruments are: the *dude* or *mrčaljka* (bagpipes; no longer played), the *citura* in Podravina or the *trontolje* in Medimurje (bourdon box zithers), and the *cimbal* (dulcimer) which came from Hungary and is played as a solo instrument or in mixed bands. Violins are common in instrumental groups, joined by the *cimbal* and *tambura* as accompaniment. There are also the *bandisti* (brass bands) which play at socials and weddings. *Tambura* bands emerged during the 20th century, particularly among amateur folklore groups.

Dancing in formation of open or closed circles (the *kolo* dance), accompanied by singing (often ballads) began to disappear at the end of the 19th century when several couple-dances were introduced from the neighbouring north-west, for example the *čardaš*, *polka*, *valcer* and *zibnšrit*. There are also solo dances, e.g. the *moldovan* stick-dance, performed by skilful male dancers.

(iii) North-western and central Croatia. This comprises Croatian Zagorje, the broad surroundings of Zagreb, and the Žumberak, Pokuplje, Upper Posavina, Moslavina and Bilogora regions. Diatonic tunes with four- to six-note melodic groupings are common in these regions, sometimes with changeable degrees (e.g. between a major and minor 3rd above the lowest tone; ex.5). Usually melodies

Ex.5 Wedding song, Ćurlovac, the Bilogora region; rec. Z. Lovrenčević (Lovrenčević, 1994: 45)

conclude on the second 'degree' which can also be the 'tonic'. Apart from unison tunes (mainly in ritual songs), there are two-part songs with unison-endings (an older tradition), or in the interval of the major 3rd and perfect 5th (a newer tradition). Newer repertory includes tunes which tend to or are already in a major mode (ex.6).

There are various flutes: the *žvegla* or the *frula* (duct flute), the *dvojnice* or *dvojke* (double duct flute) and others made as souvenirs and toy instruments in the shapes of birds, fish, hammers or walking-sticks. In the 19th century and beginning of the 20th, dances were accompanied by the *dude* (a bagpipe with triple chanter) in the Bilogora and Moslavina areas. The *guci* instrumental groups, consisting of two *gusle* (violins) and the *bajs* (a doublebass played with a bow), sometimes together

Ex.6 Carol, Matenci, Croatian Zagorje; rec. and transcr. J. Bezić (Bezić, 1973: 340)

Ex.7 Two-part song, Stara Baška, the island of Krk; rec. I.Matetić-Ronjgov (I.Matetić-Ronjgov, 1990: 385)

Ex.8 The *mantinjada* play on two *sopilas*, Novi Vindolski, Croatian littoral; rec. and transcr. N. Karabaić (Karabaić, 1956: 27)

with a *cimbal* (dulcimer), were found across the whole region. In the first half of the 20th century they were joined and/or replaced by various kinds of *tambura*, which spread from eastern Croatia (Slavonia).

In dance repertories the *drmeš* dance is widespread. It is danced in couples or in small circular groups, and has two basic figures: in the first, small steps are made with marked shaking of the entire body; in the second, the circular group whirls at fast tempo. Along with the *drmeš*, the *polka* is the most popular dance of these regions.

(iv) Western Croatia. Consisting of the northern Adriatic areas (the Istrian Peninsula, the Quarner Bay and its islands such as Krk, Cres, Lošinj and Susak), western Croatia's traditional music is characterized mainly by chromatic modes with successive (approximate) semitones, or with an (approximate) whole tone alternating with semitones. Two-part singing in pairs (of the same or mixed gender) is performed with movement in parallel (approximate) minor 3rds, with a delayed unison ending, arrived at by contrary motion (ex.7). The inversions of these intervals (approximate major 6ths and octaves) appear when the accompaniment is in the upper part (for example when the leading part is performed by a male singer). The singers often insert vocables at the end of particular words, or between the syllables, for example 'ma', 'nina nena', 'trajna naj' etc. Sometimes the entire refrain is performed in this way, or even the entire tune, which is customary when there is no instrumental accompaniment to the dance. This style of singing is called *tarankanje*.

Dances are frequently accompanied by two *sopila* or *roženica*, large and small double-reed wind instruments, which produce two-part music with similar characteristics to those in singing. On solemn festive occasions, the *mantinjada* is played on them (ex.8). It is also customary to dance to a *šurle* accompaniment (single-reed instrument with two separate chanters), to the *mih* or *meh* (the same as the *diple na mješinu*), and in the inland northern part of Istria, to an instrumental group called *gunjci* (a violin, clarinet and a two-string doublebass), and, more recently, to the *(h)armonika* (a diatonic accordion).

This region is characterized by the *tanac* and the *balun* dances. They have several figures performed by the dancers facing in two rows and as couples regularly distributed in a circle, figures in which very small steps are made and those in which the female dancers spin very quickly. Other dances, like the *polka* and the *valcer*, are also performed.

(v) Southern Croatia.

(a) The Adriatic hinterland. The older tradition of the Dalmatian hinterland and the Lika region is characterized by narrow-interval style: tunes are based on chromatic modes of narrow range, with intervals that deviate from the tempered system. In two-part singing drone accompaniments and intervals of the 2nd frequently appear. The parts also finish on the interval of a 2nd (ex.9). Short songs (decasyllabic couplets) are performed in a peculiar style of singing, usually known as *ojkanje*. It is characterized by performing melisma of varying lengths, sometimes with sharp and prolonged shaking of the voice on the syllables 'Oj', 'hoj', 'voj', 'ej' or 'aj' (ex.9). *Ojkanje* is connected with mountain areas and stock-raising cultures, and is practised outdoors. It appears as the solo singing of lone travellers (*putniško*), or in two-part tunes (*vojkavica, treskavica, rera, ganga, rozgalica*). *Ojkanje* is also known in Bosnia and similar singing styles exist in the mountain regions of Albania, Bulgaria, Greece and Turkey.

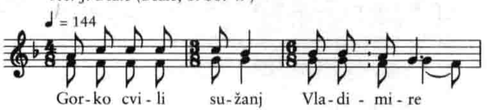
Narrative songs (epic and ballad) are performed by individual singers who often direct their gaze at a hand-held book or cap (singing *iz kape, iz knjige*, 'from a cap, from a book') to aid concentration, as the songs are long and sung from memory. The most famous performers of epic songs are *guslari*, singers who accompany themselves on the *gusle*, a bowed, single-string chordophone widespread in the Balkans. They perform all the verses improvising two basic recitative melody-sections. The instrumental melody is similar to the vocal one (ex.10). *Guslari* were highly respected in their community.

The *diple* is a widely distributed single-reed instrument with a double chanter, the older type of which produces

Ex.9 *Treskavica,* Podvaroš, near Sinj, Dalmation hinterland; rec. and transcr. J. Bezić (Bezić, 1967–8: 220)

one-part, and the newer, two-part music. Frequently it is attached to a bellows (then called *diple na mješinu* or *mih*). This kind of bagpipe does not have a drone-pipe, and is also found all along the Adriatic coast and on the islands. It is played by shepherds, but also at parties, sometimes to dancing.

Newer musics, especially in the Lika region, are charactized by diatonic tunes in the *na bas* style. The solo-*tambura* (the *danguba*) is also found, the musician using it to accompany his own singing.



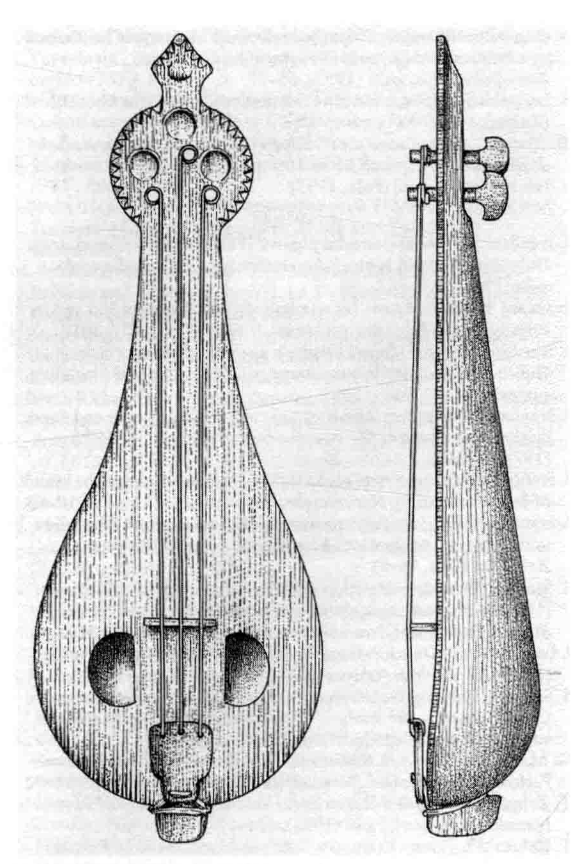
The *nijemo kolo* (the mute *kolo* dance) without any musical accompaniment is common in dance repertories, the rhythm provided by the dance-steps and the sound of the rattling of the ducats adorning the dancers' costumes.

Ex.10 A song accompanied by the *gusle*, Krušvar-Dicmo, Dalmation hinterland; rec. and transcr. J. Bezić (Bezić, 1967–8: 228)

It is performed in large steps and jumps in various figures which change to the commands of the dance-leader.

(b) The central and southern Adriatic. This region comprises coastal Dalmatia and its islands. Older traditions (particularly in northern Dalmatia) are marked mainly by diatonic two-part singing with a small range and delayed unison endings (ex.11); endings in 5ths

Ex.11 Narrative song, Bibinje, near Zadar, northern Dalmatia; rec. J. Bezić (Bezić, 1966: 49)



became common around the mid-20th century. In the very south (around Dubrovnik) single-part singing is more common. Songs of more recent traditions have characteristics of the major mode. A gradual descent from the seventh to the third degree is typical for the upper part of these songs. They are performed as two-part (in parallel 3rds) or multi-part harmonic songs (ex.12). The latter is known as *klapsko pjevanje* (*klapa* singing) because it is performed by a male group (called a *klapa*), made up of between four and eight singers. In the mid-19th century it was performed in urban centres, and during the 20th century it was introduced into villages. Wide popularization of *klapa* singing is linked to the Dalmatian Klapa Festival in Omiš (established in 1967), where every year arrangements of traditional *klapa* songs, as well as new compositions in the style, are performed. During the last two decades this style of singing became strongly identified with Dalmatian music. Popular songs are sometimes performed in this style.

In villages, dances (usually in couples) are accompanied by the *mih* or *mišnjice*, and the LIRA or *lijera* (*lirica* or *lijerica* in its diminutive form) in the southern Adriatic region (see illustration). The *lira* is usually used to accompany the *poskočica* (also known as the *linđo*) dance. In towns *mandolin* ensembles accompany urban dances, such as the *šotić*, *manfrina*, *kvadrilja* and *polka šaltina*. On the islands of Korčula and Lastovo the *moreška* and the *moštra* (sword dances) are still performed, usually at Carnival time.

3. RESEARCH. Although the first notations of traditional music date from as early as the 16th century, indirect sources (e.g. hymnals with examples of contrafactum, descriptions, travel notes and so on) predominated until

Ex.12 The *klapa* song, Svirče, the island of Hvar, Dalmatia; rec. and transcr. J. Bezić (Bezić, 1995: 355)

Lirica (three-string bowed chordophone)

the 19th century, when interest grew and traditional music started to be written down. Franjo Ksaver Kuhač (1834–1911) was the founder of Croatian ethnomusicology. He noted down more than 2000 tunes and wrote numerous papers on traditional music. His collection of instruments is kept in the Ethnographic Museum in Zagreb.

Systematic research continued in the 20th century. During the 1920s, the Ethnographic Museum in Zagreb organized phonographic recordings (120 wax rolls kept in the Phonogram-Archiv in Vienna). Notable researchers included Božidar Širola (1889–1956), a composer and musicologist who studied traditional instruments and wrote the first synthesized review of Croatian traditional music; and Vinko Žganec (1890–1976) who noted down more than 15,000 tunes and published them in a number of extensive collections. During the 1950s and 60s, under the auspices of the Institute for Folk Art in Zagreb (established 1948, today the Institute for Ethnology and Folklore Research), Žganec organized research in the individual regions. The focus of interest at that time was the rural music of the earlier traditions and the study of musical structures.

The institute has a specialized library and documentation fund (for manuscripts, photo-, phono- and video-recordings and computerized databases). The ethnomusicologists Stjepan Stepanov (1901–84) and Jerko Bezić (*b* 1929), and the ethnochoreologist Ivan Ivančan (*b* 1927) have made a great contribution to the institute's research projects. Under the influence of contextual folklore studies and anthropology, the subject of research has been considerably broadened since the 1970s and has covered many aspects of traditional and contemporary music and dance culture.

STANISLAV TUKSAR (I), GROZDANA MAROŠEVIĆ (II)

Croatti [**Crotti**], **Francesco** (*b* Ferrara; *fl* 1607–8). Italian composer. An Augustinian monk, he was *maestro di cappella* of the cathedral at Pescia, near Lucca, in 1607. His only known collection of music, the *Messa e motetti* for five, six or eight voices (Venice, 1608), shows him to be one of those church composers who were still writing for fairly large forces in the tradition of the Gabrielis. The mass adopts an imitative style for the entries of the eight voices but is more homophonic in the Gloria and Credo. As in the earlier music of Giovanni Gabrieli, some of Croatti's double-choir motets use a second choir lower in tessitura than the first. There are also refrain forms: *Verbum caro* has a triple-time tutti that punctuates 4/4 sections for the first choir alone. Several motets by him are included in contemporary anthologies (RISM 1612[3], 1617[1], 1621[2]). (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

JEROME ROCHE

Croce, Benedetto (*b* Pescasseroli, nr Aquila, 25 Feb 1866; *d* Naples, 20 Nov 1952). Italian philosopher, historian and critic. In its original and most influential formulation Croce's aesthetic theory is part of a general philosophy of civilization (largely derived from Vico and Hegel). Croce's view is both 'idealist' and 'historicist'. His idealism is evident when he poses a strong contrast between 'intuition' and 'intellect', and argues that art is 'intuition without intellectual relations' (1915). His emphasis on the intuitive is motivated by a resistance to contemporary positivism, which gave weight to scientific understanding. His 'intuition' is a form of non-conceptual, non-experimental activity. It does not, however, consist in introspective knowledge, or vague impressions which can be known apart from any tangible form. Rather, that which is 'known' intuitively is grasped only in its expression ('The spirit only intuits by making, forming, expressing', 1902, Eng. trans., 1992, 8–9). 'Expression' itself gains an unusual meaning by this association with the intuitive. If the act of 'expressing' gives content to the intuition, it cannot be claimed that the expression is of something already 'known', as if intuition and expression were two separate things. To say that art 'expresses' intuitions is to say that it brings a state to clear and explicit consciousness by giving it a material and perceptible form.

Croce espoused an 'absolute historicism', more radical in its denial of any transcendent values, or patterns of development, than even the earlier German historicisms had been (Roberts, 1987, p.4). Absolute historicism is the view that a human, historical 'reality' is the only reality there is. This view appears in Croce's approach to art criticism as a form of historical exegesis. The critic may provide commentaries on the historical circumstances of a work's creation in order to prepare another for its contemplation, but he or she should not offer judgments of what is 'beautiful' or 'ugly' by reference to absolute values, as such judgments fail to take account of the fact that each artistic intuition is unique. The only grounds for judging a work 'bad' is, in Croce's view, that it fails to express an intuition, but a judgment of this kind would disqualify it from being a work of art at all. It is also not necessary for a critic to explain the art, because an artistic intuition is made immediately accessible to others simply by being expressed. The function of the critic cannot then be to interpret or evaluate, but only to clear away historical obstacles in the way of recapturing the intuition and to point out such lapses from clarity as clichés and reliance on set forms.

Croce's aesthetic theory was highly influential, particularly in Italy, between World Wars I and II. His theory poses problems for the relation between composers and performers of music. The composer, as an artist, must have achieved a definitive intuition: the function of the

executant can only be to recapture that intuition. But this is hard to apply in practice, and denies to the performer the status of artist. This issue was hotly debated between Croce's followers and others. Croce's later views, which modified his theory so as to assimilate all art to lyric poetry conceived as a cry from the heart, had less influence. His earlier theory became best known in the English-speaking world through the somewhat confused but polemically effective version formulated by R.G. Collingwood (*Principles of Art*, 1938). A collected edition of Croce's writings was published in forty volumes (*Scritti di storia letteraria e politica*, Bari, 1916–52).

Croce, Elena [Viviani, Elena Croce] (*fl* 1698–1720). Italian soprano. Her first known appearance was in Mantua in 1698, though she was probably of Bolognese birth. She sang in operas by Caldara and Lotti at Venice in 1708 and in A. Scarlatti's *L'amor volubile e tiranno* at Naples in 1709. Probably early in 1710 she replaced Margherita Durastanti as Agrippina in some performances of Handel's opera at Venice. She sang there again, as Elena Croce Viviani, in 1712 and 1713. Early in 1716 she was in London, singing at the King's Theatre until June in the pasticcios *Lucio Vero* and *Clearte* and a revival of Haym's adaptation of A. Scarlatti's *Pirro e Demetrio*. In 1719–20 she sang at Munich.

WINTON DEAN

Croce, Giovanni [Ionne a Cruce Clodiensis; Chiozzotto] (*b* Chioggia, *c*1557; *d* Venice, 15 May 1609). Italian composer, singer and priest. One of the best and most influential composers of the Venetian school, he was in particular a master of the canzonetta and madrigal comedy.

1. LIFE. Croce was a pupil of Zarlino, who made him a member of the choir of S Marco, Venice, while he was still a boy. He took orders before 1585 and for much of his life was in the employ of the church of S Maria Formosa, though the evidence is conflicting as to whether he was ever parish priest. According to one report to the Venetian procurators he was a reliable singer of moderate quality. In the early 1590s he was made *vicemaestro di cappella* of S Marco, in 1593 being in charge of the singing teaching at its seminary. On the death of Baldassare Donato in 1603 there was some dispute about the appointment of the *maestro*, one party favouring a search for a foreigner, but Croce's supporters gained the position for him. In his later years he suffered from gout, and there is evidence that the choir of S Marco was not up to its usual standard during his six years of office. He died of an unidentified infection causing 'fever and spots'.

2. WORKS. Unaffected by most of the modern trends of his time, Croce's secular music is the epitome of the lighter style developed by Andrea Gabrieli. Setting the usual pastoral verse he preferred to ignore its sexual connotations and more emotional potential. Using diatonic melody based on crisp rhythmic motifs, and harmony that is rarely astringent and often full of cadential progressions, his madrigals are very attractive for the amateur singer: in mood and technique they can be compared with those of Thomas Morley, who imitated him quite closely in many ways. Though he was a competent contrapuntist his textures are rarely complex and never academic; they are the product of the twin-motif, whereby each theme is given a simultaneous counter-subject, thus making for concision and a distinctly homophonic attitude. His style can be heard at its best in the 'Spring' section of *I diporti della villa* (*RISM* 1601[7]) and in a similar madrigal sequence, *Ne la staggion novella*, in his first book of five-part madrigals (1585).

Croce's three-part canzonettas (1601) show his attractive melodic gift in their lively, balanced phrases, which are allowed to shape themselves without any reference to the imagery of the verse. The madrigal comedies are less abstract, possessing that fine grain of satire notable in their forebears, the *giustiniane* of Andrea Gabrieli. The *Triaca musicale* is a series of Venetian sketches – pictures of children going to school, folk games, peasants from the countryside (figures of fun in mercantile Venice) and so on – painted with musical allusions to popular songs of the time and occasionally guying the madrigal style. The *Mascarate piacevoli et ridicolose* is a set of dialect canzonettas, depicting by similar means the various characters in carnival entertainments. Both works include clever examples of echo music.

Croce's church music is also conservative. His motets and masses include works written for a small choir, probably that of his parish church, which seem to reflect the needs of the Council of Trent in the audibility of the

words and their general simplicity. His four-part motets (1597) are excellent examples of the small-scale church music that preceded the concertatos of Viadana. Designed for a group of singers lacking a true soprano, they are very easy to sing, never too demanding in either technique or emotion even when a penitential text might suggest a less detached attitude. Croce's style in these works, in both their smoothness of melody and purity of harmony, is closer to that of Palestrina than to that of his fellow Venetians, who were affected by the more abrasive rhythms and freer treatment of dissonance found in Lassus. His early works, for *cori spezzati*, are more obviously traditional to S Marco and show a greater range. Those in the *Compietta* of 1591 tend to be constructed in more intricate counterpoint than his later music; the motets of 1594 show him following the paths of Andrea Gabrieli more closely in their densely argued dialogue and tendency to homophonic writing. He had much the same extrovert attitude to the words, which differentiates him from the more inward-looking Giovanni Gabrieli (who was almost his exact contemporary), and he excelled with texts of rejoicing. In spite of a title-page that suggests instrumental participation, these motets do not use the extremes of range common in Venetian music at this time, and the style remains essentially vocal. Nor do they require keyboard support, even though this publication was one of the first to be supplied with a *basso per l'organo* (in fact a *basso seguente* which includes the bass part of each choir). The masses for eight voices (1596) are generally in a similar idiom, though their compactness makes for denser counterpoint. They are unusual in being parody masses, which were not often composed by Venetians for double choir (though they were later taken up in Germany): two use motets, the third Janequin's *La guerre* as models. The *Missa 'Percussit Saul'* is a particularly splendid work, full of virile rhythms and containing harmonic asperities not unlike those of English composers of the period. A later book of motets for eight voices (1605) seems equally to diverge from Venetian tradition in its lack of exploitation of sonorities, although there is still an effective use of double-choir dialogue and occasionally some new freedom of modulation between tonal centres.

The most significant of Croce's posthumously published music is contained in the *Sacre cantilene concertate* of 1610, which represents an attempt to combine the new concertato manner developed by Viadana with the Venetian grand manner. Each of these motets is divided into sections, in some of which solo voices are accompanied by the organ, others, alternating with them, being performed by ripieno voices with instruments if available. The differentiation of style between these sections, together with the fact that each is virtually self-contained, means that these are among the earliest works in the history of the church cantata. They may well have influenced Schütz in his use of *cori favoriti*, whose function is the same as that of the soloists in Croce's music.

Although he does not seem to have travelled abroad, Croce had a major influence on European music, especially as a madrigalist. Many of his works were reprinted in the Netherlands, and some were well known in England, where several of his best pieces were reprinted with translations in the second book of *Musica transalpina* (1597). It was almost certainly his contribution to *Il trionfo di Dori* (RISM 1592^{11}) that acted as an incentive to Morley to compile *The Triumphs of Oriana*, and his set of spiritual madrigals setting vernacular versions of the penitential psalms (1596) was known in Germany and England, where it went into two editions. Croce was visited by Dowland and mentioned by Henry Peacham in *The Compleat Gentleman* (1622) as a distinguished composer; and some manuscript partbooks (at *GB-Ob*) suggest that in the revival of madrigal singing in the 18th and 19th centuries he was a favourite with amateurs.

Croche (Fr.). *See* QUAVER (eighth-note); *fuse* and *huitième* are also used. *See also* NOTE VALUES.

Croci, Antonio (*b* Modena, late 16th century; *d* after 1641). Italian theorist and composer. He was a minorite. His five published works arose out of his activities as a church musician and teacher, information about which derives from the title-pages and dedications of three of them: in 1633 he was organist of S Francesco, Bologna, and in 1642 was master of the novices at the monastery at S Felice sul Panaro, Modena. He is more important as a theorist than as a composer. His last and most mature theoretical work, the *Geminato compendio*, is, as its title suggests, in two parts; the first deals with cantus firmi, the second with the rubrics of the breviary.

THEORETICAL WORKS

Instructio novitiorum (Faenza, 1630)
Breve discorso della perfezione del numero ternario (Modena, 1632)
Geminato compendio overo Duplicata guida … per giungere facilmente alla perfettione del canto piano, op.5 (Venice, 1642)

WORKS

Messa, e salmi concertati, 4vv, org, op.3 (Venice, 1633)
Frutti musicali di messe tre ecclesiastiche, op.4 (Venice, 1642)

GIUSEPPE VECCHI

Crocker, Richard L(incoln) (*b* Roxbury, MA, 17 Feb 1927). American musicologist. He took the BA as Scholar of the House (Philosophical Orations) from Yale College in 1950, and completed the doctorate under Schrade in 1957 with a dissertation on the Limoges *prosae*. After teaching at Yale (1955–63), he became assistant professor (1963–7), associate professor (1967–71) and full professor (1971–) at the University of California at Berkeley. He retired in 1994. He became known for his independent ideas in *A History of Musical Style*, and in 'The Troping Hypothesis', for which he was awarded the Alfred Einstein Memorial Prize by the American Musicological Society. His work at Berkeley in developing methods of teaching non-musicians deserves mention (see *Listening to Music*). Crocker's major scholarly contribution, however, is to the history and analysis of the medieval sequence, and his work on music theory and early polyphony has been important in providing the basis for a new understanding of principles of composition in the Middle Ages, particularly those connected with tonal order.

PHILIP BRETT

Croes, Henri-Jacques de (*b* Antwerp, bap. 19 Sept 1705; *d* Brussels, 16 Aug 1786). Flemish composer, conductor and violinist. At the age of 18 (7 November 1723) he was named first violin at the St Jacobskerk, Antwerp. In September 1729 he went to Brussels, where he entered the service of Prince Anselme-François of Thurn and Taxis. The prince held the monopoly of postal services in the Empire and had several residences, the most important being at Brussels and Frankfurt and later at Regensburg; de Croes is mentioned in the prince's archives in Germany (in 1734, 1737–9 and 1742). By 1744 he was back in Brussels as a first violin in the chapel of Charles of Lorraine, whose sister-in-law, the Empress Maria Theresa, had made him governor of the Austrian Netherlands. In 1746 he became *maître de chapelle* at the court and directed the chamber music, for at that time the same musicians played in both chapel and court. There were six singers (two counter-tenors, two tenors and two basses) and 13 instrumentalists (six violinists, one violist, one cellist, one double bass player, two organists and two oboists), all of whom were French. For important festivals, the orchestra was augmented by the musicians of the most important collegiate church in Brussels, Ste Gudule (now the cathedral). De Croes remained master of music at the Brussels court until his death.

Given de Croes's circumstances, it is not surprising that he composed both church music and chamber music (in particular sonatas and concertos). He was in no way an innovator: his style may be described as an interweaving of the French and Italian traditions, as might be expected in the southern Netherlands at a time when musical forms were in a stage of transition between the Baroque style and the *galant*. In his trio sonatas, for example, he wrote in the Corelli tradition with a slow introduction and fugal allegro followed by a number of movements alternately slow and fast. In other sonatas he conformed to a more modern Italian pattern: fast–slow–fast, with a lighter texture and more ornate melodic lines. The divertissements belong to the tradition of the French suite, with an overture in dotted rhythm followed by dances. As in the Italianate sonatas, the texture is light and the decoration combines French ornaments with new fashions like the 'Mannheimer Vorhalt' and the Lombard rhythms common in contemporary German music. The solo concertos and the concerti grossi are in the contemporary three-movement Italian style but with the lighter texture that was then employed in France after the manner of J.-M. Leclair; the trademarks of the Mannheim school are also present, giving the concertos a pre-Classical accent. De

Croes was influenced by Corelli, Vivaldi, Tartini and even Handel, and his opening themes frequently bear close resemblance to their works.

De Croes's extant church music includes several motets and fragments of masses, written for four voices and four instruments, with the usual tessituras; this was doubtless the force of the royal chapel and Ste Gudule. Despite the requirements of church music (particularly the masses), the idiom seems more instrumental than vocal. The instruments frequently double the voice parts or realize the figured bass in a fairly straightforward manner. The motets are unusual in that they have a structure similar to that of the cantata, with alternating choruses and solo sections. In these works too, there is evidence of French influence (particularly of a tradition founded by Henry Dumont at the court of Louis XIV), combined with the traditions of the Italian cantata. De Croes's son, Henri-Joseph de Croes (*b* Brussels, 16 Aug 1758; *d* Brussels, 6 Jan 1842), was from 1775 a violinist in the service of the Prince of Thurn and Taxis at Regensburg, and *maître de chapelle* from 1776 to 1783. He is known to have composed only one work, a set of violin duos which his father presented to Charles of Lorraine in the (unfulfilled) hope that his son might succeed him as *maître de chapelle* at the Brussels court.

WORKS

Sacred: Missa solemnis, d, 4vv, 4 insts, 1738, *B-Bc*; Messe brève, d, 4vv, 4 insts, *Bc*; Kyrie and Gloria, 4vv, 4 insts, *Bc*; 5 motets, 4vv, 4 insts, *Bc*; Cum mirabiliter, motet, B solo, 4 insts, *Bc*; 53 masses, lost; 63 motets, incl. 24 with chorus, lost

Concs.: 6 for 2 vn with 6 sonates 'à 4 parties', op.1 (Brussels, 1734), lost; 6 for 2 vn with 6 sonate, op.1 (n.p., n.d.) [?same as above]; 4 for fl/vn, with 4 divertimenti à 4 parti (Brussels, 1737); 1 for fl/ob, *S-Skma*; 2 for fl, *Skma*; 5 for fl, 2 vn, 1 for fl, vn, 1 for fl, *B-Bc*

Other inst: 6 sonates en trio, 2 vn/fl, bc, op.1 (Paris, before 1743); 6 sonates en trio, 2 vn, bc, op.3 (Brussels, ?1737–49), pubd for 2 vn/fl, bc (Paris, before 1749); 6 divertissements, 2 vn, va, bc, op.2 (Paris, ?1743–55); 6 sonates à 4 parties, 2 vn, va, bc, op.4 (Brussels, *c*1747); 6 divertimento, 2 vn, va, bc, op.4 (Paris, after 1749); 6 divertissements, 2 vn, vn/va, bc, op.4 (Paris, after 1750); 6 sonates en trio, 2 vn/fl, bc, op.5 (Paris, n.d.); 16 syms., orch, lost; 16 simphonies d'église, 4 insts, ob ad lib, lost

SUZANNE CLERCX-LEJEUNE

Croft [Crofts], **William** (*b* Nether Ettington, Warwicks., bap. 30 Dec 1678; *d* Bath, 14 Aug 1727). English composer. He was a chorister in the Chapel Royal under Blow, of whom, as appears from verses prefixed to *Amphion anglicus* (1700), he was not only a pupil but a protégé. He was also deeply influenced by Purcell, many of whose works he must have performed and certainly preserved in manuscript copies from the 1690s. There is no reason to reject the probability that he is the 'Phillip Crofts' mentioned in the parish archives of St Anne's Church, Soho, as organist from 1700. In that year he renewed his connection with the Chapel Royal as Gentleman Extraordinary, sharing that post, together with the reversion of a place as organist, with Jeremiah Clarke (i). In May 1704 they jointly succeeded Francis Pigott as organist of the chapel, and when Clarke died in 1707 the whole place fell to Croft. His anthems in celebration of the battles of Blenheim and Ramillies (*I will give thanks*, *O clap your hands* and *The Lord hath appeared*) show that he was already by then supplementing Blow's duties as a composer, and on Blow's death in 1708 he followed him not only as composer, Tuner of the Regals and Organs, and Master of the Children of the Chapel Royal but also as organist of Westminster Abbey. Rather curiously, at some time before 1712, he paid for the restoration of the monument in Norwich Cathedral to William Inglott. In 1712 he relinquished his post at St Anne's.

In July 1713 Croft took the Oxford degree of DMus, being the earliest Oxford graduate in music relating to whom there survives solid extended work submitted for the degree; this took the form of two odes for solo voices, chorus and orchestra, *With noise of cannon* and *Laurus cruentas*, celebrating the Treaty of Utrecht, and published as *Musicus apparatus academicus*. Croft was the senior Chapel Royal composer at the time when Handel began to find favour with Queen Anne, and even though there is no evidence of friction it is not impossible that this imposing volume may have seemed a means of maintaining the native composer's standing. In 1715 his stipend as Master of the Children of the Chapel Royal was increased by £80 a year, his duties to include teaching the boys reading, writing and arithmetic, as well as organ playing and composition. From around this time until his death he enjoyed the patronage of Sir John Dolben of Finedon, Northamptonshire, sub-dean of the Chapel Royal (1712–17). Croft broke new ground in 1724 by the publication of a handsome two-volume collection of his church music, entitled *Musica sacra* (see illustration), engraved and in the form of a score rather than in parts, the advantages of which he cogently urged in his preface. A copy of his 'Proposals' to subscribers is now in the New York Public Library. A list dated 1726 (*GB-Lbl* Add.11732) shows that Croft was one of the earliest members of the Academy of Vocal Music. He married in 1705, but died childless and was buried close to Purcell in Westminster Abbey. Hawkins (*History*, ii, 797) described him as a 'grave and decent man', and the imposing format of his two chief publications together with the nature of his music indicates that he took his position seriously.

As a composer Croft was both a staunch preserver of tradition and an assimilator of new techniques. Many of his works were modelled on specific compositions by Purcell; yet there is evidence that he revised his own *Te Deum* in D, which was clearly based on Purcell's 1694 composition, after having heard Handel's 'Utrecht' setting of 1713. Enough of Croft's songs and instrumental music is dated to justify the view that these branches of composition did not occupy him much after his third decade. His string pieces for the theatre are agreeable if not specially noteworthy, while his harpsichord music is smoother and more regularly turned than that of Blow,

William Croft: engraving by George Vertue after Thomas Murray, from Croft's 'Musica sacra' (London: Walsh, 1724)

with whom Croft, together with others of Blow's scholars, combined in a publication of 1700. The *Hymn on Divine Musick* (*What art thou*) from *Harmonia sacra*, ii (1714), is worthily in the line of Purcell's sacred songs but has less intensity of feeling; in the pleasing solo song *By purling streams* one sees the movements becoming shaped by purely musical considerations, not simply in response to the words, without yet becoming aria. Three sonatas for solo violin and continuo, written before the publication of Corelli's op.5, are of an interesting quality and not merely because they adumbrate an understanding of the idiom of the late Baroque.

Croft was indeed the first English composer of substance to grasp that idiom in a consistent way without earlier gropings or admixture of styles. This is shown in the rhythmic vocabulary, contour of phrase, clarity of tonality, application of fugato and broad concertante handling of chorus and instruments as displayed in his *Te Deum* in D and *Musicus apparatus academicus*. For that reason it was Croft who among composers of his generation most decisively turned a new page in the history of the verse anthem. At the same time as he applied this idiom he also organized the anthem into well-rounded movements of clearly delineated abstract character, instead of the shorter-breathed sections of his predecessors. Solos, duets and trios make up the greater part of these anthems, and he used the organ (on lines already foreshadowed, but more systematically) by allotting introductory passages to it, sometimes in the form of melody and bass but much more frequently a melodic type of stiffly unfolding bass, figured to carry a simple chordal right-hand part. This type of anthem, which Croft transmitted to Greene, is well exemplified in *O praise the Lord, ye that fear him*. Although he applied himself seriously to verse anthem composition and was entirely free from triviality, the general impression is somewhat dry. While in solo passages his melody is conventional, the sections for full choir are stolidly imitative. But like Blow and Purcell before him he was interested also in older polyphonic methods, and a small group of full anthems not only maintains this thread in English music but, as in *Hear my prayer, O Lord*, displays a sombre expressiveness.

In his services Croft, like others, was hampered by the restrictions of the 'short' service style. Nevertheless, in his Service in E♭ he achieved a broader feeling than his post-Restoration predecessors, and when reaching the Gloria to the *Jubilate* of the Service in A he launched into a rolling fugato of considerable effectiveness. The orchestral *Te Deum* and *Jubilate* is a dignified work, perhaps more spacious than Purcell's if less personal, which might well have established itself had it not been overshadowed by Handel's 'Utrecht' setting of some four years later. Croft's Burial Service is a noble classic of moving simplicity, into which, without any degree of incongruity, he overtly incorporated Purcell's setting of *Thou knowest, Lord*.

Croft's hymn tunes in Playford's *The Divine Companion* include those now known as 'Eatington' and 'Croft's 148th'. What are now called 'St Matthew' and 'St Anne' first appeared in the sixth edition of the *Supplement to the New Version* (1708), a wholly anonymous collection, but the subsequent ascription of these to him is generally accepted as a probability. There is, however, much room for doubt about the ascription to him of 'Hanover' from the same collection (see article 'Saint Anne's Tune' in earlier editions of *Grove*).

WATKINS SHAW/GRAYDON BEEKS

Croix (Fr.). *See* SHARP.

Croix, Antoine. *See* LACROIX, ANTOINE.

Croix sonore (Fr.: 'sound cross'; Rus. *zvuchashchiy krest*). A type of THEREMIN in which the normal antenna or aerial is replaced by a large brass cross mounted on a sphere; the electronic circuitry is inside the sphere. It was constructed by Michel Billaudot and Pierre Dauvillier (who probably worked on it at different times) for the émigré Russian composer Nicolas Obouhow. A prototype was apparently demonstrated in Paris in 1926 but then withdrawn; an improved version was presented in 1934. *See* ELECTRONIC INSTRUMENTS, §III, 1(iii–iv).

HUGH DAVIES

Croiza [Conelly], **Claire** (*b* Paris, 14 Sept 1882; *d* Paris, 27 May 1946). French mezzo-soprano. She made her début in Nancy in 1905 (in De Lara's *Messalina*). The following year she began her long association with the Théâtre de la Monnaie, Brussels (début as Delilah, 1906), where her wide repertory included Berlioz's Dido, Clytemnestra in *Iphigénie en Aulide* and Strauss's *Elektra*, Erda, Carmen, Donizetti's Léonor, Charlotte and Fauré's Penelope. At the Paris Opéra she appeared in 1908 as Delilah. At Rouché's Théâtre des Arts in 1913 she sang in the d'Indy editions of *Poppea* and Destouches' *Les éléments* and an act of Gluck's *Orphée*. She sang the title role in Gustave Doret's *La tisseuse d'orties* at its first performance in 1927 at the Opéra-Comique, and in the first staged performance of Debussy's *La damoiselle élue* in 1919 at the Théâtre du Vaudeville.

From 1922 Croiza taught at the Ecole Normale and from 1934 at the Conservatoire. Her instinct for the French language and her intelligence, clarity of tone and passionate reserve caused her to be admired as much by poets as by musicians; Paul Valéry hailed her as possessing 'la voix la plus sensible de notre génération'. Saint-Saëns, d'Indy and Fauré admired her unreservedly, as, later, did Debussy and Roussel. Her silvery yet warm tone, and that 'volupté du son' based on pure, perfect utterance of the words, can be heard on her recordings.

MARTIN COOPER

Crokhorne. *See* CRUMHORN.

Croll, Gerhard (*b* Düsseldorf, 25 May 1927). Austrian musicologist of German origin. He studied musicology, art history and philosophy at the University of Göttingen (1948–54) and received the doctorate in 1954 under Rudolf Gerber with a dissertation on Weerbeke's motets. After working for three years on a scholarship from the Deutsche Forschungsgemeinschaft he became assistant lecturer in 1959 at the University of Münster, Westphalia, where two years later he completed his *Habilitation* with a work on Steffani. In 1966 he was appointed to the newly created chair of musicology at Salzburg. He was made professor emeritus in 1993.

Croll worked initially in the field of sacred music of the 15th and 16th centuries, but after submitting his doctoral dissertation he turned to Italian and German Baroque opera as well as to music of the Classical era. One of the editors of the Weerbeke Gesamtausgabe and Gluck's Sämtliche Werke, he was editor-in-chief of the latter from 1960 for 30 years; he has also written major articles for a number of dictionaries (*Grove6*, *MGG1*, *RiemannL12*). He is a member of the Zentralinstitut für Mozart-Forschung and contributes to the new collected edition of Mozart's works. Some of his more remarkable Mozart discoveries include the Larghetto and Allegro in E♭ for two pianos (KV deest), a sixth string quartet arrangement of a Bach fugue by Mozart (K405) and an additional march, the *Marsch der Janitscharen* (Kassel, 1980), from *Die Entführung aus dem Serail*.

RUDOLF KLEIN

Croma (It.). *See* QUAVER (eighth-note). The term was also used for a CROTCHET (quarter-note), with *semicroma* being used for the quaver. *See also* NOTE VALUES.

Cromcorn [cromorne]. *See* CRUMHORN.

Cromorne (i) (Fr.). A wind instrument of uncertain identity, used at the French court in the 17th and early 18th centuries. 'Cromornes et trompettes marines' formed part of the *grande écurie* from the mid-17th century to the mid-18th, by which time the positions originally occupied by players of these instruments had probably become sinecures (*see* PARIS, §V, 1(i)). There were normally five *cromornes*: two *dessus*, one *taille*, one *quinte* and one *basse de cromorne*.

It is a misconception that the *cromorne* can be identified with the CRUMHORN. Certain inaccuracies and inconsistencies in the description and illustrations of the crumhorn given by Mersenne (*Harmonie universelle*, 1636–7) and perpetuated by Trichet (*Traité des instruments de musique*, *c*1640; see Lesure, 1955), who based his comments on Mersenne's, suggest that neither theorist was familiar with the instrument (which they called 'tournebout'). This and the absence of firm evidence for the crumhorn in France before Mersenne show that it was little known there, if at all (if it was played in France, it would appear to have been referred to as the *douçaine*: *see* DOLZAINA). Both Mersenne and Trichet refer to the *cromorne* only as an organ stop. The identification of the *cromorne*with an unusual instrument found in some modern collections and known as the *tournebout*(*see* TOURNEBOUT (2)) can also be disregarded. A suite 'pour les cromornes' by Degrignis (1660) in the Toulouse-Philidor Collection in the Bibliothèque Nationale, Paris (the opening 'Petit bransle' of which is given in *Grove's Dictionary*, 5th edn, 'Crumhorn'), has a bass part with a range of over two octaves; a note in the score of Charpentier's *Offerte pour l'orgue et pour les violons, flûtes, et hautbois* H514 (?early 1670s; see Lewis) specifies that the bass line, which also exceeds the range of a true crumhorn, should be doubled by 'serpent, *cromorne* and bassoon'. Brossard (1703) and others gave 'basse de chromorne' as a synonym for 'bassoon'. The *cromorne* therefore appears to have been a type of bassoon. The similarity of the name to 'crumhorn' remains unexplained; perhaps the *cromorne* resembled a bass shawm, with a curved bell reminiscent of the crumhorn. Such an instrument, described as a 'gros hault-bois', appears in engravings of the funeral of Duke Charles III of Lorraine at Nancy in 1618 (reproduced in Boydell). Walther's dictionary (1732) suggests that the name 'cromorne' was a corruption of *cor* (horn) and *morne* (dark, quiet, sad).

Cromorne (ii). *See under* ORGAN STOP.

Croner, Daniel (*b* Kronstadt (now Braşov), 22 March 1656; *d* Hălchiu, district Braşov, 23 April 1740). Transylvanian composer and organist of Saxon descent. He studied theology and music in Kronstadt and Breslau (now Wrocław) and, with the organist Johann Ulich, in Wittenberg. In addition to his work as an officer of Kronstadt City Council, he was organist of the Black Church; after completing his studies, he became a professor of organ and composer there. During his last years he was organist of the Evangelical Church in Hălchiu (1701–1740).

From the four manuscript collections of organ music in tablature in the Library of the Black Church in Braşov (dated Kronstadt, 1675; Breslau, 1671; Wittenberg, 1682; Kronstadt, 1685, respectively), it is possible to distinguish not only Croner's considerable musical skills but also an innovatory spirit underlying the works. The fugues, preludes, toccatas, fantasias and chorales all mark the transition from the earlier polyphonic style (illustrated by the works of Johann Ulich, Johann Froberger, Bernhard Meyer and J.H. Kittel, some of whose pieces are included in his collections) to the new styles of the high Baroque. The composer's main innovation was the idea of a collection of pieces in a complete cycle of keys (cf Bach's later *Das wohltemperirte Clavier*). Other important features include the rhythmic variations of choral themes, the departure from early church modes, and the frequent introduction of the pedal. The inclusion of all 25 pieces from J.E. Kindermann's *Harmonia organica* (1645) illustrates the retrospective character of the tablatures compiled by Croner between 1681 and 1684 (ed. A. Pernye, D. Benkö and K. Fittler as *Tabulature* (Budapest, 1987); some ed. A. Porfetye (Weisbaden, 1971–2)). Quite interesting and original (in view of information expressed in earlier treatises) are the fingering methods he recommended for keyboard instruments and the finger extension principle for the execution of preludes and capriccios.

VIOREL COSMA

Cröner, Franz Carl Thomas (*b* ?Augsburg, *c*1724; *d* Munich, 1 Dec 1787). German composer, violinist and flautist. He was the son of Thomas Cröner (*c*1690–1757), court musician to the Prince-Bishop of Augsburg and violinist at the Munich court from 1735. Franz Carl Thomas became an *Accessist* (unsalaried player who succeeded to a salaried post when one became vacant) in the Munich court orchestra in 1737–8 and for a time he was in the service of the abbot of the Benedictine abbey at Rott am Inn. During the early 1740s he toured extensively, going as far afield as Russia and England with two of his brothers, Franz Ferdinand (*b* Augsburg, 24 March 1720; *d* Munich, 12 June 1780), violinist and flautist, deputy Konzertmeister at the Munich court from 1754 and Konzertmeister from 1772, and Anton Albert (*b* Augsburg, 23 April 1727; *d* Traunstein, 30 Sept 1770), a cellist and from 1745 court violinist at Munich; Johann Nepomuk Cröner was another brother. Franz Carl Thomas and Anton Albert were sent to Italy for musical study in 1744–5 by Emperor Charles VII; in 1748 Franz Carl Thomas entered the service of Maximilian III Joseph as a court musician, as both violinist and flautist, and the five 'Sinfoniae' and 'Sonatae' listed in the 1753 Hofkapelle catalogue and two symphonies in the 1766 Breithopf catalogue are probably by him. In 1759 he was made court composer. In this capacity he provided the elector with six viola da gamba concertos annually, none of which survives; his only known music is a six-movement Sinfonia in C (*D-HAR*) and *Six Sonatas for two Violins with a Thorough Bass* (London, 1758), works largely in the Baroque tradition. He also wrote for the Munich court the scenic oratorio *Il Giuseppe riconosciuto* (1756; libretto by Metastasio) and for the Greater Latin Congregation he wrote the Lenten meditations *De bono usu mediorum ad finem, sive Job* (1751) and *Odoratus* (1761). For the Jesuit grammar school in Munich he wrote the comedies *Alphonsi Peresii Gusmani in regem fidelitas* (1760), *Religio Joviniani* (1761) and *Urbanitas praemium* (1763). Only the librettos of these works survive.

The family, also referred to as Kröner, Gröner, Krenner or Kriener, was ennobled in 1749 and thereafter known as von Cröner. A son of Franz Carl Thomas, Theobald (baptismal name Alois; 1763–1806), was a violinist who composed music, none of which survives, for the Cistercian Raitenhaslach Abbey, Upper Bavaria, where he was a monk; Joseph von Cröner (*b* 1754), a son of Franz Carl Thomas or his brother Anton, was a violinist in the Munich court orchestra, 1775–8.

ROBERT MÜNSTER

Cröner, Johann Nepomuk (*b* ?Munich, *c*1737; *d* Munich, 24 June 1785). German composer and violinist, brother of FRANZ CARL THOMAS CRÖNER. He was an *Accessist* (unsalaried player who succeeded to a salaried post when one became vacant) in the Munich court orchestra for some time before 1748. On 1 September 1751 he became a full court and chamber violinist. In 1774 he became vice-Konzertmeister of the orchestra, which he probably led at the première of Mozart's *La finta giardiniera* on 13 January 1774 at the Munich Salvatortheater (see Leopold Mozart's letter of 18 October 1777, where he mistakenly called Johann Nepomuk 'Jos'). Cröner enjoyed a special position of trust at court. He was in charge of the music collection belonging to Princess Maria Anna, wife of Electoral Prince Max III, Joseph. Of his compositions, six four-movement symphonies and two violin concertos (in A major and B♭ major) survive (*D-Mbs*). There are two further violin concertos, in G major and D major (also *D-Mbs*), which are thought to be the work of either Franz Carl Thomas or Johann Nepomuk.

His wife Maria Josepha Cröner (*b* ?Munich, *c*1724–5; *d* Munich, 11 March 1800) was a soprano who sang in opera and oratorio performances at the Munich court between 1753 and 1766; she was probably a daughter of the Munich court singer and tenor Johann Baptist Anton Perberich (1703–59).

Cronhamn, Johan [Jöns] **Peter** (*b* Östra Karup, Halland, 7 May 1803; *d* Stockholm, 15 June 1875). Swedish composer, organist and educationist. He was first a glazier, then a schoolteacher in Lund (1821–5), and began formal musical studies in 1825 at the conservatory in Stockholm. He was organist of Skeppsholm Church in Stockholm (1827–37) and became a teacher at the conservatory in 1842. He was elected a member of the Swedish Royal Academy of Music in 1843 and was appointed its secretary in 1860. He edited the academy's proceedings from 1865 to 1873 and published a centenary account of its achievements, *Kongliga Musikaliska Akademien åren 1771–1871*. Among his works are songs, quartets for male voices, *Sextio sånger af Carl Mikael Bellman* (1832) for male chorus, *Musica sacra* (1854–67) for mixed choir, and many folksongs specially arranged for the magazine *Runa*.

His son Frithiof August Cronhamn (*b* Stockholm, 26 June 1856; *d* Stockholm, 28 April 1897) was a music librarian and critic.

ROBERT LAYTON

Cronin, Elizabeth [Éilís Bean Uí Chróinín; née Herlihy/Ní Iarlaithe] (*b* Fuhirees, Co. Cork, 30 May 1879; *d* Macroom, Co. Cork, 2 June 1956). Irish traditional singer. Reared in a bilingual area of rural west Cork with strong oral and literary traditions in Irish and in English, Mrs Cronin, married to a farmer, learnt her large repertory of several hundred songs in both languages from her grandparents and parents, farm servants and travelling beggars. These included dandling songs, lilts and songs of local interest as well as broadside narratives and classic ballads (notably *Lord Gregory* or *The Lass of Aughrim*, her version of the Scottish *Lass of Roch Royal*). She took some part in Gaelic League language-revival music festivals in youth, but confined her singing mainly to farm work, the domestic circle and local social occasions. Discovered in the decade before her death by a series of Irish, English and American collectors (including Seamus Ennis, Brian George, Alan Lomax and Jean Ritchie), she became familiar to international audiences through the highly popular BBC radio series *As I Roved Out* in the early 1950s, and such commercial recordings as the influential 1960s LP series *Folk Songs of Britain*.

NICHOLAS CAROLAN

Crook (Fr. *corps de rechange, ton de rechange*; Ger. *Stimmbogen*). Detachable lengths of tubing inserted into brass instruments for the purpose of changing the tube length and hence the pitch. Since natural horns and trumpets can sound only the notes of the harmonic series, the sole way of playing this series at another pitch is to alter the fundamental note, and this is done by the crooks, which on the horn used to amount to nine or more, starting from B♭ or C. The earliest mention of a crook is, however, for the trombone, in 1541: it was inserted between slide and bell joints to allow performance of parts lower than those for which the instrument was constructed. Horn and trumpet crooks are of two kinds. The commonest, inserted between mouthpiece and instrument, was known as a 'terminal' or 'mouthpipe' crook (so called because it incorporates a mouthpipe, which receives the mouthpiece). Less common are 'medial' or 'slide' crooks, inserted like a tuning-slide and having two legs. In Germany during the 18th century an 'Inventionshorn' or trumpet might have had crooks of either kind. The tuning was finely adjusted by inserting short lengths of tubing known as tuning bits next to the crook.

Although the need for crooks was greatly reduced by the invention of valves, many types of instruments were provided with crooks throughout the 19th century – and even into the 20th – so that a given harmonic series could be produced without the use of valves, and in order to preserve the special tonal and technical qualities of crooks.

The term is also applied to the curved metal tube upon which is placed the reed of a bassoon or english horn, and generally to any such removable bent tube holding a mouthpiece, as in saxophones and the deep clarinets.

See also HORN, §2(iii).

ANTHONY C. BAINES/R

Crook, Howard (*b* Passaic, NJ, 15 June 1947). American tenor. He studied at Illinois State University and began his career primarily as a concert singer, making his opera début as Eisenstein (*Die Fledermaus*) in Cleveland in 1970. His subsequent roles have included Belmonte and Pelléas at Amsterdam (1983 and 1984), Lully's Atys and Rameau's Castor at Aix-en-Provence (1987 and 1991), and Admetus in Lully's *Alceste* at the Théâtre des Champs-Elysées, Paris. His agile technique and lyrical projection of high-lying roles have proved especially effective both in French Baroque repertory and in the Bach Passions, in which Crook is an admired Evangelist. His recordings include Monteverdi's Vespers, Lully's *Alceste*, *Armide* and *Acis et Galatée*, Rameau's *Castor et Pollux* and *Les Indes galantes*, Leclair's *Scylla et Glaucus*, *Messiah* and Bach's Passions.

NICHOLAS ANDERSON

Crooks, Richard (Alexander) (*b* Trenton, NJ, 26 June 1900; *d* Portola Valley, CA, 1 Oct 1972). American tenor. He studied with Sidney H. Bourne and Frank La Forge, and first sang in opera at Hamburg as Cavaradossi in 1927. Appearances with the Berlin Staatsoper and in other European centres followed, in roles such as Walther and Lohengrin. He made his American opera début in 1930 in Philadelphia as Cavaradossi, and his Metropolitan début as Massenet's Des Grieux in 1933. He sang leading lyric roles, mostly French and Italian, with the company and elsewhere in the USA for the next ten

seasons, then pursued a concert career. Crooks had a beautiful voice which, though limited in the upper register, was admired for its smoothness of tone and production, as can be judged from his many recordings of opera, lieder and lighter music.

MAX DE SCHAUENSEE/R

Crooning. A style of popular, usually male, singing. The word is Scottish in origin: 'croyne', meaning a loud, deep roar, became 'croon', a low, murmuring sound. In the 19th century the term was associated with lullabies, and in America particularly with those of 'black mammies'. Hence, the injunction to 'croon a tune' appears in Schwartz, Young and Lewis's 1918 song, *Rock-a-bye your baby with a dixie melody*, made famous by Al Jolson. By the 1920s, however, the term was associated with a style of singing that arose as a response to the particular requirements of microphone, as opposed to theatre, singing. The sensitive amplification of the microphone allowed or, some might say, required singers to apply less breath to the vocal cords, resulting in an intimate and conversational sound. Singers gradually discovered as well that the microphone favoured lower-pitched voices and that the use of head or mixed chest-head voice in lower registers (where operatic and theatrical singers had used only chest) aided the production of quiet singing and equalized notes across the range.

Crooning also involved certain stylistic traits: sliding into notes rather than attacking them squarely on pitch, the careful use of rhythmic and melodic variants (especially the mordent), and an anodyne, understated expression. It is this last quality more than any technical traits that separated crooning from other popular singing styles of the 1920s, such as those of classic blues or Broadway. Early crooners included 'Scrappy' Lambert, Smith Ballew, 'Whispering' Jack Smith, Rudy Vallee and Gene Austin: these medium-high tenors were usually found fronting a dance band, where their presence was limited to one or two choruses of a song. Bing Crosby also started in this mould, but gradually shifted to a lower baritone range. Moreover, he had a darker sound and a more energetic approach to phrasing that set him apart from his predecessors and formed the blueprint for most of his successors.

Although Crosby had been established as a solo artist since 1930, it was not until after World War II that the demise of the swing-era big bands led to the predominance of the solo singer, as exemplified by the careers of Dick Haymes, Buddy Clark, Perry Como, Dean Martin and Frank Sinatra. While crooning tended to be associated primarily with white male singers, some postwar black artists, namely Billy Eckstine and Nat 'King' Cole, were also included in this category. By the end of the 1960s, however, crooning was practically extinct as a distinct performance style.

The term always had some pejorative connotations; even in its heyday, crooning was considered effeminate, whining or excessively sentimental by some writers. It should also be remembered that the best exemplars, such as Crosby, Sinatra and Cole, always incorporated less restrictive elements into their interpretations, especially those improvisational approaches derived from instrumental jazz.

HOWARD GOLDSTEIN

Cropper, Steve (*b* Willow Spring, MO, 21 Oct 1941). American electric guitarist, producer and songwriter. He initially achieved fame as the guitarist in two Memphis-based instrumental groups, the Mar-Keys and BOOKER T. AND THE MGS. Having left the Mar-Keys in the summer of 1961, he began working for Jim Stewart at Stax Records in a number of capacities: as a member of the house band (the MGs), a songwriter, engineer and promoter. In this way he was involved in most of the records issued by Stax in the 1960s. In 1970 he left Stax and founded the Trans-Maximus Inc. (TMI) studio and record label with Jerry Williams, and embarked on a freelance career. He produced and played on albums recorded at TMI or Ardent Studios by such artists as Poco, Jeff Beck, José Feliciano, Yvonne Elliman, John Prine and Mitch Ryder. Later production successes included Tower of Power's *We came to play* (1978) and John Cougar's *Nothing matters and what if it did* (1980). In the late 1970s he became a charter member of the Blues Brothers Band, with whom he continued to record and perform into the 1990s, and subsequently appeared in the film *The Blues Brothers* (1980).

Cropper was seminal in defining the sound of soul music in the 1960s. He wrote songs performed by the most prominent artists of that genre, including Otis Redding – *Mr Pitiful* (Volt, 1964), *(Sitting on) The Dock of the Bay* (Volt, 1968), Wilson Pickett – *In the Midnight Hour* (Atl., 1965), *634-5789 (Soulsville USA)* (Atl., 1966) and Eddie Floyd – *Knock on wood* (Stax, 1966). Songs such as these also display his characteristic clipped telecaster sound. He has always remained in demand as both a session guitarist and a producer, and recorded solo albums in 1969, 1980 and 1982. As a member of Booker T. and the MGs, Cropper was inducted into the Rock and Roll Hall of Fame in 1992.

WORKS
(selective list)

Green Onions, 1962 [collab. A. Jackson, B.T. Jones, L. Steinnerg]; Chinese Checkers, 1963 [collab. Jackson, Jones and Steinnerg]; Gee whiz, its Christmas, 1963 [collab. V. Trauth C. Thomas]; What a fool I've been, 1963 [collab. W. Bell]; Can your monkey do the dog, 1964 [collab. R. Thomas]; I've got no time to lose, 1964 [collab. D. Parker]; Mr. Pitiful, 1964 [collab. O. Redding]; Candy, 1965 [collab. I. Hayes]; Goodnight Baby, 1965 [collab. D. Porter]; Grab this thing, 1965 [collab. A. Bell]

Hole in the Wall, 1965 [collab. Jackson, Jones and Nathan]; In the Midnight Hour, 1965 [collab. W. Pickett]; Just One More Day, 1965 [collab. Redding and Robinson]; See-Saw, 1965 [collab. D. Covay]

634-5789 (Soulsville U.S.A.), 1966 [collab. E. Floyd]; Fa-Fa-Fa-Fa-Fa (Sad Song), 1966 [collab. Redding]; Knock on wood, 1966 [collab. Floyd]; My Sweet Potato, 1966 [collab. Jackson and Jones]; Ninety-Nine and a Half (won't do), 1966 [collab. Floyd and Pickett]; Patch my heart, 1966 [collab. Hayes]; Share what you got (but keep what you need), 1966 [collab. W. Bell and Porter]; Sookie Sookie, 1966 [collab. Covay]; Things get better, 1966 [collab. Floyd and Jackson]

Hip Hug-Her, 1967 [collab. D. Dunn, Jackson and Jones]; Knucklehead, 1967 [collab. Jones]; On a Saturday Night, 1967 [collab. Floyd]; Raise your hand, 1967 [collab. Bell and Floyd];

(Sittin' on) The Dock of the Bay, 1968 [collab. Redding]; The Happy Song (Dum-Dum), 1968 [collab. Redding]; Soul Limbo, 1968 [collab. Dunn, Jackson and Jones]; Time Is Tight, 1969 [collab. Dunn, Jackson and Jones]; The Best Years of my Life, 1970 [collab. Floyd]; Melting Pot, 1971 [collab. Dunn, Jackson and Jones]

ROB BOWMAN

Crosa [Croza], **Giovanni Francesco** (*b* ?Pinerolo, nr Turin, *c*1700; *d* after Jan 1771). Italian opera impresario. He played an important role in the early diffusion of comic opera; his troupe was part of the first wave of Italian *buffo* companies to invade northern Europe in the 1740s and early 1750s. In 1746 he promoted comic opera in Milan. Two years later he introduced the genre in London, but only his production of Gaetano Latilla's *Don Calascione* met with some success. In August and September 1749 he introduced Italian comic opera in Brussels before returning to London. After a dispute with the King's Theatre director Francesco Vanneschi, Crosa moved to the Little Theatre in the Haymarket, where his company performed Vincenzo Ciampi's *Il negligente*. In January 1750 they returned to the King's, giving comic operas and two *opere serie* by Ciampi. The operas failed and the season was cut short in April by the impresario's bankruptcy. Crosa went to prison for debt but escaped on 8 May. A reward of £50 was promised for help in apprehending the fugitive, who was 'about five feet and five inches high, of a swarthy complexion, with dark brown eye-brows, pitted with the small-pox, stoops a little in the shoulder, is about fifty years of age and takes a remarkable deal of snuff' (*London Evening Post*, 17 May 1750). Crosa fled to the Netherlands, where between 3 August and 20 October 1750 his troupe performed Italian comic operas in Amsterdam (including Natale Resta's *Li tre cicisbei ridicoli*) until his creditors in England caught up with him and he was thrown into gaol again. He returned to Brussels at the end of 1753, when he produced five comic operas. From September 1754 until mid-1755 Crosa and Resta presented comic opera in Liège, frequently applauded by the 14-year-old Grétry. For the carnival season of 1759 Crosa promoted Latilla's *Madama Ciana* at Brescia. He mounted comic opera in Turin in 1767, but, unable to meet his obligations with singers, he was gaoled again in December for debt. On 13 February 1771 Leopold Mozart wrote that Crosa was then in Milan, 'where he goes about begging, miserably clad and with a long beard'.

SASKIA WILLAERT

Crosby, Bing [Harry Lillis] (*b* Tacoma, WA, 2 May 1904; *d* Madrid, Spain, 14 Oct 1977). American popular singer and actor. As a boy in Spokane he played drums and sang with small jazz groups. With Al Rinker (Mildred Bailey's brother) and Harry Barris he formed the Rhythm Boys, who appeared from 1926 to 1930 with the Paul Whiteman Orchestra. He began working independently about 1930; in 1931 he began a spectacularly successful career in radio (with the theme-song *When the Blue of the Night*) and film, notably in musical films such as *Holiday Inn* (1942, with a score by Irving Berlin that included the song *White Christmas*) and in the 'Road to' comedy series with Bob Hope and Dorothy Lamour. He also made an appearance with Jack Teagarden in *The Birth of the Blues* (1941), loosely based on the rise of the Original Dixieland Jazz Band), in which he played a clarinettist modelled on Larry Shields. Although never primarily a jazz singer, Crosby retained an interest in jazz and is best remembered in this context for the collaborations with Louis Armstrong, particularly in the film *High Society* (1956), and in recordings of songs arranged by Johnny Mercer, of which 'Sugar' on the album *Bing Crosby – Louis Armstrong* (1960, MGM) is an excellent example.

Crosby was one of the first singers to master the use of the microphone and, even more than Al Jolson (whose singing his early recordings reflect), he was important in introducing into the mainstream of American popular singing a black American concept of song as a lyrical extension of speech. One of the first crooners, he used the microphone not so much for singing as for apparently talking (or even whispering) to a melody. His techniques – easing the weight of breath on the vocal cords, passing into a head voice at a low register, using forward production to aid distinct enunciation, singing on consonants (a practice of black singers), and making discreet use of appoggiaturas, mordents, and slurs to emphasize the text – were emulated by nearly all later popular singers.

The most popular singer of his generation, sales of Crosby's records have been estimated in excess of 300,000,000. His voice remained remarkably unblemished by age; even on his last recordings, made when he was in his 70s and singing in a bass range, it retained the characteristics of timbre, utterance and ostensible artlessness that communicated directly to a broad public and contributed greatly to the image he projected of an ordinary, sympathetic personality.

Crosby's brother, Bob (*b* Spokane, WA, 25 Aug 1913; *d* La Jolla, CA, 9 March 1993), became a noted bandleader and singer, and the unique style of big-band dixieland jazz of the Bob Crosby Orchestra gained international popularity during the late 1930s; a smaller ensemble drawn from the band played under the name of the Bobcats. After the war he was mainly active as a compère and singer on radio and television shows, and in nightclubs.

HENRY PLEASANTS/R

Crosby, Fanny [Frances] **(Jane)** [Van Alstyne, Fanny] (*b* South East, Putnam Co., NY, 24 March 1820; *d*

Bridgeport, CT, 12 Feb 1915). American poet and writer of gospel hymn texts. She was blind from the age of six weeks, and was educated and later taught at the New York Institution for the Blind; she married Alexander Van Alstyne, also a teacher at the school, in 1858. During the 1850s she supplied texts for some of G.F. Root's most successful songs, notably *Hazel Dell* (1852), *There's music in the air* (1854), and *Rosalie, the Prairie Flower* (1858).

In 1864 Crosby turned to hymnwriting, and by 1900, using over 200 pen names, had written approximately 9000 texts, including 'Jesus, keep me near the cross' (1869), 'Praise Him, praise Him' (1869), 'Pass me not, o gentle Savior' (1870), 'Rescue the perishing' (1870), 'Blessed assurance' (1873), 'All the way my Savior leads me' (1875), and 'Saved by Grace' (1894). She was the most important writer of gospel hymn texts in the 19th century, and although epitomizing that era of revivalism, they remain popular in the 20th century. Approximately 1000 of Crosby's unpublished hymns are held by the Hope Publishing Company in Carol Stream, Illinois (who is the successor to Biglow & Main, Crosby's principal publisher).

MEL R. WILHOIT

Crosby, Stills and Nash [CS&N; Crosby, Stills, Nash and Young]. American folk rock group. It was formed in 1968 by David Crosby (David van Cortland; *b* Los Angeles, 14 Aug 1941), Stephen Stills (*b* Dallas, 3 Jan 1945) and Graham Nash (*b* Blackpool, England, 2 Feb 1942), who had been key members of the Byrds, Buffalo Springfield and the Hollies respectively. Their eponymous début album (Atl., 1969) sold more than two million copies in America and included *Suite: Judy Blue Eyes* and the hippy anthem *Marrakesh Express*. In 1969 Neil Young joined the group in time for their first major performance, before 400,000 people at Woodstock. Young's tougher song-writing, distinctive vocals and guitar 'duels' with Stills gave the group a harder, heavier sound approaching progressive rock. *Déjà Vu* (Atl., 1970) featured such tracks as *Helpless* and *Teach Your Children* which highlight the group's meticulous close-harmony singing. The group split up in 1970, since when various reunion tours and albums have failed to recapture the brilliance and freshness of their earliest work. Each member has pursued a solo career with varying degrees of success.

LIZ THOMSON

Crosdill [Crosdell, Crossdill, Crusdile], **John** (*b* London, *c*1750–55; bur. London, 11 Oct 1825). English cellist. His father, Richard (1698–1790), may also have been a cellist. Crosdill was a chorister at Westminster Abbey and later a pupil of Jean-Pierre Duport. On 24 April 1777 he, along with William Cramer, was recommended by Redmond Simpson to be admitted to masonry by dispensation, and was subsequently made a master mason; however, it is not known of which lodge he was a member. On 3 May 1764 he played a duet with Siprutini in a concert given by the latter at Hickford's Room. He held appointments as viol player at the Chapel Royal from 10 March 1778, member of the king's private band from 1778, chamber musician to Queen Charlotte from 1782 and Composer of State Music in Ireland from 1783 (no compositions survive). He was a principal cellist at the Three Choirs Festival (1769–77 and 1779–87), at the Professional Concert (1783–*c*1793), at the Handel Commemoration (1784) and at the Concert of Ancient Music (1776–*c*1787). He made appearances at various London theatres and concert halls, as well as at the Oxford Music Room (from 1768), at Dublin, and at the Salisbury Festival (1776–81). He was, with JAMES CERVETTO, the foremost cellist of his generation in Britain; he was an agile player, his tone grander and more brilliant than Cervetto's, but less expressive. Indeed, James Hook dedicated his virtuoso *Solos* op.24 (*c*1783) to Crosdill, and a review of one of Crosdill's performances (*Public Advertiser*, 2 March 1782) said that his 'execution' was superior to that of Duport, but that his instrument tended to address itself 'to the *Ear*, and even to the *Eye*, and little to the *Heart* and its Affections ... he surprizes, but he does not elevate'.

On 31 May 1785 he married Elizabeth Colebrooke, a rich, 70-year-old widow, which enabled him to retire from his profession as cellist and teacher. He did, however, subsequently play in public occasionally, for example at the coronation, in 1821, of George IV, his former cello pupil. He left £1000 to the Royal Society of Musicians, of which he had been a member since 4 December 1768. A half-length engraving of Crosdill by W. Daniell after George Dance is in the National Portrait Gallery, London; the location of a portrait by Gainsborough, exhibited at the Royal Academy in 1780, is unknown.

GRAHAM SADLER/MARIJA ĐURIĆ SPEARE

Cross, Joan (Annie) (*b* London, 7 Sept 1900; *d* Aldeburgh, 12 Dec 1993). English soprano, teacher and producer. She began her musical life as a violinist while a pupil at St Paul's Girls' School, London. Continuing her studies at Trinity College of Music, she found Emile Sauret unmoved by her playing and turned to singing, making rapid

progress under the tuition of Dawson Freer. Her career started in 1923 when she accepted the offer of unpaid chorus work at the Old Vic. After taking various comprimario parts she soon found herself singing roles such as Elisabeth (*Tannhäuser*) and Aida. As principal soprano of Sadler's Wells (1931–46), she was recognized as a consummate singing-actress in an exceptionally wide range of roles, from Purcell's Dido to Rosalinde (*Die Fledermaus*), Butterfly, Elsa, Sieglinde and the Marschallin. She made her Covent Garden début, as Mimi, in 1931 and sang Kupava and Militrisa in the English premières of Rimsky-Korsakov's *Snow Maiden* and *Tale of Tzar Saltan* (both 1933).

On assuming the directorship of the Sadler's Wells Opera Company in 1943 Cross combined administration with singing. Her decision to reopen the theatre in June 1945 with the première of Britten's *Peter Grimes*, in which she created the role of Ellen Orford, won her respect, but also enmity, leading to her departure from the company. In a new and unexpected phase of her life's work, she created a further four Britten roles over the next decade: the Female Chorus in *The Rape of Lucretia* (1946, Glyndebourne), Lady Billows in *Albert Herring* (1947, Glyndebourne), Queen Elizabeth in *Gloriana* (1953, Covent Garden), and Mrs Grose in *The Turn of the Screw* (1954, Venice). Her work as a teacher and opera producer involved her in many pioneering causes. She was a founder-member of the English Opera Group and co-founder of the Opera School (now the National Opera Studio) in 1948. Her first major production was *Der Rosenkavalier* for Covent Garden (1947), though her greatest successes were more often abroad, particularly in Norway.

Cross possessed a distinctive voice of grave beauty which she used with an unerring sense of style. She made a relatively small number of recordings between 1924 and 1955, including an admired Mrs Grose conducted by the composer. Never one for compromise or make-do, her outspokenness sometimes clouded her professional and personal relationships. Awarded a CBE in 1951, Cross also wrote several fine, English singing translations of operas and a volume of memoirs (unpublished).

BRYAN CRIMP

Cross, Letitia (?bap. Dorking, 6 March 1682; *d* London, 4 April 1737). English singer, actress and dancer. Miss Cross was 'the girl' in Purcell's theatre company in the last few months of his life, when he wrote several songs for her, including 'I attempt from love's sickness' (in *The Indian Queen*), 'Man is for the woman made' (*The Mock Marriage*) and 'From rosy bowers' (*The Comical History of Don Quixote*, part iii). Daniel Purcell and Jeremiah Clarke later wrote for her. A pert and lively personality is indicated by the prologues and epilogues she delivered and her acting roles such as Hoyden in John Vanbrugh's *The Relapse*. In 1698 she apparently received 500 guineas for sexual services to Peter the Great during his London visit, and later went to France with 'a certain baronet'. She returned to sing in the first English opera in the Italian style, *Arsinoe* (January 1705). She resumed her acting roles, was frequently advertised as a dancer and continued to sing Purcell's music. Her career was in decline in the 1720s and after 1725 she seems to have made only one stage appearance.

OLIVE BALDWIN, THELMA WILSON

Cross, Lowell (Merlin) (*b* Kingsville, TX, 24 June 1938). American composer. His undergraduate studies, English and mathematics (BA 1961) and music (BA 1963) were at Texas Technological University. There he began work as a recording engineer and producer, and composed his first electronic music in a studio which he installed in 1961. He studied electronic music and musicology at the University of Toronto (MA 1968), where his interest in electronics led to an important association with David Tudor. He developed the concept of the laser light show and collaborated with Tudor and Carson Jeffries in the first multi-colour laser performance with electronic music (*Video/Laser I*, 1969). An extension of this work (*Video/Laser II*, 1970) was installed at Expo '70 in Osaka, Japan. Other laser performance systems were installed at the University of Iowa (*Video/Laser III*, 1972) and the Adler Planetarium in Chicago (*Video/Laser IV*, 1980). In 1975, he prepared a laser realization of the *luce* section of Skryabin's *Prometheus* op.60. Cross has taught at Mills College, the National Institute of Design, Ahmedabad, India, and, from 1971, the University of Iowa, where he is director of recording studios. He is the author of *A Bibliography of Electronic Music* (Toronto, 1967, 3/1970) as well as many articles on electronic music, art and technology, laser performance and audio engineering.

WORKS
(*selective list*)

0.8 Century, tape, 1961–2; 3 Etudes, tape, 1965; Video II (B), Video II (C), tape, audio system, TV, 1965–8; Video II (L), tape, audio system, krypton laser, X–Y laser deflection system, 1965–9; Musica instrumentalis, pfmrs, audio system, TV, 1966–8; Reunion, pfmrs, 1968, collab. J. Cage, M. Duchamp, D. Tudor and others, Video III, pfmrs, audio system, elecs, TV, 1968, collab. Tudor; Video/Laser I–IV, audio-visual works using laser deflection systems, 1969–80, I–II collab. Tudor and C. Jeffries; laser realization: Skryabin: Prometey, op.60, luce section, 1975; other works collab. Tudor

JOHN HOLZAEPFEL

Cross, Thomas (*b* ?London, ?1660–65; *d* ?London, ?1732–5). English music engraver, printer, publisher and music seller. He was probably the son of the 17th-century engraver Thomas Cross, who engraved some frontispieces and portraits for John Playford's publications, including the portrait of the composer John Gamble (*Ayres and Dialogues*, 1656), and who may have engraved some music. From 1683 to about 1710 the younger Cross often signed himself 'Tho. Cross junior sculpt.', as on his first

known work, Purcell's *Sonnata's of III. Parts* (1683), printed for the composer. From about 1692 to about 1720 he kept a music shop in London. He was the first to issue songs in single sheet format rather than in collections, and from the 1690s a considerable number of these appeared under his imprint. At first they were engraved on copper plates, which was an expensive method considering the ephemeral nature of the sheet songs, but he later used a cheaper material, probably pewter. He had a virtual monopoly of the music engraving trade until Walsh established his business in 1695, after which they became rivals. Cross, however, scorned Walsh's frequent use of punches rather than pure engraving and warned on one of his sheet songs 'beware of the nonsensical puncht ones'. It is doubtful that Cross ever did any work with punches, despite Hawkins's assertion that he did stamp the plates of a work by Geminiani. Despite their rivalry, Cross did on occasion work for Walsh, as well as for other publishers such as Cullen, Meares and Wright, in addition to issuing his own publications and engraving works for composers who wished to self-publish. References in Purcell's *Orpheus britannicus* (1698) and Blow's *Amphion anglicus* (1700) attest to his fame and to the popularity of the new sheet music. He engraved in a bold style and his early work is particularly fine. It is clear, however, that he employed assistants, which probably accounts for some of the differences in engraving style which occur on plates bearing Cross's name, particularly in the later part of his career. Important works engraved in the Cross workshop included Purcell's and John Eccles's *A Collection of Songs* (*c*1696), Daniel Purcell's *Six Cantatas* (1713), Handel's *Radamisto* (1720; for illustration *see* MEARES) and Benjamin Cooke's edition of Corelli's sonatas and concertos (1732), one of Cross's last known works.

Crossdill, John. *See* CROSDILL, JOHN.

Crosse, Gordon (*b* Bury, 1 Dec 1937). English composer. He studied at Oxford University with Wellesz, and undertook postgraduate research into 15th-century music. During 1962 he studied with Petrassi, and for much of his career combined composition with teaching posts, including those of senior music tutor at the extra-mural department of Birmingham University (1964–6), Haywood Fellow in Music, also at Birmingham (1966–9), Fellow in music at Essex University (1969–73) and composer-in-residence at King's College, Cambridge (1973–5). In 1977, he was visting professor in composition at the University of California, Santa Barbara.

Crosse's formative works, such as *Villanelles* (1959), show the influence of serial and medieval techniques and the music of Maxwell Davies. From the outset, he was flexible in his use of series, favouring those with clear diatonic implications as in the *Concerto da camera* (1962). This work, composed under Petrassi's guidance, proved a watershed, unlocking a greatly expanded expressive range and an interest in music as drama. This interest not only found an immediate outlet in the three works that established Crosse's reputation – *Meet my Folks!*, for young performers (1963–4), *Changes*, for chorus and orchestra (1965–6), and *Purgatory* (1965–6), the first of four operas composed over the following decade – but also left its mark on later concertante works such as *Ariadne* for oboe and 12 instruments (1971–2) as well as the dramatic monodrama *Memories of Morning: Night* (1971).

In Crosse's music, thematic material rarely undergoes development in the Classical sense, but can instead be layered and superimposed (as in *Some Marches on a Ground*, 1970) or extended by restatement and decoration. The Violin Concerto no.2 (1969), for example, opens with a threefold repetition and elaboration of three separate groups of material, the source of the fragmentary ideas being revealed, at the work's conclusion, as an Ockeghem chanson. The influence of Britten, already apparent in the melodic writing of *Meet my Folks!* and *Changes*, persisted in the works of the 1970s, notably in the ostinato writing of the Cello Concerto (1976–8) and in *Dreamsongs* (1978), which weaves allusions from Britten's *Ceremony of Carols* into an orchestral tapestry of elegiac melancholy.

During the 1980s Crosse's music underwent a marked stylistic change with a decrease in chromaticism and a more overt use of tonality. Nonetheless, the instrumental and vocal works that dominate this decade – *Wavesongs* (1983), the Piano Trio (1985–6) and the final large-scale works, *Array* (1985–6) and *Sea Psalms* (1989–90) – continue to exploit certain devices of his earlier work, such as ostinati and the use of motivic cells as the basis of thematic construction. Crosse has composed little since 1990, but has not ruled out the possiblity of further works.

WORKS

STAGE

Purgatory (op, 1, after W.B. Yeats), op.18, 1965–6; Cheltenham, Everyman, 7 July 1966

The Grace of Todd (op, 1, D. Rudkin), op.20, 1967–8; Aldeburgh, Jubilee Hall, 7 June 1969; rev. 1974

The Story of Vasco (op, 3, T. Hughes, after Schehadé), op.29, 1968–73; London, Coliseum, 13 March 1974

Wheel of the World (entertainment, 1, D. Cowan, after G. Chaucer: *The Canterbury Tales*), op.32, 1969–72; Oxford, 5 June 1972

Potter Thompson (op, 1, A. Garner), op.33, 1972–3; London, St Mary Magdalene, Munster Square, 9 Jan 1975

Young Apollo (ballet, 1, choreog. D. Bintley), 1984, London, CC, 17 Nov 1984

OTHER WORKS

Orch: Elegy, op.1, small orch, 1959–60; Concerto da camera (Vn Conc. no.1), op.6, vn, 10 wind, 2 perc, 1962; Conc., op.8, chbr orch, 1962; Symphonies, op.11, chbr orch, 1964; Sinfonia concertante, op.13a, 1965, withdrawn, rev. 1975 as Sym. no.1; Ceremony, op.19, vc, orch, 1966; Vn Conc. no.2, op.26, 1969; Ouvert→Clos, op.27, chbr orch, 1969; Some Marches on a Ground, op.28, 1970; Ariadne, concertante, op.31, ob, 12 insts, 1971–2; Sym. no.2, op.37, 1974–5; Thel, concertante, op.38, fl, 2 hn, 2 str septet, 1974–6; Epiphany Variations, double variations, op.39, 1975–6; Vc Conc., op.44, 1976–8, rev. 1981; Play Ground, op.41, 1977–8; Wildboy, concertante, op.42, cl, cimb, 7 players, 1978; Dreamsongs, op.43, 1978; Array, tpt, str, 1985–6; Quiet!, wind band, 1987

Vocal and Choral: Corpus Christi Carol (16th century), op.5, S/T, cl, hn, str qt, 1961; 2 Christmas Songs, unacc. chorus, 1962; For the Unfallen (G. Hill), op.9, T, hn, str, 1963; Epitaph (W. Raleigh), SSATBB, 1964; Medieval French Songs, op.14a, S/T, cl, pf, perc, rev. as 3 Songs to Medieval French Texts, op.14b, Mez/Bar, pf, 1965; O Blessed Lord, anthem, op.15, SATB, org, 1965; Changes (T. Browne, W. Blake, R. Herrick, S. Hawes, W. Davenant, anon.), op.17, S, Bar, chorus, opt. children's chorus, orch, 1965–6; A May Song (Herrick), op.22, SSATBB, 1967; The Covenant of the Rainbow (from Chester miracle play), Festival anthem, op.24, chorus, org, pf 4 hands, 1968; The New World (T. Hughes), song cycle, op.25, Mez/Bar, pf, 1968–9; Memories of Morning: Night (monodrama, J. Rhys: *Wide Sargasso Sea*), op.30, Mez, orch, 1971

Celebration (cant., W. Blake), unison vv, chorus, orch, 1972; The Cool Web (S. Smith, R. Graves), op.36, S/T, pf, 1973–4; World Within (E. Brontë), op.40, narr, Mez, 10 insts, 1976; Verses in memoriam David Munrow (Vincent), Ct, rec, vc, hpd, 1979; Voice from the Tomb (S. Smith), op.36a, Mez/Bar, pf, 1980; Harvest Songs (Hughes), op.46, double choir, children's choir, orch, 1980; Dreamcanon 1 (K. Raine), op.49, C, chorus, 2 pf, 1 perc, 1981; Wintersong (Hughes, trad.), op.51, AATTBB, opt. perc, 1982; A Wake Again (Lucretius), 2 Ct, 2 rec, vc, hpd, 1985–6; Armada Echoes (M.J. Davis), 2 Ct, T, 2 Bar, B, 1987–8; Sea Psalms (Pss lxxvii, cvii, xcviii, H. Stubbs), chorus, children's vv, orch, 1989–90

Chbr and solo inst: Villanelles, op.2, wind qnt, vn, vc, 1959, rev. 1974; 3 Inventions, op.3, fl, cl, 1959; Canto, op.4, wind qnt, trbn, 1961, rev. 1963; Carol, op.7, fl, pf, 1962; Studies, set 1, op.34a, str qt, 1972–3; Dreamsongs, op.35, cl, ob, bn, pf, 1973; Studies, set 2, op.34b, str qt, 1977; Variations 'Little Epiphany', op.39a, ob, vc, 1977; Str Qt, op.47, 1979–80; A Year and a Day, op.48a, cl, 1979; Trio (Rhymes and Reasons), op.52, cl, vc, pf, 1979–82; Peace, op.53, 4 tpt, 4 trbn, hn, tuba, 1979–82; Fear No More, ob, ob d'amore, eng hn, 1981; A Wake, fl, cl, vc, pf, 1982; Water Music, tr + t + descant + opt. sopranino rec, pf, 1982; Wavesongs, vc, pf, 1983; Chime, brass qnt, 1982–3; Oboe Qnt, 1983–6; Pf Trio, vn, vc, pf, 1985–6

For children: Meet my Folks! (T. Hughes), op.10, spkr, children's vv, 8 insts, 1963–4; Rats Away! (anon.), op.12, children's vv, 2 tr insts, xyl, chimes, perc, b inst, 1964; Ahmet the Woodseller (I. Serraillier), op.16, unison vv, perc, 9 insts ad lib., 1964–5; The Demon of Adachigahara (Hughes), op.21, narr, children's vv, orch, 1967; The History of the Flood (J.H. Stubbs), op.23, children's vv, harp, 1970; Holly from the Bongs (nativity opera, Garner), 1973

Principal publisher: Oxford University Press

ANDREW BURN

Cross-fingering. *See* FINGERING, §III, 1.

Cross flute. An older name for the transverse flute, used to distinguish it from the end-blown RECORDER. *See* FLUTE, §II.

Cross-Grainger free music machine. A series of composition machines developed between 1945 and 1961 at White Plains, New York, by an American physics teacher, Burnett Cross (*b* New York, 7 Aug 1914; *d* 1996), and PERCY GRAINGER, with the assistance of Grainger's wife Ella (1889–1979). The purpose of the machines, each exploring different technology, was to enable Grainger to realize his ideas of 'free music' based on 'gliding' tones.

The first 'free music' machine (1945–8) consisted of three Melanettes (small monophonic electronic keyboard instruments, later replaced by Solovoxes), tuned a $\frac{1}{6}$-tone apart, controlled by the keys of a silenced Duo-Art player piano; the microtonal tuning produced an approximation of a 'gliding' tone. The Reed-box Tone-tool (1950–1) consisted of harmonium reeds tuned in $\frac{1}{8}$-tones, controlled by holes punched into a roll of brown wrapping paper. The 'Kangaroo Pouch' Method of Synchronising & Playing 8 Oscillators, constructed in 1952, had a scroll of brown paper travelling horizontally with four large brown-paper cut-out graphs ('hill and dale' pouches) sewn on to each side, along the contours of which rode discs attached to flexible arms that mechanically controlled the frequencies of the oscillators (see illustration); eight smaller cut-out graphs controlled volume. The final machine, begun in 1953, used electronic oscillators based on the newly introduced transistors. Graphic outlines, in parallel tracks for pitch and volume, were painted in erasable black ink on a roll of transparent plastic film. Adjustable 'tuning sticks' formed different pitch masks between spotlights and the photoelectric cells past which the roll moved in a process typical of DRAWN SOUND. None of the machines featured timbre control, which was to have been dealt with only when the other parameters could be precisely controlled. Only the first machine was completed.

Two of the machines, the Reed-box Tone-tool and the 'Kangaroo Pouch' system, together with part of the last machine (most of which disappeared in transit), are now housed at the Grainger Museum in Melbourne; they were restored by Cross during several visits. The Grainger Museum also possesses a machine from 1950 in which a swanee whistle and two recorders are operated by a roll of paper perforated with holes and slits cut by hand.

HUGH DAVIES

Crossley, Paul (Christopher Richard) (*b* Dewsbury, 17 May 1944). English pianist. An English graduate of Oxford (where he was organ scholar at Mansfield College), he studied the piano with Fanny Waterman in Leeds. In October 1967 he obtained a French government scholarship for study with Messiaen and Yvonne Loriod in Paris; the following year he won the Messiaen Piano Competition at Royan, and first appeared in London, at the French Institute. Tippett wrote for him his Third Piano Sonata, first played at the 1973 Bath Festival, and his Fourth Piano Sonata, first played in 1985. Crossley has continued to champion new music, and has given the first performances of works by Nicholas Maw (*Personae*, 1973), George Benjamin (*Sortilèges*, 1982), John Adams (*Eros Piano*, 1989), Takemitsu (*Litany*, 1990, and *Quotation of Dream*, 1991), Henze (*Requiem*, 1993), Górecki (Sonata, 1992) and Magnus Lindberg (Concerto, 1992). From 1988 to 1994 he was artistic director of the London Sinfonietta. Crossley's recordings include the complete piano music of Fauré, Debussy, Poulenc and Ravel, as well as Messiaen's *Turangalîla-symphonie* and Fauré's violin sonatas (with Arthur Grumiaux). He was made a CBE in 1993.

MAX LOPPERT/JESSICA DUCHEN

Crossley-Holland, Peter (*b* London, 28 Jan 1916). English ethnomusicologist and composer. After reading medicine at Oxford, he studied composition at the RCM (1937–9) with Ireland (who had earlier given him private lessons) and returned to Oxford to take the BMus (1943). He later studied composition privately with Seiber, Rubbra and Julius Harrison and carried out postgraduate work in Indian music at the London School of Oriental and African Studies. He was successively a regional director of the Arts Council (1943–5), a member of the music division of the BBC (1948–63) and an assistant director of the Institute of Comparative Music Studies and Documentation, Berlin (1964–6), he was also editor of the *Journal of the International Folk Music Council* (1965–8). He joined the faculty of the UCLA in 1969 and was appointed professor of music there in 1972 and chairman of the Council on Ethnomusicology in 1976. He retired in 1983.

In his ethnomusicological research he has concentrated on Celtic, Tibetan and native American music, particularly the musical artifacts of pre-Columbian America. The results of his studies and analyses of Tibetan vocal and instrumental music have been published in several articles; he has made a number of field recordings of sacred and secular pieces. His compositions include two cantatas, a symphony, three symphonic poems and music for string and chamber orchestras, solo recorder, chorus, solo voices and various combinations of recorders. As a composer, he is preoccupied by metaphysics and the principles of the natural world and he has described these sources of inspiration in *Speaking of my Life* (1979).

Crossover. A term used mainly in the music industry to refer to a recording or an artist who has moved across from one CHART to another. Crossover is an artificial concept, dependent on the sometimes arbitrary and/or non-musical definitions of the charts, which measure the popularity of recordings, ranking them by style. The pop chart is the overall singles chart: normally a hit 'crosses over' from a *speciality* chart – jazz, classical, dance/disco, country, rhythm and blues – to pop.

Crossover between the disco and rhythm and blues charts is common, and at some periods pop crossover from one chart has increased (e.g. country crossover was high in the late 1970s and the mid-1990s). Crossover from the rhythm and blues chart was so prevalent in the early 1960s that the chart was suspended from 1963 to 1965; that, however, has also been seen as a ploy to marginalize black artists by forcing them to compete with better-funded white artists for mainstream chart positions. (See D. Brackett, *MQ*, lxxviii, 1994, pp.774–97).

Though ostensibly indicative of musical style, the charts also encode race, geography, class and even sexuality. Country charts have historically registered white, Southern tastes, while the rhythm and blues chart registers music by black artists, regardless of style (evident by its myriad name changes in *Billboard* over the years – sepia, race, rhythm and blues, soul, urban contemporary, black, and back to rhythm and blues). The dance chart has reflected male homosexual tastes, as that group often forms the primary audience for disco in the USA; the dance scene in Britain is more mainstream, with a much higher proportion of crossover from dance to pop. The most successful crossover artist was Elvis Presley, who achieved number one hits on the pop, country and rhythm and blues charts.

The term 'crossover musicology' has been used to describe an approach to MUSICOLOGY that combines different branches within musicology, or musicology with related disciplines, though that entails the same dangers of artificial boundaries as the charts.

ROBYNN J. STILWELL

Cross-relation. *See* FALSE RELATION.

Cross-rhythm. The regular shift of some of the beats in a metric pattern to points ahead of or behind their normal positions in that pattern, for instance the division of 4/4 into 3+3+2 quavers, or 9/8 into 2+2+2+3 quavers; if every beat is shifted by the same amount, this is called SYNCOPATION.

See also POLYRHYTHM; RHYTHM.

□

Cross-strung. *See* OVERSTRUNG.

Crot. *See* CRWTH.

Crotal. A hollow-sphere bell, such as a sleigh-bell. *See* BELL (i).

Crotala [crotales] (Lat.; Gr. *krotala*). A term for an instrument resembling slapsticks, although sometimes described by scholars as castanets (it is classified as an IDIOPHONE). Crotala were probably the most common percussion instrument of classical antiquity and can be traced back at least as far as the Mesilim or Early Dynastic I period in Mesopotamia. Consisting of two pieces of wood, bone or bronze hinged with leather, they were held in one hand and struck together by the action of fingers and thumb. Normally a pair was held in each hand (*see* CLAPPERS, fig.3).

As with other ancient percussion instruments such as the tympanum and cymbala, the most prominent iconographic representation of the crotala was in the orgiastic rites of Dionysus and Cybele, where they were depicted in the hands of dancing women and satyrs. However, their use seems to have extended to every occasion with dancing, whether cult, theatrical or domestic, with the possible exception of highly formalized choral dancing as in the Greek tragedy of the classical period. Etruscan dancers used them; there were female crotala players throughout the Hellenistic world; and stage directions on a 2nd-century Oxyrhynchus papyrus prescribe crotala and tympana as accompaniment to the interlude in a mime performance. *See also* GREECE, §I, 5(i)(a)

Crotales. Small CYMBALS tuned to a definite pitch. Probably dating from the middle of the 1st millennium BCE, bronze crotales (probably cast) have been found in Egypt, Rome and Greece; these generally have a large central boss and upturned rim, producing well-defined bell-like notes of high pitch (the 'well-tuned cymbals' of Psalm cl). Modern crotales do not have the upturned rim; they are rather heavier than FINGER CYMBALS (which are unpitched and may also be classified as metal CLAPPERS or castanets). The term 'antique cymbals' (Fr. *cymbales antiques*) may refer to pitched or unpitched instruments. As a rule, if no pitch is indicated the intended sound is that of finger cymbals. Berlioz, Debussy and Ravel all scored for antique cymbals with definite pitches: their intention was that two crotales of the same pitch should be struck together, resulting in a better sound than when they are struck with hard xylophone mallets, which is the more common technique.

In modern crotales the rim is about 5 mm thick, and the diameter ranges from about 6 cm to 14 cm. They are now used extensively by composers; most often a range of two octaves, c'''–c''''' is required, although Kolberg produces a five-octave set, g–g'''''. Some sets are made with a built in damper pedal, which is a great advantage given the resonance of the crotales. As with the glockenspiel, crotales sound two octaves higher than written.

The term has also been applied to ancient clappers (*see* CROTALA) crotal bells ('crotals') are small closed bells (*see* BELL (i)).

JAMES BLADES/JAMES HOLLAND

Crotch, William (*b* Norwich, 5 July 1775; *d* Taunton, 29 Dec 1847). English composer, organist, theorist and painter. He was an exceptional child prodigy and became one of the most distinguished English musicians of his day.

1. LIFE. Crotch was the youngest son of Michael Crotch, a master carpenter, and his wife Isabella. At the age of about 18 months he began to pick out tunes on a small house organ which his father had built, and soon after his second birthday he had taught himself to play *God Save the King* with the bass. He played to a large company at Norwich in February 1778, and that summer his mother began taking him on a series of tours in which his phenomenal gifts were exploited (fig.1). They went first to Cambridge and other main towns in East Anglia, then to Oxford and London, where on 10 December 1778 Daines Barrington heard him play tunes 'almost throughout with chords'. On 1 January 1779 he played to the king and queen at Buckingham Palace. He could transpose into any key, and name all four notes in a chord by ear. Burney described his abilities in a report to the Royal Society on 18 February 1779. A second visit to London followed in October 1779, when an advertisement announced that 'Mrs. Crotch is arrived in town with her son, the Musical Child, who will perform on the organ every day as usual, from one o'clock to three, at Mrs. Hart's, milliner, Piccadilly'. He then toured the British Isles appearing several times in Scotland. He could play the organ, piano and violin, had already begun to compose, and was also talented in drawing and painting. On a visit to Leicester he played to William Gardiner,

1. William Crotch, aged 3: engraving by James Fittler

who reported that he could read Handel's organ concertos at sight. In 1779 he made the acquaintance of two other infant prodigies, Charles and Samuel Wesley, who established that he could distinguish between mean-tone and natural scales. Samuel Wesley and Crotch remained lifelong friends.

The evidence of Crotch's precocity is incontestable, being based in part on contemporary printed accounts in many sources, including those of such qualified observers as Barrington and Burney. The fact that Crotch's ultimate achievement as a composer hardly lived up to this promise may perhaps be put down to the psychological damage he suffered as a child. Crotch himself later confessed: 'I look back on this part of my life with pain and humiliation . . . I was becoming a spoilt child and in danger of becoming what too many of my musical brethren have become under similar circumstances and unfortunately remained through life'.

From 1786 to 1788 he was at Cambridge, as assistant to Professor Randall. He played the organ for services at King's, Trinity and St Mary the Great. Then he was sent to Oxford and placed in the care of the Rev. A.C. Schomberg, tutor of Magdalen College, who began to prepare him to enter the university and take orders in the church. This plan was dropped when Schomberg's health broke down, and Crotch continued his musical studies. His oratorio *The Captivity of Judah*, based on a text by Schomberg, was prepared under the guidance of his Cambridge teacher Charles Hague, and the aging Dutch composer Pieter Helendal. It was performed at Trinity Hall, Cambridge, on 4 June 1789. In September 1790 Crotch was appointed organist of Christ Church, Oxford, while still only 15 years old. During this period he came much under the influence of John Malchair, leader of the

Oxford Music Club orchestra, who like Crotch was a painter as well as a musician. From 1793 he began deputizing for the professor of music, Philip Hayes, as the conductor of the Music Room concerts, which he continued to direct until 1806. He took the degree of BMus on 5 June 1794, and that of DMus on 21 November 1799. In March 1797 he succeeded Hayes as professor of music and organist of St John's College and the university church of St Mary the Virgin. Although there was no taught course in music at the university, Hayes had often presented 'lectures' which took the form of specially composed odes or oratorios performed in the Music School. Crotch, however, was the first Heather Professor to deliver formal lectures on the history, theory and aesthetics of music. After an inaugural lecture in December 1798, from 1800 to 1805 he gave an annual course of lectures to subscribers in the Music School. In 1805–7 he gave a similar series at the Royal Institution in London, which was one of the first of the new societies to provide regular courses of lectures on music. In 1806–7 he withdrew from Oxford, resigning his organistships, and settled in London; but he retained the professorship until his death, and continued to award degrees and to compose odes for chancellors' installations – the professor's only formal duties in those days.

In London Crotch became well known as a teacher, composer and scholar. His appearances as a soloist were infrequent but remarkable. He sometimes played one of his organ concertos at a benefit concert. On 7 June 1809 he played a programme of his own arrangements of Handel's music for organ and piano to commemorate the 50th anniversary of the composer's death (possibly the first example of a 'one-man' public concert in Europe). He assisted Samuel Wesley and Benjamin Jacob in bringing out the music of J.S. Bach at organ recitals. In April 1812 came the performance of his oratorio *Palestine*, his most conspicuously successful work. It was repeated many times in London and the provinces, though Crotch never printed the score and charged 200 guineas for the loan of the instrumental parts and his own attendance as conductor at each performance.

He conducted the Birmingham Festival in 1808, and frequently directed concerts of the Philharmonic Society in London, of which he had become an associate on its foundation in 1813. His Symphony in F was performed by the society in 1814, and he remained a member in 1814–19 and 1828–32. He was also in considerable demand as a lecturer, and in April 1808 hired the Lower Rooms, Hanover Square, where he delivered a course of 12 public lectures, in June 1809. Between 1812 and 1823 he gave courses annually at the Surrey Institution and during the 1820s at the Royal Institution and London Institution. On the establishment of the Royal Academy of Music in 1822 Crotch was appointed its principal. He himself instructed the pupils in harmony, counterpoint and composition. Sterndale Bennett remembered him with affection:

> An active man, he used to walk from his house in the neighbourhood of Campden Hill to Tenterden Street, entering his classroom with his pockets distended by paint-boxes and sketch-books, and allowing his pupils, to their great delight, to examine any additions he had made on his walk through Kensington Gardens. A musical treat, often enjoyed by his class, was his playing from memory a series of the Choruses of Handel, which he could select with endless variety.

He resigned the principalship on 21 June 1832. In that year, on the institution of the Gresham Prize for church music, Crotch was appointed one of the judges, along with Horsley and Stevens. In 1834 he produced at Oxford a third oratorio, *The Captivity of Judah*, a second setting of the text for which he had first composed the music 45 years before; it was repeated in London in May 1836, but earned little of the critical acclaim accorded to *Palestine*. Crotch's last public appearance was at the Handel Festival in Westminster Abbey, when he played the organ on 28 June 1834. In retirement he devoted himself to sketching, composing and writing on all manner of subjects, especially for the benefit of his young nephews, nieces and grandchildren. He would sometimes visit his son, the Rev. W.R. Crotch, who was master of the grammar school, Taunton; it was during one such visit that he died. He was buried at Bishop's Hull, near Taunton. He left his music and musical copyrights to his son, and the rest of his property (estimated at £18,000) to his wife. After her death most of his library was sold by Puttick & Simpson on 20 February 1873. The 275 lots included a vast range of antiquarian music, some of which had formed the basis of his famous *Specimens*, and a considerable selection of early theory books.

2. Works. Crotch was not a prolific composer and chose to concentrate largely on choral and keyboard genres. His contemporary reputation was founded on his oratorio *Palestine*, the first even moderately successful oratorio composed in England since Handel's day. Handel's music exerted a strong influence on Crotch's own eclectic musical style and also on the formation of the musical aesthetic he expounded in his lectures. His scholarly interest in music of the past often impinged on his own works, which frequently mixed movements in a variety of styles. In the anthem *The Lord is King* a six-bar ground bass underpins the first half of the chorus 'Confounded be all they', and the funeral anthem *The joy of our heart is ceased*, written on the death of the Duke of York in 1824, opens with a direct quotation from the Dead March in Handel's *Saul*. The Third Organ Concerto

2. William Crotch: portrait by John Linnell, watercolour, 1839 (National Portrait Gallery, London)

in B♭ juxtaposes movements in the 'ancient' style of Handel with others in a heterogeneous Classical style. A similar mixture of styles can be heard in *Palestine* and the second *Captivity of Judah*, including some movements, like the chorus 'Let Sinai tell' from the former and 'Open ye the gates' from the latter, which demonstrate just how well informed the composer was about contemporary musical developments. Nevertheless, Crotch's music displays a certain detachment from fashionable trends and above all an avoidance of vulgarity and sentimentality. It is poles apart from the idioms of such younger contemporaries as Field and Bishop, but not unlike that of Samuel Wesley, his senior by nine years.

With the exception of the Third Organ Concerto and several symphonic movements, Crotch's orchestral music rarely reaches the level of his oratorios, yet he was an imaginative orchestrator. His large-scale works frequently make use of expanded brass and woodwind sections with parts for three trombones and clarinets. *The Bells* calls for an array of hand bells which play the chimes of Oxford's various clocks. The witty March and Waltz written for the private concerts of the queen in 1832 reveal an unexpectedly light-hearted side to his character. His symphonies and overtures suggest a familiarity with Haydn's 'London' symphonies which, as an arranger, he made available to a domestic market. His piano music is fluent and inventive. His valuable work as an arranger is often overlooked but included piano arrangements of Mozart's 'Jupiter' symphony, extracts from his operas, and Beethoven's Pastoral Symphony reduced for piano, violin and cello.

His cathedral anthems are mostly early works and display a reverence for the church music of his predecessors; as H.J. Gauntlett complained, they were the result of 'great industry but no genius'. Indeed, the two pieces by Crotch that maintained their popularity longest in cathedral choirs were not written as anthems at all: 'Lo! star-led chiefs' started life as a solo quartet in *Palestine*, while *Methinks I hear the full celestial choir* was published as a glee. Although the subdramatic, evangelical grandeur of the oratorio seems to have suited his gifts best, after the second *Captivity of Judah* he never again attempted anything on such a large scale. His horizons contracted to the point where he spent much of his creative energy on Anglican chants. He composed single chants, double chants, canonic chants, retrograde chants; he published fugues based on chants; he made the composition of chants an important part of his teaching at the RAM, and in 1842 he published his *Rules for Chanting the Psalms*. It is not, perhaps, wholly ironic that several of his Anglican chants are the only pieces composed by him that remain in regular use.

Crotch was highly influential as a lecturer and writer on musical subjects. His *Elements of Musical Composition*, published in 1812 and twice reprinted, was much in demand as a manual for beginners, as were his books on thoroughbass and piano playing. Far more important were his lectures, delivered first at Oxford and then, in revised forms, at the Royal Institution and elsewhere in London, and ultimately excerpted in *The Substance of Several Courses of Lectures* (1831). In these lectures Crotch offered a historical survey of music, firmly grounded on an aesthetic theory. His avowed aim was to improve the taste of lovers of music by enabling them to appreciate the merits of any composition through a consideration of the comparative value of the style adopted by the composer. He believed in a close union of the arts and in his lecture on 'Design' (1802) told his audience: 'Let the student examine a fine composition in the same way he would contemplate the beauties of a picture'. To this end Crotch adopted from Sir Joshua Reynolds the stylistic categories (ranked in descending order of greatness) of the sublime, the beautiful, and the ornamental (the last replacing Reynold's 'picturesque'), into which, regardless of age or nationality, all music, like the visual arts, could be fitted. The value of each style was proportional to the 'mental labour employed in their formation and the mental capacities required for the comprehension and enjoyment of them'. Crotch urged a rediscovery of the sublime style through the revival and imitation of ancient music – a goal that obviously paralleled that of the Gothic revival in architecture. He attempted to put it into practice himself, first by exhaustive collection and study of old music, second by presenting examples for revival in performance, and third by imitating it in composition. His concept of the 'three styles' was often quoted and referred to by later writers, and, more significantly, was also attacked and ridiculed. Burney was an early critic, and in 1836 Henry Gauntlett took issue with Crotch's doctrine of a special church style (the 'sublime') in imitation of ancient music. Despite his veneration of the past, and of Handel in particular, Crotch introduced his audiences to a wide range of music from all ages and did much to stimulate interest in unfamiliar works by Haydn and Mozart; his pioneering lectures on Mozart's operas (1817–21) are of particular importance. His three-volume anthology of *Specimens of Various Styles of Music referred to in a Course of Lectures* is encyclopaedic in scope and surprisingly forward looking in its aim to combine academic example with practical purpose. He not only hoped to broaden the taste of the public, but also to offer 'a *practical* History of the progress of the Science' and 'to the Student in Composition a great variety of matter for his study and imitation'. So influential were the *Specimens* that Grove in 1883 thought it worth while to list their contents in his *Dictionary*; Bumpus in 1908 still thought them 'useful'. Crotch was also an important force in the revival of early English church music. He published a selection of early psalm tunes, together with Tallis's Litany and *Veni Creator*, in 1803. Several churches and colleges at Oxford began to revive these tunes and some of the Elizabethan and Jacobean cathedral music, and they were well established there by the time the more general revival got under way in the 1830s. Rainbow has shown that Crotch's lectures had a decisive influence on Thomas Helmore and other musical leaders of the Tractarian movement. In old age Crotch seems to have become unnecessarily dogmatic about what was proper in church music. He condemned S.S. Wesley's *The wilderness* when it was submitted for the Gresham Prize in 1833, and the same composer's *O Lord thou art my God*, his exercise for the Oxford DMus in 1839. He actually wrote to Maria Hackett on 4 March 1833: 'The introduction of novelty, variety, contrast, expression, originality etc., is the very cause of the decay so long apparent in our church music'. If this were so, then Crotch himself would have been one of the prime culprits, for his own music is distinguished by all these qualities.

The extraordinary range and depth of Crotch's mental activity can be judged from his voluminous writings on

many subjects besides music. The *Monthly Magazine* of 1800 carried his observations on the shape of the earth, speculations about the atmosphere of the moon, as well as advocating the use of a pendulum as a metronome (15 years before Maelzel discovered Winkel's system). In 1842 he wrote *A Treatise on Perspective* and as an artist is regarded as a distinguished member of an 'Oxford school' of landscape painting that in some respects anticipated Constable, who was a close acquaintance. A collection of 'Six Etchings by W. Crotch from Sketches by Mr [Hugh] O'Neill, of the Ruins of the late Fire at Christ Church, Oxford' was published at Oxford in 1809. Some 1200 of Crotch's paintings and drawings are in the Norfolk and Norwich Record Office, along with his plays and writings on architecture, art, astronomy, electricity, fortification, geography, geometry, grammar, gunnery, history, optics, physics, pyrotechnics and other subjects. Bumpus also records that he wrote a complete commentary on the Old and New Testaments and the Book of Psalms. The iconography of Crotch is extensive, and includes, as well as a number of representations of the child prodigy, portraits of various stages of his life (see figs.1 and 2). Crotch's 13 volumes of letters (1801–45) and memoirs as well as A.H. Mann's exhaustive researches can be studied at the Norfolk and Norwich Record Office.

WORKS

LARGE VOCAL

The Captivity of Judah (orat, A.C. Schomberg and J. Owen), 1786–9, Cambridge, 4 June 1789, *GB-Lbl*
Chorus to Humanity (from W. Mason: Elfrida), 1790–91, *Lbl*
Messiah, A Sacred Eclogue (cant., Pope), *Lbl*
Ode to Fancy (J. Warton), 1799, Oxford, 21 Nov 1799 (London, 1800), *Ob*
Ode for the installation of Lord Grenville as Chancellor of the University of Oxford, 1810, *Ouf*
Palestine (orat, R. Heber), 1805–11, London, 21 April 1812, *Lbl*, *Ob*; vs (London, 1814, 2/1839)
The Captivity of Judah, orat, 1812–28, Oxford, 10 June 1834, *Lbl*, *NWr* 11260
Spirit of the golden lyre (ode, J. Conybeare), on the King's accession, May 1820, *Lbl*
When these are days of old (ode, J. Keble), for the installation of the Duke of Wellington as Chancellor of the University of Oxford, Oxford, 10 June 1834, *Lbl*; 3 airs (Oxford, 1834)
The Bells, ode, 1836, *NWr* 11275

SACRED VOCAL

Ten Anthems in Score (Cambridge, 1798): Be merciful unto me [excerpt, Comfort O Lord the soul of thy servant, 1794, *Och*, pubd separately]; Blessed is he whose unrighteousness is forgiven; God is our hope (2nd version); How dear are thy counsels, 1796, *Och*; My God, my God, look upon me; O Lord God of hosts; Rejoice in the Lord [excerpt, Behold thy king cometh, pubd separately]; Sing we merrily, 1794, *Och*; The Lord, even the most mighty God, hath spoken; Who is like unto thee
2 anthems in An Original Collection of Sacred Music, ed. A. Pettet (London, 1825): O Lord, from whom all good things do come; Weep not for me
Holy, holy, holy, Lord God Almighty (R. Heber), 1827 (London, 1859); O come hither and hearken (London, *c*1838); The Lord is King, vv, orch, 1838 (London, 1843)
10 anthems, 1796–1803, *GB-Ob*; God is our hope (1st version), *Lbl*; I will cry unto God, 1796, *Och*; Lo, cherub bands, *Ob*; O give thanks, vv, orch, *Lbl*; The joy of our heart is ceased, vv, orch [for the funeral of the Duke of York], *NWr* 11270
Gloria Patri (canon 2 in 1), in *Harmonicon*, ix (1831); Chants in Crotch, ed., A Collection of . . . Chants (London, 1842); 9 hymn tunes in C.D. Hackett, The National Psalmist (London, 1842); Kyrie, F, in R. Fawcett, Lyra Ecclesiastica (London, 1844); Chants, *NWr* 5288, 11234; TeD, B♭, 1790, *Lbl*

SECULAR VOCAL

9 glees, pubd singly, incl. Methinks I hear the full celestial choir (London, 1800)
20 glees; 32 rounds; 33 canons; 6 madrigals (motets): all in *Ob*
Songs: Liberty (London, *c*1785); Sycamore Vale, 1787; The rose had been wash'd (London, *c*1790)

ORCHESTRAL

Concerto, hpd/pf, orch (London, 1784)
3 Concertos, org, orch F, A, B♭ (London, *c*1805)
Ovs.: A, 1795; G, 1815; both in *Lbl*
Sinfonia, E♭, 1808, rev. 1817, *Lbl*; Sinfonia, F, 1814, *Lbl*
March and Waltz (London, 1832); arr. pf duet (London, 1833), ed. in LPS, xix (1986)

KEYBOARD AND CHAMBER

2 Sonatas, pf/hpd, vn (London, *c*1786)
Quartet, str, 1788, rev. 1790, *Lbl*
3 Sonatas, pf/hpd (London, 1793); no.3 ed. in LPS, vii (1985)
Sonata, G, pf, 1795, *Lbl*
Milton Oysters, with Variations, pf (London, *c*1795)
[3] Original airs . . . by John and William Crotch, pf (London, *c*1804–5)
Fugue on a Subject of T. Muffat's, org/pf (London, 1806)
Prelude and Air, pf (London, 1807, 2/1812); ed. LPS, vii (1985)
Sonata, E♭, pf (London, 1808)
30 Rounds, pf (London, 1813)
Preludes, pf (London, 1822)
Fantasia, pf (London, before 1824)
3 Divertimentos, pf (London, *c*1825)
Introduction and Fugue, pf/org (London, *c*1825)
Fugue on a subject of 3 notes, org/pf (London, *c*1825)
[12] Fugues, the Subjects taken from Chants, org/pf (London, 1835–7)
Juvenilia, sketches etc., *NWr*

EDITIONS AND ARRANGEMENTS

Tallis's Litany . . . a Collection of Old Psalm Tunes . . . Tallis's 'Come, Holy Ghost' (London, 1803, 2/1807)
Specimens of Various Styles of Music, 3 vols. (London, *c*1808–*c*1815, 3/*c*1845)
Psalm Tunes Selected for the Use of Cathedrals and Parish Churches (London, 1836)
Chappell's Collection of National English Airs (London, 1838–40) [collab. others]
A Collection of 72 Original Single and Double Chants (London, 1842)
G.F. Handel: Anthems for the Coronation of King George II, The Works of Handel [Handel Society], i (London, 1843)
Arrangements of Handel's oratorios, and symphonies, concertos and quartets by Haydn, Mozart, and Beethoven etc., pf solo/duet (London, *c*1800–45)
'Old Hundredth' psalm tune arr. orch, MS Croydon, Royal School of Church Music

WRITINGS

only those on music

'Remarks on the Terms at Present Used in Music, for Regulating Time', *Monthly Magazine*, viii (1799–1800), 941
Elements of Musical Composition Comprehending the Rules of Thorough Bass and the Theory of Tuning (London, 1812, rev. 3/1856 by T. Pickering)
Preface to *Preludes for the Piano Forte* (London, 1822), 1–24
Practical Thorough Bass (London, *c*1825)

NICHOLAS TEMPERLEY, SIMON HEIGHES

Crotchet (Fr. *noire*; Ger. *Viertel-Note*; It. *nera, croma*; Lat. *semiminima*; Sp. *negra*). In Western notation the note that is half the value of a minim and twice that of a quaver. In American usage it is called a quarter-note. It is the equivalent of the old semiminim (Lat. *semiminima*), first found in 14th-century music. The semiminim took the form of a minim with a crook, or else a coloured minim (red in black notation, black in the more recent void notation). The crotchet is still in regular use, although in common with other notes it now has a round note head. Many 20th-century composers adopted the crotchet as a convenient value for the standard pulse, and it is found as the denominator in the most frequently used time signatures (3/4, 4/4 etc.). Its various forms and the crotchet rest are shown in ex.1*a–e*; the semiminim rest is shown in ex.1*f*

JOHN MOREHEN/RICHARD RASTALL

Crotte, Nicolas de la. *See* LA GROTTE, NICOLAS DE.

Crotti, Archangelo (*fl* Ferrara, 1608). Italian composer. There is no evidence for Eitner's surmise that he was identical with FRANCESCO CROATTI. He was living as a monk at Ferrara when he published *Il primo libro de' concerti ecclesiastici a 1, a 2, a 3, a 4, & a 5, parte con voci sole, et parte con voci et istrumenti* (Venice, 1608). This volume is one of the earliest to include solo and duet motets in the new concertato manner of Viadana. The pieces were written for modest resources; the vocal parts are rarely difficult, using only the easier kinds of ornament found in 16th-century instruction books. Six compositions require instruments, which are always specified (one or two cornetts or violins and one to three trombones), though often ad lib. While the concerto *Ave Maria coelorum* (two voices and two trombones) employs the polychoral principle on a small scale (one voice and one trombone), the three motets for one voice and two instruments are clearly conceived as vocal works with the instruments added afterwards. The active participation of the basso continuo, which is linked in some way to the voice part, reveals a rather conservative use of monody; the trombone is limited to doubling the continuo, while the cornett alternates parallel motion with the bass (and more rarely with the voice) with freer writing, as though it were a second vocal part, though it rarely has any real autonomy. Of historical significance is the concerto *Sancta Maria*, an instrumental sonata (although the term 'sonata' does not appear in the print) for two cornetts or violins and trombone, above which the soprano intones the text of the litany 'Sancta Maria, ora pro nobis' eight times, always on the same notes and always preceded by two semibreve rests. The piece concludes with a repeat of 'ora pro nobis' on the same notes as before. A precursor of Monteverdi's *Sonata sopra Sancta Maria*, this work also has a schematic structure, but with more interesting instrumental writing, which makes free use of the characteristics of the canzone and the instrumental fantasia, well known in Ferrara above all from the works of Luzzasco Luzzaschi. The structure of the motet *Pater peccavi* is different, for here the instrumental style drives the voice, which fits in with the concise structure and style of writing.

Croubelis, Simoni dall [Simoni, D.; Simono, D.] (*b* ?1726; *d* ?Copenhagen, ?1790). Dutch composer, active in Denmark. Before settling in Copenhagen in the early 1780s he appears to have worked in Amsterdam, where a few arrangements of vocal music (some as flute duets) were published. The earliest reference to his presence in Denmark is the signature 'a Coppenhage le 16 may 1785' on one of his manuscripts. He was 60 years old at the time of the official census on 1 July 1787. Annotations on the music manuscripts and on two handwritten catalogues

of the Copenhagen court music archives suggest that he had important connections with members of the nobility. Among these was W.H.R.R. Giedde, an amateur flautist and prominent music collector, through whose widow the collection of Croubelis's music passed to the court and then to the Royal Library. 97 compositions, mostly instrumental, survive in manuscript (most of them presumably autograph). Their style is typical of that of the mid-18th century.

NIELS KRABBE

Crouch, Andrae (Edward) (*b* Los Angeles, 1 July 1942). American gospel singer, pianist and composer. As a child he served as a church pianist. After two years of study at Valley Junior College he withdrew to organize a gospel group, the Cogics (an acronym for the Church of God in Christ). This group, which included his twin sister Sandra, disbanded when their pianist Billy Preston took up a career in secular music, and in the late 1960s Crouch organized another group, the Disciples. Crouch's performance style is varied: some songs are typical of the traditional gospel style (*Soon and Very Soon*, 1976); fast songs are often executed with the driving beat of secular soul music, often to the accompaniment of a synthesizer, with the Disciples providing a slick backing in the manner of a pop group (*I will keep you in perfect peace*, 1976); gospel ballads are delivered in a crooning style associated with secular music (*Tell them*, 1975). His recordings thus appeal to a multi-racial secular as well as a religious audience (he has won a large number of Grammy awards), and he has had more financial success than any other black American gospel singer. He has appeared throughout the USA as well as in Europe and East Asia, and is regarded as one of the leaders of contemporary gospel music. Crouch has written more than 300 gospel songs, many of which, such as *Through It All* (1971) and *Take me back* (1977), have become standards.

HORACE CLARENCE BOYER

Crouch [née Phillips], **Anna Maria** (*b* London, 20 April 1763; *d* Brighton, 2 Oct 1805). English soprano and actress. She was articled to Thomas Linley and made her début as Mandane in *Artaxerxes* on 11 November 1780. The next season her singing of Purcell's 'Fairest isle' in *King Arthur* was encored, and her loveliness and gentle demeanour meant that she was particularly admired in roles such as Miranda in *The Tempest* and Angelica in the new opera *The Fair American*. She sang and acted at Drury Lane with summer seasons in Ireland and the provinces until her retirement in 1801, although her later career was dogged by ill-health. Two years after her marriage in 1785 she met the tenor Michael Kelly and they were living together long before the legal separation from her husband in 1791. They appeared together in stage works, oratorios and concerts, and moved in brilliant social and artistic circles. Storace created leading roles for her, notably Lady Elinor in *The Haunted Tower* (1789), Catherine in *The Siege of Belgrade* (1791) and the title role in *Lodoiska* (1794). Her singing of 'When pensive I thought of my love' as the heroine in Kelly's *Bluebeard* (1798) was particularly remembered. All accounts of her agree with Sainsbury's *Dictionary* which recorded that she had a 'remarkably sweet voice and a naive affecting style of singing' together with 'extraordinary personal charms'.

OLIVE BALDWIN, THELMA WILSON

Crouch, Frederick Nicholls (*b* London, 31 July 1808; *d* Portland, ME, 18 Aug 1896). English cellist, singer and composer. He studied music with his father Frederick William Crouch (*c*1783–1844, author of a *Complete Treatise on the Violoncello*, 1826) and his grandfather William Crouch, organist of Old Street Church, London. He played in the orchestra of the Royal Coburg Theatre at the age of nine. He entered the RAM in 1831 but left in June the next year; during that time he was cellist in the King's Theatre and other orchestras, including Queen Adelaide's private band. After 1832 he moved to Plymouth, where he worked as a professional singer and a travelling salesman. His famous song *Kathleen Mavourneen* was composed between about 1835 and 1838. He gave lectures on the songs and legends of Ireland, became supervisor at D'Almaine & Co. music publishers, and is thought to have contributed to advances in zincography, an engraving process. In 1849 he went to New York as a cellist, probably to escape his creditors in the wake of a lawsuit (he was twice declared bankrupt, and before leaving England had contracted the first of four bigamous marriages). In the USA he undertook several, mostly unsuccessful, musical enterprises – conducting, singing and teaching in Boston, Portland, Philadelphia, Washington and Richmond. He served as a trumpeter in the Confederate Army during the civil war, and then settled as a singing teacher in Baltimore. In 1881 he was working as a varnisher in a factory there; a testimonial concert was given in Baltimore in 1883.

Besides the song that made his name famous, and hundreds of others, Crouch wrote two operas, *Sir Roger de Coverley* and *The Fifth of November, 1670*, an *Othello Travestie* (Philadelphia, 1856) and a monody (now in *US-CA*). Some of his manuscripts are in the New York Public Library. One of his 18 known children, Emma Elizabeth (1842–86), was the famous Parisian courtesan 'Cora Pearl'.

BRUCE CARR

Crowd. *See* CRWTH. *See* WALES, §II, 1.

Crowson, Lamar (*b* Tampa, FL, 27 May 1926; *d* Johannesburg, 25 Aug 1998). American pianist. He studied at Reed College in Portland, Oregon, and subsequently (1948–50) the piano at the RCM in London with Arthur Benjamin. In 1952 he was named laureate in the Queen Elisabeth Competition in Brussels. He was appointed to the staff of the RCM in 1957. From 1965 to 1968 he was a senior lecturer at the University of Cape Town and from 1969 to 1971 professor at the RCM. He returned to the University of Cape Town in 1972, where he was a senior lecturer and later (1980) a professor, receiving an honorary doctorate in 1996.

Although Crowson's first success was as a soloist, it was as a chamber musician that he soon made his name. For many years he was the pianist for the Melos Ensemble. He worked with performers such as Jacqueline du Pré, Itzhak Perlman, Ruggiero Ricci, Janet Baker and Gervase de Peyer, and took part in the European premières of Poulenc's Sonata for clarinet and piano and Copland's *Fantasy*.

JAMES MAY

Croza, Giovanni Francesco. *See* CROSA, GIOVANNI FRANCESCO.

Crozier, Catharine (*b* Hobart, OK, 18 Jan 1914). American organist. She graduated from the Eastman School of Music in Rochester in 1936, and made her professional début in Washington, DC, in 1941 at a national convention of the American Guild of Organists. She had joined the organ faculty at the Eastman School in 1938 and became head of the department in 1953. From 1955 to 1969 she was organ professor at Rollins College, Winter Park, Florida. Her own teachers included Joseph Bonnet, Yella Pessl (harpsichord) and Harold Gleason, the American musicologist whom she later married. With him she gave innumerable masterclasses at many institutions. Her concert career took her to most European countries. In 1962 she joined E. Power Biggs and Virgil Fox in inaugurating the organ at Philharmonic Hall, New York. Her memorized repertory was immense and historically inclusive although she specialized in contemporary music.

VERNON GOTWALS

Crozier, Eric (*b* London, 14 Nov 1914; *d* Granville, France, 7 Sept 1994). English librettist and director. His literary gifts, sensitivity to words and musical acumen made him an outstanding librettist, particularly in his collaboration with Britten. He studied at the Royal Academy of Dramatic Art for two years and in 1934 won a scholarship to the British Institute in Paris, where he encountered La Compagnie des Quinzes, a group of young players founded by Jacques Copeau 'with the declared aim of bringing back truth, beauty and poetry to the French stage'. Upon his return to England, he became one of the first drama producers for BBC Television. Following the outbreak of World War II he worked first with Tyrone Guthrie at the Old Vic (based in Burnley) and then with Sadler's Wells. His first production for the company, *The Bartered Bride* (1943), was followed in 1945 by *Peter Grimes*. After dissension arose within the organization he left and co-founded the English Opera Group (1947) and the Aldeburgh Festival (1948) with Britten and John Piper.

Crozier based his first libretto, *Albert Herring* (1947), on Maupassant's short story *Le rosier de Madame Husson*. Its great success – despite the hostility of many critics and the lofty disapproval of John Christie of Glyndebourne – led to *Let's Make an Opera* (1948), which was subsequently pared down to its central story *The Little Sweep*. *Billy Budd* (1951), based on the novel by Herman Melville, was the product of a collaboration with E.M. Forster. Crozier also wrote the libretto for Lennox Berkeley's *Ruth* (1956) and directed the premières of *Peter Grimes* (1945, London; 1946, Tanglewood) and *The Rape of Lucretia* (1946, Glyndebourne). His opera translations include *The Bartered Bride*, *Otello*, *Falstaff* and *La traviata* (all with Joan Cross), *Idomeneo*, *Salome* and *Die Frau ohne Schatten*. He was a tutor at the Britten-Pears School for Advanced Musical Studies at Snape Maltings, with his wife, Nancy Evans, who succeeded Peter Pears as director. Both were appointed OBE in 1991. Crozier also wrote books for children and was an accomplished broadcaster.

J.M. THOMSON

Crozier, Nancy. *See* EVANS, NANCY.

Cruft, Adrian (Francis) (*b* Mitcham, 10 Feb 1921; *d* Hill Head, Hants., 20 Feb 1987). English composer. He was educated at Westminster Abbey Choir School (where he became head chorister) and Westminster School, and went to the RCM (1938–40 and 1946–7, the intervening years being spent on war service). At the RCM he held the Boult conducting scholarship, studied composition with Jacob and Rubbra, and double bass with his father, Eugene. From 1947 he played with all the major London orchestras, finally giving up bass playing in 1969. He was

for some years an active member of the Composers' Guild, becoming chairman in 1966, and was largely concerned in the setting up of the British Music Information Centre at the guild's London headquarters in 1967. His music is diatonic, firmly based in tradition and generally straightforward in idiom. His church music benefits from inside knowledge of the performing context, and his wide experience of other fields of practical music-making preserves it from the parochialism which so often threatens the specialist composer of church music. His works include four cantatas, settings of the canticles and many anthems and carols, works for orchestra, chamber music and music for children and amateurs.

WORKS
(*selective list*)

Ops: The Eatanswill Election (J. Platt, after C. Dickens: *The Pickwick Papers*), op.84, 1981; Dr Syn (3, Platt, after R. Thorndyke), op.89, 1983

HUGO COLE/JOHN CRUFT

Cruft, Eugene (John) (*b* London, 8 June 1887; *d* London, 4 June 1976). English double bass player. He was principal of his section in the BBC SO from its foundation in 1929 until 1949, a position he held with distinction, then of the Royal Opera House Orchestra, 1949–52. Later he was director and principal of the Pro Arte Orchestra and performed with prominent London ensembles. His keen and energetic manner of performance made him a striking personality.

Cruft's influence as a teacher was widespread, at the RCM, and with the National Youth Orchestra from 1952 until shortly before his death. His methods were sometimes unconventional – he advocated the use of a matchbox to keep the first and second fingers of the left hand apart, and of a piece of string to keep the third and fourth together – but at a time when advanced double bass tuition was in its infancy his teaching did a great deal to raise standards. He published *The Eugene Cruft School of Double-Bass Playing* (London, 1966). He put his knowledge of music and the orchestral world to good use in lectures, articles and administration; he was Honorary Treasurer of the Royal Society of Musicians, 1946–76, and was the orchestral organizing secretary for the coronations of George VI and Elizabeth II. He was made an OBE in 1957.

WATSON FORBES/RODNEY SLATFORD

Crüger, Johannes (*b* Gross-Breesen, nr Guben, Lower Lusatia, 9 April 1598; *d* Berlin, 23 Feb 1662). German composer and theorist. His singular contribution to 17th-century German music lay in his revitalizing of the Protestant chorale. He was also influential as a theorist.

1. Life. Until he was 15 Crüger was educated at schools at Guben and then began a period of extensive travelling. He studied with Paul Homberger (who may have been a pupil of Giovanni Gabrieli) in Regensburg in 1614. The following year he visited both Austria and Hungary, including a brief stay in Pressburg (now Bratislava). Before arriving in Berlin at the end of the year he travelled through Moravia, Bohemia and Saxony. In Berlin he became a tutor to the family of Christoph von Blumenthal, a captain of the royal guard of the Elector of Brandenburg. In October 1602 he entered the University of Wittenberg as a theology student. Nothing further is known about his musical education, but from 1619 he published music in Berlin. In some way he successfully established his reputation as a musician and teacher there, and on 23 June 1622 he was called back there to become Kantor at the Nikolaikirche (the city's most important parish church) as well as teacher at the Grauen Kloster Gymnasium. He retained his position as Kantor until his death 40 years later.

2. Works. Crüger compiled, arranged and contributed new melodies to several major chorale collections, including *Praxis pietatis melica*, his most important achievement and the most influential chorale publication of the 17th century. His first collection, *Newes vollkömliches Gesangbuch, Augspurgischer Confession*, appeared in 1640. It includes 240 chorale texts and 137 melodies, of which 18 are by him. It is the first publication to arrange chorales as melodies with a figured bass accompaniment rather than as settings for several voices. Not only does this arrangement emphasize the importance of the organ in the accompaniment of chorales in Berlin churches, but the simplicity of the accompaniment as well as of the melodic rhythm indicates the extent to which Crüger aimed to make these arrangements practical for singing in the home during private worship. This collection was apparently the first edition of the *Praxis pietatis melica*, extant first in an edition of 1647 and republished more than 40 times until well into the 18th century (printings of various Berlin editions also appeared in other European cities). In the edition of 1647, in which the chorales again have a figured bass accompaniment, 15 texts by Paul Gerhardt appear for the first time with melodies by Crüger. Gerhardt, perhaps the most renowned poet of German chorales, became a close friend of Crüger's in 1657 when he became deacon at the Nikolaikirche, and the two collaborated after this. From edition to edition *Praxis pietatis melica* changed and expanded in size, although by the end of the century Crüger's name as a composer of chorales had vanished from its pages; as early as the tenth edition of 1661, which contains 550 chorales, only two melodies can still be attributed to Crüger.

In 1649 Crüger published the *Praxis pietatis melica* in an arrangement for four voices, two instrumental parts (violins or trumpets) and thoroughbass entitled *Geistliche Kirchen-Melodeien*. The instrumental parts, which are optional, usually lie above the vocal melody and are generally florid: they produce something like chorale arias. Crüger claimed to be the first to add instrumental parts to chorale melodies, although precedents existed for such a combination of voices and instruments in the sacred symphonies of Venetian composers in the first decades of the 17th century. A similar arrangement for voices and optional instrumental parts appears in Crüger's next chorale publication, the *Psalmodia sacra*. The first part (1658) consists of the 150 psalms in the translation by Ambrosius Lobwasser arranged for four-part chorus, three instrumental parts and thoroughbass. Part ii (dated 1657 [sic]) includes 173 sacred songs and psalms, of which 105 have instrumental accompaniments, mostly in two additional parts.

Some 71 melodies by Crüger appear in these several publications, only a few of which have remained in modern Protestant hymnals. The following are specially noteworthy: *Herzliebster Jesu, was hast du verbrochen* (words by Johann Heerman), *Jesu, meine Freude* (Johann Franck) and *Schmücke dich, o liebe Seele* (Johann Franck) and his adaptations of Johann Schop's melody *O Ewigkeit, du Donnerwort* and Michael Franck's *Ach wie flüchtig, ach wie nichtig*.

Crüger wrote several theoretical works, all of which have the character of instruction manuals. In 1625 appeared two brief manuals: *Praecepta musicae practica* and *Kurtzer und verstendtlicher Unterricht*, which were expanded and adapted as *Quaestiones musicae practicae* (1650), a work that in turn became the basis for his final treatise, *Musicae practicae ... Der rechte Weg zur Singekunst* (1660). In between came his best-known treatise, *Synopsis musica* (1630). These volumes contain little that is original; Crüger drew most of the ideas as well as many of the music examples from authors such as Johannes Lippius, C.T. Walliser, Sethus Calvisius, J.A. Herbst and Michael Praetorius. The section of examples illustrating fugue in *Synopsis musica* originates in Sweelinck's rules of counterpoint (see M. Seiffert: 'J.P. Sweelinck und seine direkten Schüler', *VMw*, vii, 1891, p.180). However, in drawing together many of the most important new theoretical ideas of the 17th century and especially in the emphasis that he placed on the harmonic primacy of music, Crüger gave his treatises an independent validity that influenced many subsequent music theorists. He defined music as 'the science of artfully and judiciously combining and inflecting harmonic intervals, which make a *concentus* of diverse sounds, especially for the purpose of moving man to the glory of God' (*Synopsis musica*, caput I). Although the concept comes from Lippius, Crüger was the first to introduce the idea into an instruction manual meant for music students.

In *Der rechte Weg zur Singekunst*, as in his other works, Crüger instructed the reader in the rudiments of singing. In the first five chapters he discussed the principles of notation, solmization, intervals and proportions. Chapter 6, however, is the most frequently cited. Entitled 'Diminutionibus notularum' and enlarging upon a similar chapter in the 1654 edition of *Synopsis musica*, Crüger borrowed heavily from Herbst's *Musicae practica* (1642) and Praetorius's *Syntagma musicum*, iii (1619), both of which devote considerable space to the art of singing in the Italian manner. Crüger gave lengthy music examples of vocal diminution figures and ornamentation: *accento*, *tremolo*, *gruppo*, *tirata*, *trillo passaggio*. He suggested, however, that these forms of Italian vocal embellishment belonged more appropriately to music sung at royal musical establishments and for the most part were not included in the education of schoolchildren. This would seem to indicate that although the Italian manner of singing was the rule in aristocratic circles in mid-17th-century Germany, it had not strongly affected the traditional church music practices of Berlin, where Crüger's influence remained paramount for 40 years.

WORKS

CHORALE COLLECTIONS

Newes vollkömliches Gesangbuch, Augspurgischer Confession, . . . in welchem nicht allein vornemlich des Herrn Lutheri, und anderer gelehrten Leute, Geist- und Trostreiche Lieder, so bishero in Christl. Kirchen bräuchlich gewesen: sondern auch viel schöne newe Trostgesänge, insonderheit des vornehmen Theol. und Poeten Herrn Johan Heermanns, zu finden, mit aussenlassung hingegen der unnötigen und ungebräuchlichen Lieder, 4vv, bc (org) (Berlin, 1640)

Praxis pietatis melica. Das ist: Übung der Gottseligkeit in Christlichen und trostreichen Gesängen, Herrn D. Martini Lutheri fürnehmlich, wie auch anderer vornehmer und gelehrter Leute ordentlich zusammengebracht, 4vv, bc (org) (Berlin, 2/1647 [the preface suggests that the previously cited chorale collection is the first edn]); see *ZahnM* for details of numerous later edns

Geistliche Kirchen-Melodeien über die von Herrn D. Luthero sel. und andern vornehmen und gelehrten Leuten aufgesetzte geist- und trostreiche Gesänge und Psalmen, 4vv, 2 vn/cornetts, bc (org) (Leipzig, 1649) [arr. of Praxis pietatis melica]

D.M. Luthers und anderer vornehmen geistreichen und gelehrten Männer geistliche Lieder und Psalmen, ed. C. Runge (Berlin, 1653); although Crüger was not the editor, many of his important chorales were published in this collection for the first time

Psalmodia sacra, das ist: Des Königes und Propheten Davids geistreiche Psalmen, durch Ambrosium Lobwasser, D. aus dem Frantzösischen, nach ihren gebräuchlichen schönen Melodien, in deutsche Reim-Art versetzet, 4vv, 3 insts, bc (Berlin, 1658)

D.M. Luthers wie auch anderer gottseligen und christlichen Leute geistliche Lieder und Psalmen, 4vv, 3 insts, bc (Berlin, 1657 [sic]) [pt.ii of Psalmodia sacra]

Hymni selecti in gratiam studiosae inventutis Gymnasii berolinensis (Berlin, 1680) [according to *EitnerQ*]

OTHER MUSCIAL WORKS

Concentus musicus zu hochzeitlichen Ehren dem Ehrenwerten . . . Herrn Caspar Goltzen und seiner vielgeliebten Braut Magdalen Mauriti, 8vv (Berlin, 1619)

Achtstimmig Hochzeitsgesang aus dem IV. Capitel des hohen Liedes Salomonis zu Ehren . . . dem Ehrenwerten . . . Herrn Johanni Kallen, Buchhändler . . . in Berlin und seiner vielgeliebten . . . Braut Margareten Krausen (Berlin, 1620)

Meditationum musicarum paradisus primus, oder Erstes musicalisches Lustgärtlein, 3, 4vv (Berlin, 1622)

Meditationum musicarum paradisus secundus . . . welcher aus mehrern nach den acht Kirchentönen eingerichteten Magnificats, 2–8vv, bc (org) (Berlin, 1626)

Laudes Dei vespertinae, 4, 5vv, bc (Berlin, 1645)

Recreationes musicae, das ist Neun poetische Amorösen (Leipzig, 1651), lost

THEORETICAL WORKS

Praecepta musicae practicae figuralis (Berlin, 1625)

Kurtzer und verstendtlicher Unterricht, recht und leichtlich singen zu lernen (Berlin, 1625)

Synopsis musica, continens rationem constituendi et componendi melos harmonicum, conscripta variisque exemplis illustrata (Berlin, 1630, enlarged 2/1654)

Quaestiones musicae practicae ex capitis comprehensae, quae perspicua, facili et qua fieri potuit, succincta methodo ad praxin necessaria continent, in gratiam et usum studiosae inventutis conscriptae varrisque idoneis exemplis unacum utilissima XII

modorum doctrina illustrata (Berlin, 1650) [expansion and adaptation of the first two items]
Musicae practicae praecepta brevia et exercitia pro tyronibus varia. Der rechte Weg zur Singekunst (Berlin, 1660)

GEORGE J. BUELOW

Crüger, Pancratius (*b* Finsterwalde, Lower Lusatia, 1546; *d* Frankfurt an der Oder, 23 Oct 1614 or 25 Oct 1615). German teacher and writer. He may have been related to Johannes Crüger. He is first heard of as Kantor at the Martinsschule, Brunswick. In October 1575 he moved to Helmstedt as a teacher of Latin and poetry, and at the inauguration of the university there on 16 October 1576 he received a master's degree in philosophy. From 24 December 1580 to 11 April 1581 he was dean of the faculty of philosophy and in January 1581 was appointed professor of logic. He later became Rektor of the grammar school at Lübeck. In his singing instruction there he wished to use note names (A, B, C, D etc.) instead of the traditional solmization syllables (*ut*, *re*, *mi*, *fa* etc.), and he also campaigned at Halberstadt and Rostock in support of the alphabetical system and against solmization. As a consequence, proceedings were started against him which led to his dismissal in 1588. He was in fact the first teacher who is known publicly to have advocated the use of note names, though there are no writings by him on the subject. The first publications about it, by Ambrosius Profe, Thomas Selle and Wolfgang Hase, date from the mid-17th century. In 1589 Crüger became Rektor at Goldberg, Schwerin. From the autumn of 1598 until his death he was professor of Greek at the University of Frankfurt an der Oder; during the winter term of 1598 he was chancellor. His few extant writings deal mainly with poetry. (I. Schubert: *Wolfgang Hase als Musiktheoretiker*, diss., U. of Graz, 1969)

INGRID SCHUBERT

Cruit. Irish term originally denoting a lyre (the word itself is a cognate of the Welsh CRWTH) but subsequently used for a frame harp, the later Irish lyre name being *timpán* (*see* TIMPÁN, TIOMPÁN).

Crumb, George (Henry) (*b* Charleston, WV, 24 Oct 1929). American composer. Born to accomplished musical parents, he participated in domestic music-making from an early age, an experience that instilled in him a lifelong empathy with the Classical and Romantic repertory. He studied at Mason College (1947–50), the University of Illinois, Urbana-Champaign (MM 1953), the Berlin Hochschule für Musik (Fulbright Fellow, 1955–6), where he was a student of Boris Blacher, and the University of Michigan, Ann Arbor (DMA 1959), where his teachers included Ross Lee Finney. In 1959 he accepted a teaching position at the University of Colorado, Boulder. After receiving a Rockefeller grant in 1964, he became composer-in-residence at the Buffalo Center for the Creative and Performing Arts. His first mature works, composed during these years, include Five Pieces for Piano (1962), *Night Music I* (1963) and *Four Nocturnes* (1964), in which delicate timbral effects combine with a Webern-esque pointillism and echoes of a Virginian folk heritage to create the atmospheric chiaroscuro that became a trademark of his style.

In 1965 Crumb was appointed to a composition post at the University of Pennsylvania, where he remained until his retirement 30 years later. His early years at Penn were especially productive. He wrote the four books of *Madrigals* (1965–9), *Eleven Echoes of Autumn* (1965), *Songs, Drones and Refrains of Death* (1968), *Night of the Four Moons* (1969), inspired by and composed during the Apollo 11 space flight, the string quartet *Black Angels* (1970), a strikingly dramatic, surreal allegory of the Vietnam War, and the widely acclaimed *Ancient Voices of Children* (1970). *Echoes of Time and the River* (1967), one of only three orchestral works in his output, won the Pulitzer Prize in 1968. Nine of his vocal works have connections with the poetry of Federico García Lorca, whose writing Crumb first encountered at the University of Michigan. Haunted by Lorca's surreal and explosive imagery, Crumb created musical landscapes of similar luminescence and intensity. In *Ancient Voices* and *Night of the Four Moons*, for example, Crumb set Lorca texts that reveal the poet's interweaving of fantasy and reality, of childish innocence and adult voluptuousness, of life, love and mortality; his perception of the elements (earth, moon, sea, etc.) as animate spirits; and his vivid evocation of actual sounds. To serve such powerful imagery, Crumb developed extended performance techniques, some of which acquired considerable notoriety: forces for *Ancient Voices* include a paper-threaded harp, a chisel slid along piano strings to bend their pitch, a musical saw and tuned 'prayer stones'; instructions for *Black Angels* direct the performers to trill with thimble-capped fingers, and to simulate the sound of viols by bowing on the fingerboard between the left hand and scroll; *Vox balaenae* (1971) requires a flautist to sing and play simultaneously and a cellist to play glissandos of artificial harmonics to mimic the cries of seagulls. Crumb's scores abound in such delightful ingenuities, the delicate effect of which is frequently enhanced by amplification.

Another common feature of Crumb's style is his use of musical quotation; this always serves a symbolic purpose, as exemplified by the strands of Bach's D♯ minor fugue from *Das wohltemperirte Clavier*, ii, that trail through the final section of *Music for a Summer Evening* (1974). Textual quotations from Salvatore Quasimodo, Blaise Pascal and R.M. Rilke describing the loneliness of Man 'falling' through the frightening infinity of space precede three of the movements of the work, which as a whole represents a spiritual quest for meaning, reconciliation, nativity and assurance. To enhance this theme, Crumb chose fugue passages in which Bach, having reached the minor key with the maximum number of sharps, proceeded to modulate further to the sharp side, necessitating a profusion of double sharps, as if aspiring ever upwards to a state of spiritual transcendence. Surrounded by

incandescent eruptions, the Bach extracts float softly aloft, the upper line of the piano shadowed by the vibraphone, an effect that is almost unbearably poignant.

Where no direct quotation will serve, Crumb has drawn on his gift for pastiche. His parody of a Spanish Renaissance sarabande in *Black Angels* is one such example. Particularly memorable is the end of *Night of the Four Moons* which, with its uncannily apt Lorca texts, is a musical and poetic allegory of Man's 'capture' of the moon. The performers eventually exit the stage, like astronauts returning to earth, leaving a lone spotlit cellist who sustains slowly rotating high harmonics ('Musica Mundana'). Interrupting this icy oscillation, the audience hears from off stage, like an intermittent distant radio transmission, snatches of a pastiche Mahlerian *Berceuse* in the affectingly 'warm' key of F♯ major ('Musica Humana'). This creates both a reference to the end of Haydn's 'Farewell' Symphony and a nostalgic symbol of humanity heard, as it were, from the impersonal vastness of space.

Many of Crumb's works include an implicit or real theatricalism, invariably understated but sufficient to ensure him a significant place among postwar exponents of music theatre. Between 1965 and 1985 his works received over 50 choreographic treatments from dance companies worldwide. His use of pictorially suggestive notation in several works is also notable. In the two volumes of *Makrokosmos* (1972–3), for example, each a set of '12 Fantasy-Pieces after the Zodiac' steeped in multiple references, every fourth piece is notated as a visual symbol, the musical staves drawn to represent a cross ('Capricorn'), a double star ('Gemini'), or a spiral galaxy ('Aquarius'). Apart from his three orchestral compositions, Crumb has attempted only one large-scale work, *Star-Child* (1977), a Ford Foundation commission for Pierre Boulez and the New York PO. Although only 33 minutes in duration, the work requires substantial vocal and orchestral forces. While its Latin text leads from darkness to light, despair to redemption, a characteristic progression for Crumb, the music remains essentially reflective and illustrative, static rather than dynamic.

No essential differences in method or feeling appear between the scores of the late 1960s and 70s and the handful of significant compositions from the next two decades. His art is naturally monodic, expressing itself through subtleties of nuance, manner and coloration, now poised above a trance-like drone, now exploding with iridescence, most of all contemplative, magical and mysterious. During the 1980s and 90s he composed more slowly, perhaps due to his acknowledged difficulty in evolving new concepts. *Quest* (1990, rev. 1994), for solo guitar and five players, is one of the more substantial later additions to his output.

Although the works that established Crumb's reputation are relatively few, their refinement is exquisite and their breadth of reference intriguing. His openness to external stimuli – musical, poetic, sociological – has caused some critics to accuse him of emphasizing surface sensation at the expense of real substance. One may argue in his defence, however, that for him the medium is the message; the allusions, stylistic juxtapositions and whimsical quotations with which his music abounds are its very heart. These references result in a beguilingly evocative music, the haunting atmosphere of which has brought him many admirers.

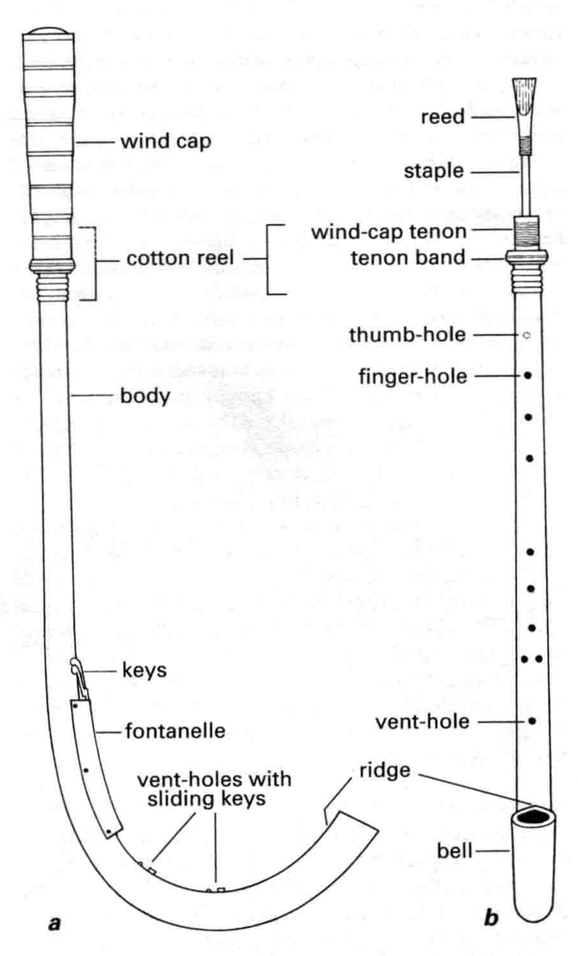
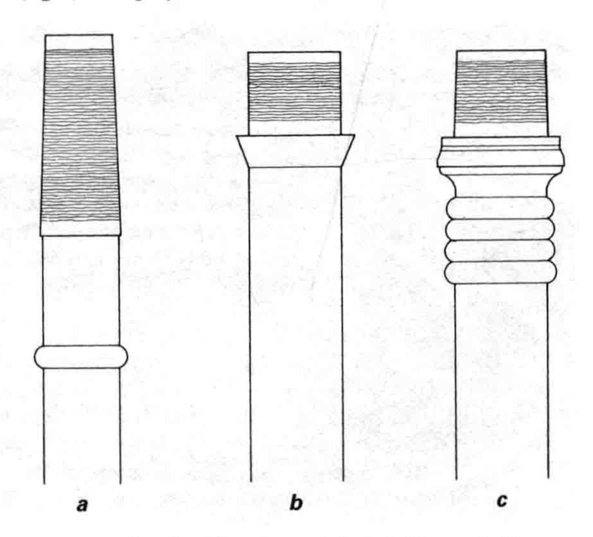
RICHARD STEINITZ



Crumhorn (from Ger. *Krummhorn*, *Krumbhorn*: 'curved horn', also *Krummpfeife*: 'curved pipe'; Fr. *tournebout*, ?*douçaine*; It. *storto*, *cornamuto torto*, *piva torta*). A double-reed wind-cap instrument with cylindrical bore and a curved lower end to the body (hence its name). The crumhorn was the most important wind-cap instrument during the 16th and early 17th centuries and is mainly associated with Germany, Italy and the Low Countries. (*See* WIND-CAP INSTRUMENTS.)

1. Construction and sizes. 2. Surviving instruments and typology. 3. Makers. 4. History. 5. Repertory and usage.

1. CONSTRUCTION AND SIZES. The crumhorn consists of three sections: the body, the cotton reel (or cap housing) and the wind cap; the reed is attached to a brass staple which is inserted into the top of the bore and enclosed by the cap (fig.1). The body, commonly of maple, was made of centre-grain wood to facilitate the drilling of the very narrow bore, and the bend was normally made by heating the wood after the bore had been drilled out. Although basically cylindrical, the bore normally expands slightly in the curved lower section of the instrument, the end of the bore being hollowed out to a flare; this, together with the upcurved end, has a small but significant effect on the tone of the instrument.



Owing to its narrow cylindrical bore and wind cap, the crumhorn does not overblow; its basic range is therefore restricted to a 9th unless increased downwards by keys, as on some larger sizes. Agricola (1529) referred to the technique of underblowing on bass crumhorns, by which the range could be extended downwards by a 5th. This additional lower range is called for in some music specifying crumhorns. There is no historical evidence of keys to increase the upper range.

The crumhorn has a thumb-hole, seven finger-holes and one or more vent-holes in the curved lower section. On smaller, keyless instruments the lowest finger-hole is doubled to allow for left- or right-handed playing, the hole which is not in use being filled with wax; on larger sizes a key with fish-tail touch is used. Some instruments have a second keyed hole, which increases the range by one extra note, and two vent-holes equipped with sliding keys that must be set before playing. On these 'extended' crumhorns the range is thus increased downwards by a 4th, though only one of the three possible additional lower notes can be chosen for use at any one time owing to the cumbersome, if ingenious, system of preset vent-hole keys. The keys on the larger sizes of crumhorns are protected by a fontanelle, usually of brass.

1. Crumhorns (type III): (a) side view of an extended size; (b) front view of a keyless size, with wind cap removed (not to scale)

The cotton reel, permanently fixed to the top end of the body, provides the tenon on to which the wind cap fits (fig.2). The player blows through a hole in the wind cap,

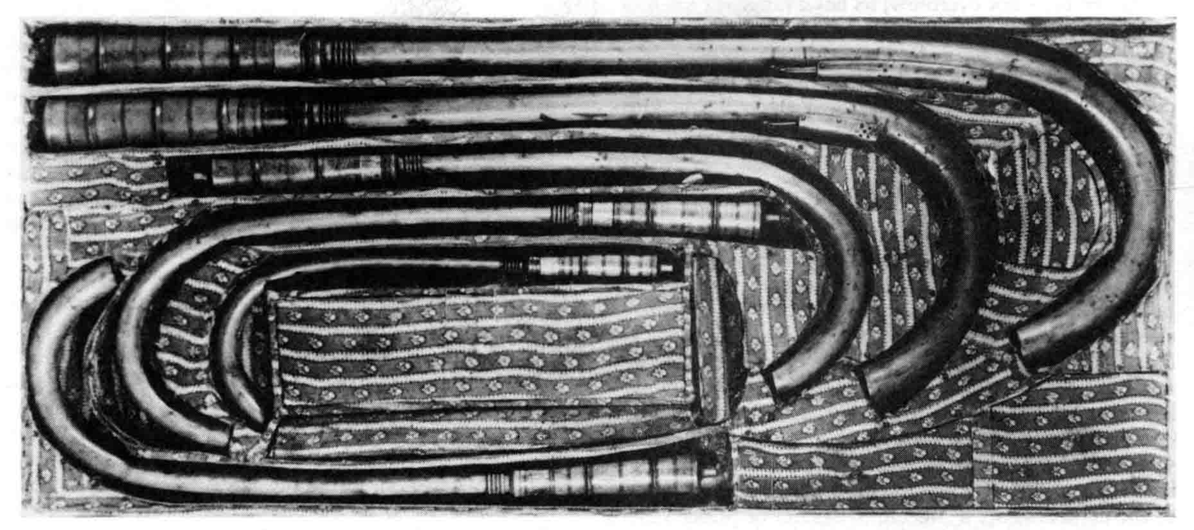
2. Cotton reels and wind-cap tenons: (a) type I; (b) type II; (c) type III

which is at the top on smaller sizes of crumhorn and at the edge or on the side on larger instruments. The bottom of the wind cap is normally reinforced with a brass ferrule.

Like most Renaissance wind instruments, crumhorns were made in different sizes: the soprano (Ger. *Exilent*, *klein Diskant*; It. *stortino*) had a range *c′–d″*; the alto (*Diskant*) g–d′; the tenor (*Alt, Tenor*) *c–d′*; the extended tenor (*Tenor*) *G* or *A–d′*; the bass (*Bassus*) *F–g*; the extended bass (*bass Chorist*, *bass Canter*), *C–g*; the great bass (*gross Bass*, *Contrabass*), *B♭′*–cor *C–d*; and the extended great bass, *G′–d*. With underblowing, the bass sizes could play up to a 5th lower. The most common sizes were alto, tenor and extended bass. An intarsia (*c*1510) by Giovanni da Verona in the Stanza della Segnatura in the Vatican shows that soprano, alto, tenor and (unextended) bass were known at that time. (This and other pictorial sources referred to here are reproduced in Boydell, 1982.) The earliest evidence of the extended type is an extended tenor crumhorn dated 1522, now in the Kunsthistorisches Museum, Vienna.

The earliest reference to a great bass crumhorn is a letter dated 1542 from Georg Neuschel to Duke Albrecht V of Prussia, and the only surviving great bass was made by Jörg Wier (ii), who died in about 1549. Praetorius (2/1619–20), who provided the most detailed contemporary description and illustration of crumhorns, mentioned all sizes except the extended tenor. He also illustrated an instrument that he termed ‘Basset: Nicolo’, effectively a straight crumhorn with keys giving a range equivalent to that of the great bass.

2. SURVIVING INSTRUMENTS AND TYPOLOGY. 56 Renaissance crumhorns, including all known sizes, are in the following collections: Augsburg (Städtische Kunstsammlungen); Berlin (Musikinstrumenten-Museum, Staatliches Institut für Musikforschung); Boston (Museum of Fine Arts); Brussels (Conservatory); Leipzig (Musikinstrumenten-Museum, University of Leipzig); Linz (Oberösterreichisches Landesarchiv); Nuremberg (Germanisches Nationalmuseum); Rome (Museo nazionale degli strumenti musicali); Salamanca (Cathedral); Verona (Accademia Filarmonica); and Vienna (Kunsthistorisches Museum). A further set of crumhorns is reported in Barcelona (Museo Municipal de Musica).



The surviving crumhorns have been classified by Boydell into five main types:

Type I, represented by crumhorns now in Verona, and others, is considered to be of Italian make and, on the basis of details of design and comparison with iconographical evidence, the earliest known type. It is characterized by a conical wind-cap tenon, whereas on all other types the tenon is cylindrical; the cotton reel is externally much simpler than on other types, and the wind cap is relatively heavy and undecorated, with straight sides. The keys and key cover, or fontanelle, are also distinctive, being of cast iron rather than brass, and the keys are pivoted differently from those on other types. Type I is subdivided into type I*a*, in which the curve was made in the normal way with heat, and type I*b*, in which triangular segments of wood were cut away from the edge which was to form the inside of the bend, the resulting piece glued into a curve and the whole instrument covered in leather. Type I*b* may represent the earliest known stage in crumhorn-making techniques.

Type II, a transitional form of which only one certain example survives (in Vienna), has a cylindrical wind-cap tenon, but the design of the cotton reel is simpler than that on type III. The surviving instrument was made by Jörg Wier (i) in Memmingen, south Germany, probably at the beginning of the 16th century.

Type III is the classic form of the crumhorn (see figs.1 and 2), represented by the majority of surviving instruments, including those made by Jörg Wier (ii) and the set of six, in their original case, probably made by the Bassano brothers (see §3 below) and now in Brussels (fig.3). The cotton reel has a broad tenon band and three or four raised bands of rounded section beneath. The body expands slightly in external diameter towards the bell, and the double-lever system of keys and the fontanelle, where present, are of brass. Type III may have been developed by the Wiers.

Type IV is represented by a set of crumhorns with the maker's mark HC or HG, now in Berlin but listed in inventories from St Wenzelskirche, Naumburg, during

3. Set of six crumhorns (type III) in their original case, probably made by members of the Bassano family (Musée des Instruments de Musique, Brussels)

4. Woman playing a crumhorn (type I): detail from 'The Presentation of Christ in the Temple' by Vittore Carpaccio, 1510 (Galleria dell'Accademia, Venice)

the 17th and early 18th centuries. Although similar in general characteristics to type III, they are distinguished by an uneven quality of design and workmanship, having unusually large finger-holes and a body diameter that does not increase towards the bell.

Type V differs radically from all other types: although it is similar to type III at the upper end, the bend is a separate piece from the body and was not bent with heat but carved from solid wood, the bore being drilled in sections afterwards. The curve is sharp and the section ends in a widely expanded bell. Only one type V crumhorn is known; it was first mentioned in the inventory of Archduke Ferdinand of the Tyrol at Innsbruck in 1596 and is now in Vienna. Three miniature ivory models of crumhorns of this type, but without wind caps (also in Vienna), have the same provenance and may have been modelled on this instrument.

3. MAKERS. Most original crumhorns carry a maker's mark, normally branded on the front of the instrument above the first finger-hole but sometimes also at the bottom of the bell. At least eight different makers can be distinguished, but the names of only two, possibly three, have been identified. Of these the more important are the makers of the WIER family, who were active in Memmingen: Jörg Wier (i), who died before 1530, Jörg Wier (ii) (*b c*1485–90; *d* ?1549), the leading crumhorn maker of the Renaissance, and possibly Jörg Wier (iii) (*fl* ?1557–65), who may have continued to make crumhorns after the death of Jörg (ii). 29 of the 56 known original crumhorns were made by the Wiers, the majority by Jörg (ii), to whom the development of extended crumhorns and of the great bass size may be attributable. Also documented are the 'Bassani brothers' of London (originally from Venice), referred to by Johann (Hans) Jakob Fugger of Munich in 1571 in a description of a large case containing various wind instruments, including 12 crumhorns. Lasocki (1985) has shown that the 'rabbit's feet' 'silkworm moth' mark on the boxed set of crumhorns in Brussels (and on numerous other woodwind instruments of the period) is probably that of the Bassanos. The crumhorns now in Berlin bear the mark HC (or perhaps HG), possibly to be identified with Hans Creutzer, who worked near Nuremberg in 1612 (Nickel, 1971). Kinsky's assumption (1925) that Georg Neuschel made crumhorns as well as brass instruments has been shown to be incorrect (Nickel).

4. HISTORY. The earliest evidence of the crumhorn is a painting by Lorenzo Costa dated 1488, in Bologna, depicting the triumph of Death. However, the term 'Krummhorn' (and cognates) was used in Germany from about 1300, apparently to describe a curved lip-reed instrument. From the mid-15th century it becomes increasingly possible that this ambiguous term may signify the true crumhorn: references to players of 'Krummpfeyffen' at the court of Albrecht Achilles of Ansbach (1440–86) are likely to refer to crumhorns. Although Sachs's suggestion (1909–10) that the medieval *douçaine* (*see* DOLZAINA) was a crumhorn is no longer accepted, Meyer (1983) argued that this name, which in Romance languages (Fr. *douçaine*; Sp. *dulçayna*) clearly referred to some sort of soft-toned wind instrument earlier in the Middle Ages, was applied to crumhorns when these were developed during the 15th century.

The crumhorn was probably developed in Germany, which remained the main area of its use. The characteristic curved shape may have evolved from bladder pipes and bagpipes with curved animal-horn bells, or it may be attributable to the growth of neo-classical ideas, which led to attempts to construct an instrument based on the TIBIA with animal-horn bell known from late classical sources. While the curve does help to project the sound, the technical difficulties involved in making it and the fact that it was not applied to other instruments suggest that this was not the sole reason for its existence. The origins of the use of the wind cap are also somewhat obscure, but can probably be traced to developments from bladder pipes and bagpipes (*see* BAGPIPE and BLADDER PIPE).

From the beginning of the 16th century evidence for the crumhorn becomes much clearer and more widespread. At the wedding of Duke Johann of Saxony to Sofia of Mecklenburg at Torgau in 1500, the Mass was accompanied by instruments including four crumhorns, and in Bremen in 1504 the town musicians played crumhorns and other instruments during a *Te Deum* on Ascension Day. The first known reference to a crumhorn in the Low Countries concerned a new stop on the organ of Antwerp Cathedral (1505); the stop was designed to sound 'like crumhorns or *douçaines*'. It has been stated that a crumhorn stop was included on an organ in Dresden in 1489, but this stop too dates from 1505.

During the early part of the 16th century the crumhorn spread rapidly through the German-speaking areas of Europe, the Low Countries and Italy. Crumhorns appear in a number of paintings of this period, including *The Presentation of Christ in the Temple* by Vittore Carpaccio in Venice (1510; fig.4), the altarpiece in Freiburg Cathe-

dral by Hans Baldung (1512–16), the *Memorial Picture for Lorenz Tucher* by Hans Süss von Kulmbach in Nuremberg (1513) and the *Coronation of the Virgin* by a Czech master (*c*1520), now in Prague. Other illustrations of crumhorns in the early part of the century include the intarsia in the Vatican already referred to, Virdung's *Musica getutscht* (1511), which depicts four crumhorns not very accurately drawn, and the engravings (1512–19) by Hans Burgkmair I for the *Triumphzug Maximilians* (1526), which show two crumhorns with shawms and sackbut. Crumhorn stops on organs also occurred widely. By 1522, the date on two of his known instruments, Jörg Wier (ii) was producing crumhorns of a fully developed design which remained virtually unchanged during the rest of the period of their use. Crumhorns are mentioned in treatises by Virdung (1511), Agricola (1529), Zacconi (1592), Cerone (1613), Praetorius (2/1619–20), Mersenne (1636, 1636–7) and Trichet (*c*1640; see Lesure, 1955). Well over 100 references to crumhorns from the late 15th century to the early 17th have been recorded, the majority relating to German court and town bands, whose inventories nearly always include one or more sets.

Although the Bassano brothers apparently made crumhorns in England, there is little evidence for their use there. Sets were owned by Henry VIII and the earls of Arundel at Nonsuch House, and Sir William Leighton mentioned them among many other instruments in a poem from *The Teares or Lamentations of a Sorrowful Soule* (1613), but they do not occur in inventories or other documents of English town waits, who would certainly have used them had they been generally known. When he wrote that crumhorns ('tournebouts') 'are made in England', Mersenne (1636) was probably referring to earlier crumhorns made by the Bassanos.

The position of the crumhorn in France is unclear because of the absence of any unambiguous name for the instrument before Mersenne (1636) first described and illustrated it under the name TOURNEBOUT (he used the term CROMORNE (i) exclusively as an organ stop). It seems improbable that an instrument that enjoyed widespread use in neighbouring countries during the 16th century should not also have been known in France, and it has been plausibly argued that crumhorns may have been referred to there as *douçaines* – in which case they can be shown to have been widely used. There is, however, no recorded iconographical evidence for the crumhorn in France during the 16th century.

Crumhorns were certainly used in Spain, although the evidence is again largely inconclusive owing to uncertainty about what the instrument was called. An inventory of the instruments brought by Mary of Hungary from Mechlin to Madrid in 1559 includes 11 'orlos de Alemania, hechos a manera de cornetas', which Vander Straeten (1888) suggested were crumhorns. While the Spanish 'orlo' cannot be assumed to refer specifically to the crumhorn, the identification in this case seems likely. The 1602 Madrid inventory lists two sets of 'cornamusas de madera de Alemania' as well as a 'dulçayna ... a manera de cayado' ('shaped like a crook'); both of these entries may refer to crumhorns. The most compelling evidence is a set of crumhorns in the old cathedral in Salamanca, which are thought to have been there since the Renaissance.

Crumhorns remained in use into the 17th century – one was depicted in a 'Vanitas' painting by the Dutchman Pieter Claesz in 1628 – but they rapidly lost ground during the middle of the century as musical taste changed and their limited compass and expressive range no longer met the requirements of composers. A carving on an ivory cabinet by Christoph Angermaier of Munich (*c*1620) shows a crumhorn played without the wind cap; this and other isolated pieces of evidence for the practice, beginning in the 16th century, may represent an attempt by players to make the crumhorn more expressive by exerting direct lip pressure on the reed. The crumhorn's decline in popularity is demonstrated by the set owned by the city of Nuremberg: bought from Memmingen in 1539, the instruments were listed in inventories during the later 16th and early 17th centuries and were repaired and presumably still in regular use in 1620, but in 1643 they were played at a 'historical concert', which featured various 'old-fashioned' instruments. Crumhorns continued to appear in isolated literary sources and inventories into the 18th century, though it is clear that they had fallen out of use: Diderot included the crumhorn ('tournebout') in his *Encyclopédie* (vol.xvi, 1765) in the context of *instrumens anciens*. A 'Stort' used at Breslau in 1668, sometimes considered to be one of the latest references to performance on a crumhorn, has been shown to have been a curtal. In the Netherlands 'kromhoorn' was used as a synonym for 'cornett' by Douwes (1699), and it is doubtless with that meaning that 'kromhoorens' are referred to in the text of a theatrical presentation that took place in Amsterdam in 1678.

5. REPERTORY AND USAGE. Like other Renaissance instruments, crumhorns can in principle play any music of the period that suits their limited range, although musical, social and geographical contexts may impose constraints. Transposition was widely practised by crumhorn players and is referred to by both Agricola and Praetorius (*Syntagma musicum*, iii), as well as being demonstrated in Thomas Stoltzer's setting of Psalm xxxvii. A small but significant amount of music survives in which the use of crumhorns in one or more parts is specified, or in which it is known from contemporary sources that crumhorns were played. In the dedication to Duke Albrecht of Prussia of his setting of Psalm xxxvii, *Erzürne dich nicht* (1526), Stoltzer said that he had crumhorns in mind ('hab an die Khrumphörner gedacht') when he wrote the piece. As written, the six parts (a seventh part, in the final section, is stated by Stoltzer to be unsuitable for the crumhorn) would require one soprano crumhorn, three altos in *f* (not the usual *g*), and two tenors in *B*♭ (not *c*), one with an extension to *F*. Since instruments with these compasses are not known to have existed, the music must have been transposed down a 4th to suit the normal sizes of alto in *g*, three tenors in *c*, and two basses in *F*, one making use of the technique of underblowing to extend its range diatonically down to *C*. Two sets of partbooks in Copenhagen (*DK-Kk*), dated 1541 and 1556 and originally prepared for the Prussian court band, contain some pieces in which crumhorns are specified; these include an anonymous setting of *D'Andernach auff dem Reine* in which the bass part is marked 'Krumbhörner' and the five parts suit alto, two tenor, bass and extended bass crumhorns. Schein included in his *Banchetto musicale* (1617) a *Padouana für 4 Krummhörner*, for alto, two tenors and bass. A 'Passamezzo' in Praetorius's *Terpsichore*(1612) is described as being playable on crumhorns or other instruments

('welcher auff Krumbhörnern oder andern Instrumenten gespielet wird'), but there is evidently some confusion here since some of the parts cannot be played on crumhorns.

Crumhorns are known to have been used in the music for the celebrations at the wedding of Cosimo I de' Medici to Eleonora of Toledo in Florence in 1539. They occur in three pieces (*Sacr'et santo Hymeneo*, *Guardane almo pastore* and *Bacco, Bacco, euoe*) from the *intermedii*, twice in mixed ensembles of many instruments with voices, and once in an ensemble of five crumhorns (including soprano) with one cornett and six voices. Brown (1973) pointed out that in this and other Florentine *intermedii* later in the century, for which the music has not survived, crumhorns were normally associated with strange or unusual groups, such as Calumny, Ignorance and Fear (1568), and Frauds and Deceptions (1565); in 1548 they participated in a celebration of the Age of Bronze.

These pieces of music for crumhorns, or connected with them, included sacred music, polyphonic settings of secular songs, homophonic dance music and theatrical music with voices, a wide range of uses that is reflected in the documentary and iconographical evidence. There emerges from these sources the important point that, when they were not playing on their own, crumhorns were most commonly associated with sackbuts: in Torgau in 1500 four crumhorns and an organ played with three sackbuts, a cornett and a second organ; in the *Triumphzug Maximilians* crumhorns are shown with two shawms and sackbut; some pieces in the Copenhagen partbooks specify crumhorns and sackbuts together; and in *Syntagma musicum* Praetorius discussed the use of a double choir of crumhorns and sackbuts. In mixed ensembles crumhorns often played the inner parts, especially the cantus firmi in pieces such as Tenorlieder. Clearly, crumhorns had a much stronger sound than is often thought.

The crumhorn was essentially an instrument played by professional musicians at courts and in the larger town bands. This was doubtless chiefly because crumhorns were relatively expensive to make and were supplied in sets of three or more sizes, requiring a group of musicians for normal use. Besides inventories and accounts of payments for the purchase or repair of crumhorns, there are other documents proving their use by town musicians, especially in Germany: the regulations governing the town players of Tallinn in 1532 refer to crumhorns in the context of dance music; the instructions for the watchmen of Trier in 1593–4 mention that 'recorders, crumhorns, cornetts or shawms' are to be played from the church tower in the morning, at noon and in the evening. In court records crumhorns occur not only in inventories and accounts but also in descriptions of weddings, banquets and other festivities. *See also* CORNAMUSA (i).

BARRA R. BOYDELL

Crusaders [Jazz Crusaders], **the.** American jazz and jazz-funk group. Having met at school, Wilton Felder (*b* Houston, 31 Aug 1940; tenor saxophone and bass guitar), Joe Sample (*b* Houston, 1 Feb 1939; keyboards) and Stix (Nesbert) Hooper (*b* Houston, 15 Aug 1939; drums) formed the Modern Jazz Sextet while at Texas Southern University with Wayne Henderson (*b* Houston, 24 Sept 1938; trombone) and two others. Moving to Los Angeles, they changed their name to the Jazz Crusaders and secured a contract with World Pacific Jazz Records, working firmly within the soul jazz idiom. In the early 1970s the group re-emerged, playing in a jazz-funk style, as the Crusaders, building songs around funk vamps, catchy melodies and terse solos. They added Larry Carlton (guitar) in 1974 and Pops Popwell (bass) in 1975 in the midst of enjoying a string of moderate hits in the rhythm and blues chart, including *Put it where you want it* (1972), *Don't let it get you down* (1973) and *Keep that same old feeling* (1976). Their biggest success came in 1979 with *Street Life* which featured the singer Randy Crawford and helped to launch her career. In addition to their own recordings, during their heyday the Crusaders played on albums by Steely Dan, Curtis Mayfield, Joni Mitchell, Ray Charles, Van Morrison and B.B. King, among others. While not especially influential during the 1970s, their

meticulous jazz-funk sound became more significant in the acid jazz movement of the 1990s in Britain.

DAVID BRACKETT

Crusdile, John. *See* CROSDILL, JOHN.

Crusell, Bernhard Henrik (*b* Uusikaupunki, Finland, 15 Oct 1775; *d* Stockholm, 28 July 1838). Swedish-Finnish clarinettist, composer and translator. The son of a poor bookbinder, he received his earliest musical education from a clarinettist of the Nyland regimental band. In 1788 he became a volunteer musician in the military band at Sveaborg, outside Helsinki, and in 1791 he was transferred to Stockholm. From 1793 to 1833 he was a clarinettist in the court orchestra. In 1798 he studied the clarinet with Franz Tausch in Berlin and gave concerts there and in Hamburg. In Sweden he became a distinguished soloist, performing concertos and chamber music by Peter Winter, L.A. Lebrun, L.-E. Jadin, Krommer, Beethoven, Mozart and others, as well as his own works. Reviews emphasize his tone and in particular his *pianissimo*. About 1800 Crusell played with the reed turned upwards, and later with the reed turned downwards, which favours cantabile playing. After *c*1810 he used an 11-keyed Grenser clarinet.

In Stockholm Crusell studied music theory and composition with Daniel Böritz and Abbe Vogler, intermittently active in Stockholm from 1786 to 1799. In 1803 he studied composition with Berton and Gossec during a six-month stay in Paris. As well as writing instrumental music for his own use, he also composed works for his wind-instrument colleagues in the court orchestra. In 1811 he made a trip to Leipzig to search for a publisher; this marked his first contact with the Bureau de Musique (A. Kühnel), taken over by C.F. Peters in 1814.

Crusell conducted the military bands in Linköping every summer from 1818 to 1837 and arranged marches and opera overtures by Weber, Spohr and Rossini for their use; he also composed pieces for male choir.

In the 1820s he composed solo songs, among others to texts from *Frithiof's Saga* by the well-known Swedish poet Esaias Tegnér. His opera *Lilla slavinnan*, first performed in 1824, was given 34 times over the next 14 years. Crusell was also a brilliant linguist who translated the foremost French, German and Italian operas for the Swedish stage. His début in 1821 with *Le nozze di Figaro* contributed to his election to the Geatish League, the leading literary circle in Sweden at this time. He was awarded the Swedish Academy's Gold Medal in 1837, and was inducted into the Wasa Order. His two manuscript autobiographies are in the Royal Library, Stockholm.

WORKS
(*selective*)

Stage: Lilla slavinnan [The Little Slave Girl] (op, R. Pixérécourt, trans. U. Mannerhjerta and G. Lagerbjelke), Stockholm, Royal, 18 Feb 1824, *S-St*; excerpts pubd (Stockholm, 1824)

Inst: 3 cl concs.: E♭, op.1, ?1808 (Leipzig, 1811), f, op.5, 1815 (Leipzig, 1818), B♭, op.11, ?1807 (Leipzig, 1828); Variations on *Goda gosse glaset töm* (O. Åhlström), cl, orch, op.12, 1804, rev. as *Introduction et air suédois* (Leipzig, 1830); Concertante, cl, bn, hn, orch, op.3, 1808 (Leipzig, 1816); Concertino, bn, orch, 1829; marches and other pieces for band

Chbr: 3 qts, cl, vn, va, vc: E♭, op.2, ?1807 (Leipzig, 1811), c, op.4, ?1804 (Leipzig, 1817), A, op.7, ?1821 (Leipzig, 1823), op.8 pubd (Leipzig, 1823) with fl instead of cl; 3 duos, 2 cl (Leipzig, 1821); Divertimento, ob, str, op.9 (Leipzig, 1823)

Vocal: Sångstycken (E. Tegnér and others), 3 vols. (Stockholm, 1822); Frithiofs saga, 10 songs (Tegnér) (Stockholm, 1826, enlarged 1827); other songs, cants. and settings for choir

FABIAN DAHLSTRÖM

Crusius, Johann. *See* KRUSS, JOHANN.

Cruvelli [Crüwell], **(Jeanne) Sophie (Charlotte)** (*b* Bielefeld, 12 March 1826; *d* Nice or Monaco, 6 Nov 1907). German soprano. A pupil of Francesco Lamperti, she made her début at La Fenice, Venice, in 1847 as Odabella (*Attila*). She repeated the same role in Udine, followed by Lucrezia (*I due Foscari*). Verdi's early operas suited her voice, which was large and powerful if not always under perfect control, and in 1848 she sang Elvira (*Ernani*) and Abigaille (*Nabucco*, given as *Nino*) at Her Majesty's Theatre in London, as well as Leonore (*Fidelio*) and Countess Almaviva. She appeared in Milan in 1849–50, singing roles including Odabella, Elvira, Abigaille, Rosina and Norma. She made her Paris début in 1851 as Elvira, and at the Théâtre Italien she also sang in *Norma*, *La sonnambula*, *Fidelio* and *Semiramide*. In 1854 she transferred to the Opéra (her performance is reported in *Dwight's Journal*, iv (1853–4), 150–51), appearing as Valentine (*Les Huguenots*), Julia (*La vestale*) and Rachel (*La Juive*). She then returned to London, where she sang in Rossini's *Otello*, in *Fidelio* and as Donna Anna at Covent Garden. She created Hélène in *Les vêpres siciliennes* at the Paris Opéra in 1855, and retired the following year after her marriage to Baron Vigier.

ELIZABETH FORBES

Cruz, Agostinho da (*b* Braga, *c*1590; *d* Lisbon, after 1640). Portuguese composer and theorist. He was an Augustinian canon at the priory of S Cruz, Coimbra, where he received his habit on 12 September 1609, and he was also *mestre di capela* at the monastery of S Vicente de Fora, Lisbon, the sister house of S Cruz. He was highly respected both as a practical musician and as a theorist. He compiled a volume of music for each of the instruments he played (the organ and the rebec) and dedicated them to King João IV and João Mascarenhaus, Count of Santa Cruz. In 1632 he wrote two treatises, one on plainchant and one on polyphony, both dedicated to the king. None of these was printed and the manuscripts are now lost. Two organ pieces by him survive in 17th-century manuscripts: the *Tento de 4° tom* included in Roque da Conceição's *Livro de obras de orgão* (ed. in PM, xi, 1967) is corrupt; the other has been edited in M.S. Kastner, *Silva ibérica de música para tecla de los siglos XVI, XVII y XVIII* (Mainz, 1954).

BERNADETTE NELSON

Cruz, Celia (*b* Santos Suarez, Havana, 21 Oct 1924). Cuban popular singer. She was a gifted child singer and, after winning a radio talent competition in 1947, enrolled in the Havana Conservatory. The first groups she performed with included Las Mulatas del Fuego and the Orchestra Gloria Matancera. In 1950 she joined the world-renowned Sonora Matancera, performing with them for nearly 15 years and establishing her international fame. She left Cuba after Castro rose to power in 1959, and settled in the USA, marrying the trumpet player Pedro Knight in 1962. Although she recorded with the percussionist Tito Puente between 1966 and 1972, Cruz settled into semi-retirement during the 1960s. Her career was revitalized in 1973 by her performance of 'Gracia Divina' in Larry Harlow's salsa opera *Hommy*. She spent the next several years performing with Johnny Pacheco and other members of the Fania entourage, and remained active in the late 1990s.

Cruz has recorded over 70 albums with the most important names in international salsa, including Johnny Pacheco, Tito Puente, Ray Barretto, Papo Lucca, Willie Colón, Oscar D'León and La India. She has become an indispensable member of the Fania All-Stars and La Combinación Perfecta. She also starred in the 1992 movie *The Mambo Kings*. Her rich voice and inimitable swing have earned two Grammy awards and four Grammy nominations. Among her many fans, Cruz is renowned for her renditions of *Quimbará*, *Bemba colora*, *Yerbero moderno*, *Usted abusó*, *Sopa en botella* and Cuban classics such as *Cao cao mani picao*. Among fellow musicians she is acclaimed for her musicianship and uncanny ability to perform new material without rehearsal. In the early 1990s Cruz received an honorary doctorate from Yale and was also awarded a star on Hollywood's Walk of Fame.

Celia Cruz

LISE WAXER

Cruz, Filipe da (*b* Lisbon, *c*1603; *d* ?Lisbon, *c*1663). Portuguese composer, active partly in Spain. He took the white habit of a friar of Santiago at the royal monastery of Palmela (near Lisbon) and was *mestre de música* in the Casa da Misericórdia at Lisbon. He then went to Madrid, where he became a naturalized Castilian and was on 1 June 1641 appointed a singer in the Spanish royal chapel. Despite a salary rise on 1 August 1642 and other favours, he composed a solmization mass in which he cryptically declared his allegiance to King João IV of Portugal. On 1 September 1655, pretending that he wished to compete for the post of *maestro de capilla* at Málaga, he fled to Córdoba where he wrote a self-incriminating letter to his sister at Madrid. By a decree dated 18 May 1656 João IV made him *mestre* of the Portuguese royal chapel, a post which he continued to occupy during the reign of Afonso VI. Although he was recognized in both Spain and Portugal as a composer of the highest gifts, only two secular songs by him now survive, in a manuscript (*E-Mn* 1262) copied in 1655 (1 ed. in MME, xxxii, 1970). *No cantéis, dulçe ruyseñor*, for three voices, one of the most emotional songs in the entire 1655 collection, aptly proves that in 17th-century Spain *mi–fa* could, on the composer's demand, be sung as a whole step and *sol–la* as a semitone. According to Barbosa Machado, Cruz also wrote before 1649 two masses, one, in ten parts, entitled *Que razón podeis vos tener para no me querer* and presumably parodying Juan Vásquez (see MME, iv, 1946, pp.67ff), the other *Sola reynas tu en mi*, the solmization syllables of which, as mentioned above, were intended for 'Joannes Quartus Rex mi'; various sets of polychoral vespers and compline services; and two motets, *Dimitte me*, for 12 voices, and *Vivo ego*, for five. Of his five villancicos listed in João IV's catalogue (1649), the one for Christmas is in Portuguese, the four for Corpus Christi in Spanish. Francisco Manuel de Melo credited him with the music of the 24th tono, *Sy apagar que eres Lucia*, in *La avena de Tersicore* (*Obras metricas*, ii, Lyons, 1665).

ROBERT STEVENSON

Cruz, Ivo (*b* Corumbá, Brazil, 19 May 1901; *d* Lisbon, 8 Sept 1985). Portuguese composer and conductor. He began his musical studies in Lisbon with Timoteo da Silveira (piano), Tomás de Lima and Tomás Borba (composition). In 1923, together with Eduardo Libório, he founded the periodical *Renascimento musical*, which

was concerned with research into old Portuguese music. After concluding his law studies at Lisbon University (1919–24) he went to Munich, where he studied for five years with Richard Mors (composition and conducting), with Reuss at the Trapp Conservatory and with Alfred Lorenz and von der Pfordten (aesthetics and music history) at the university. Back in Lisbon he founded the Sociedade Coral Duarte Lobo (1931) and the Lisbon PO (1937), with which he presented the major choral and orchestral repertory. He was appointed director of the Lisbon Conservatory in 1938, retaining the post until his retirement in 1971. He also founded the Pro Arte Society, a concert organization for promoting Portuguese musicians, and wrote music criticism for several newpapers. He played an important role as a conductor and in disseminating the early Portuguese repertory, which clearly influenced his music. His memoirs *O que fiz e o que não fiz* were published in the year of his death (Lisbon, 1985).

JOSÉ CARLOS PICOTO/ADRIANA LATINO

Cruz, Sor **Juana Inés de la.** *See* JUANA INÉS DE LA CRUZ.

Cruz, Ramón de la (*b* 1731; *fl* Madrid; *d* 1794). Spanish dramatist and librettist. He was a prolific writer of texts for all manner of *comedias*, zarzuelas, *tonadillas*, *sainetes* and an *ópera cómica*. Of a total of 542 works, 27 are texts to be set as zarzuelas and at least 50 are *sainetes*. Much adored by the theatre-going public and the acting companies, he was a leader in the mid-18th-century movement towards native Spanish genres and away from the strait-jacket of *opera seria*. His comments about the zarzuela as a freely defined genre, in the preface to *Nuevo drama cómico-harmónico intitulado: Quien complace a la deidad, acierta a sacrificar* (Madrid, 1757), indicate that he was already studying its renovation in the 1750s. Indeed, all the new *castizo* zarzuelas of the later 18th century were performed between 1757 and 1787. Together with the composer Antonio Rodríguez de Hita, he brought a new kind of serious music drama to the public theatres of Madrid in *Briseida* (July 1768), with classical heroes singing and speaking in Spanish. The genre of the *zarzuela heróica* was designed to win the Madrid public away from *opera seria* and *melodramma* after the Italian manner. The success of *Briseida* led to the production of the zarzuela *Las segadoras de Vallecas* the following September, also with music by Rodríguez de Hita but with a typical Spanish story and common rather than classical heroic characters.

As well as heroic zarzuelas, Cruz supplied numerous texts for *zarzuelas burlescas*, *tonadillas*, *sainetes* and *comedias*. These were set by virtually all the theatre composers of the later 18th century, such as José Castel, Pablo Esteve y Grimau, Ventura Galván, Fabián García Pacheco, Blas de Laserna, Luis Misón, Antonio Palomino, Rodríguez de Hita and Antonio Rosales. He also provided a strictly neo-classical text (in Spanish) for Luigi Boccherini's zarzuela *La Clementina* (1786), produced privately to a commission from the widowed Duchess-Countess of Benavente and Duchess of Osuna, an important patron of music and theatre. Prefaces and other explanatory and theoretical writings by Cruz are essential documents for the history of theatre music in 18th-century Spain and for the history of the zarzuela.

LOUISE K. STEIN

Cruz, Zulema de la. *See* LA CRUZ, ZULEMA DE.

Cruz Brocarte, Antonio de la. *See* BROCARTE, ANTONIO DE LA CRUZ.

Cruz de Castro, Carlos (*b* Madrid, 23 Dec 1941). Spanish composer. In 1958 he began his musical training with Concha Tomasetti at the Madrid Conservatory. He studied composition with Gerardo Gombau and Calés, and conducting with Enrique García Asensio. At the same time he started a course in law and social sciences at the Central University of Madrid, but later abandoned it to dedicate himself entirely to composition. In 1972 he went to Düsseldorf to finish his training at the Robert Schumann Institut Hochschule with Milko Kelemen, benefiting also from the guidance of Antonio Janigro and Günther Becker.

During the 1960s and 70s he took part in a variety of activities on the Spanish musical scene: he was a member of the Estudio Nueva Generación group of composers (1968) and co-directed the Hispanic-Mexican Festivals of Contemporary Music for which, from 1973, he organized concerts and conferences. His works have represented Spain at various international festivals, including the Paris Bienniale (1971), the ISCM (1972), the Premio Italia (1975), the UNESCO International Composers' Platform in Paris (1979) and the Paris World Festival (1975). He has played an important educational role as lecturer and speaker at various courses and conferences, both national and international. Since 1990 he has been director of production of Spanish National Radio's classical station.

As a composer, Cruz de Castro has addressed every musical genre, tackling experimental and graphic forms alongside formal patterns consecrated by the most solid of traditions. In the 1970s he began to develop a method of composing which he calls 'concretism', in which a single element provides the listener with a sense of unity.

In addition to instrumental genres, from chamber music, string quartets and large orchestral compositions, the vocal genres stand out. The most prominent works in this field are *Vocales* (1969), where the composer adopts an aleatory treatment of the voice, *Silabario de San Perrault* (1973), in which the text serves as a support for a kind of continuous canon, *Anuario* (1974), which can be interpreted simultaneously in several languages and various timbres, *Mixtitlan* (1975), where he explores natural languages starting from pre-Hispanic texts, and *Tarot de Valverde de la Vera* (1983), a confluence of elements drawn from his previous experience in vocal treatment together with a broadening of the spectrum of possibilities.

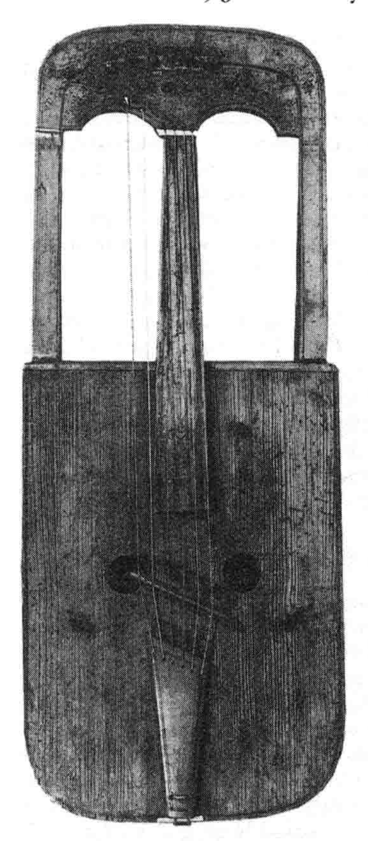
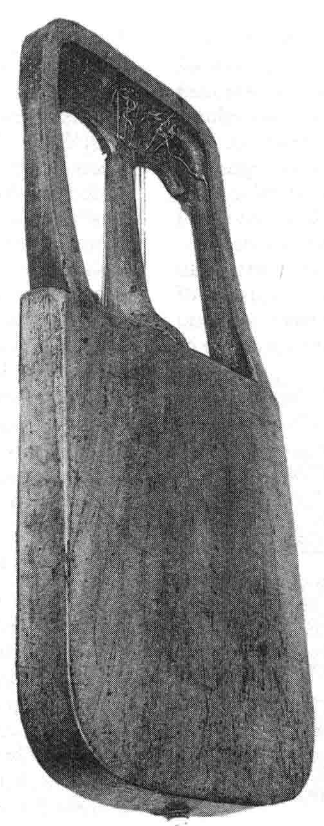
MARTA CURESES



Crwth [chorus, crot, crowd]. A Welsh term for a plucked and, from about the 11th century, a bowed lyre. The name is cognate with the Irish *crot*, *cruit*, which originally denoted a plucked lyre but was ultimately used for a harp. The Middle English *crouthe*, *crowd(e)* is a late 12th-century borrowing of the Welsh *crwth*. For related north European lyres *see* ROTTE (ii), STRÅKHARPA, and SCOTLAND, §II, 8.

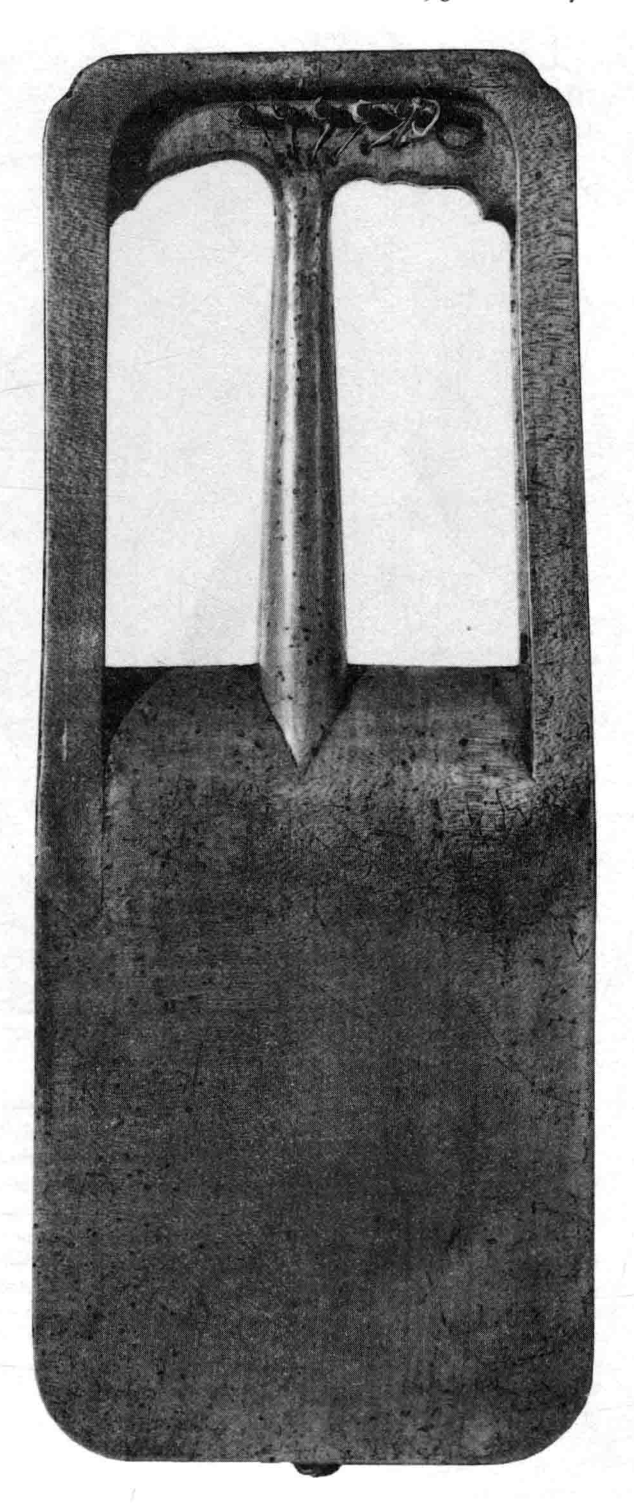


Three 18th-century six-string Welsh crwths have survived: the Foelas crwth (fig.1), made in 1742 by Richard Evans (*fl* 1736–56); one held at the Warrington Museum and Art Gallery; and a third at the National Library of Wales, Aberystwyth (fig.2). A small number of modern makers now make exact copies of crwths, and playing techniques are being rediscovered through experimentation and in the light of the evidence of 16th-century treatises.

1. History and structure. 2. Technical and theoretical considerations.

1. HISTORY AND STRUCTURE. Although the three 18th-century instruments vary slightly in proportion and design they share the same basic structure: the body, including the neck, is carved from a single block of sycamore in the age-old manner and the sound-board is made of pine. To lighten the upper part of the instrument the insides of the arms were hollowed out, echoing Medieval lyre construction. The string holder at the back of the yoke was also hollowed out. The forward sloping arms are found in numerous depictions of classical lyres, and on the crwth have the effect of keeping the strings parallel to the sound-board. The Foelas and Warrington crwths share some refinements not seen on the Aberstwyth instrument, which is slightly smaller in size. A narrow baulk of sycamore, part of the body of the instrument, is visible from the front and flush with the surface of the sound-board. The sound-box is wider than the frame (see fig.1), which would not afford the extra support mentioned below (§2) were it widened to continue flush with the sound-box. Both instruments have mock purfling along the front outline. None of the crwths has a brass bar and the blocks in the Foelas crwth are probably modern.

The Warrington crwth has more slender arms than the other two. This carefully crafted crwth with its decoratively shaped yoke and, unlike the other two, a separate nut placed on the yoke to protect the lateral drones, has neither a saddle nor sign of wear from tailgut. Unfortunately the tailpiece, the fingerboard and nut, and the bridge are missing; in fact the other crwths are exhibited with modern curved bridges. The heads of the tuning-pins on the Foelas crwth are filed with decorative crosses and some features - such as the neck button and fingerboard - were influenced by violin construction that perhaps reflects Richard Evans' experience as a violin maker. Valuable information regarding the crwth in 16th-century Wales is provided by a panel of a 16th century bedhead at Cotehele House, Cornwall, showing a Welsh crythor and harper, and by references in Welsh poetry, especially the strict-metre request poems in which an object was described by means of numerous comparisons. Lack of pre-16th-century information in Welsh sources makes it impossible to confirm whether the crwth had always been six stringed or had at least become so by the time the apparently six-string crwth was carved on a misericord at



1. Crwth by Richard Evans, 1742, from the Foelas Estate in north Wales (Museum of Welsh Life, Cardiff)

Worcester Cathedral in about 1397. Unlike the harp and the medieval fiddle, the crwth did not develop beyond its late medieval form.

The crwth was a rare instrument in medieval England, apparently already obsolete by the 16th century, although it retained its high status in Wales until the end of the century. Even its popularity in 14th-century England may have been due to its favoured status at the courts of Edward I and II: over half the crwth players (*croutheres* or *crouderes*) mentioned in the expense accounts were from Wales and the Welsh Marches. Significantly, three depictions of the instrument played by or associated with minstrels date from this period: Book of Hours from York *c*1300 formerly in the possession of C.W. Dyson Perrins (MS 12.f.76), the seal of Roger Wade, 1316 (*GB-Lbl* seal no.lxxxvii.44), and a treatise on Kingship by Walter de Milemete (*GB-Och* 92.f.43). With the exception of the original 15th-century carving of a crwth (incorrectly restored after storm damage in 1894) at St Mary's Church, Shrewsbury, which has a figure-of-eight form (see Galpin, 1910), these and other depictions resemble in shape, if not in detail, the later Welsh crwth, having a straight-sided form with one or both ends rounded.

The paucity of pre-16th-century iconographic sources for bowed crwths necessitates a particularly cautious approach in evaluating the evidence of the number of strings and lateral drones in view of the difficulty of accurate depiction, especially on carvings (for a discussion of these problems, *see* FIDDLE). The problem is compounded by ambiguities in terminology in regard to the medieval crwth (*see* ROTTE, (ii), CHORUS, (iii)). Exactly when the bow began to be used on north European lyres is not known. Bachmann hypothesized that the spade-like fiddle common in southern Europe in the Romanesque period evolved from the lyre, which in that region had developed a neck in the 8th–9th century. Whether north European lyres already had a neck before the bow was adopted is open to speculation. Three-, four- and five-string waisted oval lyres played with bows are depicted in 11th- and 12th-century continental sources, some having necks, but not always with centrally set strings.

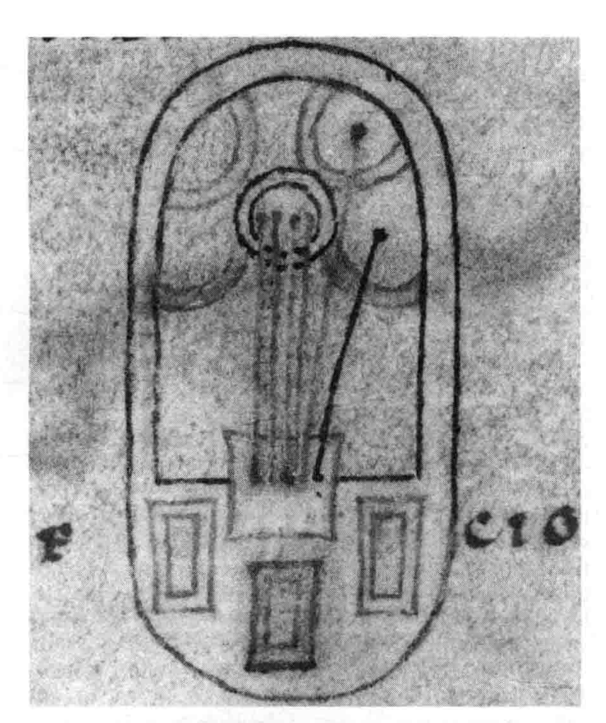
The lyres depicted in the Winchcombe Psalter (*c*1030–50, *GB-Cu* Ff.1.23, f.4*v*) and in an early 12th-century Durham manuscript (*GB-DRc* Hunter 100, f.62*v*) raise difficult questions of interpretation. The Winchcombe Psalter shows a plucked three-string lyre as well as a bowed four-string lyre held at the shoulder; in both cases the strings would appear to be stopped over the end of the instrument rather than through an opening, although it may be that the instrument is merely being held, rather than fingered (fig.3). However, the four centrally set strings of the bowed instrument would imply the presence of a neck. It may be that the artist wished to show his knowledge of a new feature, i.e. the bow, which is quite carefully drawn. Although a bow is not included with the Durham lyre, it has four centrally set strings, which would suggest a neck, and a further two set at an oblique angle (fig.4). This six-string lyre tantalizingly resembles the 18th-century crwth of fig.1 in so far as it would appear to have a similar string formation, albeit here depicted in mirror image. However, in view of the fact that this instrument clearly illustrates the word 'lira' in a treatise on the constellations, it may be that the artist had seen a four-string bowed lyre, but thinking that a lyre

2. Crwth, 18th century (National Library of Wales, Aberystwyth); rear view, showing 'rat-tail' where the neck joins the box

ought to have six strings (*see* ROTTE, (ii)), added two more, thereby conforming to Pythagorean symbolism. A carved stone figure of *c*1200 (now much weathered) at St Finian's Church, Waterville, Co. Kerry, plays a rectangular apparently six-string bowed lyre.

As with the medieval fiddle, the few pre-16th-century depictions of the crwth have variant features regarding the bow, the methods of attaching the strings at the lower end, the presence of a bridge and fingerboard, and the number of strings. In the stained glass windows (1447) at the Beauchamp Chapel, St Mary's Church, Warwick, two five-string crwth players are seen facing a pair of harpers and therefore at a slight angle, enabling us to see that the neck is thin. Here, as in the 15th-century carving shown

3. Four-string bowed lyre, with a three-string plucked lyre and harp: drawing from the Winchcombe Psalter, c1030–50 (GB-Cu Ff.1.23. f.4v)



in fig.5, the crwth players' fingers press directly on to the neck. The absence of a fingerboard meant that a separate bridge was unnecessary and that a frontal string-holder or (as seen in fig.5) a tailpiece resting directly on a bridge or possibly tilted upwards with a wedge, would be sufficient. As shown by 18th-century evidence (see Barrington, also fig.1), the two most reliable crwth depictions, the seal of Roger Wade (1316) and the Welsh carving on a 16th-century bedhead now at Cotehele House, Cornwall, clearly show a flat bridge, which usually implies flat fingerboard – features that are difficult to depict in relief. The 18th-century bridge was placed obliquely with one foot extending through a right soundhole and standing on the back, thus acting as a soundpost. While the bridge foot enters the opposite circular soundhole on the Cotehele crwth, this feature is not obviously visible on the seal of Roger Wade. Some south-east European folk fiddles today have a combined bridge and soundpost (*see* BRIDGE, (i)).

That the crwth of the official 16th-century Welsh *crythor* was a six-string instrument is confirmed by the request poems and the surviving 18th-century crwths. An anonymous poem addressed to Robert Rheinalt, a master crwth player, who appears in the court records of Henry VIII as a 'Welsh minstrel', requesting a crwth on behalf of Edward Grythor of Yale, gives a description of the string arrangement which corresponds with the 18th-century evidence of a six-string crwth tuned in three pairs of octaves:

> Ei ffrismal a ddfalwn
> A thri sydd I wneuthur sŵn:
> Crasdant, cywirdant fal cynt
> A'u bwrdwnau'n ber 'dantynt;
> . . .
> Lle i'r fawd yw'r llorf a'i was;

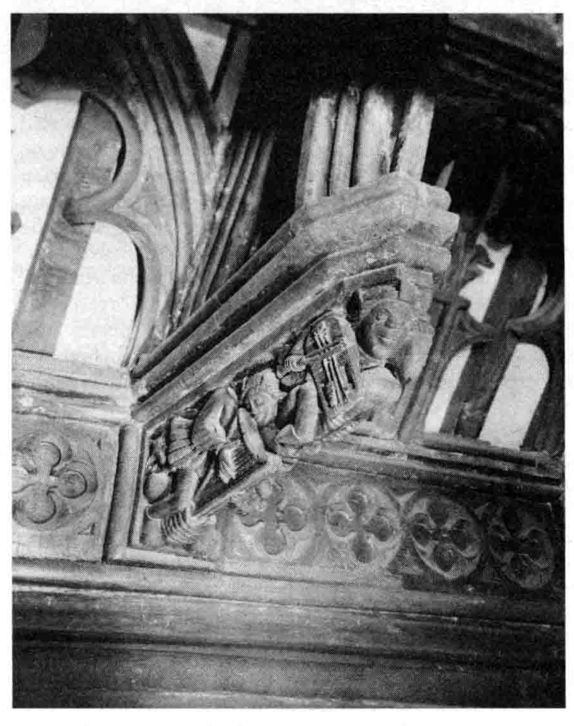
(We shall describe its principal [strings], and there are three which produce sound: the upper and middle as before, and their bourdons sweetly sounding below . . . the lower string and its servant are the thumb's realm)

Although the poem does not mention the specific tuning of G C D, by examining the *cerdd dant* (string craft) treatises alongside the Robert ap Huw manuscript one can see that *cywirdant/cyweirdant* would correspond with C, *crasdant* (D) and *llorfdant* (G) (see §2 below). However, apart from the six-string Worcester misericord crwth (*c*1397) and the above-mentioned Durham manuscript,

4. Oval lyre with six strings: drawing from an English MS, 12th century (GB-DRc Hunter 100. f.62v)

other medieval and Renaissance depictions would appear to have three, four or five strings. Because of its Welsh connections, the Cotehele crwth might have been expected to have six rather than five strings. While the craftsman perhaps had difficulty in carving six strings in relief in the space available, one must seriously consider that at least one of the Beauchamp Chapel crwths has its five strings arranged in one single and two double courses, all of which appear to run above the neck. What the small number of crwth depictions reveals, however, is that over half, including the Roger Wade seal, are four-string crwths.

The use of 'crwth' as a generic term for bowed instruments from the late 16th century onwards can cause difficulties in interpretation. As in English, the Welsh poets sometimes used 'fiddle' or 'fiddler' as terms of abuse, as in a light satirical poem in which 'crwth' and 'ffidl' are used interchangeably. A reference to a 'fiddler a chrwth trithant' ('a fiddler who plays a three-string crwth') (*GB-AB* Peniarth 77.p.175) being one of four types of inferior entertainer should not necessarily be taken as direct evidence of a three-string crwth. Moreover a sketch of a three-string crwth and bow, coupled with harp and two bagpipes, used to illustrate a list of the various 'ancient' grades of bardic craft in an early 17th-century manuscript (*GB-CDp* 2.634, f.358) was perhaps inspired by humanist ideas. It may reflect a 16th-century Welsh version of the legend concerning the origin of the lyre in which Mercury is credited with the discovery of the crwth with three horsehair strings and a bow. However one cannot dismiss the possibility of a three-string crwth being used in Wales concurrently or maybe before the development of a crwth tuned in three pairs of strings. This may be what the poet implies by 'fal cynt' ('as before') in the above quoted poem; the six-string crwth would call for a more advanced technique (see §2 below). The three-string crwth of a 1498 carving at Milton Abbas, Dorset (fig.5) seems to have a lateral drone touched by the thumb.



With the possible exception of the Dorset carving (fig.5), lateral drones are not obviously depicted in any of the sources. On the Roger Wade seal the lower pre 18th-century string seems to be thicker and set slightly apart from the other three; on the Cotehele crwth the fourth string runs at a more oblique angle. On the Worcester crwth, which is held in the same downward-pointing position as the Beauchamp Chapel crwths, the thumb seems to be pressing down on the lower two strings. Conversely it may be that these particular crwths are merely being held, not played. The poem addressed to Robert Rheinallt also refers to 'seven tuning-pins, one of which is unused/spare': 'Llwyn tew o ebillion teg; Os aeth enw, saith o honym', Eisiau gradd, segyr yw un'. This tallies with another poem requesting seven pins: long, straight metal tuning-pins which fitted tightly were obviously much valued.

Although there is no surviving iconographical evidence of the crwth in Wales from before the 16th century, there is a considerable body of literary and documentary evidence which attests to the important role the crwth played in Welsh society as a high-art instrument. The earliest reference to 'crwth' or 'crythor' is found in a pre-1100 poem:

> Wyf bard ac wyf telynawr
> Wyf pibyd ac wyf crythawr

(I am a bard, a harper, a piper and a crwth player).

The same three instruments are referred to in *Brut y Tywysogion* ('The Chronicles of the Prince') at a special feast held at the court of Lord Rhys in 1176 and also by GIRALDUS CAMBRENSIS. These references to a trinity of musical instruments, echoed in the early 17th-century

5. Minstrels playing a harp and three-string crwth: wooden carving on a hammerbeam, 1498 (Abbot's Hall, Milton Abbey, Dorset)

manuscript mentioned above, might be interpreted as a mere formulaic literary device. If one could prove the hypothesis of a formulaic triad of plucked, bowed and blown instruments, this poem would take the earliest evidence of a bowed crwth in Wales back to the 11th century. Nevertheless, the references show that the crwth was well established at an early date, although its stringing is unknown.

The crwth and harp were the only two instruments used in Welsh bardic performance throughout the later Middle Ages, although the greater number of elegies and request poems involving harp/harper reflect its higher status. The 16th-century *Statud Gruffud ap Cyanan* ('The Statute of Gruffudd ap Cynan') (*GB-Lbl* Add.19711, second quarter of the 16th century), written mainly to emphasize the superiority of the guild of poets and musicians at a time when the authorities were legislating against unlicensed entertainers, contains valuable information regarding the requirements of the various grades of bardic craft. Harpers and crwth players largely shared the same repertory. However, it may be significant that, in one of the 16th-century manuscripts listing titles of musical repertory (*GB-AB* 1711b.f.62r, 66v), separate named musical pieces are given for the *cadair* and the *colofn*, two of the most technically advanced genres. Some later 16th-century versions of the *Statud* state that the *datgeiniad* ('declaimer')

Towards the end of the 16th century the professional poets' stubborn reluctance to forgo the old strict metres in the face of competition from free verse based on the metres of popular English airs meant that they eventually lost the patronage of the increasingly anglicized Welsh nobility, who embraced the type of musical entertainment and instruments fashionable at the Elizabethan court. There is no doubt that many of the professional musicians, in order to retain their status, adapted themselves to playing the currently popular plucked and bowed instruments. While the crwth continued to be played by a lower stratum of musicians patronized by a correspondingly lower social stratum, the inability of the crwth to evolve and compete with the increasingly popular violin caused its eventual demise towards the end of the 18th century, by which time it had become an object of antiquarian curiosity. Daines Barrington's sketch of John Morgan, one of the last crwth players in north Wales with the caption 'Method of holding and playing on the instrument' (*c*1770; Society of Antiquaries, London), showing the method of supporting the crwth with a strap, corresponds precisely with evidence from 16th-century poetry and iconography and possibly with the minstrel depicted in a Book of Hours from York of about 1300 (formerly in the possession of C.W. Dyson Perrins).

Barrington in 1770 recorded the crwth's tuning as *g–g′–c″–c′–d′–d″*, but when Bingley gave the tuning as *a–a′–e′–e″–b′–b″* over 30 years later, the player he heard had obviously adopted the fiddle tuning in 5ths. By exchanging the flat fingerboard and bridge for curved ones, as clearly happened with the Aberystwyth crwth, it effectively became a 'violon en forme de crouthe'.

2. Technical and theoretical considerations. Experiments using a six-string Welsh crwth played slung from the neck reveal many of its anomalous features to be highly practical. The arched shapes cut from the yoke on either side of the fingerboard allow space for the fingers to reach the semitone next to the nut (half position in modern terms), and for the thumb to pluck the lateral strings. The oblique angle of the bridge to the nut aligns with the angle made by the fingertips against the fingerboard, making it possible to play in tune using the basic technique of the crwth: stopping each octave pair of strings with one finger. The stopped strings, though tuned in octave pairs (*c″–c′–d′–d″*), are not grouped into courses but evenly distributed across the width of the fingerboard, giving space for each string to be stopped separately if required, thereby splitting the pairs to make richer chords or allowing one of the pair to complete a harmony while figuration is played on another.

The two strings (*g–g′*) lying off the fingerboard are on a slightly different plane from the stopped strings, which takes them out of the bow's reach except when playing close to the bridge, which is flat (the curved bridge shown on the Foelas crwth in fig.1 is not original). This allows three combinations: sounding all six strings at once with the bow close to the bridge; bowing the four stopped strings and leaving the remaining two silent; or bowing the stopped strings while plucking the two G strings with the thumb. The last feat is made easier by opening the left hand to bear against the surrounding frame, thus giving an extra point of contact and stability.

Until the end of the 16th century the crwth's special status alongside the harp meant that a prestigious, formal repertory analogous to that of the harp (*see* Harp, §V, 1(i); and Robert ap Huw) was also played on the crwth. The harp tablature in the Robert ap Huw manuscript (*GB-Lbl* Add.14905) contains pieces composed on the 24 measures of string music (*pedwar mesur ar hugain cerdd dant*). These are successions of two contrasting sets of notes – principal and weak – which predominate alternately, forming binary patterns represented by the figures 'I' and 'O', e.g. *corffiniwr* IIOO IOII. By convention, crwth players represented the measures differently, reversing the figures. *Corffiniwr* thus became OOII OIOO, distinguishing between different branches of the craft guild and reflecting the fact that a crwth player is able to play the notes *c′–a′* (Guido of Arezzo's 'natural Hexachord') in the first position but is unable to complete the scale downwards to *g*, as is a harper. A harper, therefore, is able to use the most principal of Guido's hexachords, which climbs from T and provides the first triad of the gamut: T, B, D; occupying the lowest three lines of the 'great stave' ('I'). The first complete hexachord available to a crwth player climbs from C, it is less principal, and gives the triad: C, E, G; occupying the second, third and fourth spaces from the bottom of the 'great stave' ('O'). In this context the lines are equated with 'I' and the spaces with 'O' (Peniarth 155) rather than corresponding to fixed or movable pitches respectively as outlined below.

A crwth player interprets the harp music in the Robert ap Huw manuscript by identifying the predominating set of notes (i.e. the principal set or those marked 'I' in harp terms) by playing the open C strings while playing figuration on the D strings. When the weak set (those marked 'O') predominate, the arrangement is reversed. The plucked G strings generally form a bass common to both sets.

The open strings of the crwth correspond to the *cyweirdannau* (principal or fixed strings) of the harp. The notes *e′*, *f′*, *a′* and *b′* and their octaves, produced by stopping the crwth's strings, are the *lleddfdannau* (weak

or movable strings) of the harp. The crwth's tuning is well suited to realizing the binary patterns found in the Robert ap Huw manuscript, and fulfils the Pythagorean ratio 12:9:8:6, as do the fixed strings of the harp, recalling the *hestotes* (fixed elements forming a 4th, a 5th and an octave) and *kinumenoi* (movable elements: the interior notes of a tetrachord) of ancient Greek music. Tuning in octave pairs enriches the sound and is a built-in arrangement for converting 4ths into 5ths (5ths were considered more perfect consonances than 4ths during the Middle Ages). This tuning also produces 'octave ambiguity' and most closely resembles the third of the three tunings for the viella given by Hieronymus de Moravia (see Page).

The most important treatise dealing with bardic music for harp and crwth, *Llyfr Cadwedigaeth a Dosbarth Cerdd Dannau* (see Peniarth MS 155, also Miles), contains directions to the crwth player for creating the five standard and warranted *cyweiriau* (harp tunings; *see* ROBERT AP HUW) by stopping the strings. This source and others give directions for tuning the harp in the five standard and warranted tunings in terms of the Pythagorean tradition and the Guidonian system. Robert ap Huw gives tuning-charts for two of them (*cras gywair* and *lleddf gywair y gwyddil*; see Lewis, 108–9). By applying the index and middle fingers appropriately to the crwth's fingerboard, the positions of the semitone (*mi–fa*) are identified within the C–F tetrachord. F (*fa*) is omitted in the two pentatonic tunings (see Lewis, 7).

In later medieval Wales, the most splendid production and performance of bardic poetry and music involved four professionals: a poet, a harpist and or a crwth player, and a *datgeiniad* (declaimer). Two or three of these roles were sometimes played by one person, especially near the end of the 16th century, when patronage for bardic poetry and music became meagre.

During the 17th century crwth players had to play the new, pan-European, bourgeois music demanded by all classes. They played jigs and other dance tunes, and accompanied popular songs, ballads and post-Reformation carols. Remnants of bardic repertory survived briefly outside their social context. When it died out at the end of the 18th century the crwth still embodied the musical theories of ancient Greece and medieval Christianity and of Welsh bardic music in its lyre construction and characteristic tuning. Modern players using accurate copies of crwths and using bridges which are, in Barrington's words, 'perfectly flat, so all the strings are necessarily struck at the same time, and afford a perpetual succession of chords', have begun exploring the bardic repertory, accompanying traditional Welsh and English popular songs and ballads and playing historical dance music.

Cryptography, musical. Cryptography ('secret writing') includes any method of masking a message. Sometimes the act of communication is itself concealed, for example by the use of invisible ink. More commonly, an overt message is disguised by code or cipher. In code an arbitrary assemblage of letters or numbers is assigned some specific meaning, or an ordinary word or phrase may be allotted some quite different significance. In cipher, the letters of a message are systematically transformed, either by changing their order or by replacing them with other letters or symbols. Both code and cipher principles can facilitate communications as well as conceal them, as for example in the Morse code (strictly a cipher) and in the invention of artificial languages. All these procedures are akin to some aspects of music. Thus 'key' is a basic common concept, while pitch and rhythm have evident semantic application. Indeed, music has often been conceived and described as a communication intelligible only to the initiated, which is precisely what language-structures in general and cryptograms in particular are designed to be.

Many cryptologists have been notable musicians. Among composers, Tartini, Michael Haydn, Schumann and Elgar are known to have been interested in cryptography. There is some evidence (e.g. Kahn, 1967, p.563) that the two abilities are positively correlated. The connection was also recognized and used in World War II by the British crypto-analytic service, candidates for which were asked among other things whether they could read an orchestral score. It is not surprising, then, that musical symbols or ideas should have been used in cryptography and allied disciplines from the earliest times, nor that quasi-cryptographic ideas should have been freely used in music. This article considers those separate areas in turn, dealing with each in chronological order, and then in conclusion discusses their occasional overlap.

1. CRYPTOGRAPHY USING MUSICAL IDEAS AND SYMBOLS.

The most obvious method, the assignment of letters to individual notes of music, seems to have been the earliest and has certainly remained the commonest. The late 15th-century manuscript *Rules for Carrying on a Secret Correspondence by Cipher* (*GB-Lbl* Sloane 351, f.15*b*) describes a musical cipher. Symbols for 24 letters and the word 'et' are formed by using five different pitches on a three-line staff and altering the stem directions and note values. The five vowels are represented as in ex.1. As an

Ex.1

illustration, the scribe has spelt out in his music-cipher the words 'In nomine summe et individue trinitatis hoc opus incipio'. The earliest documented system thereafter

seems to be the analogous cipher used about 1560 by Philip II of Spain. This begins as in ex.2 and continues

similarly with different note values. By the end of the 16th century some very complex systems were in practical use. Thus the papal cryptographic service about 1596 used a music-cipher of nine different pitches each variable in eight ways, yielding a possible 72 symbols. Such proliferation is over-elaborate, and the simpler 11 × 2 system published by Giovanni Porta (*c*1600, in later editions of his seminal work on cryptography) found more general favour (ex.3).

Many other possible uses of musical symbols were exploited by cryptographers. In 1596 Porta described a method of communication whereby a beleaguered city could send messages by ringing bells in a prearranged permutation, for example one bell once = A, twice = B, thrice = C; a second bell once = D; and so on. By 1650 Athanasius Kircher had transferred this idea to the orchestra, by allotting up to four successive notes among six instruments; thus one note from the first instrument would mean the letter A, two notes B, and so on. In 1685 Friderici proposed a number of novel and ingenious music-ciphers (such as ex.4). Nor were the visual aspects

re	F	G	H	I	K

of music neglected; thus a 17th-century manuscript (*Lbl* Add.45850M) when folded spells out a message, supposedly to Charles II, with the stems and tails of notes.

In general the cryptographic textbooks and sourcebooks continued to describe some form of Porta's basic table (ex.3), which recurs in readily recognizable adaptations throughout the 16th and 17th centuries (Davies, 1967). Between 1620 and 1685 it appeared in five major works published in England, Germany and Italy (Schwenter, Godwin, Kircher, Schott, Friderici). Telemann may well have been referring to it when he wrote in the oratorio *Der Tag des Gerichts* of having been offered instruction in a secret method of 'discovering by means of music the dealings of ambassadors and generals, and conveying orders to them'.

The Porta system evolved with music history. A specimen in the Foreign Office archives from about 1750 uses crotchets and quavers with treble and bass clefs (Schooling, 1896). Another, suggested by Philip Thicknesse in 1772, uses crotchets and minims with treble clef and key signature for extra authenticity. In the late 18th and early 19th centuries the system appears in textbooks by Guyot in France, Hooper in England and Klüber in Germany, in the form of a cipher-wheel on which the notes and corresponding letters are written round in two circles, one fixed and one movable. This device, of vital importance in the history of general cryptography (cf Kahn, 1967, pp.128–9) permits frequent resetting, thus baffling the hostile analyst. In these sources also the cipher further evolves, in the same interest, towards the random allocation of cipher letters to musical notes, the occasional representation of one letter by a two-note group, and in general a policy of analogy with real music, at least in appearance (for which purpose Klüber recommended the addition of sharps and flats). This had always seemed desirable for cryptographic reasons. Thus the papal encipherers had added to their music-cipher messages an ostensibly relevant liturgical text, so as to avert suspicion. In the later 18th and early 19th centuries the possibility of combining real cipher with real music was the subject of lively experiment and debate ('Cipher', *Rees's Cyclopaedia*, 1819–20). A notable contribution was made by Michael Haydn who (according to his biographers, 1808) invented an elaborate music-cipher of his own (ex.5) presumably for communication purposes but perhaps for composition as well. At least it strikingly foreshadows cipher systems later used as compositional devices (see ex.10 below); and it may even have been designed (e.g. in its treatment of modified vowels) to yield results which were not too unlike real music. But it remained a private initiative. The only documented contemporary use of music-cipher in practice, in the French diplomatic service (correspondence between the Duke of Havre and the Duke of Lorges, *GB-Lbl* Add.32259, f.180*v*), relies on a Porta-type system which is neither convincing musically nor secure cryptographically. This use continued as late as 1800. Nor was the type entirely extinct in the 20th century; the first solved intercept of the New York City Police Department ('Codes are Fragile', 1952) was a series of melodic lines in the treble clef which turned out to be a note-for-figure encipherment of illegal wagers – furnished with occasional accents and pauses in an optimistic attempt at verisimilitude.

2. Other communication systems using musical symbols. Meanwhile, on a different (not strictly cryptographic) level, musical sounds or symbols had been considered as the basis for more general semantic systems and structures. One pioneer was Bishop Wilkins, who suggested (1641) that the ordinary notes of a musical instrument might be used to express not only letters and

†*sic*, though by analogy with Ä and Ö it would be

words but things and notions, so that 'there might be such a general language as should be equally speakable by all nations and peoples'. Leibniz (*c*1678) put forward a similar suggestion for an artificial language consisting solely of tones and intervals (Couturat, 1903). There must also have been practical research and experiment in this area, for in 1800 (as Klüber recorded, 1809) pupils at a school for the blind in Paris were 'reading' phrases played on the violin. The (unspecified) techniques used may have been a Porta-type system extended for communication purposes (as by Bertini, 1811). But they were more likely to have been precursors of the ideas later developed by Jean-François Sudre (1787–1862), whose pupils could also converse with him via the violin. By 1817 he had constructed a complete artificial language, in which any seven different symbols could be combined five at a time, with variations of order and stress. The seven sol-fa syllables or pitches formed one obvious basis of his system, which incorporated such quasi-musical ideas as the use of 'domisol' (i.e. the perfect triad) to mean 'God' and its retrograde form to mean 'Satan'. Similarly 'sollasi' means 'ascend' and 'silasol' 'descend'. The idea was officially welcomed in its day as having potential practical value; but it found no lasting application, and was in effect superseded by the invention of the Morse code. With the demise of Sudre's system the last serious attempt to exploit purely musical resources for purely linguistic purposes came to an end.

3. MUSIC USING CRYPTOGRAPHIC AND RELATED CONCEPTS. No doubt the idea of using the elements of music to convey extra-musical semantic significance (whether audible or inaudible, overt or covert) is as old as music itself. Some devices depend on written notation. Words can be sung, for added emphasis, to their corresponding solmization names (e.g. 're' for 'king', 'sol' for 'sun'). Examples are found from Josquin to Schütz (Wessely, 1973; *see also* SOLMIZATION). EYE MUSIC, adding visual meaning to written scores, is found as late as Bach, some of whose music may also contain the idea of a ritual symbolism of gesture, motion or number (Krause, 1964). Numbers can be signified by intervals or instruments, voices or entries, from the 14th century (Wessely, 1973) to Bach (Krause, 1964; Geiringer, 1956). The numbers thus conveyed may then be used according to strict cryptographic principles to encipher letters of the alphabet, according to the system already described above. This device was used in the early 18th century by J.C. Faber, whose *Neu-erfundene obligate Composition* (MS, *D-W*) enciphers the name 'Ludovicus' by the number of notes allotted to the solo trumpet in each of the nine movements. Using the Latin milesian alphabet (A=1, B=2, C=3 to I=9, K=10 to S=90, T=100 to Z=500), which Faber stated was taken from Tabourot (1584), the solo trumpet plays 20 notes in the first movement, at the head of which is written 'L=20', 200 notes in the second, at the head of which is written 'U=200' and so on (*see also* NUMBERS AND MUSIC). The same determined encipherer also used a Porta system analogous to ex.3 as a means of incorporating messages, for instance in the viola part of a quartet.

The most common of all such devices however was the use of the letter-names of notes to create themes from words or (more usually) names of people. This idea too no doubt dates back to the beginning of letter nomenclature. It is particularly associated with the name of Bach, which in German usage can be written as in ex.6. Bach himself and his contemporaries incorporated that phrase

Ex.6

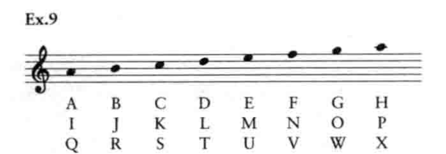
in many works (as did Beethoven, Schumann, Liszt, Rimsky-Korsakov, Busoni and several others; *see* B–A–C–H). Bach showed further ingenuity in his seven-part canon over a ground of F–A–B–E, headed 'FABERepetatur' – possibly a suitably cryptic allusion to J.C. Faber himself or a kinsman. Such ideas flourished especially in the common ground between music and literature that was increasingly cultivated in the 18th and 19th centuries; they are, for example, typical of Jean Paul and occur in his novel *Flegeljahre* (1804–5). As a consequence, more letters and ideas were found musical equivalents than the standard A to G (and H, the German B♮). For example, 'S' can be considered as the equivalent of the note E♭, because the German name of the latter is 'Es'; this enabled Friedrich Fesca to begin a string quartet with F–E–E♭–C–A, literally his own signature tune. It helped Spohr sportively to render his own name as in ex.7 (*po* stands

Ex.7

for *portamento*; the old-style crotchet rest looks like 'r'). At one extreme, ideas of this kind could be used in grave commemoration of the death of Schubert, as in the fugues written on the musical letters of his name by Stadler and Sechter; at the other, they could inspire such *jeux d'esprit* as John Field's tribute to his hostess Mme Cramer (MS, 1832) in the form of two grateful melodies on B–E–E–F and C–A–B–B–A–G–E.

The greatest and most prolific exponent of such notions, whether serious or genial, was Schumann. The musical letters of his own name, S–C–H–A, form a main theme of *Carnaval*, where they are also found as A–S–C–H, the name of his friend Ernestine von Fricken's home town, and anagrammatized as A–S–H–C. The A–S component is enciphered variously as two notes (A, E♭) or as one (As = A♭ in German). Schumann also used, in published music, A–B–E–G–G and G–A–D–E (names of friends); F–A–E (standing for 'frei aber einsam', free but lonely, a device also used in music by Joachim); and H (the answer to a riddle on the letter H). His other overt music-ciphers used in extant letters or manuscripts include A–C–H, A–D–E, B–E–D–A (a pet name for Clara Wieck), B–E–S–E–D–H (the nearest equivalent to the name of a friend, Bezeth), E–H–E ('marriage') and, no doubt the longest example on record, (L)–A–S–S D–A–S F–A–D–E, F–A–S–S D–A–S A–E–C–H–D(T)–E, or 'leave what is trite, hold fast to the right', in a musical rebus.

It has been suggested that Schumann used a three-line, eight-note cipher (on a system derived from Klüber, 1809, with whose work he has been shown to be familiar; see Sams, 'A Schumann Primer', 1970) much as in ex.9 below, especially for the purpose of making themes with the covert significance of 'Clara' (Schumann, née Wieck); and that Brahms also used such themes with the same meaning (Sams, 1971 and forthcoming). Brahms was also much given to the meaningful use of musical letters. He



seems to have used his own, B–A–H–S, in his A♭ minor organ fugue. He modified the F–A–E idea to F–A–F, standing for 'frei aber froh', free but happy, which was used in many works from the Serenade no.1 to Symphony no.3. The notes A–G–A–(T)–H–E, A–D–E are used as a valediction to Agathe von Siebold in the Sextet op.36 and arguably in other works (Sams, 'Brahms and his Musical Love-Letters', 1971). In correspondence Brahms referred to Adele Strauss as the notes A–E♭ (A.S.) and to Gisela von Arnim as the notes G♯–E–A (Gis-e-la). This ingenious combination of German note-names with solmization names, the typical French usage, recurs in the use of B♭–A–F (B-la-F) in a string quartet written for Belyayev by Borodin, Glazunov, Lyadov and Rimsky-Korsakov. It has been suggested that Tchaikovsky made analogous use of a friend's name, D–E(s)–Si–re–E (Brown, 1978). Glazunov composed on the theme of his own pet name, S–A–C–H–A; César Cui linked the musical letters B–A–B–E–G in his wife's maiden name (Bamberg) with his own initials, C–C. Smetana not only composed with his own monogram B–S and the musical letters F–E–D–A in the name Froejeda, but also enciphered the year 1862 as the first, eighth, sixth and second degrees of the scale.

In England, Elgar was a skilled cryptologist. He successfully solved a well-known challenge cipher, to which eminent experts later thought it worthwhile to publish their own solutions; he constructed a difficult if not impossible cryptogram; he made cipher entries in diaries and notebooks. One of his earliest works was an Allegretto for violin and piano on G–E–D–G–E, the name of a friend. It seems reasonable on the facts to conjecture that he used private ciphers in some of his compositions, and that suggestion has often been made in respect of the 'Enigma' Variations. The theme of Granville Bantock's *Helena Variations* is fashioned from his wife's initials, H–F–B.

The first major composer to make serious and acknowledged use of a detailed and coherent cipher system was Ravel, who in 1909 used ex.8 (except that, presumably to

avoid repetition, H was given its German equivalent, B♮) to encipher the name Haydn in a commemorative Menuet for piano. Similar pieces were written on the same system at the same time by Debussy, Dukas, Hahn and d'Indy. The same 7 × 4 system was used again in 1922 by Ravel and others (Schmitt, Enescu, Aubert, Koechlin, Ladmirault and Roger-Ducasse) in tribute to Fauré. The idea

seems to have appealed to Ravel who (alone, apart from Schmitt) elected to encipher the whole name of Gabriel Fauré. In 1929 another group of composers (Poulenc, Honegger, Milhaud, Ibert and others) used cipher in celebration of Albert Roussel; this time no uniform system was adopted. Some are unspecified, Poulenc's for example; but it can be inferred from the score of his *Pièce brève sur le nom d'Albert Roussel* to be an 8 × 3 arrangement as in ex.9. The name 'Albert' is also enciphered backwards to make an additional theme. Of especial interest is Honegger's encipherment system, ex.10, which is worth com-

paring with Michael Haydn's (see ex.5). Honegger's actual compositional procedure is shown in exx.11 and 12.

The simpler model of ex.8 was used by Arnold Bax in his *Variations on the Name Gabriel Fauré* in 1949. Otherwise outside France the German letter-name tradition continued in the 20th century as in the 19th. In Berg's Chamber Concerto the musical letters in the names Schoenberg, Webern and Berg (S–C–H–B–E–G, E–B–E, B–E–G) are incorporated in the music as personal symbols. Thea Musgrave made a similar use of the names of the first Viennese school in her Chamber Concerto no.3. Dmitry Shostakovich, in his Eighth String Quartet and elsewhere, used his monogram D–S–C–H as a theme, which Ronald Stevenson also used, in homage, in his *Passacaglia*; while Everett Helm has signed more than one composition with the musical initials E–H. In Bussotti's contemporary theatre-piece *La passion selon Sade*, D–Es–A–D–E is interlocked with B–A–C–H. But the most striking developments of the 1960s came from what might be called the French tradition, in the form of Olivier Messiaen's 'communicable language' (ex.13) and

complementary leitmotifs (ex.14) which together make the complete cipher and code system used in the organ

Ex.14 Theme of God

work *Méditations sur le mystère de la Sainte Trinité* (Halbreich, 1972). Ex.13 is used to encipher extended quotations (in French) from the *Summa theologica* of St Thomas Aquinas; ex.14 and other leitmotifs symbolize spiritual entities or basic concepts such as 'to be' or 'to have'.

It seems entirely fitting that such a system should have evolved in the only milieu ever to have produced real music on themes overtly derived from cipher, and the only milieu ever to have produced a complete artificial language with musical elements. There is an evident affinity between ex.13 and ex.10 (most clearly in the first eight notes of each). Although the 'theme of God' means the same in its retrograde form, unlike François Sudre's 'domisol', the relation between his 'language' and Messiaen's is also manifest, especially when we learn that the latter's ascending 'to be' is counterbalanced by the descending theme 'to have'.

5. Conclusion. The two streams of music and cryptography, usually quite separate, sometimes converge. That trend became more marked in the later years of the 20th century. The combinative impetus came from both sides. Cryptographers have always striven to make their music-ciphers as much like real music as possible in order to enhance their effectiveness as cipher. Some composers, conversely, may well have felt that their music was enriched by a judicious admixture of cryptographic elements. The use of cipher themes seems to have begun with J.C. Faber and may well have continued with Michael Haydn, Schumann and Elgar. The undisguised use resumed in France with Ravel, Poulenc, Honegger and others, and culminated in Messiaen. But, as Norman Cazden showed in 1961, modern scores present unrivalled opportunities for encipherments of all kinds, and no doubt there are undeclared exponents of undisclosed cipher techniques of musical composition.

Critical mention of this practice tends to be uncomprehending and deprecatory. But on the evidence it derives from a true intuition that music and semantics have deep roots in common ground. Nor is this intuition confined to musicians; Thomas Mann for example in *Dr Faustus* envisaged a 12-note system which could also be used as cipher, suffusing the music with new quasi-verbal meaning. It is perhaps significant that in the past all the best-known and most frequent examples have been encipherments of names – presumably because names, of all words, are the least fixed and most fluid in meaning, and therefore the most closely akin to musical motifs as generally understood. With changing techniques and attitudes cipher equivalents may now more readily assume the form of words or phrases.

In any event there will remain the demonstrable kinship between the musical and the cryptographic mind. The ready assimilation of music to symbolic communications systems and language structures; the consensus that music has an import related to its own structure; the prevalent feeling that music is itself a mysterious language intelligible only to the initiated: all these and other affinities and analogies between music and cryptography at least suggest that the relation is not without psychological or aesthetic significance.

ERIC SAMS/R

Crystallophone. A term devised to embrace those instruments which sound through the vibration of glass or other brittle substances. They may be sounded either by striking or by friction (as in the case of the glass armonica). Most crystallophones are tuned by the filling of the glasses with different amounts of water (as with the 'glasses filled with spring water' on which Gluck played a concerto in London in 1746); others depend upon the mass of the glasses themselves. A non-Western example is the South Asian *jaltarang*. *See also* ARMONICA; GLASSCHORD; MUSICAL GLASSES; STICCADO-PASTROLE.

Crystal Palace. London exhibition hall built in Hyde Park in 1851 and moved to Sydenham, opening in 1854; its two performance venues were used for concerts until it was destroyed in 1936. *See* LONDON (i), §VI, 2 and fig.37.

Crystals, the. American pop group. Its members were Dee Dee Kennibrew (*b* Brooklyn, New York, 1945), Dolores 'Lala' Brooks (*b* Brooklyn, New York, 1946), Mary Thomas (*b* Brooklyn, New York, 1945), Pat Wright (*b* Brooklyn, New York, 1945) and Barbara Alston (*b* Brooklyn, New York, 1945). They were discovered by Phil Spector in New York in 1961 and became the first of the singing groups for whom Spector created his 'wall of sound'. The group's first hits were *Da Doo Ron Ron* and *Then he kissed me*, both composed by Ellie Greenwich and Jeff Barry. Both recordings featured Brooks's powerful lead singing and effective chanted harmonies by the other group members. While the Crystals were touring the United States, Spector used Darlene Love and the Blossoms to record the Gene Pitney composition *He's a rebel* and *He's sure the boy I love*, the next hit singles issued under the group's name. The original group was used by Spector for subsequent records by the Crystals but none was as successful as their early efforts.

DAVE LAING

Csakan (Hung. *csákány*: 'cane flute'). (1) DUCT FLUTE in the shape of a walking stick or an oboe, popular in and around Vienna from about 1807 until the 1840s. The instrument is related to the shepherds' flutes of Hungary, Slovakia and Croatia, which combine duct flute and walking stick, and to the other variously shaped instruments, such as the 18th-century iron 'csákányfokos' which is both a weapon and a duct flute (Budapest, Hungarian National Museum), which appeared in this region.

The first known appearance of the csakan was at a concert in Budapest on 18 February 1807; the performer, Anton Heberle (*fl* 1806–16), is identified as the inventor of the instrument in concert announcements from 1810 on. Heberle's *Scala für den Ungarischen Csakan* appeared in 1807 and he was the first to publish music for it. The early csakan was shaped like a walking stick, with the mouthpiece in the handle. Most such instruments were pitched in A♭ or G, although a few were pitched in A; they were played as transposing instruments, in C. The fingering was like that of a recorder. The instrument of Heberle's *Scala* had no keys, but by 1815 up to 13 keys might be added (Klingenbrunner), along with a tuning-slide and a device for narrowing the thumb-hole. A keyless csakan in the collection of the Gesellschaft der Musikfreunde in Vienna is a gift from 'Eberle in Pápa'.

In the 1820s there appeared a new csakan 'in the pleasing shape of an oboe', usually in three pieces. This instrument appeared in both a 'simple' form, with one key, and a 'complex' form, with seven. The Viennese court oboist Ernst Krähmer (1795–1837) was the foremost performer on this instrument, appearing frequently in concerts in Vienna from the 1820s. His further distinction between the 'Viennese' and 'Pressburg' models (*Tonleiter*) simply refers to the narrowing of the thumb hole on the Pressburg type, which makes it possible to leave the thumb hole open for overblowing.

Well-known makers of the csakan included Johann Ziegler and Stephan Koch in Vienna and Franz Schöllnast in Pressburg. Schöllnast's accounts provide detailed information about his customers, revealing that the csakan was primarily a dilettante's instrument, purchased by those who wanted something simple and inexpensive. Between 1807 and 1845 around 400 works for the csakan were published, mainly for csakan solo, csakan duet or csakan with guitar or piano.

(2) A type of duct flute made in Markneukirchen towards the end of the 19th century. It was shaped like a recorder but had one to eight keys and no thumb-hole. This instrument, sometimes also called a 'Schulflöte', was popular in the early 20th century because of its simple fingering.

Csákány (Hung.). *See* CSAKAN.

Csapó, Gyula (*b* Pápa, 26 Sept 1955). Hungarian composer. Between 1974 and 1980 he studied composition at the Budapest Academy of Music, after which he spent six months at IRCAM on a fellowship. In 1975 he became a member of the Budapest New Music Studio. From 1983 he studied under Feldman SUNY at Buffalo, taking the doctorate there in 1987, and from 1991 he was assistant professor of composition at Princeton University; in 1994 he was appointed assistant professor at the University of Saskatchewan, Canada.

In his music he strives towards the integration and collaboration of elements both spiritual and sensual, both deterministic and accidental. His structuring of musical time is based on timbre – and timbral 'mode' in its wider sense – rather than on the organization of voices according to pitch. Favouring a freely interpreted, variational ('rotational') form which may also include collage-like

episodes, his works oppose the concepts of representation and formal progression, or development. Alongside an openness towards various non-European cultures, the recurrence in certain works (e.g. *Hark Edward ...* and *A Desert March*) of references to classical music reveal a robust connection with the tradition of European art music.

ÁDÁM KONDOR

Csárdás (from Hung. *csárda*: 'country inn'). A Hungarian dance originating about 1835, derived from the VERBUNKOS and eventually replacing it as the primary Hungarian national dance, as understood in salon, ballet and character-dance milieux. It enjoyed great popularity in aristocratic formal dance events, where it was meant as an idealized evocation of peasant dances. Its purpose was thus more social and ceremonial than that of *verbunkos* (a recruiting music originally danced by soldiers). Like the *verbunkos*, the *csárdás* had slow sections (*lassan* or *lassú*) and fast ones (*friska* or *friss*); the former were in a heavy 4/4 metre that suggested dignity, pride and (often) grief, while the latter could achieve extremely fast tempos and was danced with abandon. One of the pioneers of the genre, *Csárdás for Violin and Piano*, was the Hungarian composer Márk Rózsavölgyi, who took an interest in it after having built a reputation with *verbunkos* compositions; he dedicated a *csárdás* to Ferenc Erkel, for which he was thanked publicly.

Since the *csárdás* was not a bona fide folk music, its evolution was relatively short: thus, while it inspired a good deal of interest at mid-century, it soon became formulaic. According to Szabolcsi, it was 'in the center of popular Hungarian instrumental music' in the 1850s and 1860s, but by the 1870s and 1880s its literature was 'growing rigid and standardized . . . and by the end of the century had become very trivial'. Nonetheless, as a popular form it became a staple of the Hungarian Gypsy repertory, the performing inflections of which came to define it. Liszt's Hungarian Rhapsody no.2, the most famous of the genre, is cast in *csárdás* form, its two sections labelled *Lassan* and *Friska*: the first section has a heavy, proud and theatrical pathos, while the second begins with twittering cimbalom effects and builds to a furious prestissimo. Two later examples by Liszt, the *Csárdás macabre* and *Csárdás obstiné*, are based on the fast *csárdás* only and have more in common with his late style than with the traditional STYLE HONGROIS. The distance between *csárdás* and its folk roots is illustrated by the fact that one of the most famous examples of the genre was composed by an Italian, Vittorio Monti. The *csárdás* compositions of the violinist Jenő Hubay are particularly successful; indeed, material from his *Scènes de la Csárdá* no.5, *Hullámzó Bálaton* (op.33), is quoted outright in the famous *csárdás* in Act 3 of Glazunov's ballet *Raymonda* (1896–7).

JONATHAN BELLMAN

Csáth, Géza [Brenner, József] (*b* Szabadka [now Subotica, Serbia], 13 Feb 1887; *d* nr Szabadka, 11 Sept 1919). Hungarian music critic. In 1901 he started writing music criticism for the *Bácskai Hírlap* newspaper. After failing the entrance exam for the Budapest Music Academy, he enrolled in the medical faculty. In 1906 he became music critic of the *Budapest Napló* and the journal *Nyugat* regularly published his lectures and reviews from 1908 onwards. He also made a few attempts at composition: songs, pieces for piano and violin, as well as incidental music for his own play, *Hamvazószerda* 'Ash Wednesday'. He was among the first to recognize the importance of Bartók and Kodály, and his study of Puccini (1909) and article on Wagner (both in *Zeneszerző portrék*, 1911) were highly influential. Csáth's main work was as a neurologist. From 1914 to 1915 he worked as an army doctor on the Serbian and Russian fronts, and later in Budapest. He was relieved of his military duties in 1917 on health grounds and became district doctor at Regőce. In 1919 he suffered a nervous breakdown and was hospitalized at Baja, but escaped and walked home, where he shot his wife and attempted suicide. His hospital treatment continued in Szabadka, from where he escaped but was taken prisoner by the Serbs and poisoned himself.

ÁGNES GÁDOR

Csekö, Luís Carlos (*b* Salvador, 10 Feb 1945). Brazilian composer. He received his bachelor's degree at the University of Brasília in 1971, studying composition and theory with Fernando Cerqueira, Rinaldo Rossi, and Nicolau Kokron-Yoo. He later earned a masters in composition at the University of Colorado, Boulder (1980). While in the USA he also took courses at Columbia University and the University of Minnesota, Minneapolis. He has held workshops and given lectures on contemporary composition and music education in national festivals

and has been a guest composer and visiting professor in colleges throughout Brazil.

Since the late 1980s he has been teaching in Rio de Janeiro at the Pró-Arte music, the school Conservatório Brasileiro de Música and the Instituto Nacional de Música, promoting contemporary music events and undertaking research in the Workshop of Musical Language. He has written on music education and composition and completed a book, *Music Language Workshop: Contemporary Music, Process of Creation, and Music Education* (forthcoming).

Csekö's compositional approach juxtaposes aleatory and improvisatory procedures with the deconstruction of the street music and traditional religious music of his native city (*afoxé, candomblé,* samba). He has also worked with electro-acoustic media and with lighting, movement and scenic design (*Gradação, Canções dos dias vãos I, Canções do alheamento, Oscilações*). He has won several national compositional prizes, from the Brazilian Society of Contemporary Music and the Goethe Institute. He participated in the Brazilian Delegation to the 1996 Sonidos de las Américas Festival sponsored by the American Composers Orchestra. Several of his works have been recorded by GHA Records (Belgium), the Center for New Music Resources (Colorado), and the Estudio da Glória (Rio de Janeiro)

GERARD BÉHAGUE

Csemiczky, Miklós (*b* Budapest, 16 March 1954). Hungarian composer. He studied composition with Kocsár at the Budapest Conservatory (1973–7) and with Rezső Sugár and Petrovics at the Liszt Academy (1977–82). Subsequently he was appointed to teach theory at the Bartók Music Secondary School. He is a recipient of the Erkel (1986) and Bártok-Pásztory (1996) prizes, and was twice a prizewinner at the Budapest Spring Festival's international competition (for the String Quartet and *Capriccios, Epitaphs and Choral*). The influence of Stravinsky emerges in Csemiczky's *Antiphonae II*, which uses groups of instruments antiphonally in addition to bringing principles of chant to intervallic content, motifs and rhythm. His *Commedia senza parole*, inspired by *commedia dell'arte* and Samuel Beckett's *Acte sans paroles*, is a musical scenario based on interacting contrasting elements. His choral works written after 1990 have a classical tendency, fitting securely into the more traditional school of post-Bartókian Hungarian composition.

RACHEL BECKLES WILLSON

Csermák, Antal György (*b c*1774; *d* Veszprém, 25 Oct 1822). Hungarian composer and violinist. According to his first biographer Count István Fáy, Csermák went to Hungary from Bohemia (by way of Vienna) in the 1790s. In 1795–6 he was leader of the first Hungarian national theatre company orchestra in Pest and Buda, and in 1795 he set up a 'musical academy' in the theatre. At this point he was not yet involved with Hungarian music, but gave much admired virtuoso performances of the violin music of Haydn, Mozart and Viotti. In 1802 or 1803, when Csermák was playing chamber music at Gödöllő, the home of Prince Antal Grassalkovich, he met the gypsy violinist and composer Bihari. Influenced by Bihari's playing, and by his and János Lavotta's *verbunkos* compositions, Csermák was drawn to the new Hungarian national music. In 1804 he published his first compositions in the Hungarian style, the *Romances hongraises* and the string trio *Magyar nemzeti tánczok*. From then he was a famous composer and interpreter of *verbunkos* music; but since he held no permanent post he led a nomadic life, moving from one country estate to another. Fáy and Liszt both recorded that he appeared at the imperial court in Vienna, and that he also visited Russia. In 1809, inspired by the final revolt of the Hungarian nobility against Napoleon, he composed his first string quartet, a programmatic suite in the national style but also greatly influenced by Mozart. The last years of Csermák's life were filled with restless wanderings. The recollections of his contemporaries, as well as his own manuscripts dating from this period, testify to his increasing mental illness. In 1822 he was living in Veszprém, where he handed over the manuscripts of his many dance compositions to the cathedral Kapellmeister József Ruzitska, who was later to edit the great edition of *verbunkos* music *Magyar nóták Veszprém vármegyéből* ('Hungarian tunes from County Veszprém'). He died in poverty and isolation.

Of the virtuoso violinist-composers who epitomize the golden age of *verbunkos* music, Csermák was intellectually the most sophisticated. His chamber music shows a high degree of theoretical understanding, combined with a thorough knowledge of the Viennese Classical style and an imaginative approach to harmony. In his chamber works he was a pioneer of a specifically Hungarian tradition in art music, which would combine certain aspects of the Viennese Classics with those of the *verbunkos*. He was also strongly influenced by Hungarian, Slovak and Romanian folk music, and revealed in Hungarian music a potential which was fully realized only in the 20th century. Some of Csermák's musical ideas were exploited by Liszt (Hungarian Rhapsody no.4) and Erkel (Duo brillant). His contemporaries, with typical Romantic overstatement, dubbed him 'the Hungarian Beethoven', praising him as a skilled composer and instrumentalist who expressed a certain patriotic spirit, and thereby contributed to the awakening of a national consciousness among his fellow countrymen.

FERENC BÓNIS

Csiky, Boldizsár (*b* Tîrgu Mureş, 3 Oct 1937). Romanian composer of Hungarian descent. After attending the Music Lyceum in Tîrgu Mureş (1953–5) he studied composition with Toduţă at the Cluj Academy (1956–61). Returning to Tîrgu Mureş, Csiky taught harmony and composition at the Arts Lyceum (1961–8) and became the musical secretary (1961–90) then director (1990–97) of the Philharmonic Orchestra. He has also directed several music festivals. Though his administrative commitments have taken time away from his compositional activity, he has established himself as a composer with an essentially neo-romantic style, incorporating elements of post-serial techniques when this is necessary to permit a greater scope of expression. Further details are given in V. Cosma: *Muzicieni români* (Bucharest, 1970).

WORKS

OCTAVIAN COSMA

C sol fa. The pitch *c″* in the HEXACHORD system.

C sol fa ut. The pitch *c′* (middle C) in the HEXACHORD system.

Csomasz Tóth, Kálmán (*b* Tapolcafő, 30 Sept 1902; *d* Budapest, 20 Nov 1988). Hungarian musicologist. He studied theology at Pápa, Hungary (1920–22), and at Dayton, Ohio (1922–4, BD 1924), before reading music and philology at Budapest University (1925–8). He was professor of church music and hymnody in the Budapest Reformed Theological Faculty (1952–78), and took the *kandidátus* degree in musicology (1962) for his book on 16th-century Hungarian melodies. He was a member of the International Fellowship for Hymnological Research and a regular contributor to its yearbook, and a member of the musicology committee at the Hungarian Academy of Sciences, of which he was president (1977–80). His chief research topic was Hungarian music history, with special reference to the musical life of Hungarian Protestant churches and schools; he prepared many organ settings and choral compositions for church use.

VERA LAMPERT

Ctesibius [Ktesibios] (*fl* Alexandria, 3rd century BCE). Greek inventor. According to earlier scholarship, he was active during the reign of Ptolemy Euergetes I (246–221 BCE). A review of the evidence by Perrot, however, supports the conclusion that he was active about 270 BCE, the period of Ptolemy Philadelphus. He enjoyed wide fame in antiquity for his mechanical devices operated by the pressure of water or air. Often these were elaborate toys created to amuse the court: one such was a water-clock, with sounding trumpets among its ingenious fittings, made for Ptolemy's queen Arsinoë.

The most famous and significant of Ctesibius's inventions was the HYDRAULIS, or water-organ. While some references fail to establish him precisely as its discoverer, his claim is strengthened by the weight of the total evidence and the lack of any satisfactory alternative theory. Farmer argued that the case for Ctesibius is supported by the existence of an Alexandrian treatise, surviving only in Arabic translation; this describes and illustrates a hydraulic musical device of a type much earlier than that described by Vitruvius or by Hero of Alexandria. His attempt, however, to identify the author, a certain Muristus (whose name exists in several variant forms), with Ctesibius is highly conjectural and involves difficulties.

No description of the hydraulis by Ctesibius himself has survived. According to reasonable modern conjecture, a lever-actuated piston forced air into a chamber partially filled with water and thence to the pipes. Lucretius (*On Nature*, v.332–7) and Cicero (*Tusculan Disputations*, iii.18.43) wrote admiringly of the hydraulis, which achieved great popularity in Rome, and in the first years of the Empire Vitruvius attempted to describe it. He spoke of a wind chest divided into four, six or eight air channels – the limitation to the octave is noteworthy – and gave a detailed account of a mechanism in which keys set slide valves in motion to open or close the passage of air to the pipes (*On Architecture*, x.8.2, 6). A Roman hydraulis dating from 228 CE, very close to the date of Athenaeus's description of the instrument (174a, e) has been unearthed at Aquincum, near modern Budapest. Ctesibius's invention, essentially an elaboration of the panpipes, may be viewed as a distant ancestor of the immensely complex modern pipe organ.

WARREN ANDERSON/THOMAS J. MATHIESEN

Cuatro. A small four-string plucked lute descended from the Spanish vihuela; see COLOMBIA, §II, 4; MEXICO, §II, 2(i); PUERTO RICO, §II, 3–4; VENEZUELA, §II, 3.

Cuba, Republic of (Sp. República de Cuba). Island republic in the West Indies. It is situated in the Caribbean Sea between North and South America and near to the Tropic of Cancer. It comprises over 1600 cays (low coral banks) and the Isla de la Juventud. The capital city is Havana. Cuba became an independent republic in 1901, and was declared a communist state in 1961.

I. Art music. II. Traditional music.

I. Art music

The history of art music in Cuba shows that it surpassed that of any other Caribbean island, although colonial music started much later there than in the larger Latin American countries. Musical activity during the 16th and 17th centuries was apparently limited. At that time sacred music was concentrated at Santiago Cathedral; the earliest reference to music indicates the presence there in 1544 of Miguel Velázquez, a native organist. The post of *maestro de capilla* was established in 1682, with limited means, by Bishop Juan García de Palacios, and was first held by Domingo de Flores.

Attempts to revive church music at Santiago, begun during the first half of the 18th century, were successful only during the latter part of the century when Cuba produced its first important composer, Esteban Salas y Castro. Before his transfer to Santiago in 1764, Salas was associated with the music of the Havana parish church (which became a cathedral in 1788). His extensive output includes masses, generally in four parts with string accompaniment, Lamentations, psalm settings, motets, litanies and numerous villancicos in the vernacular. His liturgical pieces are in a transitional style combining late Baroque and pre-Classical characteristics. Another Cuban, Francisco José Hierrezuelo, succeeded Salas at Santiago; after his resignation the Spaniard Juan Paris (1759–1845) occupied the post (1805–45). The musicologists Alejo Carpentier and Pablo Hernández Balaguer discovered several of Paris's works, which include many villancicos. By the 1830s operatic and symphonic music

was being performed in the cathedral, much to the disapproval of some local musicians.

Music at Havana Cathedral seems to have reached its peak during the early 19th century, although there have been no specific studies of the historical and musical archives there. The Academy of Music was founded in 1814, and the S Cecilia Academy in 1816; the first music published in Cuba was a *contradanza* (1803).

Symphonies, operas and piano music, at first in a Classical and then in a predominantly Romantic style, characterized 19th-century Cuban music. Antonio Raffelín (1796–1882) wrote a mass, several symphonies and chamber music works in a Classical idiom. Robredo Manuel Saumell, a prolific composer, cultivated the *contradanza* with its typical dotted-figure accompaniment, characteristic of the later habanera, *danzón* and other Latin American popular dance rhythms. Laureano Fuentes Matóns (1825–98) wrote many chamber works, sacred pieces, a symphonic poem *América*, an opera *Seila* and several zarzuelas. Nicolás Ruiz Espadero (1832–90) wrote virtuoso piano pieces in a style derived from Liszt and Gottschalk, such as his *Canto del guajiro*. Gaspar Villate studied at the Paris Conservatoire and had three of his operas given their first performance in Europe (*Zilia*, Paris, 1877; *La czarine*, The Hague, 1880; *Baldassare*, Madrid, 1885).

The first decisive step towards musical nationalism in Cuba was taken by Ignacio Cervantes (1847–1905), the most important Cuban composer of his generation. He was a pupil of Gottschalk and Ruíz Espadero and then of Marmontel at the Paris Conservatoire, and had a successful career as a concert pianist. Among his many works the 45 *Danzas cubanas* for piano (1875–95), many of them *contradanzas*, combine folk-music elements of both Afro-Cuban and Guajiro traditions in a Romantic virtuoso piano style. These pieces are the most original contribution to 19th-century Cuban art music. Among the many composers active during the early 20th century Eduardo Sánchez de Fuentes, one of the most influential, also advocated a Romantic national style. Later outstanding composers associated with musical nationalism included Amadeo Roldán and Alejandro García Caturla, who found in 'Afrocubanismo' the most suitable source of national expression. The stylistic idiosyncrasies of Roldán's impressive output are best seen in his series of six *Rítmicas* (1930) for various instruments, the last two for Afro-Cuban and other percussion instruments. García Caturla had several of his works published in Europe and the USA. His skilful and original treatment of Afro-Cuban music is well represented by his *La rumba* (1933) and *Tres danzas cubanas* (1937) for orchestra, and particularly by his many settings of Alejo Carpentier's and Nicolás Guillén's Afro-Cuban poems. For a time Roldán was leader of the Havana PO, founded in 1924 by Pedro Sanjuán. Previously the Havana SO had been established under Gonzalo Roig, composer of the popular zarzuela *Cecilia Valdés*. Ernesto Lecuona, a member of the same generation, was internationally renowned for his musical comedies and many popular songs.

After the premature deaths of Roldán and García Caturla, José Ardévol (1911–81) occupied a leading position as a composer and teacher from the 1930s to the mid-1950s. He gave many young composers a solid technical training, and he founded the Grupo de Renovación Musical (1942) in Havana, which promoted contemporary music and rejected nationalism for its own sake. The group's manifesto stated, however, that a 'national factor is indispensable in musical creation, in the sense that all artistic expression occurs within a cultural setting'. As a composer Ardévol moved from a rigorous neo-classical style, which he initiated in Cuba, to a modernistic 'national' style.

Ardévol's pupils who were associated with the group and became prominent included Serafín Pro, composer of choral works, Gisela Hernández (1912–71), Edgardo Martín (*b* 1915), Harold Gramatges (*b* 1918) and Argeliers León (1918–91), also noted as an ethnomusicologist in the 1960s. One of the group, Julián Orbón (1925–91), established an international reputation as a composer and a pianist. In the early 1950s he broke away from the group to develop his own artistic ideas. Other 20th-century Cuban composers who developed independently include Carlo Borbolla (1902–90), Félix Guerrero Díaz (*b* 1916) and Aurelio de la Vega (*b* 1925). The last-named is the best-known composer outside Cuba. He has written in an atonal idiom and turned to electronic music in the 1960s. He directed the school of music at the Universidad de Oriente, then moved to the USA as professor of music at S Fernando State College, California, where he directs the laboratory of electronic music. Among other composers born in the 1920s and 30s Juan Blanco (*b* 1929), Carlos Fariñas (*b* 1934) and Leo Brouwer (*b* 1939) have used electronic and serial techniques. Brouwer has also drawn on aleatory techniques. Since the 1970s the most significant figures of the Cuban avant garde have been Héctor Angulo (*b* 1932), Cálixto Alvarez (*b* 1938), Roberto Valera (*b* 1938), José Loyola (*b* 1941) and Sergio Fernández Barroso (*b* 1946). With the founding of the Instituto Superior de Arte in 1976 a highly individual group of composers emerged, including Jorge Garciaporrúa (*b* 1938), Carlos Malcolm (*b* 1945), Juan Piñera (*b* 1949), José Angel Pérez Puentes (*b* 1951), Magaly Ruiz (*b* 1941) and Efraín Amador (*b* 1947). The substantial output of these composers since the 1970s has confirmed the richness and diversity of contemporary Cuban art music.

II. Traditional music

Music in Cuba often represents a complex synthesis of influences including not only Hispanic and African, but also regional and international styles from a gamut of classical, 'folk' and commercial sources. This is especially true of popular music. Cuba has existed as a political entity for over 500 years; it has developed many syncretic

national genres that testify to the island's unique cultural history and are enjoyed by nearly all Cubans. Conversely, Cuba is far from homogeneous and many cultural forms have achieved popularity only among limited segments of the population. Music genres associated with Afro-Cuban religious worship, for instance, have never been played consistently in the mass media and are considered non-musical or even offensive to some listeners. Such attitudes are most common among white/Hispanic Cubans, some of whom continue to associate African-derived expression with poverty, ignorance and superstition. Rather than conceiving of Cuban music as a single, monolithic entity, it is more helpful to view it as a conglomerate of distinct styles and tendencies which have affected one another to varying degrees over time.

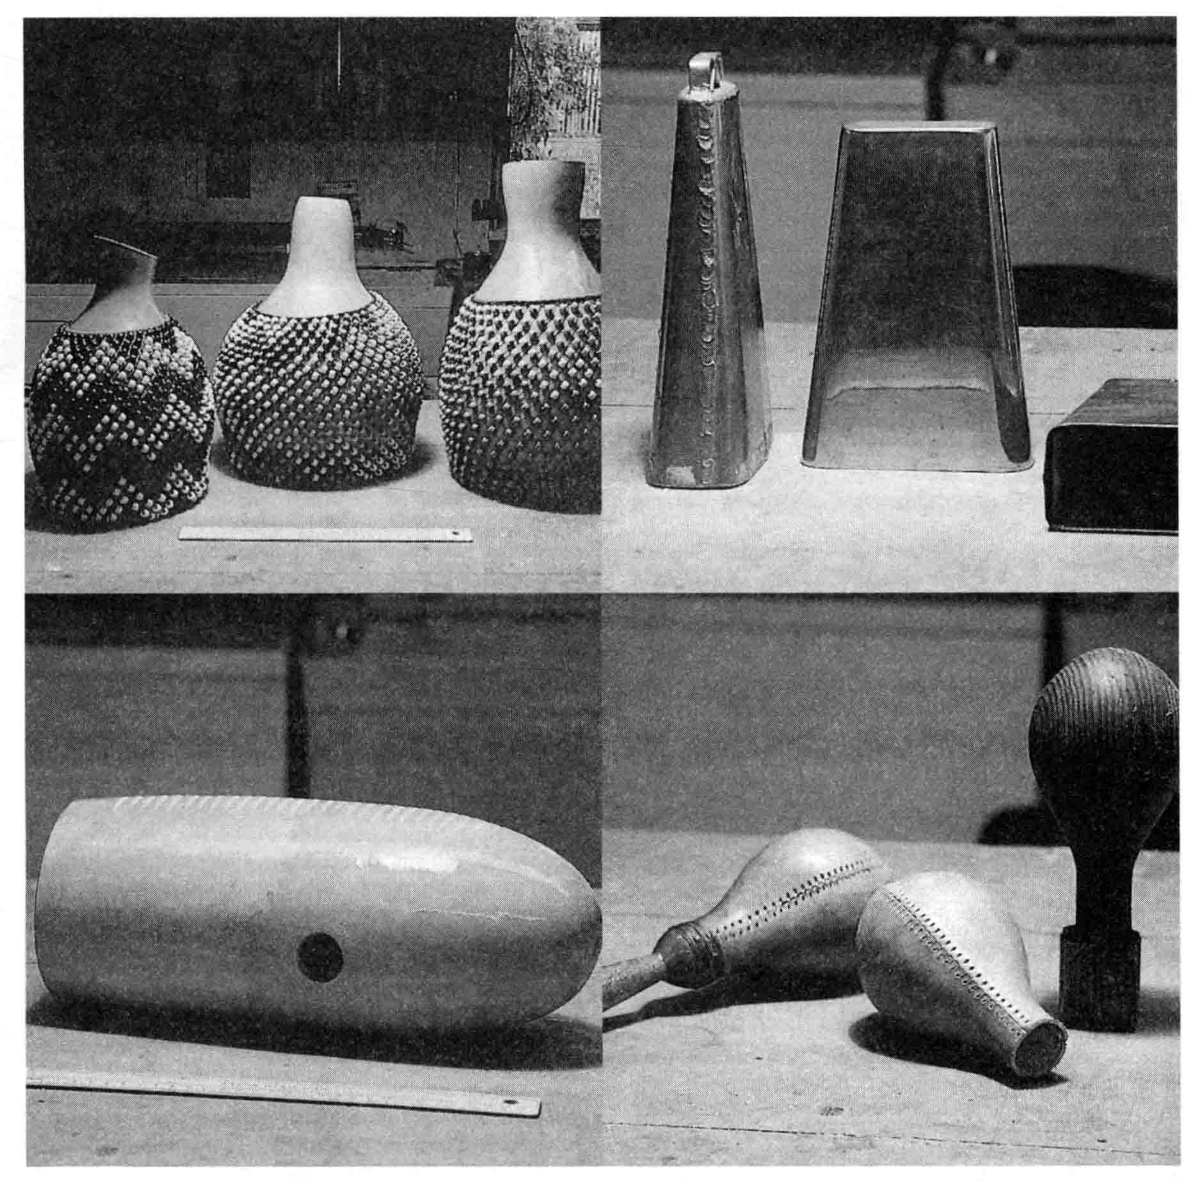
1. Local traditions: (i) Amerindian (ii) Iberian-derived (iii) Afro-Cuban. 2. Popular genres: (i) Ballroom music (ii) Blackface theatre (iii) Sentimental song genres (iv) Son. 3. Music in socialist Cuba.

1. Local traditions.

(i) Amerindian. The first known inhabitants of Cuba were the Siboney and Arawak groups living on the island at the time of the Spanish conquest. The little that is known of their musical practices has been taken from the accounts of travellers such as Bartolomé de las Casas and Gonzalo Fernández de Oviedo. Instruments employed by native groups included the *mayohuacán*, a hollowed-out log slit-drum similar to the Aztec *teponaztle*; wooden and conch-shell trumpets, the latter known as *guamos* or *cobos*; flutes; and wooden rattles similar to maracas. The maraca appears to be the only instrument employed in Cuba today which may derive from the indigenous past.

One of the most important forms of Siboney expression was the *areíto*, a communal religious event involving music, dance, ritual tobacco smoking and the consumption of alcoholic beverages. Dance movements of the *areíto* are not well documented, but seem to have involved ring formation and were at least in part mimetic. Responsorial song, a crucial element in ceremony, was led by a *tequina* or musical specialist chosen by the tribe. Colonial officials banned *areíto* performance in 1512; this, combined with the brutal nature of the conquest in the Caribbean and resultant decimation of the indigenous population, led to the early demise of such activity.

(ii) Iberian-derived. These musical traditions have existed in Cuba since the earliest days of the conquest. While most national genres demonstrate some influence from Spain, the *punto* and *décima* are most closely associated with such heritage. These forms of expression, known loosely as *música guajira* (music of rural Hispanic farmers), have remained strong into the 20th century due to government-subsidized immigration from the Canary Islands in the 1910s and 20s. The *punto* and *décima* are primarily song and string instrument traditions. They employ the *laúd*, *tres* and *bandurria* (variants of Spanish instruments developed in Cuba) as well as the guitar and maracas or other hand-held percussion. Strictly speaking, *punto* is a term used to describe instrumental music which usually accompanies song. *Décima*, by contrast, refers to the poetry most commonly associated with *música guajira*. It can be pre-composed or spontaneously improvised. *Décima* form first developed in medieval Spain. It consists of ten eight-syllable lines with the *espinela* rhyme scheme (*ABBAACCDDC*). The melodies associated with *música guajira* are stylized and formulaic. Emphasis is primarily on the text, with music in a supporting role. *Punto* and *décima* have lost favour, especially among the young, who consider them old-fashioned. Nevertheless, television and radio shows continue to promote them.

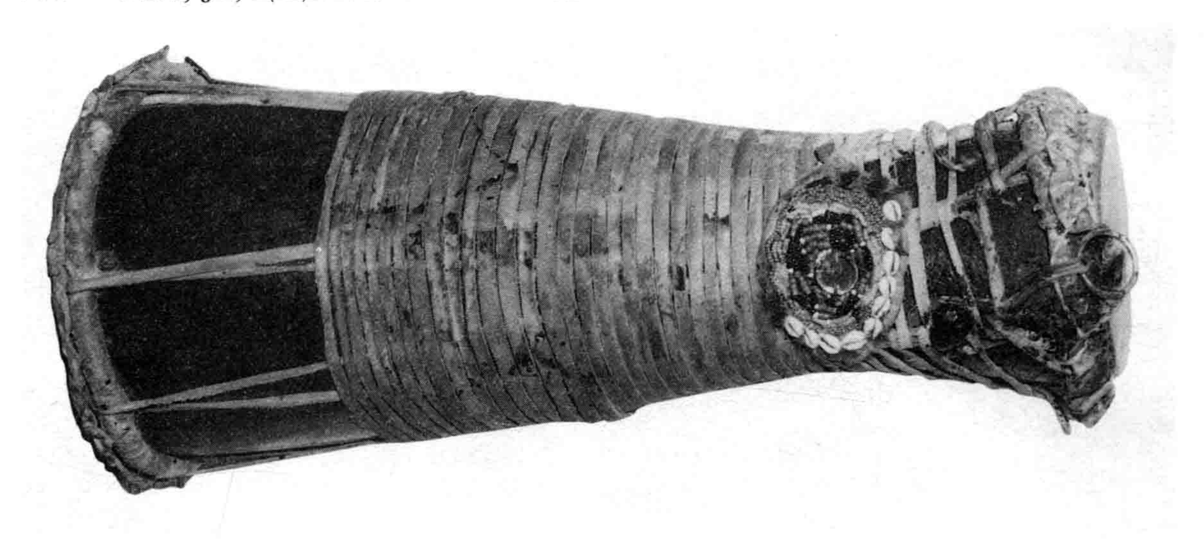


One of the most exciting aspects of improvised *décima* performance is the fact that it often occurs in the context of *controversias* or poetic song-duelling between two artists. *Décima* improvisers are required to respond quickly to the challenges of their opponent and to sing their own responses within strict metric conventions. The Spanish-derived *romance* or lyric ballad also exists in Cuba, as do other Iberian genres.

(iii) Afro-Cuban. Adopting the terminology of author Miguel Barnet, the music and dance of the *santería* ceremony can be regarded as the '*fuente viva*' of much of Cuba's cultural inspiration. As in the case of North American black gospel, the sacred music of *santería* has never enjoyed commercial mass popularity (though this may be changing), yet it has been of fundamental importance to the development of most Cuban popular music and to the strength of African cultural retentions generally. A fusion of Yoruban beliefs with aspects of Catholicism, *santería* is the largest of several Afro-Cuban religions including *arará* and *palo monte* (derived from Ewe/Dahomey and Congo groups, respectively) as well as *espiritismo* and *abakuá* ritual. Virtually all Afro-Cuban religious devotion involves music and dance: the *orichasò* (ancestor divinities) can only be invoked and worshipped by playing songs dedicated to them.

Various types of music are associated with Afro-Cuban religions. These include formal performance events closed to non-initiates in which *batá* drumming and singing predominate, as well as more open celebrations in which an *ekón* (bell) and one or more unconsecrated conga drums are more typically used, sometimes in conjunction with *chéqueres* (dried gourds shaken within a net of beads; fig.1*a*) or even violins. The *batá*, perhaps the best known of *santería* instruments, consist of a set of three double-headed, hourglass drums of different sizes. The most common names of these drums, in descending order of size, are *iyá*, *itótele* (fig.2) and *okónkolo*. *Batá* drums are considered sacred and are believed to contain a spiritual force (*añá*) which facilitates religious communication.

In any type of Yoruban-derived ceremony, Afro-Cuban religious devotion typically involves the performance of *orus*, strictly ordered sequences of percussive rhythms and songs to the *orichas*. Solo vocalists, referred to as *akpwon*, lead the singing and are responded to by a chorus of initiates. Lead singers and chorus members can be men or women; women, however, constitute the majority of *santería* devotees. The musical characteristics of traditional Afro-Cuban music, both sacred and secular, include the predominance of voice and percussion instruments; cyclic, interlocking musical segments which are repeated to provide an underlying musical texture; complex polyrhythms; responsorial singing; descending pentatonic vocal melodies; and a tendency for some instruments to play static, unchanging figures while others improvise.



Because it incorporates many of the same instruments used in religious events, the Afro-Cuban rumba sounds similar to music of the *santería* ceremony. Rumba is, however, distinctly secular. It developed in the Havana and Matanzas provinces, and its rhythms are said to be

1. Cuban percussion instruments: (a) chéqeres, a dried gourd instrument of African derivation, traditionally used in Afro-Cuban religious celebrations; (b) cencerros or bells used in secular dance bands; (c) güiro, distinct in shape and construction from the güiros used in Puerto Rico, the Dominican Republic, Mexico and elsewhere; (d) maracas, completed and in construction over a wooden mould

of Bantu origin. Similar genres (most notably the *tumba francesa* of Oriente) exist in other areas. As in the case of *batá* drumming, rumba performers (traditionally men) most often employ three drums, *conga*, *tumbadora*, *quinto* or *salidor* (in order of decreasing size and rising pitch) as well as *claves* and the *palitos* or *cáscara* (Literally 'shell', this term refers to the wooden extension of a drum, a wood block or another resonant object beaten with sticks). Rumba can also be performed on wooden boxes (*cajones*) or other instruments instead of drums. In contrast to *batá* performance, it is the highest drum in the rumba ensemble which improvises, and the lower drums, along with the *clave* and *cáscara*, which provide the more static musical texture.

Numerous antecedent genres are mentioned in the literature (for example *tahona*, *papolote*, *yuka*, *calinda*) and new forms are constantly emerging. Three major subgenres are most commonly found today: the *yambú*, *guaguancó* and *columbia*, each associated with distinct rhythms and body movements. The *yambú* and *guaguancó* are couple dances. *Yambú*, an older form, is performed at a slower tempo and involves mimetic gestures characteristic of the 19th-century rumba (*rumba del tiempo de España*). *Guaguancó*, probably the best-known variant, has inspired many commercial dances in cabarets and theatres. The choreography represents a stylized form of sexual conquest suggested by pelvic thrusts from the male dancer (referred to as the *vacunao*) and covering of the groin by the female (the *botao*). *Columbia* is a fast, virtuoso male solo dance associated with secret brotherhoods (*abakuá* or *ñáñigo* groups, a tradition derived from Efix culture).

2. Batá okónkol (small waisted drum) (Museo Nacional de la Música, Havana)

Comparsa (or conga) music represents yet another Afro-Cuban genre which has had a significant impact on national traditions. *Comparsas*, groups of primarily Afro-Cuban street musicians that perform in street parades, developed around the beginning of the 20th century. They derive from 19th-century ensembles of slaves and free blacks who were allowed to perform their *tango congo* music publicly on Epiphany (*El Día de Reyes*) each year. This event was specifically for black Cubans, who were often not allowed to participate in Carnival. At the conclusion of the Wars of Independence (1868–98), Carnival finally became a more ethnically integrated event. Controversies over the *comparsas* continued for many years, however, and bands were actually barred from participation in Carnival again from 1914 to 1936.

While *comparsas* in the 19th century tended to be organized by *cabildo* (societies representing particular African ethnic groups), those in the 20th century have been organized by city district. Neighbourhoods with well-known *comparsas* in Havana include Belén, Atarés, Jesús María and Cayo Hueso. Each *comparsa* has its own theme song as well as dance movements and costumes. Instruments are often made at home by participants or improvised from inexpensive materials. They include stave drums (made with long strips of wood) of various shapes and sizes, bells, frying pans, tyre rims, trumpets and other brass instruments, as well as the *corneta china* (a double-reed aerophone brought to Cuba by Chinese indentured servants). Through the 1940s, *comparsas* were frequently hired by Cuban politicians in an attempt to attract black voters. Dance band 'salon congas' inspired by street *comparsas* began to achieve popularity in Cuba and abroad in the 1930s.

2. Popular genres.

(i) Ballroom music. European ballroom genres have been danced in Cuba for centuries (e.g. the minuet, gavotte, quadrille and waltz) and over the years have blended with Afro-Cuban influences to produce new styles. Among the first syncretic ballroom genres to gain popularity in the early 19th century were the *contradanza* and *danza*, fusions of predominantly European musical forms with light percussive accompaniment and featuring an isorhythmic pattern brought to Cuba by Haitian refugees in the 1790s. This pattern is known as the *cinquillo* (ex.1). The growing popularity of the *contradanza* and *danza* met with fierce opposition by many middle-class critics who denounced the *cinquillo* as a 'savage Africanism'. The *danzón*, direct successor to these genres, encountered similar opposition a few decades later. Considered by many to be the first widely popular form of national music, it developed among the black and mulatto middle classes of Matanzas province in the 1870s. Band leader Miguel Faílde (1852–1921) is especially remembered as one of its important innovators.

Ex.1 *Cinquillo* rhythm, typically played on *danzón clave*

Danzones remained controversial for many years because of the *cinquillo* pattern, the predominance of Afro-Cuban musicians performing them, and their incorporation of couple dancing, which was then a new practice in Cuba and considered immoral. Little distinguishes the *danzón* from the *contradanza* and *danza* in a musical sense; its uniqueness lies primarily in its complex choreography, involving a number of distinct steps: the *paseo*, *cadena*, *sostenido* and *cedazo*. *Danzón* structure most typically consists of a rondo (*ABACAD*). Its popularity is closely associated with the Wars of Independence in Cuba and nationalist sentiment generated during the struggle for autonomy from Spain. The *danzonete* and *chachachá* of the 20th century are fusions of the *danzón* with influences from the *son*, as is the repertory of the *charanga* band. The ensembles performing mid-19th-century ballroom music were known as *orquestas típicas*. Their instrumentation included *güiro* (a gourd scraper; fig.1*c*), *timbal* (derived from the drums of Spanish military bands), clarinet, cornet, trombone, bassoon and tuba. At the turn of the century, the flute, piano, string bass and violins began to replace the aforementioned wind instruments.

(ii) Blackface theatre. Variously called *teatro bufo*, *teatro criollo*, *teatro vernáculo* or *teatro de variedades*, blackface theatre developed largely from Spanish theatri-

Ex.2 Typical *son* figurations

cal forms such as the *tonadilla* and from North American minstrelsy. While not discussed at length in most literature, blackface shows were the most popular forms of entertainment from the 1860s to at least the 1920s. Almost invariably, character interaction on stage took place in the working-class neighbourhood or urban slumhouse (*solar*). Standard characters included the comic black man (*negrito*), the light-skinned black woman (*mulata*) and the Spanish shopkeeper or businessman (*gallego*). Parodies of traditional Afro-Cuban rumba, *comparsa*, *son*, and *guaracha*, played by Western orchestral ensembles, represented the mainstay of musical accompaniment. The cornet, violin, clarinet, acoustic bass, keyboard and *timbal* were among the instruments most commonly employed.

(iii) Sentimental song genres. As is the case in most other Latin American countries, a significant amount of popular music in Cuba has tended to be slow sentimental song rather than dance music. Sentimental genres include the *canción*, *bolero* and *trova tradicional* (also known as *vieja trova*). They are characterized by extended chromatic harmonies, moderate duple metre, stylistic influences from German Lieder or Italian light opera and lyrics alluding to love or personal relationships. A number of turn-of-the-century habanera compositions are also essentially love songs, although the genre was initially intended for dancing. Cuba's *vieja trova* tradition is of particular interest, as it involved primarily black and mulatto working-class performers in Santiago de Cuba with no formal training who nevertheless demonstrated strong art music influences in their compositions.

Operatic influences are also apparent in the many popular *zarzuelas* (nationalist light operas) which first gained popularity at the turn of the century, and remain well represented. Cuban *zarzuelas* derive from the Spanish genre of the same name but their plots are based on themes and imagery specific to Cuba. The works tend to be set in the 19th century and revolve around white and black male suitors competing for the love of a mulatto woman. The peak of their popularity came in the 1920s and 30s during a movement concurrent with (and in some respects similar to) the Harlem Renaissance and known as *afrocubanismo*. Famous Cuban *zarzuela* composers include Ernesto Lecuona, Jaime Prats and Gonzalo Roig.

(iv) Son. The Cuban Son (not to be confused with its Mexican counterpart) and the Salsa music derived from it are recognized to be among the most important forms of Caribbean music of the 20th century. The scope of their international influence rivals that of reggae, blues and rock. *Sones* are highly syncretic, representing a fusion of African and Hispanic cultural influences. In the 1920s they became an important symbol of national identity in Cuba, although they originated as a regional music in the province of Oriente. *Son* is difficult to define precisely, as numerous sub-classifications exist (e.g. *son montuno*, *changüí*, *sucu-sucu*, Guaracha, *conjunto* format and Mambo), as well as hybrid forms which fuse *son*-derived characteristics with other musics (e.g. *son-guajira*, *son-pregón*, *guaracha-son* and *afro-son*). Structurally, traditional *sones* tend to be in duple metre, based on simple European-derived harmonic patterns (I–V, I–IV–V) and alternate initially between verse and chorus sections. Short instrumental segments performed on *tres* (folk guitar) or trumpet are also frequently included between strophic repetitions. The *montuno*, the final section of most *sones*, is performed at a faster tempo and involves relatively rapid alternations between a chorus and an improvising vocal or instrumental soloist. Phrases in this section are generally referred to as *inspiraciones*. The cyclical, antiphonal and highly improvisatory nature of the *montuno* bears a striking similarity to the formal organization of many traditional West African musics, whereas the initial strophic sections of *sones* (known as *canto* or *tema*) more closely resemble European musics.

Acoustic *sones* employ various instruments including the *tres*, guitar, maracas (fig.1*d*, bongo drum, *güiro* and *botija* (jug bass), *marímbula* (large lamellophone) or acoustic bass. Modern dance bands often use an electric bass, substitute electric keyboard for the guitar and *tres* and add conga drums (*tumbadoras*) and *timbales* as well as a horn section. *Son* lyrics utilize European-derived poetic forms such as *coplas*, *cuartetas* and *décimas*. Among the most distinctive musical characteristics of the genre are its prominent *clave* pattern, highly syncopated figures played by the *tres* and/or keyboard which outline the chordal structure of the piece, a tendency for the guitar strum and bongo to emphasize the fourth beat of the bar more strongly than the first and a unique bass rhythm accenting the second half of the second beat and the fourth beat of the bar, generally referred to as an anticipated bass (ex.2). The syncopated bass pattern of the *son* as well as its ambivalent stress pattern has been fundamental to the creation of modern salsa.

With the exception of some *música guajira*, *canciones*, *traditional trova* and boleros, virtually all Cuban music contains a repeating figure known as *clave* which provides a rhythmic foundation to the piece. The term *clave* is confusing since it can refer both to a diversity of characteristic two-bar rhythms as well as to the concussion sticks on which some *clave* rhythms are performed. In a

more general sense, the phrase 'being in *clave*' is used to imply the awareness of a *clave* time-line (not necessarily performed) which relates musicians' rhythmic and melodic performance to one another. The *clave* patterns of Afro-Cuban religious repertory, often performed on a bell or other metal object, tend to be in 6/8 time, while those in secular genres are more frequently in duple metre.

3. Music in socialist Cuba. The political changes resulting from the socialist revolution in 1959 have had a dramatic impact on Cuban musical activity. Support of culture and the arts in various forms has been a priority for the government; the ENA (Escuela Nacional de Arte) and ENIA (Escuela Nacional de Instructores de Arte) were created by the Castro government in 1961 at almost exactly the same time as the Bay of Pigs invasion. As in the case of most Marxist states, culture has been highly politicized in Cuba. Countless forms of musical expression have flourished on the generous support of government agencies while others have been marginalized, censored and persecuted. The musical panorama is complex and contrasts attributes such as free education, health care and relatively high salaries for many performers with limitations on personal expression, lack of adequate materials for study and difficulty in travelling. It must be emphasized, however, that artistic activity in general increased after 1959 and that the island continues to produce performers of exceptional quality.

One of the best-known forms of musical expression associated with revolutionary Cuba is referred to as *nueva trova*. The term *trova* derives from *trovador* (troubadour), a name given to early 20th-century guitarist composers. *Nueva trova* is a form of protest music incorporating stylistic influences from Cuban traditional and popular genres, jazz, rock, European classical music and other sources. It emerged as a recognizable movement in the late 1960s among younger performers, although its direct antecedents can be found in compositions by Carlos Puebla, Eduardo Saborit and traditional *trova* artists. *Nueva trova* represents part of a pan-Latin American protest song phenomenon which extended to the USA and Europe.

Song lyrics of the *nueva trova* repertory vary in style but represent an attempt to escape from commercial banality, often referring to political injustice, sexism, colonialism and related issues. Pablo Milanés, Silvio Rodríguez, Noel Nicola, Pedro Luís Ferrer and other early figures appeared on stage in street clothes and in other ways minimized the divide between performer and audience. Far from being wholeheartedly embraced by the establishment, *nueva trova* artists throughout the mid-1970s maintained a tense relationship with government officials who considered their long hair, 'hippie' clothing and interest in rock a manifestation of capitalist decadence. By the late 1970s, however, many of the same artists had achieved widespread support and were transformed into international icons of socialism. Later Cuban protest singers, including Carlos Varela, Amaury Pérez and Gerardo Alfonso, have been more heavily influenced by rock and have criticized government policies more openly than their established counterparts.

After the onset of economic crisis in 1989, musicians actively sought recording and touring contracts abroad, making their work more internationally accessible. Circumventing the American economic embargo in various ways, both they and the Cuban communist party used music as a means of generating hard currency after the collapse of the Soviet Union. Jazz artists on the island (and in exile) have received widespread recognition for their excellence, as have dance bands. Groups such as Los Van Van and Angelitos Negros experiment with international influences including rap, hiphop and Brazilian music, and combine them with Cuban genres in innovative ways. Unique fusions of Afro-Cuban religious drumming and song with *son*, salsa and rumba have become quite common in the wake of liberalized policies towards religious practitioners. Cuba continues to be a dynamic site of musical creation despite the severe economic hardships and political isolation experienced by its people.

GERARD BÉHAGUE (I), ROBIN MOORE (II)

Cuberli [Terrell], **Lella** (*b* Austin, TX, 29 Sept 1945). American soprano. She studied at Dallas, where, as Lella Terrell, she sang Kate (*Madama Butterfly*) and Inès (*La favorite*) in 1970–71. After further study in Milan she sang Anne Trulove at Siena in 1973 and for some years pursued her career mainly in Italy. At Martina Franca (1976–82) she sang Amenaide (*Tancredi*), Adalgisa (*Norma*) and Paisiello's Nina and Rosina. At La Scala (1978–84) she sang Konstanze (*Entführung*), Amyntas (*Il re pastore*), Ginevra (*Ariodante*), Rodelinda and Giunio (*Lucio Silla*). Her other roles at the major Italian opera houses have included Donna Elvira, Fiordiligi, the title role of *Elisabetta, regina d'Inghilterra*, Lucia, Bellini's Giulietta, Verdi's Desdemona, Mélisande and Countess Almaviva, a part she also sang at Aix-en-Provence, Salzburg and Vienna. In Brussels she sang Violetta (1987) and Rossini's Desdemona (1994). Returning to the USA, she made her débuts in Chicago (1989) as Amenaide, and the Metropolitan (1990) as Semiramide. She made her Covent Garden début in 1990 as Mathilde (*Guillaume Tell*), then sang *Anna Bolena* in Madrid (1991) and Donna Anna in Salzburg (1994), a role she has recorded with Barenboim. Although Cuberli's beautiful voice is not large, it is firmly produced, flexible and used with impeccable style, especially in Mozart and Rossini.

ELIZABETH FORBES

Cubop. *See* AFRO-CUBAN JAZZ.

Cuclin, Dimitrie (*b* Galaţi, 24 March/5 April 1885; *d* Bucharest, 7 Feb 1978). Romanian composer, theorist and writer. At the Bucharest Conservatory (1903–7) he studied theory and solfège with Kiriac-Georgescu, composition with Castaldi and the violin with Robert Klenck. He continued his composition studies in Paris, with Widor at the Conservatoire (1907) and with d'Indy and Sérieyx at the Schola Cantorum (1908–14). Back in Bucharest he was made professor of aesthetics and composition at the conservatory (1919–48) and he was also active as a music critic, founding and editing the review *Foaia volantă* (1932–3). Between 1924 and 1930 he was professor of violin at the City Conservatory of Music in New York and at the Brooklyn College of Music.

His literary activities extended to translating opera and oratorio texts into Romanian and writing plays, novels, poems and opera texts in Romanian, French and English. Among his extensive theoretical writings, the valuable treatise on music aesthetics received a Romanian Academy prize (1934). As a composer he has remained an isolated figure, partly as a result of his involved philosophical style, partly because of the huge forces demanded by his operas and symphonies. The first 14 symphonies are organized into a coherent tonal cycle; the later ones have contemplative programmes on life, death, human fate, etc. Each symphony follows a similar form: action, reaction, meditation, triumph of action over reaction. Cuclin's chamber pieces are closer to Romanian folksong, though the modal melodies are transformed diatonically. His most brilliant writing is in the suites for solo violin.

WORKS
(*selective list*)

Ops: Soria (madrigal op, 5, Cuclin), 1911; Traian şi Dochia (4, Cuclin), 1921; Agamemnon (5, Cuclin after Aeschylus), 1922; Bellérophon (4, Cuclin), 1925; Meleagridele (prol, 3, epilogue, Cuclin), 1958, Bucharest, Rom. TV, 1980

VIOREL COSMA

Cucu, Gheorghe (*b* Pueşti-Tîrg, Vaslui district, 11/23 Feb 1882; *d* Bucharest, 24 Aug 1932). Romanian composer and conductor. He studied in Bucharest at the school for church choristers and then at the conservatory (1899–1905), where he was a pupil of Gheorghe Brătianu (theory and solfège), Kiriac-Georgescu (harmony, counterpoint and choral conducting) and Wachmann (harmony); he also studied counterpoint with d'Indy at the Schola Cantorum in Paris (1908–11). After experience with various church choirs in Bucharest he took appointments as conductor at the metropolitan church (1912–32) and of the Carmen Society (1912–28); he also taught harmony at the conservatory (1918–32) and the Academy of Religious Music (1928–32). From his pupils he gathered a vast collection of folk music, which he later published and used in compositions, particularly carols and love songs. In these he sublimated a mastery of classical counterpoint into a folk-type heterophony, as simple as it is original. With Enescu he was one of the most distinguished Romanian melodists, drawing on ancient psalm intonations as well as folk music. His masterpiece, *Nu pricep, Curată* ('I Cannot Understand, Curată'), is a synthesis of the Romanian–Byzantine style of the first half of the 20th century; it paved the way for such large-scale religious works as Constantinescu's oratorios.

WORKS
(*selective list*)

Choral: Ursitoarea [The Fate] (trad.), 1907; Mincinosul [The Liar] (I.U. Soricu), 1910; Nu pricep, Curată [I Cannot Understand, Curată], B, chorus, ?1920; Cîntările sfintei liturghii [Chants of the Holy Liturgy], 1920–32; Haz de necaz [Grin and Bear it] (trad.); Om fără noroc [The Unlucky Man] (trad.); Coruri pe teme populare româneşti (1932)

Solo vocal: Maintenant que je t'ai revue (N. Hârjeu), 1910; Monodie (Ronsard), 1910; Cîntecul codrului [The Song of the Woods] (S.O. Iosif)

Folksong arrs.: 12 colinde populare (1924); Colinde populare (1928); 200 colinde populare, ed. C. Brăiloiu (1936)

VIOREL COSMA

Cucuel, Georges (*b* Dijon, 14 Dec 1884; *d* Grenoble, 28 Oct 1918). French musicologist. After schooling in Montbéliard and at the Lycée Louis-le-Grand in Paris he attended the Schola Cantorum and the Sorbonne, where he was a pupil of Rolland and took his doctorate in 1913 with a dissertation on La Pouplinière and 18th-century chamber music, as well as a subsidiary on the 18th-century orchestra. He was subsequently given a government grant to do research in Italy on *opera buffa*, but this was interrupted by the outbreak of war, his conscription and his death from influenza at the Grenoble military hospital. He established his reputation as a major scholar of 18th-century music in his many articles, his dissertations and his book on the origins of French comic opera, all based on thorough knowledge and full of detailed information, expressed with elegance and concision. He left an account of 18th-century aristocratic musical life in Italy drawn from documents in Rome, Florence and Naples (*Feste musicali italiani del 700*) ready for publication at the time of his conscription.

JEAN GRIBENSKI

Cudworth, Charles [Cyril Leonard Elwell] (*b* Cambridge, 30 Oct 1908; *d* Cambridge, 26 Dec 1977). English writer on music. Largely self-taught, he worked in various university departments and libraries from 1930; his musical studies were particularly encouraged by E.J. Dent. He was appointed assistant in the music section of the University Library, Cambridge, in 1943 and librarian of the Pendlebury Library at the University Music School in 1946, becoming curator in 1957; in the following year the honorary MA was conferred on him by the University of Cambridge. He retired in 1973.

Cudworth's interests ranged wide. He lectured and wrote on architecture and local history, and wrote novels and plays as well as librettos for musical treatment by Patrick Hadley (*Fen and Flood*, 1954; *Connemara*, 1958). His scholarly interests focussed on the 18th century and especially on British music, where his work on the keyboard concerto and the symphony opened up new areas of study; but he also worked on the links between music and literature, while his careful research on questions of attribution and authenticity solved many outstanding problems (it was he who established that 'Purcell's Trumpet Voluntary' was by Jeremiah Clarke). Cudworth was a prolific writer of criticism and record sleeve notes as well as a frequent and skilful broadcaster. Many generations of Cambridge music students are indebted to him for his generous and friendly assistance and counsel.

STANLEY SADIE

Cue (from Fr. *queue*: 'tail'). At the end of a series of rests in a vocal or instrumental part, in a concerted work, a prominent phrase from another part may be printed as a 'cue': it is designed to help the performer to enter at the correct point. It is normally printed in small notes (ex.1).

Ex.1

Orchestral parts are sometimes 'cued' so that music written for a larger band may be played by a smaller one. Solo parts for wind instruments may be cued into the string parts, for example, or a bass clarinet phrase may be cued into the bassoon part.

□

Cuéllar y Altarriba, Ramón Félix (*b* Zaragoza, 20 Sept 1777; *d* Santiago de Compostela, 7 Jan 1833). Spanish composer and organist. While a chorister in the metropolitan church of La Seo, Zaragoza, he studied with the *maestro de capilla*, Francisco Javier García Fajer, known as 'Lo Spagnoletto'. Cuéllar succeeded him as *maestro de capilla* in 1812 as the result of a competition. In 1815 he was appointed an honorary musician of the royal household to Fernando VII and in 1817 he was unanimously acclaimed the winner of a competition for the post of *maestro de capilla* at Oviedo Cathedral. Because of his liberal ideas he was forced to leave this position in 1823, fleeing to Madrid and taking refuge with one of his disciples, a singer in the cathedral there. For five years Cuéllar lived in poverty, finally obtaining in 1828 the position of first organist at the basilica of Santiago de Compostela, where he remained until his death. Cuéllar composed mostly sacred music in the Italian style promoted by García and his school. He enjoyed considerable renown throughout the 19th century in Spain. After a performance of one of his masses, a reviewer in the *Gaceta musical de Madrid* (11 Jan 1866) spoke of 'the inimitable grace of its melodies', phrases which 'portray the majesty of God' and asked 'Is there any mass more perfect than that of Cuéllar?'

WORKS

GUY BOURLIGUEUX

Cuénod [Cuenod], **Hugues** (**Adhémar**) (*b* Corseaux-sur-Vevey, 26 June 1902). Swiss tenor. He studied in Geneva, Basle and Vienna, making his stage début at the Théâtre des Champs-Elysées in Paris in 1928. He has appeared in many character roles in the main opera houses. He created the role of Sellem in Stravinsky's *The Rake's Progress* (1951, Venice) and sang the Astrologer in *The Golden Cockerel* (1954, Covent Garden). He made his Glyndebourne début in 1954 as Sellem, going on to sing over 470 performances there, his roles including Don Basilio, the travesty parts of Erice and Linfea in Cavalli's *L'Ormindo* and *La Calisto*, Triquet (*Yevgeny Onegin*) and the Cock (*The Cunning Little Vixen*). He sang Triquet in Geneva in 1986, and in 1987 (aged 85) made his Metropolitan Opera début as Emperor Altoum (*Turandot*). A cultivated musician with a wide command of languages, he made pioneering discs of Monteverdi under Nadia Boulanger (1937–9), and also made outstanding recordings of lute-songs, of Couperin, and of the Evangelist in Bach's *St Matthew Passion*. He was a fine interpreter of lieder and used his high, light tenor with exquisite taste in all the music he performed. On stage his interpretations were full of humour, where that was called for, and he was also a master of the grotesque.

ALAN BLYTH

Cugat, Xavier [Cugat Mingall de Bru y Denolfeo, Francisco de Asis Javier] (*b* Gerona, 1 Jan 1900; *d* Barcelona, 27 Oct 1990). Spanish bandleader, violinist and arranger, active in America. Cugat's family moved to Cuba when he was five. A child prodigy, he was playing the violin in Havana cafés by the age of seven or eight, and later studied formally in Berlin and peformed with the Berlin PO. He arrived in New York City in 1921 and formed a tango orchestra, and then moved to Hollywood, taking up a life-long hobby as caricaturist before returning to New York with a contract at the Waldorf Astoria Hotel in 1930. Despite his European origins, Cugat became the most commercially famous name in Latin music during the 1930s and 40s, especially among non-Latino North Americans, and his Latin orchestra remained resident at the Waldorf Astoria through the next decade.

Cugat did not pretend to perform authentic Latin American music, yet his lush orchestral arrangements helped popularize Cuban and other Latin American sounds in mainstream North America, earning him the title of the 'King of the Rhumba'. Among his most famous recordings are *Para vigo me voy* (*Say Si! Si!*), *Bim-bam-bum*, *Aquellos ojos verdes*, *Siboney*, *La paloma*, *The Lady in Red* and his signature tune, *Ombo* (*My Shawl*). Cugat is said to have appeared on more film footage than any other American bandleader, and his Hollywood credits include film musicals such as *Gay Madrid* (1930), *Go West Young Man* (1937) and *You Were Never Lovelier* (1942), in addition to performances alongside Bing Crosby, Desi Arnaz and Carmen Miranda. Most importantly, Cugat's orchestra became a training ground for several Cuban and American artists, including Machito, Miguelito Valdés, Tito Rodriguez, Esy Morales, Rita Hayworth, Dinah Shore and Cugat's wife, Abbe Lane.

LISE WAXER

Cui, César [Kyui, Tsezar' Antonovich] (*b* Vilnius, 6/18 Jan 1835; *d* Petrograd [St Petersburg], 26 March 1918). Russian composer and critic of Franco-Lithuanian descent. His father, an officer in the French Army, remained in Russia after Napoleon's retreat from Moscow in 1812, married a Lithuanian, Julia Gucewicz, and lived at Vilnius, where he taught French at the gymnasium. César received his early general education there, at the same time studying the piano. After a few months of harmony and counterpoint lessons from Moniuszko he entered the Engineering School at St Petersburg in 1851, and later studied at the Academy of Military Engineering (1855–7); on graduating he was appointed lecturer, and in 1879 professor. He was an acknowledged expert on fortifications, and his writings on the subject were widely acclaimed.

Cui decisively entered into the musical life of St Petersburg in 1856, when he met Balakirev; in 1857 he was also introduced to Dargomïzhsky, and subsequently became friendly with all the members of The Five. Like them, he was much influenced by Balakirev, though his works seem not to have come in for such despotic treatment as some of theirs. Balakirev did, however, help Cui with his orchestration. He may have supervised the orchestration of Cui's two earliest numbered works, the piano scherzos of 1857 (the first was based on the notes B–A–B–E–G – derived from the surname of his wife, Mal'vina Rafailovna Bamberg; the second bears the inscription 'à la Schumann'), and he certainly had a hand in the scoring of the overture to Cui's first opera

César Cui

Kavkazskiy plennik ('A Prisoner in the Caucasus'), which is to a libretto, based on Pushkin, by Viktor Krïlov, a fellow student of Cui's at the military academy. The initial two-act structure of the opera (1857–8), coupled with Cui's inept orchestration, caused a timely première to be cancelled; but he composed a new, central act in 1881–2, and in this form the opera was first given at the Mariinsky Theatre in 1883. (Around this time the Belgian Countess Louise de Mercy-Argenteau, a patron of Russian music in the West who was to become Cui's earliest biographer, became interested in his music, secured the first performance of the opera abroad, with an expanded second act, at Liège in 1886.) Krïlov was also responsible for the libretto for Cui's second stage work, the comic opera *Sïn mandarina* ('The Mandarin's Son'), composed in 1859 and also at least partly orchestrated by Balakirev.

Two years later Cui began his finest large-scale composition, the opera *Vil'yam Ratklif* ('William Ratcliff'), adapted from Pleshcheyev's verse translation of Heine's play; it occupied Cui until 1868 and was given at the Mariinsky the following year. In the partisan musical climate of Russia the mixed critical reception was to be expected: Laroche and Serov were hostile, Cui's friends were more appreciative. Rimsky-Korsakov, for example, writing in the *Sanktpeterburgskiye vedomosti* (where he was substituting for Cui, who had been music critic of the paper since 1864), commented on the impact of the narratives, though he also mentioned the poor theatrical effect of having four such lengthy numbers; and Balakirev, although he is known to have marked a copy of the score with sarcastic comments, also was enthusiastic about it. Stasov dubbed it 'one of the most important compositions of our time'; Musorgsky remarked that 'not once has it disappointed our expectations'. Again, though, there was general discontent with the orchestration: Balakirev thought it amateurish; and Rimsky, who with Balakirev had orchestrated portions of *William Ratcliff*, noted its clumsiness and virtually offered to reorchestrate the entire score. Despite its charm, its fine characterization (particularly of Mary, her father, Lesley and Margaret), much music that reveals a dramatic flair, and a revival in Moscow in 1900, *William Ratcliff* has never gained a place in the repertory.

Not that this discouraged Cui from embarking on other opera projects. In 1869, in response to a request made by Dargomïzhsky before he died in January that year, Cui completed *The Stone Guest*, a work to which he was fanatically devoted; and in 1872 he composed the first act for the (abortive) opera-ballet *Mlada*, written in collaboration with Rimsky-Korsakov, Borodin, Musorgsky and Minkus. At the same time (1871–5) he was also working on the four-act opera *Andzhelo*, with a libretto by Burenin, after Hugo. Similarly, his two next operas were based on French literature: *Le flibustier* (1888–9; libretto by Jean Richepin from his own play) and *Saratsin* ('The Saracen', 1896–8, after Dumas' *Charles VII chez ses grands vassaux*), though he returned to a Russian author for the one-act *Pir vo vremya chumï* ('A Feast in Time of Plague', 1900), a setting of one of Pushkin's 'little tragedies'. A Pushkin story also provided the material for the last of his full-length operas, *Kapitanskaya dochka* ('The Captain's Daughter', 1907–9), which was preceded by two more operas on French works, *Mademuazel' Fifi* (1902–3, after Maupassant and Méténier) and *Mateo Fal'kone* (1906–7), a 'dramatic scene' after Mérimée and Zhukovsky. Towards the end of his life he pioneered in the composition of four children's operas and completed the first performing version of Musorgsky's *Sorochintsï Fair* (given at the Petrograd Music Drama Theatre on 13/26 October 1917).

In those last years the large number of stage works was more than matched by a vast output of vocal and instrumental miniatures, made possible in no small way by Cui's nearly complete retirement as a critic: for nearly four decades he had contributed copiously to many journals and newspapers, including the *Sanktpeterburgskiye vedomosti* (1864–77), *Novoye vremya* (1876–80, 1917), *Nedelya* (1884–89, 1895), *Novosti i birzhevaya gazeta* (1896–1900), *Revue et gazette musicale de Paris* (1878–80) and others. Both in his reviews and in his book *La musique en Russie* (1880) Cui was a fervent supporter of the ideals of The Five, which included among other things realism, dramatic truth and faithful declamation; and his approach sometimes made him blind to the shortcomings of his favoured music and to the merits of music written by composers outside his coterie. He was averse to the music of Tchaikovsky and Anton Rubinstein; and on them, as on others, he frequently vented a caustic wit: he likened Rachmaninoff's First Symphony, for example, to 'a programme symphony on the Seven Plagues of Egypt' (*Novosti i birzhevaya gazeta*, 17/29 March 1897). He was also known to turn on his friends: on 6/18 February 1874 he published in the *Sanktpeterburgskiye vedomosti* a malicious notice of the first complete performance of Musorgsky's *Boris Godunov*. (Later in life, however, Cui championed his comrade's works.)

As with some other composer-critics, Cui's own music often contrasts strikingly with the principles he advocated

in his writings; but in relation to his operas he offered the explanation (in a letter to Felipe Pedrell of 22 June 1897):

Un sujet russe d'opéra m'irait pas du tout. Bien que russe, je suis d'origine mi-française, mi-lithuanienne et je n'ai pas le sens de la musique russe dans mes veines. . . . C'est pourquoi à l'exception de mon premier opéra *Le prisonnier du Caucase*, tous les sujets de mes opéras sont et seront étrangers.

In the first act of *A Prisoner in the Caucasus* there are certainly some Russian inflections, but Cui expressed a veritable fear of strongly Russian subjects, a fear that he bravely tackled, if not with complete success, in *The Captain's Daughter*.

Although Auber and Meyerbeer are usually cited as influences on Cui's stage music, his works generally lack the italianate vocal display, rhythmic drive and spectacular stage effects associated with the French masters. The intimacy of much of his operatic music has been criticized as derived all too much from the solo song and therefore lacking in suitable dramatic depth, especially for a four-act work. In *William Ratcliff* he took up the ideas of 'musical realism' and 'melodic recitative' that are prominent in *The Stone Guest*, though, as in *Boris Godunov*, these stark elements are tempered by lyrical melody, and the recitative often dissolves into iterative arioso. But Cui is known chiefly as a miniaturist. In spite of a sonata and three string quartets to his credit, by far the largest part of his music consists of songs and short chamber and piano pieces, in which he displayed the fascination with Chopin that had been with him since his childhood, and also his ability to crystallize a particular mood or to express succinctly the sentiments of a poem.

In addition to accolades and promotion in his military teaching career, Cui was named a member of the Institut de France in 1894; he was honoured with jubilee celebrations for the 25th anniversary of *William Ratcliff* in the same year and for his 50th year as a performed composer in 1909. During the period 1896–1904 he served as officiating director of the St Petersburg division of the Russian Music Society. In addition to his writings on music he published a number of books on military fortification.

A renewed interest in Cui in the late 20th century is attested by various stagings of *Puss-in-Boots* in Germany, a revival of *The Madarin's Son* in Moscow (1998) and one of *Feast in Time of Plague* by the Tchaikovsky Opera in Perm' in 1999.

WORKS

Most published in Cui's lifetime by Bessel, Belyayev, Heugel, Leduc and Jurgenson

Note: according to Nazarov and Gaub, there is a 'Bol'shoy notnïy al'bom' [Large music album] in *RUS-SPsc* containing early works (to 1856)

STAGE

autograph scores of works first performed at St Petersburg, Mariinsky Theatre, in RUS-SPtob

GEOFFREY NORRIS/LYLE NEFF

Cui [née Bamberg], **Mal'vina Rafailovna** (*b* ?St Petersburg, 1836; *d* ?St Petersburg, 1899). Russian amateur singer. The daughter of a physician of German ancestry, she studied singing with Dargomïzhsky; in the 1850s she became acquainted at his home with César Cui, whom she married in 1858. In 1859 she took the lone female role in a domestic performance of Cui's only comic opera, *The Mandarin's Son*, in which Cui and Musorgsky also participated. During the 1860s she helped Cui run a preparatory boarding-school for boys destined for training in military engineering; the move, though necessary for financial reasons, delayed Cui's composition of *William Ratcliff*. In 1869, during a visit to Dresden, Mal'vina negotiated with the music publisher Röder to print the vocal score of *William Ratcliff*, whose German singing text may also have owed much to her. Cui dedicated several works to her, including the Scherzo for piano op.1, the Pushkin and Lermontov songs op.33 and *The Mandarin's Son*.

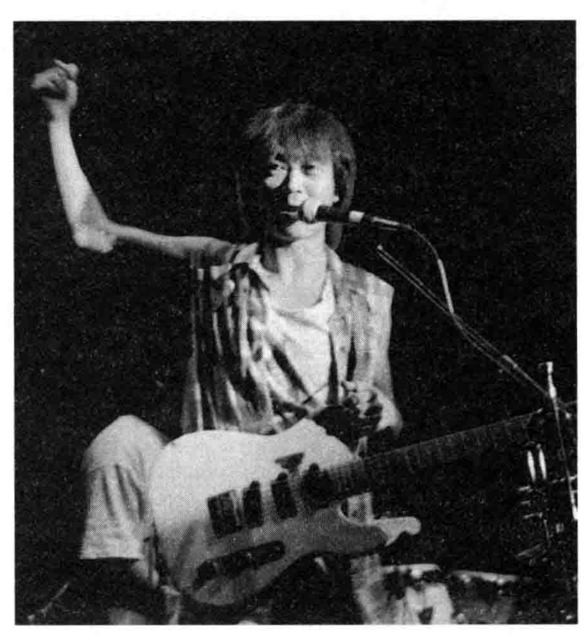
LYLE NEFF

Cuíca [puíta]. Brazilian FRICTION DRUM with a remarkable pitch range. A wooden stick, fastened at one end inside a drum in the centre of the drumhead, is rosined and rubbed with a cloth. The instrument's large range is produced by changing tension on the head by pressing with the hand. Its origin is difficult to determine. It was introduced into Brazil probably by Bantu slaves, but it has also been known in Spain for centuries and is believed to have been brought to sub-Saharan Africa by Muslims. The *cuíca* is used to accompany numerous folk and urban popular dances; for example, it may be part of the instrumental ensemble for the May *dança de Santa Cruz* (derived from Iberian tradition) or for the *moçambique* dramatic dance (*bailado*) in Minas Gerais, the other instruments of the latter ensemble being snare drum, *reco-reco* (scraper) and *xique-xique* (rattle). For Holy Cross dances and processions the accompaniment may be two *adufe* (tambourine) players, with occasionally an additional *cuíca* player and *güiros*. It is often used with other instruments in performances of São Paulo rural sambas when it joins an ensemble including *bombo* (large bass drum), snare drum, tambourine, *reco-reco* and *guaia* (shaken rattle).

JOHN M. SCHECHTER



Cui Jian (*b* Beijing, 2 Aug 1961). Chinese *Yaogun* (rock and roll) musician. Born of parents of Korean descent, Cui received music lessons at an early age from his father. In 1981 he joined the Beijing SO as a classical trumpeter. At the same time he began composing in the popular and rock idioms, after listening to music by the Beatles, Rolling Stones, Sting and Talking Heads. Cui is guitarist, vocalist and trumpeter of his own band. He became an icon of Beijing's youth culture in 1988, after a series of public performances. His compositions evolved in the following year, culminating in *Yiwusuoyou* ('Nothing to my Name'), for which he wrote the music and lyric.

Cui's music and vocal delivery, often cited as emblematic of Chinese youthful anger, epitomized the frustrations of the post-Cultural Revolution generation in China. His music continued to be distributed nationwide, and his band traveled to Europe and America for concert tours in the mid-1990s. Cui's band featured an array of Western and Chinese instruments, from *suona*, saxophone, trumpet and electric guitars to ritual gongs and cymbals.

JOANNA C. LEE

Cuivré (Fr.: 'ringing', 'sonorous'). The peculiar brassy tone from the horn, achieved by a slight tensing of the lips and an incisive attack. This can be done equally well on the open or stopped horn.

Cuivres (Fr.). *See* BRASS INSTRUMENTS.

Cukkerman, Viktor Abramovich. *See* ZUCKERMANN, VIKTOR ABRAMOVICH.

Culp, Julia (*b* Groningen, 6 Oct 1880; *d* Amsterdam, 13 Oct 1970). Dutch mezzo-soprano. She studied with Cornélie van Zanten and Etelka Gerster and made her début in 1901 in Magdeburg in a concert with Busoni. She never appeared in opera, and seldom in oratorio (though Henry Wood praised her in Elgar's *The Dream of Gerontius*), but was one of the first singers to specialize in lieder. As such she was pre-eminent, appearing in Germany, the Netherlands, England and, between 1913 and 1917, in the USA. She had a small but beautifully even and perfectly focussed voice, and worked wonders with delicate tone-shadings and the subtlest musical and textual details. Her distinctive art is preserved on a number of recordings, including the first *Frauenliebe und-leben* on disc. Although her style may seem old-fashioned she was a fastidious and eloquent interpreter, notable for perfect legato and sensitive nuance.

LEO RIEMENS/ALAN BLYTH

Culshaw, John (Royds) (*b* Southport, 28 May 1924; *d* London, 27 April 1980). English record and television producer. He studied music during his war service and had no formal training. In 1946 he began producing classical recordings for Decca. After a short spell with Capitol he returned to Decca in 1954 to become manager and chief producer, remaining in the post until 1967, when he became Head of Music Programmes for BBC Television, a post he held until 1975. While there, he was responsible for the television première of *Owen Wingrave*. After leaving the BBC, he was chairman of the music panel of the British Arts Council (1975–7) and worked as a freelance record producer and writer. At Decca he widened the scope of operatic recording in both a technical and an imaginative sense. His achievement there culminated in the recordings of Britten's operas under the composer's direction, and the first complete recording of Wagner's *Ring*, a project begun with *Das Rheingold* in 1959 and concluded in 1966. He has described the alarms and excursions of the undertaking in his frank and entertaining book, *Ring Resounding*. At the BBC he tried, with considerable success, to improve the presentation of music both in his own work, by encouraging other producers to experiment, and by broadening the scope of opera broadcasts.

ALAN BLYTH

Cummings, W(illiam) H(ayman) (*b* Sidbury, Devon, 22 Aug 1831; *d* London, 6 June 1915). English tenor, musical administrator and church musician. He was a chorister of St Paul's Cathedral, where in 1838 he sang at the funeral of the cathedral organist, Thomas Attwood. But Attwood's successor, William Hawes, treated the boys so harshly that Cummings's father found him a place in the choir of the Temple Church. He sang alto in the first London performance (16 April 1847) of *Elijah* under Mendelssohn. A few months later he became organist of Waltham Abbey on the recommendation of his teacher, E.J. Hopkins, the Temple organist. Cummings's adaptation of a theme from Mendelssohn's *Festgesang* (1840) to 'Hark! the herald angels sing' dates from this time. His love of singing outweighing his interest in the organ, he became tenor at the Temple Church and later at the Chapel Royal. His only singing teacher was J.W. Hobbs, a lay clerk at Westminster Abbey, whose daughter Clara he subsequently married. Until about 1880 he was one of the leading tenors in oratorio, where his 'wonted skill and good taste' and sound musicianship found ample scope in works such as Bach's *St Matthew Passion*. He also made two concert tours of the USA, the first in November 1871 with a small vocal ensemble that accompanied the famous English baritone Charles Santley.

In later years Cummings played an important part in many English musical institutions. He was a professor of singing at the RAM (1879–96) and served on the management committee. He also taught singing at the Royal Normal College and School for the Blind in London. From 1882 until its demise in 1888 he was associated with the Sacred Harmonic Society, first as chorus master and later (1885) as conductor; he appears to have been more successful with choirs than with orchestras. In 1896 he succeeded Sir Joseph Barnby to become the third principal of the GSM, where he modernized the curriculum; he retired in 1910. The foundation of the (now Royal) Musical Association and the Purcell Society owed much to Cummings's energies and skill in business matters, and the affairs of the Incorporated Society of Musicians, the Philharmonic Society and the Royal Society of Musicians profited greatly from his professional integrity and wide sympathies. He became a Fellow of the Society of Antiquaries in 1884 and was awarded an honorary doctorate of Trinity College, Dublin, in 1900.

Cummings's lifelong admiration for the music of Mendelssohn proved too strong an influence in his compositions for voice and chorus, which include an anthem, a morning service and a cantata, *The Fairy Ring*. His scholarly work, on the other hand, has retained much of its value. Although modern research has supplanted his biography of Purcell (1881) his editions for the Purcell Society and monographs on the national anthem (1902), Blow (1909) and Arne (1912) contain much fundamental information. Today Cummings is remembered chiefly for his magnificent music library. As early as 19 years of age he was collecting rarities as diverse as one of Handel's lace ruffles and autograph scores of Purcell and Beethoven; some 50 years later his superb library of some 4500 pieces had become the last of the great Victorian collections. In an article 'On the Formation of a National Musical

Library' (1877), Cummings had warned against the dispersal of important collections by auction, and it was a cruel mischance that precisely this misfortune befell his own treasures some 40 years later in London. (Some 400 volumes are now in *J-Tn*; 59 are in *US-Wc*.)

HUGH J. McLEAN

Cuncius, Christoph. *See* CONTIUS, CHRISTOPH.

Cunelier. Name under which JO CUVELIER is erroneously entered in *F-CH* 564.

Cunha, Brasílio Itiberê da (*b* Paranaguá, 1 Aug 1846; *d* Berlin, 11 Aug 1913). Brazilian composer and pianist. A career diplomat, he was largely self-taught in music. For many years he lived in Berlin, Rome and Brussels as minister plenipotentiary, and in Europe he made the acquaintance of the leading composers of the time, among them Liszt, who played his works, and Anton Rubinstein, to whom he dedicated the *Etude de concert* (Milan, n.d.), a paraphrase of C.P.E. Bach's *Solfeggietto*. In many other piano pieces, such as the *Nuits orientales* (Milan, n.d.), he tried to present a fashionable Romantic exoticism, but he is chiefly remembered for *A sertaneja* (1869), a piano fantasy based on urban popular music and one of the first Brazilian nationalist compositions.

GERARD BÉHAGUE

Cunha, João Itiberê da (*b* Curitiba, 8 Aug 1869; *d* Rio de Janeiro, 25 Feb 1953). Brazilian composer, poet and music critic. Like his brother Brasílio Itiberê da Cunha, he was an amateur musician. He studied law in Belgium for a diplomatic career; but after some experience as a diplomat, he decided to concentrate his activities on journalism, and particularly music journalism. For more than 40 years he was the music critic of the Rio newspaper *Correio da Manhã*, among others. He became an accomplished self-taught pianist and composer. Most of his best-known works are for piano, although his orchestral *Suite brasileira* became quite successful in the early 1950s. He showed a predilection for programmatic music and a clear liking for the subtlety and refinement of French impressionistic harmony. His best-known piano pieces include *Marcha humorística*, *Danse plaisante et sentimentale*, *Fête villageoise* and *Quatre portraits de vieux carnaval* ('Arlequin', 'Pierrot', 'Scaramouche', 'Polichinelle'), all written in a post-Romantic style. Other piano pieces reflect a certain interest in Afro-Brazilian secular and sacred dances. (L.H.C. de Azevedo: *150 anos de música no Brasil, 1800–1950*, Rio de Janeiro, 1956)

GERARD BÉHAGUE

Cunningham, G(eorge) D(orrington) (*b* London, 2 Oct 1878; *d* Birmingham, 4 Aug 1948). English organist. He studied at the RAM and became a FRCO at 18. He served his apprenticeship as a concert organist during his 17 years at the Alexandra Palace (1901–18); this experience gave his technique a fine edge, developed his musicianship and equipped him with a wide-ranging repertory from which he instinctively excluded all that was meretricious.

Cunningham did more than any of his contemporaries to advance the standing of the organ at a time when it was not highly regarded. As city organist of Birmingham from 1924 until his death, he gave weekly BBC midday recitals, which became a national institution. His well-chosen programmes were brilliantly performed, and his treatment of the orchestral transcriptions then in vogue showed impeccable taste. His 600th recital was celebrated on 10 June 1941 with a presentation to him by the Lord Mayor of Birmingham and in 1944 he was awarded the DMus by Birmingham University, where a research fund for postgraduate students in music perpetuates his name. Cunningham was a frequent solo performer in the Promenade Concerts, at the Queen's Hall and later at the Royal Albert Hall, and was one of the first organists to make records. As conductor of the City of Birmingham Choir he inspired fine performances of classical and contemporary works and did much to influence the younger generation of musicians as organ teacher and examiner at the RAM.

STANLEY WEBB

Cunningham, Merce (*b* Centralia, WA, 16 April 1919). American choreographer. *See* BALLET, §4.

Cuno, Johann. *See* KUHNAU, JOHANN.

Cuntius, Christoph. *See* CONTIUS, CHRISTOPH.

Cupis [De Cupis, Cuppis, Cuppi, Capi, Cappi] **de Camargo.** Franco-Flemish family of musicians. Active in Brussels and Paris, they originated in Rome, whence a branch emigrated to Brussels; the necrology for (2) Marie-Anne Cupis (the most famous member of the family) in the 1771 edition of *Spectacles de Paris* traces the name 'Camargo' to the Spanish wife of her grandfather Cupis. The Brussels Bibliothèque Royale contains an important manuscript (MS 1266) on the Cupis family.

(1) **Ferdinand-Joseph Cupis** [de Camargo, Ecuyer Seigneur de Renoussant] (*b* Brussels, bap. 29 Feb 1684; *d* Paris, 19 March 1757). Teacher of music and dancing. He taught in Brussels before moving to Paris about 1725–6 with his wife, Marie-Anne de Smedt (married 2 August 1709), and their children. Described as a 'symphoniste externe', he also played for Parisian society balls and continued to teach.

(2) **Marie-Anne Cupis** ['La Camargo'] (*b* Brussels, bap. 15 April 1710; *d* Paris, 28 April 1770). Dancer, eldest daughter of (1) Ferdinand-Joseph Cupis. She learnt dancing at an early age. At the bidding of members of the Belgian court she studied for three months in Paris about 1720 with Françoise Prévost, a famous opera dancer; she was also influenced by the male dancers Pécour, Blondi and Dupré. On her return she became the *première danseuse* at the opera. After an engagement in Rouen in 1725 she and her family moved to Paris where she made her début at the Opéra on 5 May 1726 in *Les caractères de la danse* (music by J.-F. Rebel), in which she also sang. Thereafter she danced there regularly, appearing in many important premières including Rameau's *Hippolyte et Aricie* (1733) and his other theatrical works (her roles are fully listed in *ES*).

Her success was resented by her teacher Mlle Prévost, who intrigued against her, ultimately unsuccessfully. Her early career was also marked by rivalry with Marie Sallé; Voltaire compared them in verse (1728). But 'La Camargo' was both inspired and musical. She influenced the aesthetics and technique of ballet, as the first dancer to shorten the skirts of her costumes to above the instep and lower the heels of her shoes: this immodest display of foot and ankle enabled her to make technical innovations (e.g. the *entrechat*) by allowing greater freedom of leg movement. So popular became the fashion of her shoes that her shoemaker was said to have made a fortune.

She was famous for her leaps, one of which resulted in an accident that kept her off the stage in 1734. Her career was further interrupted by the demands of the Count of Clermont, the father of her two children, and she returned to the stage only in 1740, later dancing in the 1747–9 seasons' productions in Bayreuth and those of the 1749–50 season in Lyons. La Camargo retired at the height of her fame in 1751 with an unprecedented pension from the king. She was the subject of numerous portraits, verses (Voltaire), 19th-century operas (Lecocq and Enrico de Leva), a ballet (Petipas and Minkus) and a society (London, 1930).

(3) **Jean-Baptiste Cupis (de Camargo) (i)** (*b* Brussels, bap. 23 Nov 1711; *d* Montreuil, 30 April 1788). Violinist, composer, horseman and horticulturist, second son of (1) Ferdinand-Joseph Cupis. He first learnt the violin from his father. He moved with his family to Paris where he met and married Constance Dufour in 1729; they had two sons: Jean-Baptiste *le jeune* (a cellist) and Marc-Suzanne-Jean (a cavalry captain at the time of his father's death). On 20 December 1737 Cupis received a *privilège général* to publish three sets of works, issued between 1738 and 1745. Although he was never a member of the royal chapel or the Académie Royale de Musique, he worked on the musical arrangements for the dauphin's marriage in 1745. In 1750 he entered the service of the lieutenant of the Vincennes royal park.

He appeared with Guignon and Blavet at the Concert Spirituel in 1738, 1739 and 1742. The *Mercure de France* of 1 June 1738 compared Cupis favourably with his contemporaries, predicting that his playing would unite the tenderness and feeling of Leclair with the fire and brilliance of Guignon. Rameau named a movement of his fifth *concert* (1741) after him. Cupis contributed to the evolution of violin playing through his use of 8th position, fourth-finger extensions and new bowing methods with extended phrases on single bow strokes. His violin sonatas (with one exception) each contain four movements, a slow movement followed by three faster ones. The *allegro* movements are characteristically monothematic and careful attention to dynamic nuance is evident throughout. The first sonata of op.2 contains the famous 'menuet de Cupis' praised by D'Aquin de Château-Lyon (1753).

Numerous anecdotes concerning his horsemanship exist in private journals; he assumed his father's title of *écuyer* until he was made a baron by Empress Maria Theresa in 1773. He retired to Montreuil where he spent the rest of his life cultivating peaches.

WORKS

all published in Paris

6 sonates, vn, bc, op.1 (1738)
7 sonates, vn, bc, op.2 (before 1742); menuet from sonata no.1 pubd in numerous 18th-century anthologies
6 simphonia à 4 parties, op.3 (?1742–5)

(4) **François Cupis** [*le cadet*] [Cupis de Renoussard] (*b* Paris, 10 Nov 1732; *d* Paris, 13 Oct 1808). Cellist, youngest son of (1) Ferdinand-Joseph Cupis. He was apparently a wild youth: in 1751 when he was a cello student under Berteau at the Collège des Quatre Nations, he was arrested for stealing linen from his father and selling it. In 1759 action was again brought against him (and his elder brother Charles, a horn player and member of the Académie Royale de Musique orchestra, 1746–50) for drunkenness. But he became a creditable cellist and composer.

According to *Spectacles de Paris*, Cupis was a member of the Concert Spirituel orchestra, 1764–71 and 1774–7, and a member of the Académie Royale de Musique orchestra, 1767–70. In order to marry Marie-Reine Thomé de Beaumont (6 November 1770) he had to sign a renunciation of the theatre (drawn up by his parish priest) and resign his post at the Opéra.

Collections of music previously attributed to François and published between 1761 and about 1784 are listed in RISM as the work of Jean-Baptiste *le jeune*. Gerber suggested that the violin maker Cupis Decombe published in 1803 the *Méthode d'alto précédé d'un abrégé des*

principes de musique de différents airs nouveaux dont plusiers avec variations et terminé par un long caprice ou étude.

(5) **Jean-Baptiste Cupis (ii)** [*le jeune*] (*b* Paris, 1741). Cellist, composer and teacher, elder son of (3) Jean-Baptiste (i). Following in the footsteps of his uncle, François, he studied the cello with Berteau; he too briefly served as a member of the Académie Royale de Musique orchestra *petit choeur*. According to Fétis, he left the Opéra in 1771. In 1772 he published his *Méthode nouvelle et raisonée pour apprendre à jouer du violoncelle* and the following year described himself as a 'professeur de violoncelle' in the dedication of his op.5 collection of duos. His music has in the past been incorrectly attributed to his uncle.

WORKS
all published in Paris

JULIE ANNE SADIE

Cupo (It.: 'gloomy', 'dejected', 'sepulchral', 'hollow'). A direction used particularly by Verdi both in instrumental parts and in vocal parts at moments of extreme quietness. *Cupo ed allargando* also appears.

Cuppi [Cuppis] **de Camargo.** *See* CUPIS DE CAMARGO family.

Cura, José (*b* Rosario, Santa Fé, 5 Dec 1962). Argentine tenor. He began his career at the age of 15 as a choral conductor and studied composition at the National University of Rosario. After spending several years composing and conducting (1984–8), he studied singing with Horacio Amauri and, after moving to Italy, with

José Cura as Saint-Saëns's Samson

Vittorio Terranova. His stage début came in 1992 at Verona when he sang the Father in Henze's *Pollicino*, followed by Albert Gregor in *The Makropulos Affair* at Turin in 1993, Ismaele (*Nabucco*) at Genoa and Alvaro (*La forza del destino*) at Turin, both in 1994. After winning the Operalia Competition, run by Domingo, Cura made his US début in Chicago as Loris (*Fedora*), also in 1994. In 1995 he was acclaimed at his Covent Garden début in the title role of *Stiffelio* and at the Opéra Bastille, Paris, as Ismaele. His other Covent Garden roles have included Loris, Saint-Saëns's Samson (which he has recorded with Colin Davis), Don José and Andrea Chénier, the last in concert. He made his début at La Scala in 1997 as Enzo (*La Gioconda*), and the same year he sang his first Otello, with Abbado in Berlin. Other important roles include Radames, Turiddu (which he recorded for television with Muti in 1996), Canio, Puccini's Des Grieux, Roberto (*Le villi*) and Osaka (*Iris*). Cura has emerged as that rare phenomenon, a true *lirico spinto* tenor in the mould of Domingo, who has helped launch Cura's career and conducted his highly successful first recital, consisting of all the tenor arias from Puccini's operas. Cura's charismatic appearance and acting enhance his exciting, confidently produced voice.

ALAN BLYTH

Curci. Firm of Italian publishers. It was founded in Naples in 1912 by the brothers Giuseppe (1884–1953), Alberto (1886–1973) and Alfredo (1891–1952) Curci. Their grandfather Francesco (1824–1912) had opened a business at Naples in 1860 for the sale of musical instruments and for music copying, an activity which was then continued by his three children, Pasquale, Achille and Concetta. Pasquale's sons, named above, started the publishing side of the 'Casa Musicale Fratelli Curci'. This part of the business was at first known as Casa Editrice di

Operette e Vaudevilles (CEDOV), and published musical comedies and operettas by Italian and foreign composers (Imre Kálmán, Oscar Straus, Jean Gilbert, Carlo Lombardo and Alberto Curci himself). The firm's address changed in 1919 from via dei Tre Re to via Roma 304/5; in this year too, the brothers founded the society 'Amici della Musica' of Naples, organizing concerts by the greatest chamber musicians. With the development of the cinema as an art form, the Casa Curci began publishing film music by well-known composers including Mulè, Rossellini and Veretti.

In 1932 it opened a branch in Rome, and in 1936 one in Milan which was to become a great venture under the direction of Alfredo Curci. From its premises in the Galleria del Corso in Milan, the Edizioni Curci began publishing important didactic works and collections of instrumental music of all periods, edited by such musicians as Cortot, Artur Schnabel, Fischer, Alfredo Casella, Piccioli, Agosti and Magaloff. Alfredo was active also in the field of authors' rights. At his death the management of the Milanese house was taken over by his son-in-law Giuseppe Gramitto Ricci. Besides light music, the firm publishes musicological studies and the quarterly *Rassegna musicale Curci*. The catalogue now lists about 10,300 items.

MARIANGELA DONÀ

Curci [Curcio], **Giuseppe** (*b* Barletta, 15 June 1808; *d* Barletta, 5 Aug 1877). Italian composer and singing teacher. He studied at the Conservatorio di S Sebastiano in Naples with Ferno, Tritto and Pietro Raimondi, and in 1826 transferred to S Pietro a Majella, where his principal instructors were Zingarelli (composition) and Crescentini (voice); he remained there under special dispensation until 1835. Two of his earliest stage works were written for the conservatory, and were sufficiently well received to win him a chance to compose for the Teatro Nuovo, Naples, where his *Il ciabattino e la morte* (1832) dealt with the same subject that was to serve the Ricci brothers much more successfully as *Crispino e la comare* (1850). In 1834, Curci brought out on the same stage *Il sarto e i tabarri*. After having his cantata *Ruggiero* performed at the Teatro S Carlo in January 1835, he moved to northern Italy. At Turin, his *Il proscritto* won some favour, while *Don Desiderio*, produced at the Teatro di Apollo, Venice, for Carnival 1837, enjoyed a short-lived vogue. By 1840 he had renounced the stage to become a teacher of voice in Vienna, Pest, Paris (where he remained for eight years) and England, and he published two volumes of *solfeggi*. In the mid-1850s he returned to his native town, managing the Teatro Piccinni at Bari for a year, but devoting himself chiefly to instruction, and writing sacred music. As an opera composer, Curci mastered the then current conventions, but sadly he lacked genuine originality or any strong theatrical feeling.

WILLIAM ASHBROOK

Curcio [Curci], **Giuseppe (Maria)** (*b* Naples, 17 July 1752; *d* Rome, 9 Aug 1832). Italian composer. He may have been a pupil at the Naples Conservatorio della Pietà dei Turchini which, according to Eitner, possesses a manuscript copy of his cantata to St Elizabeth. He composed operas for Naples, Florence, Rome and other cities, and librettos from 1797 onwards indicate that he was a member of the Florence Accademia degli Armonici. On 11 January 1800 he was elected *maestro di cappella* and organist of Fermo Cathedral, succeeding Giuseppe Giordani; on 3 June 1813 Pietro Polimanti, a pupil of Zingarelli, became his assistant. He received his pension on 4 November 1823 and moved to Rome, where he later died. Nine bundles of autograph sacred manuscript folios survive in the archives of Fermo Cathedral, as does an undated, printed list of his works.

UGO GIRONACCI

Cure, the. English rock group. Its principal members were Robert James Smith (*b* Blackpool, 21 April 1959; vocals) and Lawrence Andrew 'Lol' Tolhurst (*b* Horley, 3 Feb 1959; bass guitar). Increasingly identified with the melancholic themes and fractured word play of Smith's compositions, The Cure followed an idiosyncratic path during the 1980s and 90s, ignoring the passing trends in British pop and rock music. They came to prominence in 1978 through the controversy caused by their first recording, *Killing an Arab* (Small Wonder), the lyrics of which were inspired by Smith's reading of Camus' *L'étranger*. The group's sparse use of guitar, bass and drums and Smith's monotone drawl contrasted with the more aggressive approach of punk rock groups but attracted a small, committed following of critics and listeners. The 1986 album *Standing on a Beach* (Fiction) brought together the group's most outstanding recordings to date. These included *Jumping Someone Else's Train* (an attack on musical fads), *A Forest*, *The Love Cats* (an uncharacteristic jeu d'esprit) and *Inbetween Days*. The group's progress in the 1990s was clouded by an unsuccessful lawsuit brought by Tolhurst claiming a share of Smith's songwriting royalties. Subsequently, Smith regrouped The Cure for further recordings and concerts which confirmed his position as one of the great eccentrics of English popular music.

DAVE LAING

Curioni, Alberico (*b* Milan, 1785; *d* Torno, Como, March 1875). Italian tenor. He sang from an early age in the major Italian cities, including Milan, Naples, where he created Alberto in Rossini's *La gazzetta* (1816), and Pesaro, where he sang Giannetto in *La gazza ladra* (1818). He made his London début in 1821 at the King's Theatre as Mozart's Titus and sang there until 1837. His roles included Rossini's Otello, Agorante (*Ricciardo e Zoraide*) and King James (*La donna del lago*), Carolino (Mayr's *Il fanatico per la musica*), Ferrando, Adriano in the London première of *Il crociato in Egitto* (1825) and Pollione with Giulia Grisi in her first *Norma* (1835). He created Orombello in *Beatrice di Tenda* (1833, Venice). Reputed to have a 'sweet, mellifluous-toned voice', he also had a fine stage presence.

ELIZABETH FORBES

Curioni, Rosa (*b* Milan, *fl* 1751–62). Italian mezzo-soprano. She sang at Cremona, Milan, Reggio nell'Emilia, Modena and Bergamo in 1751–4 in operas by Perez, Lampugnani, Latilla, Brivio and Cocchi. In autumn 1754 she was engaged as seconda donna for the King's Theatre in London and made her début in *Ipermestra* by Lampugnani and Hasse. She remained for two seasons, singing in Italian and English works. She specialized in male roles, playing the Emperor Valentinian in Hasse's *Ezio* in 1755. The part of Lysander in J.C. Smith's *The Fairies* (1755), written for her, was sung by Guadagni, but she did create Ferdinand in Smith's *The Tempest* (1756). She sang in oratorios under Handel at Covent Garden in 1756, appearing in *Athalia*, *Israel in Egypt*, *Deborah*, *Judas Maccabaeus* (Israelite Man), *Jephtha* (Storgè) and *Messiah*. She sang the title role in Traetta's *Didone abbandonata* at Venice in 1757, and in the next three years sang in Vicenza, Mantua, Pavia, Prague and Mannheim. Back in London for the 1761–2 season, she appeared in five operas and was described as musician to Duke Clemens of Bavaria. She may have been singing as late as 1771.

WINTON DEAN

Curmi [Curmy], **Alessandro** (*b* Valletta, Malta, 17 Oct 1801; *d* Naples, April 1857). Maltese composer and pianist. He studied with Pietro Paolo Bugeja and at the S Pietro a Majella Conservatory in Naples (1821–7), where his teachers included Zingarelli and Tritto. His first opera, *Gustavo d'Orxa*, was performed to acclaim in Naples in 1827. A member of Bologna's Accademia Filarmonica, his greatest success came in 1842 with *Elodia di Herstall*, written for the Teatro S Carlo in Naples. According to Vassallo, who knew Curmi personally, while on a brief visit to Paris (where he wrote the cantata *Sancte Paule*) he was invited to London to compose three operas for Covent Garden. Back in Paris in the winter of 1845, plans for a grand opera came to nothing because of the political situation, and instead Curmi composed the orchestral fantasia in six sections, *La rivoluzione*, which was also heard in Malta in 1853.

JOSEPH VELLA BONDIN

Curran, Alvin (*b* Providence, RI, 13 Dec 1938). American composer and performer. He studied composition with Ron Nelson at Brown University (BA 1960) and with Mel Powell and Elliott Carter at the Yale School of Music (MM 1963). A 1964 Ford Foundation grant enabled him to continue his studies with Carter in Berlin, where he met Stravinsky, Xenakis, Berio, Takahashi, Andriessen and Rzewski. He also became acquainted with Milton Babbitt and Earle Brown at Darmstadt. In 1965 he travelled to Rome with Chadabe, where he played the piano in bars on the Via Veneto. After beginning to

compose for Rome's avant-garde theatre scene, he formed Musica Elettronica Viva (MEV) with Rzewski and Teitelbaum. From 1966 to 1971 he performed with MEV in over 200 concerts throughout Europe and the USA, an experience through which he encountered many influential members of the avant garde. He has taught in Rome at the National Academy of Dramatic Arts (1975–80) and at Mills College, Oakland, California (from 1991). His honours include a Bearns Prize, a BMI award, an Ars Acoustica International award and the Premio Novecento of the city of Pisa.

Curran's blend of traditional and experimental backgrounds has resulted in a unique style that features natural sounds in combination with instruments, voices and electronics. He employs a wide variety of genres, ranging from chamber music to experimental radio broadcasts and sound installations. In the 1970s he created a series of solo works for voice, synthesizer, taped sounds and found objects, and developed a series of performances for lakes, ports, parks, buildings, quarries and caves. During the following decade, he extended the geographic areas of his compositions, creating simultaneous radio broadcasts of ensembles located throughout Europe.

Currentes (Lat.). The ligature, known also as the *coniunctura*, or, more usually, the short, diamond-shaped descending notes that form the latter part of the *coniunctura*. *See* LIGATURE (i).

Currie, Russell (*b* North Arlington, NJ, 3 April 1954). American composer of Scottish descent. He studied at Brooklyn College, CUNY (BA 1981) and the Eastman School of Music (MA 1996), where his composition teachers included Christopher Rouse, Joseph Schwantner, David Liptak and Warren Benson. In 1988 he founded ORRA to produce and develop contemporary music and interdisciplinary arts projects. He has served as coordinator of the Eastman School's composition programmes (1994–5), and as composer-in-residence with the Rochester PO (1992–4), the Ribchester Festival of Music and Art (1995) and the Royal Scottish Academy of Music and Drama (1995). His honours include the George Washington Corner Book Prize (1993) and the ASCAP Foundation Max Dreyfus Scholarship for music theatre (1994).

Currie's music, written in predominantly tonal idioms, features flowing melodic lines, periodic dissonance and rich and colourful orchestration. Several of his works are inspired by the writings of Edgar Allan Poe. These include his trilogy of chamber operas, *The Cask of Amontillado* (1982), *A Dream within a Dream* (1984) and *Ligeia* (1986); his duet for soprano and tenor, *Dreams* (1995); and the film score for *The Black Cat* (1993).

ELISE KIRK

Currulao. A couple-dance of the Afro-Hispanic communities of the Pacific lowlands of Colombia and Ecuador. It functions as a symbolic reinforcement of established social and political institutions and interpersonal affiliations. The 6/8 rhythms of the two *bombos* (bass drums) and two *cununus* (conical drums), the ternary vocal melodies of the *glosador* (male soloist) and *cantadoras* (female chorus), and the binary *guasá* (rattle) accompaniment combine in polyrhythm with 6/8 marimba melodies improvised by the *bordonero* (marimba player) and his accompanist, the *tiplero*, who plays on the lower part of the same instrument. While the song texts reflect the social reality of serial polygyny, the choreography symbolically concurs, with *zapateo* (foot-stamping), hat- and scarf-waving, and the use of full skirts by women for both seductive and defensive purposes.

WILLIAM GRADANTE

Curschmann, Karl Friedrich (*b* Berlin, 21 June 1805; *d* Langfuhr [now Wrzeszcz], nr Danzig, 24 Aug 1841).

German composer and singer. After his father's early death, he studied at the Gymnasium. In 1824 he began to study law at the University of Berlin. After a short time he transferred to the University of Göttingen, where he decided to adopt music as his career, and in 1825 he went to Kassel to study under Spohr and Hauptmann. He made a name as a composer of church music, but none of his works was published and all seem to have disappeared. A one-act comic opera, *Abdul und Erinnieh, oder Die beiden Todten*, was performed in Kassel on 29 October 1828 and created a favourable impression. He stayed in Kassel for four years but had no systematic instruction, although he was an active member of the Cäcilienverein. He returned to Berlin in 1829. At this period his songs were becoming known and, being gifted with a pleasant voice, he made several concert tours to Paris, Vienna and Italy. In 1837 he married Rose Behrend, a dramatic soprano, somewhat older than himself. Four years later he died of appendicitis; his wife survived him by only a year.

Curschmann's 83 songs were all published in his lifetime, and a near-complete collected edition of them, together with a few vocal trios, appeared in 1871. Among the poets he set are Goethe, Schiller, Uhland, Heine, Tieck, Müller and Chamisso, as well as various Italian texts. In the early years of the 19th century his music acquired an enthusiastic following: writing in 1835, Rellstab described him as 'without doubt the most popular composer of our times'. He also praised Curschmann for his sensitive treatment of the poetry, though in reality his songs show little marked individuality, and rely for their effect on an unsophisticated melodic charm. Though Curschmann was bold enough to set Müller's *Ungeduld* and *Mein!* (his most famous song) and Rückert's *Du bist die Rüh* when Schubert's settings were already well known, nowhere is the influence of the older master to be detected. Apart from his songs, the vocal trios and the operetta he composed little. He set Heine's *Die heiligen drei Könige aus dem Morgenlande* for double chorus and piano, and wrote variations for piano on his own *Ungeduld*. Attempts at the end of the 19th century to revive interest in his music were unsuccessful.

WORKS

published in Berlin unless otherwise stated

Abdul und Erinnieh, oder Die beiden Todten (comic op, 1), op.12, Kassel, Kurfürstliches Hoftheater, 29 Oct 1828, vs (1836)

Sacred choral: Die heiligen drei Könige aus dem Morgenlande, Christmas song (H. Heine), op.19 (1838); Pfingstmusik, 6 solo vv, org, unpubd; Barmherzig und gnädig, motet, solo v, chorus, brass insts, unpubd

Secular choral: 2 canons, 3vv, pf, op.7 (1834); Ditirambo, 3 T, pf (1835); Der Wald, S, T, pf, op.17 (1837); Blumengruss, 3 S, pf (Leipzig, *c*1839); Das Veilchen, 2 S, T, op.27 (*c*1840)

1v, pf: 71 songs, 13 vols., opp.1–5, 9, 11, 13–15, 18, 23, 25 (*c*1830–*c*1840); Romeo, scena and aria, op.6 (1833); 4 canzonets, op.8 (1834); canzonet and 3 songs, op.16 (1837); canzonets and 2 songs, op.20 (1839); 12 Solfeggien, op.21 (Leipzig, *c*1839); Gia la notte, canzonet, pf/gui acc., op.24 (*c*1840); Die Perle auf Lindahaide, 7 songs, op.28 (1841), with K.A.F. Eckert

Thema con variazioni, pf (n.d.)

Cursi, Bernardo. *See* CORSI, BERNARDO.

Cursiva (Lat.). A term used in the 15th century to describe mass movements in which the text is not sung in all the voices simultaneously but moves from one voice to another. Although the word itself is found in only one manuscript (*GB-Ob* Can.misc.213), where it is used in the index to describe a Gloria by Loqueville, it is evidently more widely applicable. It was first noticed and discussed by Hans Schoop (*Entstehung und Verwendung der Handschrift Oxford Bodleian Library, Canonici misc. 213*, Berne, 1971, 49).

See also AVERSI and VIRILAS.

□

Cursus (Lat.: 'course', 'flow'). (1) The fixed pattern of elements in the Divine Office during the course of the day and the year. During the Middle Ages each monastic order developed its own arrangement; the cursus outlined in the *Regula Benedicti* and the 'Roman' pattern followed by secular communities are among the most important.

(2) Patterns of accented and unaccented syllables in medieval plainchant. *See* INFLECTION, (1); PSALM, §II, 5, and 11; and RECITATIVE, LITURGICAL.

Curtain tune. An English 17th-century term, now obsolete, for music played while the curtain was being raised at the beginning of a play or semi-opera. It was usually played after the prologue but occasionally before it – as, for instance, in Dryden and Howard's *The Indian Queen* (1664), where the prologue was acted with scenery. In the latter part of the 17th century, the curtain tune was increasingly cast in the form of a French overture, and the two terms came to be regarded as synonymous. Even when an overture was provided, a short tune was sometimes played after it for raising the curtain (e.g. in Purcell's music for *The Indian Queen*). On occasion, dramatists made the introductory music part of the opening scene of the play: the first scene of Dryden and Lee's *Oedipus* (1678), for instance, begins with a 'plaintive tune', and in the operatic *The Tempest* (1674), Locke's curtain tune depicts the storm with which the drama opens.

MARGARET LAURIE

Curtal [double curtaile, curtall, curtoll, curtle, corthol, courthol]. The name used in England from the late 16th century to the early 18th for both the DULCIAN and the BASSOON.

See also KORTHOLT.

Curtin, Phyllis (*b* Clarksburg, WV, 3 Dec 1921). American soprano. She attended Wellesley College and studied with the bass Joseph Regneas, singing in the American première of *Peter Grimes* (1946, Tanglewood) while still a student. Her first significant opera appearances were with the New

England Opera Theatre in Boston as Lisa in *The Queen of Spades* and Lady Billows in Britten's *Albert Herring*, followed in 1953 by a début with the New York City Opera in von Einem's *Der Prozess*. Her extensive and varied roles at the City Opera over the next ten years included all the major Mozart heroines, Violetta, Salome, Walton's Cressida, and Susannah in Carlisle Floyd's opera, a role she created. Engagements in Vienna, Buenos Aires, Frankfurt and with the Metropolitan Opera, La Scala and Scottish Opera in the 1960s brought her international repute. She made numerous recital and concert appearances throughout the USA and Europe and was particularly known for her singing of contemporary works, many of which were composed for her. Curtin sang in the American premières of Britten's *War Requiem* (1963) and Shostakovich's Symphony no.14 (1969), recording the latter under Ormandy. Although she lacked the star qualities of more celebrated operatic sopranos, her singing was always much respected for its cultivated musicality, interpretative grace and vocal purity. She has taught at the Aspen School of Music and the Berkshire Music Center, and was a member of the faculty of Yale University from 1974 until 1983, when she become dean of Boston University's School of the Arts.

PETER G. DAVIS

Curtis, Alan (Stanley) (*b* Mason, MI, 17 Nov 1934). American musicologist, harpsichordist and conductor. He took the BMus at Michigan State University in 1955, and the MMus at the University of Illinois the following year. From 1957 to 1959 he studied in Amsterdam under Gustav Leonhardt, returning to the University of Illinois for the PhD degree, which he gained in 1963 with a dissertation on Sweelinck's keyboard works. In 1960 he joined the University of California at Berkeley as an instructor; he became an assistant professor in 1962, associate professor in 1966 and professor in 1970. His scholarly work has concentrated on keyboard music and opera and includes several editions (including one of Monteverdi's *L'incoronazione di Poppea*) and a book on Sweelinck. In addition to his work as a scholar, he has built up a considerable reputation as a harpsichordist and conductor in the USA and Europe, specializing in the authentic interpretation of the music of the 16th, 17th and 18th centuries. He made his La Scala début conducting *Ariodante*, in 1980, and in 1982 gave the modern première of Jommelli's *La schiava liberata* with the Netherlands Opera. In 1984 he conducted Gluck's *Armide* in the restored Bibiena theatre in Bologna. Other notable operatic performances include Cimarosa's *Gli Orazi ed í Curiazi* (1989, Rome) and Handel's *Floridante* (1990, Toronto). Among his more important recordings are performances of Monteverdi's *Poppea*, Cavalli's *Erismena*, Stradella's *La Susanna*, Traetta's *Buovo d'Antona*, Handel's *Admeto* and *Rodrigo* and keyboard works by François Couperin and J.S. and C.P.E. Bach.

Curtis-Smith, Curtis O(tto) B(ismarck) (*b* Walla Walla, WA, 9 Sept 1941). American composer. From 1960 to 1962 he studied the piano with David Burge at Whitman College and later was a pupil of Gui Mombaerts at Northwestern University (BM 1964, MM 1965). His composition teachers included Gaburo (1966) and Maderna (at the Berkshire Music Center, 1972). In 1968 he joined the faculty of Western Michigan University, Kalamazoo, where he became a full professor in 1982. He has also taught composition at the University of Michigan. His awards include the Koussevitzky Prize (1972), two grants from the Martha Baird Rockefeller Fund for Music (1975, 1976), the gold medal of the Concorso Internazionale di Musica e Danza G.B. Viotti (1975) and a Guggenheim Fellowship (1978–9). Among his commissions are *Xanthie: Winter Pieces* (1974), written for the St Paul Chamber Orchestra and the Louis Falco Dance Company, *Masquerades* (1978), for William Albright, and the String Quartet no.3 (1980), for the Kronos Quartet; he has also composed two works for the guitarist Michael Lorimer.

In his earlier compositions Curtis-Smith employed a chromatic vocabulary and displayed a flair for original timbres demonstrated in works such as *Rhapsodies* (1973). Written for Burge, this piano piece requires colour-coded groups of 4-pound-test fishing line to be drawn through the strings, creating continuous single and clustered pitches (he was the first to use a flexible bow on piano strings); mallets, tuning mutes, thumb picks and a wine bottle are also employed. The music flows with a characteristic nervous lyricism, its mellifluous dialogues punctuated with bursts of intensity. In the 1990s Curtis-Smith began exploring sub-Saharan African rhythms and polyrhythms within diatonic melodic contexts.

Curwen. English family of music educationists and music publishers.

(1) **John Curwen** (*b* Heckmondwike, Yorks., 14 Nov 1816; *d* Manchester, 26 May 1880). Congregational minister. He was a proponent of Tonic Sol-fa. Educated at Wymondley College and University College, London, he was appointed assistant minister at Basingstoke in 1838; it was during his ministry there that he first attempted to teach music to the children of his Sunday school. The venture was unsuccessful, for though he was a teacher of great natural gifts who had made a serious study of educational principles, Curwen knew nothing of music. His later activity as a music educationist was brought about by circumstances rather than natural inclination. In 1841 he was commissioned to investigate and recommend the best way of teaching music to children in Nonconformist Sunday schools. His acquaintance with Pestalozzi's principles led him to reject as misguided the continental 'fixed-*doh*' method then being widely taught in London by John Hullah, and to adopt instead the general plan of a system employing indigenous sol-fa advocated by Sarah Glover, a Norwich schoolmistress, in her *Scheme for Rendering Psalmody Congregational* (Norwich, 1835, 2/1839). After teaching himself to read music from her book Curwen devoted his life to perfecting a system based on her plan which should bring music within the reach not only of children but also of the poorer classes in general. An understanding of his work depends on the recognition that his aims were not purely musical but social and religious.

Curwen cannot be called the inventor of Tonic Sol-fa. Just as the basic idea of the system sprang from Glover, many features were adopted, with due acknowledgment, from other teachers in England and abroad. Curwen's achievement, to select devices to ease the learner's task, was due not only to his insight as a teacher but also to the personal musical limitations which forced him to approach the subject as a learner himself. His first articles outlining a course of lessons following the new system appeared in the *Independent Magazine* in 1842 and were followed a year later by *Singing for Schools and Congregations*. Both publications displayed the system in its most primitive form, but the refinements and improvements which Curwen had made to Glover's *Scheme* were already apparent. Other publications followed, each representing further improvements in detail.

After 1844 Curwen printed his own publications, sustaining losses which involved considerable domestic hardship. In 1851, he began to edit and publish a periodical called the *Tonic Sol-fa Reporter*; the venture was unsuccessful and only two numbers were issued. But the publication of a series of his articles in Cassell's *Popular Educator* in 1852 attracted thousands of pupils to Tonic Sol-fa, and Curwen's work began to be recognized nationally. The following year he again undertook the publication of a journal, which he edited himself, under the title the *Tonic Sol-fa Reporter and Magazine of Vocal Music for the People*. A breakdown in health, due to overwork, obliged him to resign his ministry temporarily in 1856; a further breakdown in 1864 led to his final resignation after which he devoted his time exclusively to the Tonic Sol-fa movement and to his publishing firm J. Curwen & Sons, which he had established in 1863. In 1869 he founded the Tonic Sol-fa College (which in 1973 set up the Curwen Institute).

The distributing side of the new firm was first known as the Tonic Sol-fa Agency; their early publications were mainly works for popular singing classes, but soon music for schools, chiefly in Tonic Sol-fa notation, was added. In 1874 the firm assumed the name of John Curwen & Sons, Tonic Sol-fa Agency. The creation in 1885 of a grant for sight-singing in schools and the recognition by the education department of the Tonic Sol-fa method led to an expansion of Curwen's catalogue, and the firm rapidly became prominent publishers of educational music. At the same time it issued much music for congregational and Sunday school use and catered to the great demand for music for the American organ and harmonium.

For illustration of Curwen's manual signs *see* TONIC SOL-FA.

(2) **John Spencer Curwen** (*b* London, 30 Sept 1847; *d* London, 6 Aug 1916). Musician and publisher, son of (1) John Curwen. His childhood at Plaistow, East London, coincided with the years of his father's early struggle to develop the Tonic Sol-fa system; as the movement gathered followers, and his father set up a printing press to publish music in sol-fa notation, the boy became increasingly involved with the publication of scores. To fit himself for the work he abandoned an earlier intention to train for the ministry, and enrolled as a student at the RAM. As a trained musician he was able to influence the standard of publications and to acquaint himself with the state of musical education on a wider basis. He became principal of the Tonic Sol-fa College in 1880 and from 1881 was editor of the *Tonic Sol-fa Reporter* (from 1889 entitled *The Musical Herald and Tonic Sol-fa Reporter*, then from 1891 simply *The Musical Herald*). In 1882 he started the competition festival movement, on the basis of Eisteddfodau at which he had acted as a judge, with the foundation of the Stratford (East London) Festival. An account of his visits to schools in many parts of Europe and the USA was published in *School Music Abroad* (London, 1901); and a survey of varying standards of church music was presented in two volumes of *Studies in Worship Music* (London, 1880–85). On his father's death he became leader of the movement and head of the publishing firm. During his directorship he expanded the firm's catalogue to include choral music and established the firm's tradition of supplying modest amateur needs. School operettas, amateur light opera and collections for the use of organizations such as the Women's Institute, British Legion and scouts became features of the Curwen output.

(3) **Annie (Jessie) Curwen** [née Gregg] (*b* Dublin, 1 Sept 1845; *d* Matlock, 22 April 1932). Music educationist, wife of (2) John Spencer Curwen, whom she married in 1877. She was trained at the Royal Irish Academy of Music, and taught the piano in Dublin before going to Scotland where she first encountered the Tonic Sol-fa system. Applying its principles to piano teaching, she produced *The Child Pianist* (London, 1886), subsequently known as *Mrs Curwen's Pianoforte Method*, a course of lessons contained in a teachers' guide and a series of pupils' books. The piano method was a valuable addition to the Curwen music catalogue. She was a student of Herbartian psychology and published *Psychology Applied to Music Teaching* (London, 1920).

(4) **John Kenneth Curwen** (*b* London, 12 April 1881; *d* Gerrards Cross, Bucks., 25 Feb 1935). Publisher, nephew of (2) John Spencer Curwen. He became head of the firm J. Curwen & Sons on the death in 1919 of his father Joseph Spedding Curwen, who had managed the printing works and had briefly served as director from 1916. Although the tradition of publishing music for schools and amateur organizations continued into the 20th century, J.K. Curwen was responsible for adding orchestral music to the catalogue. Among their publications were Holst's *The Planets* and Vaughan Williams's *Hugh the Drover*, Mass in G minor and Third Symphony, as well as works by Varèse, Bantock, Boughton and Ethel Smyth. Editors such as Cecil Sharp, Percy Dearmer and Martin Shaw were associated with the firm. The periodical *The Musical Herald*, in 1920 incorporated into *The Musical News and Herald*, continued until January 1929; *The Sackbut* (1920–34) also bore the Curwen imprint.

(5) **John Christopher Curwen** (*b* Gerrards Cross, 21 Aug 1911; *d* Gerrards Cross, 9 Dec 1993). Publisher, son of (4) John Kenneth Curwen. He succeeded to the directorship of the firm in 1935. Crowell, Collier & Macmillan purchased J. Curwen & Sons in 1969 but J.C. Curwen continued as a director of the firm under its old name. In January 1971, Crowell, Collier & Macmillan, while retaining ownership of J. Curwen & Sons, closed the London office.

H.C. COLLES/PETER WARD JONES, BERNARR RAINBOW

Curzon, Sir **Clifford (Michael)** (*b* London, 18 May 1907; *d* London, 1 Sept 1982). English pianist. He entered the RAM in 1919, studying with Charles Reddie, and winning, among many prizes, the Macfarren Gold Medal; subsequently he worked with the pianist Katharine Goodson. His first public appearance, at the age of 16, was in a Bach triple concerto, at the Queen's Hall with Sir Henry Wood, who was notably helpful in advancing his career. In 1926 he took a sub-professorship at the RAM, interrupting his work there in 1928 for two years' study with Schnabel (to whose greatness as a teacher Curzon later eloquently testified in a radio interview). After this Berlin sojourn he went to Paris, where Landowska and Nadia Boulanger were influences nearly as powerful. In 1931 he married the harpsichordist Lucille Wallace. Returning to Britain in 1932, he resigned from the RAM (of which in 1939 he was elected a Fellow) to embark on tours of Europe and, in 1939, America. After the war he appeared as soloist, recitalist and chamber musician in every important European and American musical centre, although prolonged periods of sabbatical study made performances comparatively infrequent.

In his youth Curzon was associated with a more spectacular piano repertory than that he subsequently maintained – although as late as December 1974 he was heard in London in Tchaikovsky's First Concerto; he gave many first performances, including those of Rawsthorne's Second Concerto (1951) and the Berkeley Sonata (dedicated to him, 1946). In later years, however, he devoted himself to works of Classical composers; in them he was unequalled for sensitivity and directness of manner, beauty of tone and an inner stillness. In such works as Mozart's Concerto in B♭ K595, his unique combination of nervous energy and Olympian calm earned him a reputation as a supreme Mozartian. He was made a CBE

(1958) and DMus of Leeds University (1970), and was knighted in 1977.

MAX LOPPERT

Curzon, (Ernest) Frederic (*b* London, 4 Sept 1899; *d* Bournemouth, 6 Dec 1973). English composer, organist and conductor. He showed precocious ability on the violin, cello, piano and organ and as a conductor; by the age of 20 he had gained experience in London theatres and cinemas and later was the organist at the Shepherd's Bush Pavilion. He became head of Boosey & Hawkes's Light Music department. His compositions included ballad-type songs, piano miniatures, music for film and radio, and he occasionally wrote for the theatre.

He is best remembered, however, for his orchestral works. These have a characteristic sparkle, even whimsicality, displayed in titles like *Dance of an Ostracised Imp*, *The Boulevardier* and the overture *Punchinello*, all of which achieved great popularity. Apart from these single-movement works Curzon also contributed significantly to the repertory of the light concert suite: his *Robin Hood Suite* ends with a memorable march in the manner of Eric Coates. Much of his work displays Spanish or Hungarian colour, although he never visited either country, and several movements show a gift for period pastiche. His orchestration is imaginative: accordion and harp join with woodwind and strings in *Summer Souvenir*, and up to four saxophones are used in many scores (for example *Bonaventura*, *Cascade Waltz*, *Serenade of a Clown* and *Simonetta*). Apart from the uncharacteristic *Saltarello*, few Curzon orchestral pieces featured a solo instrument. He was most active as a composer during the 1940s and 50s, and the characteristic wit and charm of his music earned him the presidency of the Light Music Society. His work is discussed in P.L. Scowcroft: *British Light Music: a Personal Gallery of Twentieth-Century Composers* (London, 1997).

WORKS

Songs: Someone a Little Like You (C. Houghton), 1951; I Bring My Love
Pf solo: By the Lyn, prelude, 1948; Valse Impromptu, 1948; Square Dancing [after 14 trad. tunes], 1951

Principal publisher: Boosey & Hawkes

PHILIP L. SCOWCROFT

Curzon, (Emmanuel) Henri (Parent) de (*b* Le Havre, 6 July 1861; *d* Paris, 25 Feb 1942). French critic and writer on music, son of the painter Alfred de Curzon. His early training was in history and archaeology. He took the degree of docteur ès lettres and in 1882 joined the Archives Nationales in Paris, where he eventually became director, retiring in 1926. His two volumes on music in the Archives Nationales (*Etat sommaire*, 1899, and *Répertoire numérique*, 1904) are still useful to researchers. He then became librarian of the Opéra-Comique. His interest in history turned gradually to literary and so to theatrical history, and in 1889 he began to write music criticism; having found his true métier he was for the rest of his life a prolific author of books, articles and reviews. From 1920 he contributed regularly to *Le ménestrel*, and in 1928 succeeded Adolphe Jullien as music critic of the *Journal des débats*; he also contributed to many other journals (*BSIM*, *Bulletin de la Société de l'histoire du théâtre*, *Guide musical*, *Monde musical*, *Revue de la France moderne*, *Revue internationale de musique*, *RdM*, *ReM*). He wrote a large number of biographies of composers, mostly careful compilations of earlier work with little original research. He paid special attention to Mozart, of whom he wrote a biography, as well as translating and editing many of his letters. Curzon was a co-founder of the Société Française de Musicologie, and vice-president of the Association de la Critique Dramatique et Musicale.

Cusanino. *See* CARESTINI, GIOVANNI.

Cushing, Charles (Cook) (*b* Oakland, CA, 8 Dec 1905; *d* Berkeley, CA, 14 April 1982). American composer. He studied at the University of California, Berkeley (BA, MA), and won the Paris Prize Fellowship (1929), which took him to the Ecole Normale de Musique for composition lessons with Boulanger; he also studied violin, viola, clarinet and piano. He taught at Berkeley (1931–68, professor 1948), where he conducted the University of California Concert Band (1934–52). His music is lyrical and makes use of Impressionist harmonies; notable among his works is *Carmen saeculare*, which was performed under his direction at the Greek Theatre in Berkeley. He translated the texts of Milhaud's *Les malheurs d'Orphée* and Satie's *Socrate*, and contributed articles to *Modern Music*. In 1952 he was admitted to the Légion d'Honneur.

VALERIE BROOKS SAMSON

Cushion dance [kissing dance]. An old social dance sometimes called 'Joan Sanderson' in England and 'Babbity Bowster' ('Bob at the Bolster') and various other names in Scotland. It enjoyed great popularity among all classes of society and there were frequent references to it in the 17th century. It was published in Playford's *Dancing Master* (1690 and later editions). Thomas Wilson included it in *A Companion to the Ball Room* (1816) together with a modified version of the dance and an alternative tune, both of which he considered more suited to the times.

The main features of the dance are these: a man (or woman, if she initiates the proceedings) dances round the room holding a cushion (or sometimes a handkerchief) which he places before a chosen member of the opposite sex. She kneels on it and they kiss; she takes the cushion and the two dance hand-in-hand round the room. She in the same way chooses a man and the three dance in a ring. The action is repeated until all, men and women alternately, have been drawn into the ring. The process is then reversed, and one by one they leave the ring. A theatrical relic of this is the Pillow Dance in the Lavrovsky version (1940) of Prokofiev's *Romeo and Juliet*.

The dance has not survived in England or on the Scottish mainland, but with certain modifications and accompanied by various tunes it is, or was until recently, performed in the Hebrides, Newfoundland and Tristan da Cunha.

MAUD KARPELES

Cusins, Sir William (George) (*b* London, 14 Oct 1833; *d* Remouchamps, 31 Aug 1893). English pianist, organist, violinist and composer. He was a chorister at the Chapel Royal, and after studying at the Brussels Conservatory won a King's Scholarship at the RAM in 1847. He first appeared in public as a solo pianist in 1849 and was in that year appointed organist at Queen Victoria's private chapel; at about the same time he joined the orchestra of the Royal Italian Opera. In 1851 he became assistant professor at the RAM, and in 1867 succeeded Sterndale Bennett as conductor of the Philharmonic Society, a post he held until 1883. During 1885 Cusins accepted a professorship at the GSM, and conducted the London Select Choir. He was nominated Master of the Queen's Music in 1870 and was knighted in 1892, resigning his court appointment in 1893. His work in the sphere of music education included examining at Queen's College (London) and (jointly with John Hullah and Otto Goldschmidt) for scholarships of the National Training School for Music. He travelled widely, and played at concerts in Germany. In 1867 he conducted the first performance of Sterndale Bennett's *Woman of Samaria* at the Birmingham Festival. His own compositions include an oratorio, cantatas, concert overtures, and concertos for violin and for piano; he produced editions of piano works by Schumann, and also edited a collection of songs to words by Tennyson. Cusins was active in caring for the Royal Music Library, where he did work on Handel sources. His brief monograph *Handel's Messiah: an Examination of the Original and some of the Contemporary MSS* (London, 1874) is a scholarly study of Handel's vocal and instrumental resources, described by William C. Smith as 'an important foundation pamphlet' (*A Handelian's Notebook*, London, 1965, p.54).

E.D. MACKERNESS

Custodio, Bernardino (Feliciano) (*b* Manila, 20 May 1911). Filipino composer, conductor and pianist. After a four-year scholarship under Alexander Lippay, he graduated from the Conservatory of the University of the Philippines in 1930 and then taught theory and the piano at the same institution, continuing his composition and conducting studies there with Lippay, Jenő Takács and Herbert Zipper. In 1959 he took the MA at the University of Santo Tomas and travelled to the USA on a Smith-Mundt grant. He was director of the University of Santo Tomas Conservatory (1958–61), associate conductor of the Manila SO for several years, dean of the Yamaha School of Music, and a member of the executive board of the National Music Council of the Philippines. Most of his compositions, written in a late-Romantic style, were burnt during World War II; notable among his works were the Malayan Suite for orchestra (1932), piano solos such as *Pauli-uli* (1974), *Sarimanok* (1976), *Ritual Dance* (1978),

Vision (1981) and *The Juggler* (1982), and songs and chamber pieces on Filipino themes.

LUCRECIA R. KASILAG

Custos (Lat.). *See* DIRECT.

Cutell [Cotell], **Richard** (*fl* 14th century). English theorist. He is generally identified with the Richard Cutell who was a member of the college at St Paul's Cathedral, London, in 1394 and was documented as a cardinal a year later. The content of Cutell's short treatise and the matter surrounding it in the manuscript place his activity in the 14th century. It is found in *GB-Ob* Bod.842, f.48*r*–48*v*, headed 'Opinio Ricardi Cutell de London'. Apart from a quite conventional description of the sights, or transpositions, and consonances proper to discant, and of the three degrees of discant, mene, treble, quatreble, the work is undistinguished. In keeping with the new proscription arising in the 14th century, Cutell forbade parallel perfect consonances of the same kind, and endorsed parallel imperfect consonances. He also stated that on perfect intervals, the solmization syllable *fa* must go with *fa*, and *mi* with *mi*, a stricter form of the usual rule prohibiting *fa* against *mi* on perfect consonances. (M.F. Bukofzer: *Geschichte des englischen Diskants und des Fauxbourdons nach den theoretischen Quellen* (Strasbourg, 1936/*R*), 47ff, 141ff)

ANDREW HUGHES

Cuti, Donato Antonio. Italian composer, uncle of MICHELE DELIPARI.

Cutner, Solomon. *See* SOLOMON.

Cut time (It. *tagliato*). A modern name for the late medieval and Renaissance practice of combining a stroke with a traditional mensuration sign. Thus C (indicating imperfect time, or two semibreves to a breve) became ₵, while O (indicating perfect time, or three semibreves to a breve) became Φ, the stroke in each case 'cutting' the time. The normal effect of the stroke in ₵ was to bring about *proportio dupla*, that is, a diminution of the relative value of each note shape in the ratio 2:1, although ₵ and C were sometimes used interchangeably. In the case of Φ, *proportio dupla* was just one possible effect of the stroke, which had other functions, including non-mensural ones (e.g. that of a coordinating sign).

See also PROPORTIONAL NOTATION.

□

Cutting, Francis (*fl* London, 1571–96; bur. St Clement Danes, London, 7 Jan 1596). English lutenist and composer. In 1571 a Francis Cutting rented from the Howards of Arundel House a tenement in the Strand facing St Clement Danes' churchyard, where he lived until his death in 1596. The absence of a will suggests this was unexpected, and unfortunately the act of admininstration of his estate to his widow Elizabeth, from which we might have deduced his occupation, does not list his possessions. Among the many references to him in documents and registers he is styled 'gentleman' only once, in 1590, therefore probably mistakenly. That Lord Thomas Howard still owed Elizabeth £20 in 1597 could imply employment by the Arundel family. A bill of complaint brought against Cutting in 1591 shows that he had connections in Suffolk and Norfolk, perhaps indicating his family's area of origin, where the surname is common and where the Howards owned considerable property.

Two facts suggest that this Francis Cutting was the lutenist and composer of that name. His son Thomas (bap. 7 November 1583) was bequeathed a 'seal Ringe of the lute' by Francis's widow in 1597. Second, none of the lute music implies composition later than 1596. Although it has been proposed that the writing of Sir Fulke Greville's pavan must post-date the granting of his knighthood in 1603, the honorific 'Sir' might have been added by the scribe, Matthew Holmes, when copying the tablature after 1603, or, alternatively, the title may refer to Sir Fulke's father (1526–1606) who had been knighted in 1565.

Cutting was prominently featured in Barley's *New Booke of Tabliture* (RISM 1596[20]) being the only composer to have his name written out in full and contributing more pieces than any other: 11 compared to only seven by Dowland. This has led to the suggestion that he collected and edited the anthology for Barley. His surviving music is of high quality, comprising about 51 lute pieces, two bandora solos and one consort part for bandora: an output exceeded only by Dowland, Bacheler and Holborne. There is much close imitation and the memorably tuneful galliards and almains are well planned harmonically to give the maximum variety within each piece. The forms include pavan, galliard, almain, toy, jig, divisions on popular tunes and intabulation of keyboard music; there are no preludes, fantasies or later dances such as coranto or volt. The lute music is written mostly for six-course lute, none requires more than seven courses; and in contrast to Dowland's use of unison stringing, octaves are needed on courses four to seven, as recommended in Barley. Unlike other composers of the time who let the music come to rest in the final bar of a strain, Cutting often joined the end of one strain to the beginning of the next with a scalar passage.

The bequeathal of Cutting's seal ring to his son Thomas, who was not the eldest, implies that the ring had special significance for the latter. This son could therefore be the lutenist Thomas Cutting who served successively from 1608 until his death in 1614 Lady Arabella Stuart, Christian IV of Denmark, Prince Henry and William Cavendish.

WORKS

Edition: *F. Cutting: Selected Works for Lute*, ed. M. Long (London, 1968) [L]

LUTE

7 pavan/galliard pairs (3 titled: Mrs Anne Markham's, E. Porter's, Sans Per), 7 pavans, 2 galliards; all in L

4 pavans (2 titled: Groninge, Sir Fulke Greville's), 17 galliards (1 titled: Sir Walter Rawley's); 6 in L

3 intabulations: Lullaby (W. Byrd), Pavana N. Bray (W. Byrd), Pavan on Lachrimae (T. Morley)

4 divisions on popular tunes: Walsingham, L; Packington's Pound; Greensleeves; Willoughby's Welcome Home

2 toys (1 titled: The Squirrell's), 1 in L; 1 jig, L; 1 duet (titled: Short Almain)

BANDORA

1 galliard; 1 set of divisions on The New Hunt; 1 consort part of Groninge Pavan

ROBERT SPENCER

Cutts, John (*fl* 1665; *d* ?Lincoln, before 19 Nov 1692). English composer. He was made junior vicar and poor clerk at Lincoln Cathedral on 31 May 1665. He appears to have spent most of his remaining life there, but was admonished in 1680 for leaving the city without permission. On 14 January 1684 he was made Master of the Choristers, though the chapter acts indicate that he lacked diligence in this office. An argument involving Cutts and his dog in the cathedral on 31 October 1689 led to his expulsion a few days later. However, on 1 April 1690 the dean and chapter resolved to establish 'two public consorts' each year and Cutts was appointed as instrumental teacher to the choirboys. He was reinstated as junior vicar and poor clerk, at the choir's request, on 11 November 1690.

Nine short solos for bass viol are in the manuscript *GB-Lcm* II.f.10, and Lot 13 in the sale of Thomas Britton's library included lyra consorts by Cutts, but these are unknown today. Eight anthems by Cutts are in manuscript (*LI*), including an eight-part setting of *Almighty and everlasting God* dated 1685. *My days are gone* is included in the manuscripts *Lbl* Add.30478–9 and 34203.

ANDREW ASHBEE

Cut-up (Ger. *Aufschnitt*). A term used in organ voicing for the height of the mouth of a flue pipe in relation to its width. Higher cut-ups encourage the development of fundamental, while lower cut-ups encourage more harmonic development. *See* VOICING, §1, and ORGAN, §III, 1.

Cuvelier, Jo(hannes) [Jean; Jacquemart le Cuvelier] (*b* ?Tournai; *fl* 1372–87). French poet and composer. His name was erroneously entered as Cunelier in *F-CH* 564, and twice given only as J.C. In 1372 he was a *diseur* of Charles V of France. According to the anonymous *Règles de la seconde rhétorique* he was called Jacquemart le Cuvelier, came from Tournai and was the king's *faiseur*. In 1387 he completed a chronicle of the life of the High Constable Bertrand du Guesclin. Cuvelier's ballade *En la saison*, set to music by Hymbert de Salinis, is dedicated to Olivier du Guesclin, a cousin of Bertrand, and to Olivier's mother, Thomasse le Blanc. In addition, *F-CH* 564 contains three ballades with both text and music by Cuvelier: *Lorques Arthus, Alixandre et Paris*, a piece with complicated proportions (see Koehler, i, 212, and ii, 109–10), *Se Galaas et le puissant Artus* (which concerns Gaston Fébus, Count of Foix; *d* 1391) and *Se Genevre, Tristan, Yssout, Hellaine*. His songs all have one texted and two untexted voices and are prime examples of the complex notational style of the Ars Subtilior.

URSULA GÜNTHER

Cuvelier d'Arras, Jehan le (*fl c*1240–70). French trouvère. He was perhaps the Johannes Cuvellarius of Bapaume (on the outskirts of Arras) cited in documents of 1258. His period of activity can in any case be determined: the chanson *Pour la meillour* is dedicated to Wagon Wion, who was *échevin* (sheriff) of Arras in 1265 and who died before February 1273. As respondent in nine jeux-partis and judge in six others, Cuvelier was familiar with many of the more important members of the Arras poetic circle, including Jehan Bretel, Jehan de Grieviler, Lambert Ferri and Adam de la Halle. Since Gamart de Vilers addressed Cuvelier as 'Sire', it would appear that he was a figure of importance.

With the exception of *Pour la meillour*, which is decasyllabic, Cuvelier's *chansons courtoises* favour heptasyllabic lines, often mixed with pentasyllabic or other lines. *Amours est* follows the pattern *AA′ BB′ CC′ DE*; otherwise, all chansons are cast in bar form. Generally some form of repetition or motivic play is present in the caudas. Cuvelier's predilection for plagal modes (except for *J'ai une dame*) is unusual. In half of the melodies the final is not a tone centre of primary importance. In the Chansonnier Cangé (*F-Pn* fr.846) there are occasional hints of modal rhythms in *Amours est*, *Mout me plaisent* and *Pour la meillour*; and the disposition of ligatures in *Anuis et desesperance* and *Jolivetés* also hints at times that a free use of modal rhythm may not be inappropriate.

THEODORE KARP

Cuvenor [Suvenor]. The word in the upper margin of f.74 of the early 16th-century manuscript *E-Bc* M.454 was read as 'Cuvenor' or 'Suvenor' by the Catalan musicologist Higini Anglès, who believed it was an ascription (*La música en la corte de los Reyes Católicos*, i, MME, i (Madrid, 1941), 113). Subsequently this otherwise unknown name was incorporated into musicological literature (see for example H. Kellman, ed.: *Census-Catalogue of Manuscript Sources of Polyphonic Music 1400–1550* (Neuhausen-Stuttgart, 1988), v, 143). The best reading of the inscription, however, is 'Superior', and it must denote a voice part, not a composer (see E. Ros-Fábregas: *The Manuscript Barcelona, Biblioteca de Catalunya, M.454: Study and Edition in the Context of the Iberian and Continental Manuscript Traditions* (diss., CUNY, 1992), i, 269–70, 274–8). The piece, a three-voice mass, is elsewhere attributed both to Aulen and to Agricola.

EMILIO ROS-FÁBREGAS

Cuvillie, John Baptiste (*d* Dublin, 1728). Organ builder active in Ireland, presumed to be of French origin. He was the leading organ builder in Ireland in the early 18th century. He was assistant to the English organ builder Renatus Harris and probably came to Ireland around 1697 when Harris was building organs for St Patrick's and subsequently Christ Church cathedrals in Dublin. In 1699 Cuvillie was contracted by Christ Church to make adjustments and certain additions to the organ. He was employed as 'keeper of the organs' at both Dublin cathedrals until his death in 1728.

Cuvillie built organs in Dublin for Trinity College (1700), St Peter's (1713), St Mary's (1713) and St Michan's (1725), and for Cloyne Cathedral (1713); he also rebuilt or enlarged the organs at St Finnbarr's Cathedral, Cork (1710), and St Canice's Cathedral, Kilkenny (*c*1710). He was employed as organ tuner and repairer at all of these locations and at many other Dublin churches until his death.

DENISE NEARY

Cuvillier, Charles (Louis Paul) (*b* Paris, 24 April 1877; *d* Paris, 14 Feb 1955). French composer. He studied at the Paris Conservatoire and with Fauré and Messager. He began writing for the Paris popular theatre and achieved popular success with *Avant-hier matin* (1905). Several subsequent operettas had international acclaim, including *Son p'tit frère* (1907) and *La reine s'amuse* (1912), the latter of which contained his greatest domestic song success, 'Ah! la troublante volupté'. These became *Wild Geese* and *The Naughty Princess* in London where Cuvillier enjoyed a run of popularity from 1918 to 1920. The greatest of his London successes was the operetta *Der lila Domino* (Leipzig, 1912), composed by a Frenchman to a German libretto and enjoying huge popularity throughout the British Empire. Cuvillier composed light, insinuating music, distinguished by typically French phrasing.

WORKS
(*selective list*)

all operettas or musical comedies

Avant-hier matin (2, T. Bernard), Paris, Capucines, 20 Oct 1905; Le flirt de Colombine (J. Redelsperger), Nice, 30 Jan 1907; Son p'tit frère (A. Barde), Paris, Capucines, 10 April 1907; rev. as Laïs, ou la courtisane amoureuse, 1930; Les rendez-vous strasbourgeois (1, R. Coolus), Paris, Comédie-Royale, 12 Feb 1908; Afgar, ou Les loisirs andalous (2, Barde and M. Carré, *fils*), Paris, Capucines, 10 April 1909; La fausse ingénue, ou les Muscadines (Barde), Paris, Capucines, 28 April 1910
Der lila Domino (3, E. von Gatti and B. Jenbach), Leipzig, Stadttheater, 3 Feb 1912; Sappho (Barde and Carré), Paris, Capucines, 27 Feb 1912; L'Initiatrice (R. Dieudonné and H. Delorme), Paris, Mayol, 6 Nov 1912; La reine s'amuse (Barde), Marseilles, Variétés, 31 Dec 1912, rev. as La reine joyeuse, Paris, Olympia, 6 Feb 1913; Flora Bella (Barde and F. Dörmann), Munich, Gärtnerplatz, 5 Sept 1913; Mademoiselle Nom d'une pipe (G. Duval), Paris, Palais Royal, 16 July 1918
The Sunshine of the World (3, G. Unger and J. Heard, after K.K. Ardaschir), London, Empire, 18 Feb 1920; Nonnette (Barde), Paris, Capucines, 28 March 1922; Bob et moi (Barde, L. Meyrargue), Paris, Théâtre Michel, 6 April 1924; Qui êtes-vous? (H. Genty, Berr and Jouvault), Monte Carlo, 13 Nov 1926; Boulard et ses filles (L. Verneuil, Saint-Granier, J. le Seyeux), Paris, Théâtre Marigny, 8 Nov 1929; Le Train de 8h 47 (G. Courteline and L. Marchis Barde), Paris, Palais Royal, 22 Dec 1935

ANDREW LAMB

Cuyás y Borés, Vicenc (*b* Palma de Mallorca, 6 Feb 1816; *d* Barcelona, 7 March 1839). Spanish composer. He abandoned medical studies in Barcelona to undertake musical composition with Ramón Vilanova. At 19 he attracted attention with a symphony dedicated to the actress Matilde Díez performed at the Principal (sometimes called S Cruz) theatre in Barcelona. Composing under Bellini's influence, Cuyás left unfinished *Ugo conte di Parigi* (to a libretto by Romani) in order to complete in record time the two-act *La Fattucchiera* (Romani, after Arlincourt: *Ismalie, ou L'amour et la mort*; manuscript score in Villanueva y Geltrú, Biblioteca-Museo Balaguer; ed. F. Cortês Mir, Madrid, 1998). Romani's libretto had previously been set by Mercadante (1832) and Carnicer (1838) as *Ismalia, ossia Morte ed amore*. Cuyás's opera was a resounding success at its opening at the Principal on 23 July 1838; the dénouement, in which the heroine Ismalia joins the shade of her deceased lover, particularly moved the public. The opera was given 20 performances the first season and seven the next. Cuyás had, however, undermined his health and contracted tuberculosis. A third Romani setting, *El sonámbulo*, was never finished.

JOHN DOWLING

Cuyler, Louise E(lvira) (*b* Omaha, NE, 14 March 1905; *d* Carmel, CA, 3 Jan 1998). American musicologist. Her first musical training was in Omaha, where, while still in high school, she appeared publicly as a violinist. She received the BM in violin from the Eastman School of Music in 1929. Later she was associated with the School of Music of the University of Michigan, where she taught theory and took the MM in theory and composition in 1933. After serving in the American Red Cross during World War II, she returned to the University of Michigan and at the same time resumed studies at the Eastman School, taking the PhD in musicology in 1948 with a dissertation on the third book of Henricus Isaac's *Choralis constantinus*. At Michigan she became professor of music (1953), director of the department of musicology (1957) and professor emeritus (1975). In addition she served for over two decades as music critic for the *Ann Arbor Daily News*, retiring in 1971. She lectured widely and was visiting professor at the University of Washington, Seattle (1964), Stanford University (1965), Indiana University (1975) and the University of California at Santa Barbara (1976). In 1975 she was made Neilson Distinguished Professor of Smith College, Northampton, Massachusetts. She was a member of the AMS council for more than 20 years, and served as its secretary (1955–71). Although her interests were wide, Cuyler was best known for her studies of the Franco-Flemish Renaissance and music in Germany during the Josquin period. In particular she discussed the political use of the motet and the interaction of church and state in musical commissions.

EDITH BORROFF/PAULA MORGAN

Cuypers [Kuypers, Kuppers], **Johannes Theodorus** (*b* Dornick, 14 Oct 1724; *d* The Hague, Sept 1808). Dutch violin maker. He became a burgher of The Hague in 1752, and worked there continuously for about 50 years. He was one of the first makers in northern Europe to work on the pattern of Stradivari, though his instruments are highly personal in character and easily recognized. Many violins are in circulation, those of the later period noting their maker's advancing age on the manuscript labels within; they are consistently fine-sounding. Johannes Cuypers was followed by his sons Johannes Franciscus (*b* 12 Jan 1766; *d* 16 July 1828) and Johannes Bernardus (*b* 3 May 1781; *d* 15 Sept 1840), whose work is of considerably less distinction.

CHARLES BEARE

Cuzzoni, Francesca (*b* Parma, 2 April 1696; *d* Bologna, 19 June 1778). Italian soprano. Her parents were Angelo, a professional violinist, and Marina Castelli. She was a pupil of Francesco Lanzi; her first known appearance was in an anonymous *La virtù coronata, o Il Fernando* (1714, Parma). She sang in 1716–17 at Bologna in operas by Bassani, Buini, Gasparini and Orlandini and by 1717–18 was 'virtuosa di camera' to the Grand Princess Violante of Tuscany, singing at Florence, Siena, Mantua, Genoa and Reggio nell'Emilia in operas by Orlandini, C.F. Pollarolo and Vivaldi (*Scanderbeg*). She made her Venice début in 1718 as Dalinda in Pollarolo's *Ariodante*, with Faustina Bordoni as Ginevra; the future rivals appeared there again in two operas the following year. Cuzzoni sang at Florence and Milan in 1719, at Turin, Bologna and Florence in 1720, at Padua in 1721 and in five more operas at Venice in 1721–2; in Orlandini's *Nerone* she played Poppaea, with Faustina as Octavia and Diana Vico as Agrippina.

She went to London at the end of 1722, having married the composer and harpsichordist Pietro Giuseppe Sandoni on the way. Her reputation preceded her. Her King's Theatre début on 12 January 1723 as Teofane in Handel's *Ottone* was sensational. The part had not been composed for her and at rehearsal she refused to sing her first aria, 'Falsa immagine', until Handel threatened to pitch her out of the window; but her triumph was complete. At her benefit on 25 March 'some of the Nobility gave her 60 Guineas a Ticket' (in addition to her salary of £2000 a season). She remained a member of the company until the Royal Academy closed in June 1728 and sang in every opera: Handel's *Flavio* (Emilia), *Giulio Cesare* (Cleopatra; she and Senesino had an outstanding success), *Tamerlano* (Asteria), *Rodelinda* (title role), *Scipione* (Berenice), *Alessandro* (Lisaura), *Admeto* (Antigona), *Riccardo Primo* (Costanza), *Radamisto* (Pilissena in the 1728 revival), *Siroe* (Laodice) and *Tolomeo* (Seleuce), Ariosti's *Coriolano*, *Vespasiano*, *Aquilio consolo*, *Artaserse*, *Dario*, *Lucio Vero* and *Teuzzone*, Bononcini's *Erminia*, *Farnace*, *Calpurnia* and *Astianatte*, and the pasticcios

Elpidia and *Elisa*. The exuberance of her admirers soon led to quarrels, first with the partisans of Senesino and later with those of Faustina Bordoni, who made her London début in *Alessandro* in 1726. The rivalry between the two great sopranos was notorious and became a public scandal when ovations, whistles and catcalls in turn led to a scuffle on stage during *Astianatte* on 6 June 1727. Cuzzoni was dismissed by the Academy, but reinstated when the king threatened to withdraw his subsidy. The final Academy season seems to have been less cantankerous, despite (or because of) the satirical portrait of the ladies as Polly and Lucy in *The Beggar's Opera*.

Cuzzoni spent winter 1728–9 in Vienna at the invitation of Count Kinsky, the imperial ambassador in London; she made a great impression but was not engaged for the opera because she demanded an exorbitant salary. She sang at Modena and Venice in 1729. Heidegger wished to engage both prima donnas for the Second Royal Academy that autumn, but Handel, who according to Rolli had never liked Faustina and wanted to forget Cuzzoni, preferred new voices. In 1730–31 Cuzzoni sang at Piacenza, Bologna, in Hasse's *Ezio* and Sarro's *Artemisia* at Naples, and in three operas, including Hasse's *Artaserse*, in Venice. During 1731–2 she appeared again in Venice and Florence in operas by Hasse and her husband, and at Genoa in the carnival seasons of 1733 and 1734, still in close association with Sandoni. She was one of the first singers approached by the Opera of the Nobility, in opposition to Handel, in 1733; she arrived in April 1734 and joined the cast of Porpora's *Arianna in Nasso*. She sang in four more operas by Porpora (*Enea nel Lazio*, *Polifemo*, *Ifigenia in Aulide* and *Mitridate*), Hasse's *Artaserse*, Handel's *Ottone* (her old part, but under Nobility management), Sandoni's *Issipile*, Veracini's *Adriano in Siria*, the pasticcio *Orfeo* and Francesco Ciampi's *Onorio*. She seems to have aroused less enthusiasm on this visit.

Cuzzoni (left), Farinelli and Heidegger: etching by the Countess of Burlington (Dorothy Boyle) and Joseph Goupy after drawings (c1730) by Marco Ricci and Goupy

Cuzzoni sang in Leo's *Olimpiade* and Caldara's *Ormisda* at Florence in 1737–8; the following carnival season she performed operas by Leo and Arena in Turin, receiving the huge sum of 8000 lire. Later in 1739 she was at Vienna, and in September 1740 she was a member of Angelo Mingotti's opera company at Hamburg. She sang in Amsterdam in 1742 with the Wolfenbüttel Kapellmeister Giovanni Verocai (she and Sandoni had now separated) and is said to have published there a new setting of Metastasio's *Il Palladio conservato* (no copy is known). After 1749 she was plagued with debts and an aging voice; her time was spent alternately in prison for debt or giving concerts to pay her debtors. In February 1750 she performed in Paris before the French queen; in 1750 and 1751 she revisited London and sang at concerts, but was coldly received. She spent her last years in Bologna, supporting herself, it is said, by making buttons. She died in obscurity and extreme poverty.

Cuzzoni in her prime was by universal consent a superb artist. Burney expressed the views of various writers, including Tosi, Quantz and particularly Mancini (*Pensieri e riflessioni pratiche spora il canto figurato*, 1774):

> It was difficult for the hearer to determine whether she most excelled in slow or rapid airs. A native warble enabled her to execute divisions with such facility as to conceal every appearance of difficulty; and so grateful and touching was the natural tone of her voice, that she rendered pathetic whatever she sung, in which she had leisure to unfold its whole volume. The art of conducting, sustaining, increasing, and diminishing her tones by minute degrees, acquired her, among professors, the title of complete mistress of her art. In a cantabile air, though the notes she added were few, she never lost a favourable opportunity of enriching the cantilena with all the refinements and embellishments of the time. Her shake was perfect, she had a creative fancy, and the power of occasionally accelerating and retarding the measure in the most artificial and able manner, by what the Italians call *tempo rubato*. Her high notes were unrivalled in clearness and sweetness, and her intonations were so just and fixed, that it seemed as if it was not in her power to sing out of tune.

Tosi praised her 'delightful soothing *Cantabile*', and contrasted her pre-eminence in 'Pathetick' with Faustina's dramatic fire in 'Allegro'. Quantz, who heard her often in 1727, said that 'her style of singing was innocent and affecting', and her graces 'took possession of the soul of every auditor, by her tender and touching expression'. She could move an audience to tears in such simple arias as 'Falsa immagine' and Rodelinda's 'Hò perduto il caro sposo'. She was probably at her best on her first visit to London, and the wonderful series of parts Handel wrote for her, especially Cleopatra, Asteria, Rodelinda and Antigone, seems perfectly calculated to bring out the qualities mentioned above. They call for a fluid use of the whole compass from *c'* to *b'''* (Quantz said she sang up to *c'''*) and offer repeated openings for her famous trill, which was slow and sensuous. Cuzzoni was the first female high soprano to distinguish herself in prime roles. Although not inclined to extremely fast passage-work, she was capable of singing coloratura arias extremely

difficult for their variety of rhythm and figuration, such as 'Sprezzando il suol' in Porpora's *Enea* or 'Da tempeste' in *Giulio Cesare*; features include short florid passages, unexpectedly rising to the higher register and then abruptly truncated on a staccato note (usually *a″* or *b″*). Other arias, such as 'Conservati fedele' in Hasse's *Artaserse* or the Largo 'Ombre, piante', again in *Rodelinda*, show an equally definite propensity to the noble and the pathetic. Cuzzoni was neither a great actress nor a beautiful woman. Horace Walpole, with reference to *Rodelinda*, said:

> she was short and squat, with a doughy cross face, but fine expression; was not a good actress; dressed ill; and was silly and fantastical. And yet on her appearing in this opera, in a *brown silk gown*, trimmed with silver, with the vulgarity and indecorum of which all the old ladies were much scandalized, the young adopted it as a fashion, so universally, that it seemed a national uniform for youth and beauty.

The best likeness of Cuzzoni is a print after Seeman, reproduced in Hawkins's *History*. She appears in many caricatures, including two operatic scenes engraved by Vanderbank (1723) and Goupy (1729) and original drawings by A.M. Zanetti (two in the Cini collection, *I-Vgc*) and Marco Ricci (two at Windsor Castle).

WINTON DEAN/CARLO VITALI

Cvetko, Dragotin (*b* Vučja Vas, Ljutomer, 19 Sept 1911; *d* Ljubljana, 3 Sept 1993). Slovene musicologist. He studied at Ljubljana Conservatory and at the University of Ljubljana, where he received the PhD in music education in 1938; he then continued his studies at the master school of the Prague Conservatory. He taught at the Ljubljana Academy from 1938 to 1943 and from 1945 to 1962. In 1962 he founded the department of musicology at the University of Ljubljana, where he became professor; from 1970 to 1972 he served as the dean of the faculty of arts there. He was a member of the Slovenian and Serbian Academies of Arts and Sciences, vice-president of the IMS and editor of *Muzikološki zbornik*. He was awarded the Herder Prize in 1972.

Cvetko was initially interested in music education, but later turned to musicology and became an authority on the history of Slovenian music. His studies of the life and works of Jacobus Handl (Gallus), Gabriel Plautzius, Johannes Baptist Dolar and several other composers of Slovenian origin show conscientious and wide-ranging research. His books organize successfully the detailed information on individual figures and institutions given in his numerous articles into a systematic music history of Slovenia, which is presented in the context of its cultural and political history. He believed that in order to understand fully the development of European musical culture it is necessary to follow not only its mainstream, but also its course in peripheral centres. Accordingly he studied the contribution of eastern central Europe to the musical life of the Renaissance and Baroque; it is largely because of his efforts that the music history of Slovenia and its relationship with the powerful musical cultures of neighbouring Austria and northern Italy are now so well documented. With Josip Andreis he was the founder of the modern school of musicology in the former Yugoslavia as well as having been a mentor to a whole generation of musicologists in Slovenia and the adjacent area of Central Europe.

BOJAN BUJIC

Cybele [Kybēlē, Kybella, Kybelē, Kybēbē (Lydian); Lat. Cybele, Cybebe, Cybela]. Ancient Phrygian deity, often called the Great Mother by both Greeks and Romans. She was linked with many other female divinities, especially Rhea and Artemis. By the time her cult reached Greece (5th century BCE) it had become fused with the liturgy of DIONYSUS, reflecting the cult of divine mother and son in Asia and Crete. The male figure worshipped in specific conjunction with Cybele was, however, her youthful consort Attis. His cult, which became important only in Rome under Claudius (emperor 41–54 CE), included the use of the syrinx; he was originally a shepherd-god.

An extensive fragment of a DITHYRAMB by Pindar, from the first half of the 5th century BCE, mentions tympana and crotala (clappers, usually in pairs) sounding in honour of 'the august Great Mother' (Bowra, frag.61.6–8). A Homeric hymn which must date from approximately the same period refers to these two instruments as well as the aulos (*To the Mother of the Gods*, xiv.3). In the *Bacchae*, produced about 405 BCE, Euripides gave particular prominence to the tympanum as the invention of Dionysus and Rhea (i.e. Cybele; 59, 120–34), linking it with the use of Phrygian auloi (127–8, 159–61) and describing its deep, booming tone (156, *barubromōn*). Cult statues or paintings of the goddess usually showed her with the tympanum (for illustration *see* TYMPANUM (i)). The Athenian minor tragic poet Diogenes described the Phrygian women worshippers of Cybele as using *rhomboi* (bullroarers) in addition to the usual tympana and cymbals (Nauck, frag.1.34 = Athenaeus, xiv, 636a; cf iv, 148c–d; v, 198d; viii, 361e; and xiv, 621b–c). According to Menander, the begging priests of Cybele's cult used cymbals to summon her (Kock, frag.245); Firmicus Maternus (4th century CE) described a similar use of the tibia.

Ovid described the introduction of Cybele's rites to Rome in 204 BCE and listed the instruments regularly used, including the Phrygian double aulos with one recurved bell-shaped mouth (*Fasti*, iv.181). Apuleius (2nd century) described the music used by followers of the 'Syrian goddess' Atargatis, whose cult resembled that of Cybele and was characterized by the presence of eunuch priests. He also mentioned a *choraula* (in this context a cornu player), dancing in triple rhythm, the tibia and various percussion instruments (*Metamorphoses*, viii.26–7). The scene depicted on a Roman terracotta suggests that a long-handled spherical rattle (the Greek *platagē*) was used in the rites of Cybele.

Only members of her priesthood and trained instrumentalists performed the rites; and since the hymns were required to be sung in Greek (Servius on Virgil, *Georgics*, ii.394), they were performed by professional singers called *hymnologi*.

Clement of Alexandria in his *Protrepticus* quoted a ritual formula recited by those being initiated into the mysteries of Cybele: 'I ate from the tympanum; I drank from the cymbal' (2.14), where the round tympanum is an image of the earth as primal element, while the concave cymbal is a chalice.

WARREN ANDERSON/THOMAS J. MATHIESEN

Cybot [Cibot, Cirot], **Noel** (*d* Paris, Aug 1556). French composer, singer and organist. He came from Limoges and was appointed a singer in the Ste Chapelle, Paris, on 9 August 1522 (*BrenetM*). In 1543 he was still resident there, having been elevated to the position of *chapelin perpetuelle*, and also acted as organist. One of Attaingnant's volumes (RISM 1530[5]) includes two courtly four-voice pieces by him in the generally homophonic manner of Sermisy. Two more pieces, rustic anecdotes set in the livelier syllabic contrapuntal style of Janequin and Passereau, figure in another Attaingnant volume (1535[6]), ascribed to 'Cirot'. A collection of *Magnificat* settings published by Attaingnant (1534[7]) opens with one by Cybot composed in the imitative manner of the post-Josquin period (ed. A. Smijers and A.T. Merritt, *Treize livres de motets parus chez Pierre Attaingnant*, v, Paris, 1960).

FRANK DOBBINS

Cybulski, Izydor Józef (*b* 2nd half of the 18th century; *d* ?Warsaw, 1st half of the 19th century). Polish composer and music engraver. The first date known in his life is 22 November 1802, when as a priest he delivered a sermon in the Augustinian church in Warsaw on the influence of music on the human mind and soul. In 1803 he worked in Elsner's music engraving workshop, but from 1805 to 1817 he ran one of his own, which in 1817 published Chopin's first composition, the Polonaise in G minor. In 1809 he organized and directed a school of organists in Warsaw. Cybulski's compositions include a Polish mass to a text by F. Wężk (1805, manuscript in *PL-CZ*), *8 variations pour le clavecin* (Warsaw, n.d.), Polonaise in B♭ (Warsaw, n.d.) and *Trois polonaises pour le clavecin ou pianoforte* (Warsaw, 1805–6).

ALINA NOWAK-ROMANOWICZ

Cyclic form. Music in which a later movement reintroduces thematic material of an earlier movement is said to be in 'cyclic form'. In its strict meaning such music returns at its end to the point whence it set out at the beginning, in the manner of the song *There's a hole in my bucket*, to produce an endlessly rotating cycle; but in practice the simplest examples have been works like Haydn's Symphony no.31 in D (*Hornsignal*), Beethoven's Serenade

op.8, Brahms's Third Symphony and Elgar's Second Symphony, whose finales all close with the material of the beginning of the work. More generally the term 'cyclic' describes those works where thematic links bind more than one movement; it is not properly applied to mere thematic resemblances. Examples may be found in many instrumental sonatas, suites and canzonas of the early 17th century (*see* VARIATIONS) and can be cited in a large number of sacred works, like Bach's B minor Mass and Mozart's Mass in C K317. But they are rare (except in Boccherini's music) in the 18th century. Beethoven (*An die ferne Geliebte*, Piano Sonata in A op.101), Schubert (Piano Trio in E♭; Fantasie in C for violin and piano) and Berlioz (*Symphonie fantastique*) laid the foundations on which Mendelssohn, Schumann, Liszt and Franck elevated cyclic principles to great importance, associated with the widespread application of THEMATIC TRANSFORMATION and the desire for greater continuity between separate movements, all methods of establishing a tighter cohesion in multi-movement forms. Since the 19th century cyclic form has been adopted as a regular stock-in-trade of musical structure.

Cymbal (Fr. *cymbale*). *See under* ORGAN STOP (*Zimbel*).

Cymbala (Lat., from Gk. *kumbalon*). (1) A type of ancient cymbals (an IDIOPHONE). Ancient cymbala were a pair of small, plate-shaped or more often cup-shaped bronze cymbals. (*See* CYMBALS and TYMPANUM (i) for illustrations.) They were associated in Greco-Roman culture with orgiastic religious rites, where they played ecstasy-inducing music together with the tympanum and the AULOS. They became particularly prominent in Rome after the introduction of the Magna Mater, Cybele, from Asia Minor in 204 BCE. They appear on numerous vases and in murals and reliefs; a typical literary reference is that of Catullus who had a young votary of the goddess exclaim: 'Come follow me to the Phrygian house of Cybele, to the Phrygian grove of the goddess, where the voice of the cymbalum sounds, where the tympanum echoes, where the Phrygian tibia player sings on his deep-toned curved reed, where they celebrate the sacred rites with shrill cries, where the milling crowd of her worshippers rushes to and fro'. Roman conquests in the East and increasing luxury among the ruling classes brought many foreign artists to the capital in the early days of the empire. Exotic dances in taverns and in the streets were performed to the accompaniment of crotala, cymbala, tympana and foreign wind instruments. The instrument was used in biblical times, and early Christian writers when they mention cymbals clearly mean cymbala, as, for example, St Augustine in his commentary on the psalms – the sound as they touch 'can be compared to our lips'.

(2) Medieval bells. The use of 'cymbala' to denote a set of small bells is first found in about 900 in treatises emanating from the St Gallen region of Germany; these treatises, which are concerned with proportion, usually designate a diatonic scale based on C (including B♭), and they use the relative weights of the bells (in the same manner that the length of organ pipes or the stopping of the string of a monochord are used) to illustrate Pythagorean pitch relationships. Shortly after, illuminations showing a row of bells hung on a frame and struck with a hammer began to appear in Germany and in areas influenced by German artists. The so-called Paris Bibles (produced after about 1290), with their illuminated initial for Psalm cl showing a seated King David playing a row of bells with a hammer, inspired numerous copies throughout France, Flanders and England. This row of bells is not seen in Italian iconography, however, nor is it used except as a symbol of David, Musica or the Risen Christ, or as an instrument in the hands of one of the musicians or theoreticians accompanying them (see illustration).

In the later medieval period the word 'cymbala' was employed less specifically. Sometimes the singular form 'cymbalum' was used to denote large church bells or monastic signal bells. Later, the scale of bells found in a clock or in the rotating sacring wheel used during Mass to herald the moment of consecration would be designated 'cymbala'. The latter usage may explain the origin of the organ stop called 'cymbalum'. Literary accounts, especially when joyful events are being described, make frequent use of the juxtaposition found in Psalm cl of 'organs and cymbals'; it was probably because the organ and bells were both used in church ritual that the word 'cymbala' came to be adopted for a bell.

Cymbala, as a row of small bells struck with hammers, have often been a popular (though recent – following Smits van Waesberghe's 1951 publication) addition to

Cymbala and fiddle (top) with a harp, rebec and panpipes: illuminated initial from a French psalter, first half of the 13th century (NL-DHk 76 E 11 f.2r)

the instrumentarium in the modern performance of medieval music. However, no medieval account exists that can incontrovertibly be said to describe the use of bells in this way; neither is there an inventory listing nor an actual surviving example of the instrument.

Cymbalon [cymbalum] (Hung.). *See* DULCIMER.

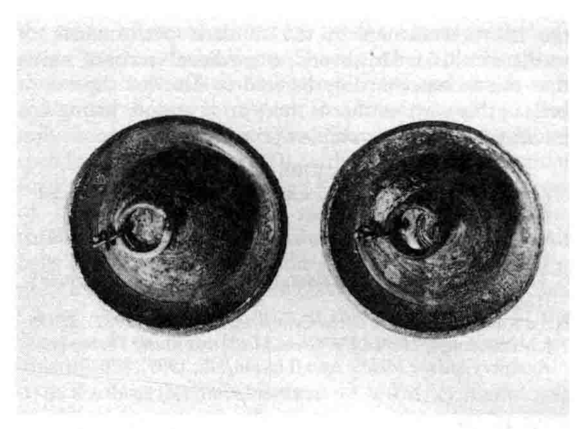
Cymbals (from Gk. *kymbos*; Fr. *cymbales*; Ger. *Becken, Schellbecken, Tellern; Tschinellen* [obsolete]; It. *piatti, cinelli*; Sp. *platillos*). Instruments of percussion (classified as vessel clappers with everted rim; *see* IDIOPHONE), normally of indefinite pitch, in the form of concave plates, each with a raised boss in the centre. The shape and size of the plate, and the size of the boss in proportion to the area of the cymbal varies widely from type to type. Pairs of cymbals are clashed together, one held in each hand by a strip or loop of cloth or leather tied through a hole or holes in the boss, or, in the case of the hi-hat (see below), by means of a foot pedal. Alternatively, single cymbals are suspended (by one hand or on a stand) and struck with a beater. The modern orchestral cymbals are a pair of large round plates of metal (an alloy of approximately 80% copper and 20% tin), the exact constituents and processing of which are the makers' secrets. The highest-quality cymbals are said to contain pure silver. Present manufacturers include the long-established and world-famous Zildjian family with branches in Turkey, the USA and Canada (fig.1; for further illustration *see* ZILDJIAN), M.M. Paiste & Sohn of Switzerland, the Premier Drum Co. of England and the Italian firm of Ufip.

1. Manufacture. 2. Ancient history: Near East and Europe. 3. China. 4. Modern Western history, usage and technique.

1. MANUFACTURE. To meet present-day requirements in the orchestra and in jazz groups, cymbals are made in many sizes and grades of sound. Diameters (edge to edge) range from 15 cm to 61 cm. Cymbals of antiquity are known to have been considerably smaller; modern small suspended cymbals tuned to a definite pitch, inspired by surviving ancient examples, are known as CROTALES (also 'antique cymbals'; see §2 below), and small pairs of cymbals, held one on the thumb and the other on the index or middle finger, are known as FINGER CYMBALS (fig.2). For standard orchestral purposes the desired tonal qualities are brilliance, resonance and a multiplicity of overtones. In general, orchestral cymbals are 'paired' with a slight difference in pitch. The finest-quality cymbals are cast, rolled, hand-beaten and machine-skimmed (pared) to a predetermined thickness. Each plate is slightly convex to ensure that only the outer edges meet. In the centre of each plate is a shallow saucer-like recess forming a dome. A double strap by which the cymbal is normally held is passed through a central hole and is knotted with a crown ('sailor's') knot inside the cymbal where the recess is concave. The strap is gripped between the thumb and first finger. To shield the knuckles a circular pad of soft leather or felt covers the dome. In some cases cymbals are held by a special handle. Moderate-quality cymbals of brass serve useful purposes, but are completely out of place in

1. *Modern orchestral cymbals by Avedis Zildjian*

2. *Indian finger cymbals (manjira)*



the full orchestra, where, with certain exceptions such as the occasional use of Chinese cymbals, only the best quality 'Turkish' instruments are acceptable.

2. Ancient history: Near East and Europe. Cymbals are of ancient origin. Three sherds with painted relief decoration (first half of 2nd millennium BCE) from Kabakh in Hittite Anatolia show musicians with cymbals; and on a terracotta plaque of similar date from Larsa (Old Babylonian period) a drummer and cymbal player are performing while two men box or wrestle. There is much reference to cymbals in the Bible, and Psalm cl refers to *mesiltayim* and *selselim* (probably identical instruments, made of bronze or copper; *see* Jewish music, §I, 3(vi)). Canaanite bronze cymbals have survived from the area, and pairs of cymbals were used in the liturgy of the First Temple at Jerusalem. David's chief musician, Asaph, was a professional cymbal player. During the dedication of the Ark, Heman, Asaph and Ethan were all three appointed to play cymbals of brass. In the last century of the Temple only one cymbal player was regularly employed, to mark pauses in the chanting, or to signal the beginning of the Levitical chant.

Cymbals not unlike those in use today are represented on Babylonian and Assyrian reliefs from the turn of the 1st millennium BCE, and a number of actual instruments have been found at Nimrud. A Babylonian plaque dated *c*700–600 BCE (British Museum, London) shows a pair of cymbals held vertically (as in the modern orchestra) and a drum; an Assyrian bas-relief of *c*680 BCE depicts cymbals held horizontally. Cymbals had their place in Assyrian military bands, where they are shown in combination with lyres and drums.

Egyptian cymbals, mostly from the Greco-Roman period, have survived in three main sizes: large, flat instruments; medium-sized cymbals with comparatively deep central depressions; and small instruments often attached to long, forked handles ('tong-cymbals'). An interesting pair of beaten bronze cymbals (their date is uncertain) measure some 15 cm in diameter and are secured by the original cord. Many of the smaller instruments produce well-defined, bell-like notes of high pitch. The Egyptian cymbal found a new, religious role in the Coptic Church, where melodies in strict rhythm are accompanied by small cymbals or cymbals and triangles. The instrument is also used at Coptic burials.

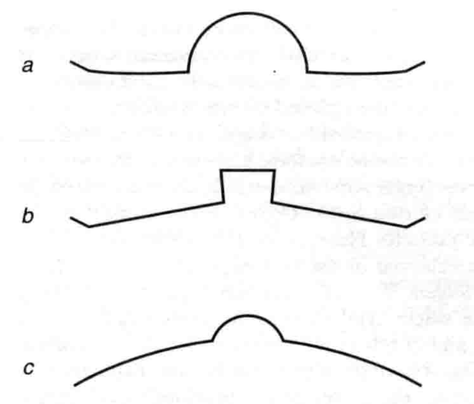
In Europe the cymbal appears in many ancient Greek and Roman iconographical sources (*see* Cymbala). A pair of small bronze cymbals from Greece (*c*500 BCE) survives (fig.3). The instrument is also clearly portrayed on a marble statue of the Hellenistic period (3rd century BCE), and on a mosaic found at Pompeii dated 73 CE. An illustration from Herculaneum shows a pair of cymbals connected by a strap. In contrast, on an ancient Greek drawing of a female centaur and a bacchante, the centaur holds a cymbal in her left hand which she strikes against an identical instrument held in the bacchante's right hand, to assist, it is supposed, in the musical activity concerned with an orgy. Greek cymbals were closely associated with such rites, particularly the ancient orgiastic rites of the goddess Cybele, and the raucous rites connected with the worship of Dionysus (or, in Rome, Bacchus; fig.4). In many cultures cymbals, in addition to their use in religious and secular life, have been credited with remarkable powers. This subject, and the use and properties of antique cymbals in Greek, Roman and Jewish history, were

3. Bronze cymbals, Greek, c500 BCE (British Museum, London)

discussed at length by F.A. Lampe in *De cymbalis veterum* (1700) and R. Ellys in *Fortuita sacra quibus subjicitur commentarius de cymbalis* (1727).

A set of cymbals from the ruins of Pompeii (in the City Museum Pompeii) range from small crotales to cymbals measuring 41 cm in diameter. These instruments are said considerably to have interested Berlioz, who was certainly responsible for introducing the gentle tinkle of 'antique cymbals' into the orchestra. In the scherzo of his dramatic symphony *Roméo et Juliette* (1839) two pairs of antique cymbals tuned a 5th apart to *b♭″* and *f‴* are needed. Debussy scored for two antique cymbals (*cymbales antiques*) in *e″* and *b″* in *Prélude à l'après-midi d'un faune* (1891–4). In *Daphnis et Chloé* (1912) Ravel scored for

4. Cup-shaped cymbala, held horizontally: detail from 'The Triumph of Bacchus over Hercules', Roman silver dish from the Mildenhall Treasure, 4th century CE (British Museum, London)

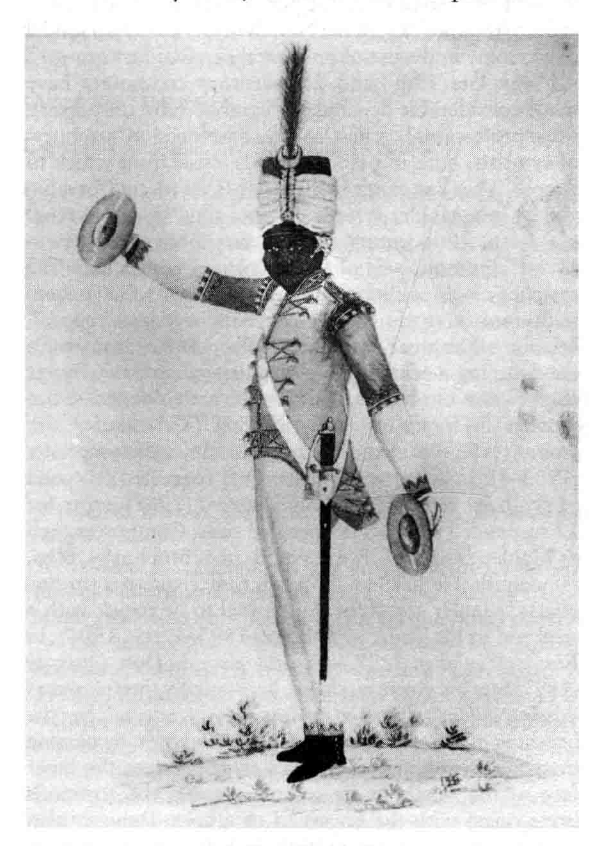


six pairs of antique cymbals with definite notes sounding *b′*, *c″*, *d♭″*, *e″*, *f″*, *a″*.

3. CHINA. Cymbals seem to have been introduced into China from Central Asia, most likely during the 3rd or 4th centuries CE. Pictures of musicians playing pairs of cymbals, roughly 20 cm or more in diameter, are found in the late Dunhuang cave frescoes (*c*7th century CE), the Wang Jian reliefs (late 9th century) and other pictorial sources. Historically known in China as *tongbo* ('copper [alloy] cymbals'), period sources show that they were employed in six of the ten official ensembles functioning within the Tang court (618–907). Cymbals known as *nao* were also commonly used in Buddhist rituals. Description of the *tongbo* in the early 10th-century dynastic history *Jiu Tangshu* suggests that the instrument has changed very little over the last millennium. Today, cymbals are widespread throughout China, used in accompaniment of the regional opera traditions and for ceremonial occasions such as weddings and funerals.

Chinese cymbals are constructed of 'resonant copper' (*xiangtong*), an alloy of essentially three or more parts copper to one part of tin. Cymbals in use today are of two basic types: *bo* and *nao* . The *bo* type is more common; its boss is large – as much as half of the total diameter – and bulbous with a strip of cloth or cord inserted through the boss for holding. The *nao* is made of thinner metal; it has gently sloping shoulders and a narrow, slightly upturned rim; its boss is small and held directly. Profiles of these cymbals are shown, together with the modern 'Turkish' cymbal in fig.5. Sizes vary considerably, from the small 'capital cymbals' (*jingbo*) that accompany Beijing opera (*c*15–20 cm in diameter), to the generally larger *nao* (*c*40–65 cm in diameter) and occasionally large *bo* of similar size. (For a discussion of the modern South Asian cymbal *see* TĀL.)

4. MODERN WESTERN HISTORY, USAGE AND TECHNIQUE. Cymbals closely resembling those used by the Greeks and Romans frequently appear in pictorial representations of the Middle Ages. In most cases instruments are represented as played – by angels and women generally – in the manner of ancient cymbals, i.e. horizontally, as portrayed by Matteo Giovanni (*Assumption of the Virgin*, late 15th century). Mersenne's *Harmonie universelle* (1636–7) illustrates cymbals with straps similar to those in use today. Cymbals – flat and hemispherical – are illustrated in 13th-century English manuscripts. In addition to their use in Christian and pagan rites and as instruments of war, cymbals (smaller than those in the modern orchestra) were used throughout the Middle Ages by dancers and to some extent in ensemble music.



Cymbals (*zil*) were used in the *mehter*, bands of the Turkish janissaries (élite troops), from at least the 14th century (*see* JANISSARY MUSIC). Turkish bands were known in Europe from the early 17th century and by the end of the century were being employed by east European rulers, and instruments from these bands were being used in European music. Turkish cymbals were included by N.A. Strungk in the orchestra for his opera *Esther*, and by Freschi in *Berenice vendicata*(both 1680). The adoption of Turkish percussion (including cymbals) into European *Feldmusik* ensembles in the mid-18th century led eventually to the growth of the large military bands early in the following century (*see* BAND (i), §II and§III). Under the influence of this fashion for 'Turkisms',

5. Profiles of (a) Chinese bo, (b) Chinese nao, and (c) Turkish cymbals

composers also began to use these instruments for special effects in the orchestra. Gluck's use of cymbals in *Iphigénie en Tauride* (1779) excited Berlioz. Mozart (*Die Entführung aus dem Serail*, 1782), Haydn ('Military' Symphony, 1793/4) and Beethoven (*Die Ruinen von Athen*, 1812, and the Ninth Symphony, 1822–4), made cunning use of cymbals with other Janissary effects.

It is from the early part of the 19th century that a more positive and extended use of cymbals as orchestral instruments is found, largely because of the pioneering of Berlioz. In his *Grande messe des morts* (1837) Berlioz scored for ten cymbals, certain of which he specified to be

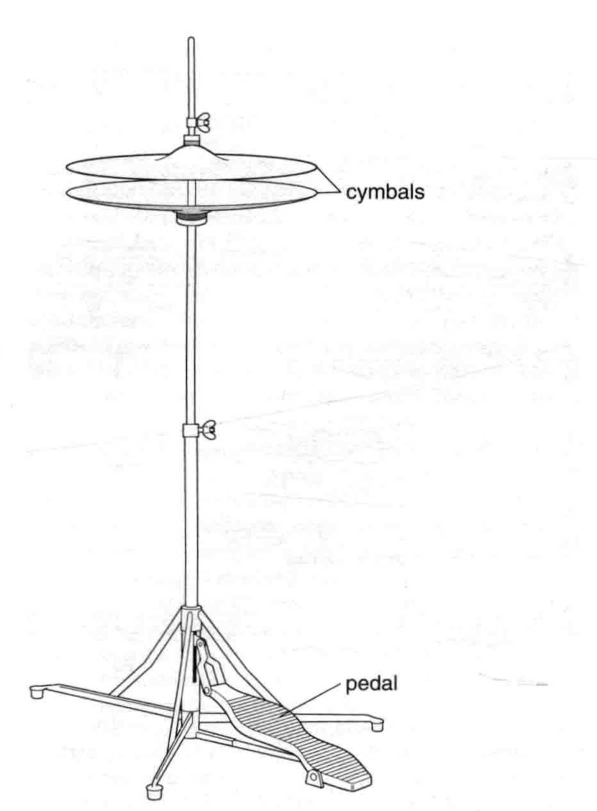
6. Janissary bandsman with cymbals: watercolour by an unknown artist, early 19th century (Royal Military School of Music, Kneller Hall, London)

struck and/or sustained with soft sticks. His ideal ensemble included four pairs of cymbals (he frequently scored for more than one pair), and he scorned the combination of bass drum and cymbals played by one musician.

Wagner's use of cymbals is exemplary. One of the finest moments for the cymbals is their first entry in the overture to *Die Meistersinger von Nürnberg*. There is also the truly noble effect of two loud strokes at the climax of the *Lohengrin* prelude. Here as in *Die Meistersinger* two cymbals are clashed in the normal manner. In *Der Ring des Nibelungen* Wagner used the mysterious ringing sound of a single cymbal, in some cases struck with a drumstick and in others with two drumsticks to produce a roll. In *Das Rheingold* a roll ('Becken mit Paukenschlägeln') describes the glitter of the precious metal, and a similar effect occurs in the second act of *Die Walküre*, when Wotan utters his mysterious blessing of Alberich. Wagner also used the two-plate roll. Here a pair of cymbals are rubbed together or the edges agitated against each other. Bartók scored for this effect in his Second Violin Concerto (1937–8) and his Second Rhapsody for Violin and Orchestra (1928, rev. 1935). It also occurs in Vaughan Williams's *A London Symphony* (1911–13, rev. 1920 and 1933). Players sometimes achieve the effect by holding the faces of two plates loosely together while a colleague executes a roll with timpani sticks.

Tchaikovsky used cymbals imitatively (short notes) in the duel scene of his fantasy-overture *Romeo and Juliet* (1869, rev. 1870 and 1880). The single stroke (*mf*) with the well-calculated vibrating period prescribed by Dvořák in his Symphony 'From the New World' (1893) is a model of economy in the use of orchestral percussion.

Many late 19th- and 20th-century composers have made considerable demands on cymbals (and the player). Most professional orchestras have developed an 'armoury' of cymbals, both in pairs and suspended, from which to choose. They can range in diameter from 61 cm (for a big climax in a Mahler symphony) to a tiny 'splash' cymbal of 15 cm. 20th-century manufacturers have made two-octave chromatic sets of tuned crotales with a standard range of *c″–c‴*, although it is an advantage to have them built into a single instrument with a damper pedal, because of the great resonance. Kolberg not only provides the damping mechanism but has also extended the range to five octaves. Messiaen wrote for a two-octave set of crotales in several works, including *Des canyons aux étoiles* (1971–4), as did Henze in his Seventh Symphony (1983–4). In *Antigonae* (1949) Orff requested ten pairs of cymbals. Peter Schat in *Signalement* (1961) wrote for 12 suspended cymbals of specified sizes. Composers such as Mahler, Strauss, Schoenberg, Bartók, Stravinsky, Bliss, Hindemith, Gerhard and Walton have requested various effects. Mahler asked for the cymbal to be struck with a steel rod in his Third Symphony (1893–6, rev. 1906). In *Ein Heldenleben* (1897–8), and also in *Don Quixote* (1897) Strauss wrote *zischend*, here usually interpreted as 'hissing'. This effect is customarily produced by the brushing of the two inner faces of the cymbals, by passing the edge of one of the cymbals swiftly across the inner face of the other, or by scraping across the striations (tone-rings) with the fingernail or a coin. Debussy also used this effect in *La mer* (1903–5). Schoenberg wrote for a sustained note to be played by drawing a cello bow over the edge of a cymbal in his Five Orchestral Pieces (1909). Bartók in his Sonata for Two Pianos and Percussion (1937) required the suspended cymbal to be struck forcibly on the dome with the heavy end of a side-drum stick, and in contrast, that the instrument be struck on the very edge with the fingernail or the blade of a pocket-knife (*pppp*). Stravinsky frequently specified cymbal with triangle beater, e.g. in the *Firebird Suite* (1910) and *Les noces* (1921–3). Bliss asked for two cymbals, placed respectively on the heads of a pair of timpani, to be struck with hard beaters in *Meditations on a Theme by John Blow* (1955). Hindemith in his Symphony in E♭ (1940) sought a sound similar to the 'sizzle' cymbal (see below) in his instruction for a cymbal to be struck with a soft stick while a thin rod is held to vibrate against the edge of the instrument.



Further unusual effects come from Gerhard and Walton. In *Hymnody* (1963) Gerhard scored for the edge of a large suspended cymbal to be scraped with a threaded rod. In one of Walton's earliest works, *Façade* (1922–9, rev. 1942, 1951, 1977), occur two novel requests: that the suspended cymbal be struck (and sustained by means of a tremolo) with wire brushes (this technique had been developed in jazz and popular music), and the (possibly unique) effect produced by striking the edge of a cymbal with a triangle.

Ceng-ceng are pairs of thick brass cymbals with a large dome, about 20 cm in diameter, used in certain Balinese gamelans. Britten used these to great effect in his ballet *The Prince of Pagodas* (1956).

Single cymbals may be suspended and struck with a variety of beaters. Formerly, in the orchestra, one of a pair of hand cymbals would be held in one hand and struck with a beater held in the other. Today an individual cymbal is suspended on a stand so that both hands are free to operate beaters. On a suspended cymbal, tremolo is normally executed in the same way as a roll on the timpani: by a series of reiterated single strokes. To keep the cymbal horizontal during a tremolo, the beaters operate on the edge away from the performer. The playing spot, unless otherwise requested, is about 3 cm from the edge. Where a single stroke with a hard stick is indicated, the cymbal is normally struck on the edge. A more rarely used effect is a roll with snare drum sticks. Note values on the suspended cymbal are usually observed by the method of 'hand-damping'.

Several types of suspended cymbal were first developed for the DRUM KIT in jazz and popular music in the 1920s and 30s, and were also adopted by the orchestra. The 'sizzle' or rivet cymbal is a suspended cymbal with loose rivets inserted in holes drilled close to the edge at regular intervals around the circumference. As the cymbal vibrates the rivets rattle, producing a 'sizzling' sound. Other types associated with the drum set include the small 'splash' cymbal, the 'crash' (about 36 cm, used for accents rather than steady time-keeping), the large 'ride' (44–66 cm), and 'bounce' cymbals. The hi-hat or 'choke' cymbals are two suspended cymbals, about 35 cm in diameter, suspended face to face on a stand and brought together by means of a pedal mechanism (fig.7).

In orchestral scores the part for the cymbals is written either on a staff or on a single line. At times the cymbal part is combined with that of the bass drum, and is signified by the use of 'tails up' and 'tails down', a method

7. Hi-hat: pressing the pedal causes the top cymbal to be brought against the lower by a connecting rod. When the foot is lifted the cymbal returns to its original position by means of a spring

used since the time of Haydn. In many modern scores easily recognizable shapes are given; ex.1*a* shows cymbals

Ex.1

(a) (b)

clashed (*naturale*) and ex.1*b* a suspended cymbal struck with a soft stick.

For the normal two-plate stroke (*naturale*, *a* 2) the cymbals are held vertically and clashed together with a swift up-and-down or across movement. Maximum brilliance is obtained by the almost full circumference of each plate meeting simultaneously. Long notes are indicated by the direction *laissez vibrer* ('let ring') or the sign in ex.1*b*, in which case the plates ring freely. Short notes are also indicated by notation, or by the terms *sec*, *étouffé* etc. To still the vibrations the cymbals are damped by being pressed against the player's clothing. Since composers are generally extraordinarily lax in writing their cymbal parts, a great deal is left to the discretion of the player, who in many cases must judge by ear (and musical acumen) rather than eye the appropriate length of the note.

The observance of note values and dynamics is a major part of orchestral cymbal technique. For *pp* the two cymbals meet as in the full clash, the degree of movements being adjusted to ensure the required volume. In certain circumstances the cymbals are played edge to edge to produce a *pianissimo*effect. Occasionally, to produce the minimum sound or a particular effect, one cymbal is lightly brushed across the other, or the two plates merely pulled apart.

The combination of cymbals with bass drum (one performer) as a measure of economy is very largely obsolete. However, the effect produced by a player striking a cymbal fixed to the bass drum with a held cymbal simultaneously with a stroke on a bass drum is effective, particularly in the military band and when requested for a particular reason (as by Mahler in his First Symphony: *Turkische Becken* and *grosse Trommel*; and by Stravinsky in *Petrushka*, 1910–11 rev. 1946).

Among the many 20th-century improvements in cymbal equipment is the insulated rack to hold one or more pairs of cymbals upright during *tacet* periods.

Cyprus. Country of the eastern Mediterranean of 9251 km². It gained independence from the United Kingdom in 1960. A Greek-inspired coup followed by an invasion of Turkish forces in 1974 led to the partitioning of the island, which is currently divided into the Republic of Cyprus, largely inhabited by the majority Greek-speaking Cypriots, and the self-proclaimed Turkish Republic of Northern Cyprus, recognized only by Turkey. Population estimates for the two parts of the island are 714,000 (1992) and 177,120 (1994) respectively. The following article deals mainly with the musics of the Greek-speaking majority.

1. Research. 2. Songs. 3. Dances. 4. Instruments. 5. Immigrant and refugee musics.

1. RESEARCH. Interest in studying Cypriot traditional musics started in the late 19th century, although most studies focussed only on the song texts and rarely referred to the music itself. Most were written by amateur researchers whose interests were mainly philological. In 1910 a musical text was published which contained 21 Cypriot songs and dances. The most important publication of the 1950s was the collection of Cypriot songs and dances by T. Kallinikos, who transcribed the music in both Western and Byzantine notation. After independence in 1960 several collections were released on the island by Cypriot musicians. Ethnomusicological work started in the 1980s, carried out by Cypriot students in universities in Greece, elsewhere in Europe and in the USA.

2. SONGS. Cypriot music is traditionally based on the scales known as *tropos* ('mode'), a term borrowed from the ancient Greek. Although there is little to link them with the *tropos* of antiquity there is clearly some correspondence with the eight Byzantine modes. A *tropos* has characteristic intervals and the use of a specific *tropos* indicates the use of a certain melodic line, basic notes and phrase endings. In addition, some Cypriot tunes are performed in Western major and minor scales which have been absorbed into the musical culture.

The most characteristic musical tradition in Cyprus is that of the *fonai* or *fones*. The *fonai* are traditional tunes which constitute melodic models to which different verses are adapted. The relationship between melody and text is important, as changes of poetic texts are very common. The use of the *fonai* may be a continuation of an old Greek musical practice. The practice of fitting an old or new poetic text to model tunes sometimes happens by fitting new text into *laika* melodies, Greek popular songs.

The most famous *fonai* are: the *Isia* ('straight'), the *Paralimnitiki* (named after the village Paralimni), the *Avkoritiki* (named after the village Avkorou) and *Anamisi* ('one-and-a-half', after the one-and-a-half lines of verse fitted to this melody). These are mainly for the two-line songs called *tsiattista*. Other well-known *fonai* are the *Akritikes*, on which the songs *Akritika* are mainly based, and the *Piitarikes*, on which the poems of *poiitarides* (professional poet-singers) are sung. Equally important are the *fonai* which are sung during the wedding ceremony and party, the *fonai* sung with a poetic text of religious content and the *fonai* sung during the traditional game of *sousa* (a traditional swing). These are usually sung in a joyful or erotic style. The music of Cyprus used to be transmitted by oral tradition: most of the older Cypriots know one or more of the *fonai* and can sing them with two-verse poems according to the occasion.

The musical form of the *fonai* is either strophic or *AB*. In the strophic form the music is repeated with a different poetic text each time. The *AB* form has a different text for each section. The vocal part of the *Isia* that follows is in *AB* form (ex.1). This *Isia* also has an instrumental introduction (not notated here) giving a three-part structure, rare in vocal music but found in many pieces of dance music. It was sung by Hatziirene Kiniyou, a 95-year-old refugee from Dioriosi, a village near Kirenia. The text deals with her status and feelings as a refugee. Other *fonai*, traditionally sung locally and derived from this one, consist of variations on either the *A* or *B* part only (thus are strophic in structure).

In addition to the songs created out of the *fonai*, a great number of songs have been imported and assimilated into Cypriot traditions from mainland Greece, e.g. *kleftika*, *nisiotika* and *mikrasiatika*. Many Cypriot songs use Greek rhythms such as 7/8 (3 + 2 + 2), 5/8 (3 + 2) and 9/8 (3 + 2 + 2 + 2 or 2 + 2 + 2 +3). However, rhythms such as 2/4, 3/4 and 4/4 are also to be found.

3. DANCES. The most typical of the dances of Cyprus are those of the *karsilamas*. There are two separate sequences of dances, one sequence for women and one for men. They are performed with the dancers standing face to face (the name of the dance comes from the word *karsi*, 'opposite'). Each of the two sequences is composed of five movements performed in succession. The five movements in both the women's and men's dance are called: *protos* ('first', in 9/8), *devteros* ('second', in 7/8),

tritos ('third', in 2/4) and *tetartos* ('fourth', in 9/8). The fifth movement, *pebtos*, is often called *ballos* and is performed in either 3/4 or 7/8. Sometimes there is a *devteros ballos* performed in 2/4 or 3/8. This 'walking dance' leads on to the *sirtos*, which is always danced after the five movements of the *karsilamas*.

Dances from all over Greece are performed in Cyprus, many of them being taught by schools, cultural societies and private workshops. The major dances from mainland Greece are the *tsamikos* and the *kalamatianos*; those originating in Smyrna are the *zeibekikos* and the *arabies*; those from the islands are the *sousta* and the *sirtos*.

4. INSTRUMENTS. The instruments traditionally used in Cyprus are the violin (*violi*), the *laouto*, the *pidkiavli* and the *taboutsa* (a frame drum). The violin may have replaced the Cypriot *lira* as a melody instrument in the mid-19th century. The commonest combination is for the violin to play the melody, the *laouto* to play an accompaniment and the *taboutsa* to keep the rhythm. It is probable that the *laouto* and the *taboutsa* were imported from the Greek islands. The *pidkiavli*, a reed wind instrument, was usually played by shepherds out in the fields where they would play *fonai* and other pieces, including improvisations. The *pidkiavli* is becoming increasingly rare.

The traditional ensemble is known as *violarides*, literally 'violin players', but also referring to the combination of instruments playing together. Instruments such as the accordion, the BOUZOUKI and the guitar are usually found in the ensemble.

Music teachers in Cyprus are mostly Western-educated with only a few having knowledge of either the Byzantine or traditional music systems. Music education in schools is mainly based on Western classical music and very few schoolteachers base their lessons on traditional Cypriot musics. In private institutions children are taught Western music, usually learning the piano or a Western symphonic instrument. The traditional way of playing the violin, *laouto* or *pidkiavli* is passed on from generation to generation within a few families. These are well known

on the island but the younger generation seems less and less interested in learning from them.

5. IMMIGRANT AND REFUGEE MUSICS. As a result of the coup and invasion of 1974, 200,000 Greek Cypriot refugees fled from the north of the island and settled around the cities of Nicosia, Limassol and Larnaca. (An estimated 41,000 Turkish-speaking Cypriots have also emigrated from the Turkish-occupied area since 1974.) They brought with them their own local traditions, which they maintain, but also created a new, urban cultural environment. This is reflected in the popularity of international 'hits' and contemporary Greek songs (*laika*), released in Cyprus at the same time as in Athens. As yet, there is no indigenous recording industry. However, local groups influenced by Western and Greek pop music often appear at local 'song contests'.

Cypriot immigrants, mainly in London, the USA and Australia, have adapted the music they brought with them to their new musical environment. To a large extent the music and songs have been retained with the use of new instruments (e.g. keyboards, electric guitars and drum kits) which are easily available. Using the *fonai* the immigrants change the old texts for new ones which better describe their feelings in the new environment. The feeling of homesickness and the desire to return to the homeland figure highly in these, particularly among many of the immigrants in London who arrived as refugees in 1974. They also write poems on the same subjects and recite them in the manner of the *poiitarides*.

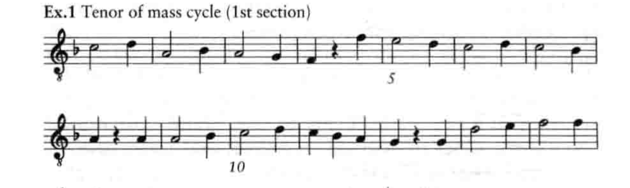
PANICOS GIORGOUDES

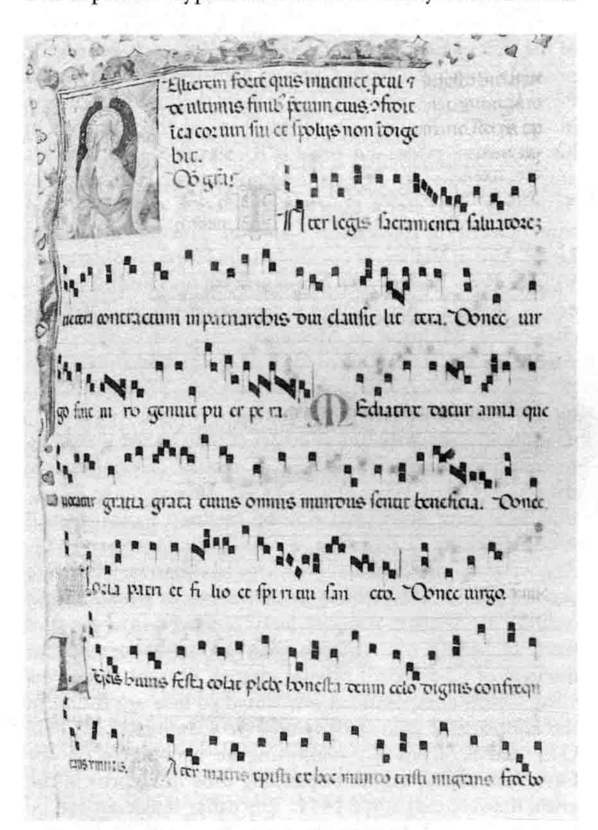
Cyprus: medieval polyphony. No Cypriot music from the early Middle Ages has survived, and conjectures as to musical activity on the island depend on scattered hints in literary and historical sources and on inferences drawn from more certain knowledge about other aspects of Cypriot life and culture (see Hoppin, 'The Cypriot–French Repertory', 1957). Early in the 15th century, however, the island witnessed the creation of a large and representative corpus of late medieval music. All the pieces are transmitted anonymously, and none appears in any manuscript other than *I-Tn* J.II.9. Nevertheless, the repertory clearly stems from the royal court of Cyprus and brings the island to temporary prominence in the history of music.

Cyprus became an outpost of French culture in the later Middle Ages; it had been under Byzantine rule until the end of the 12th century, but Richard the Lionheart seized it in 1191 during the third crusade and sold it to the Knights Templar, who put it in the charge of French barons with Guy de Lusignan at their head. Within a few years, this branch of what was an illustrious French family became hereditary kings and began the period of Frankish rule that lasted until 1489. Establishment of the Lusignan dynasty brought with it a return of Cyprus to the 'bosom of the Roman church'. This return did not wholly suppress the Byzantine rite, but it required the importation of clerics from the West and made their liturgy and music the dominant form of religious life.



Evidence of French influence on Cyprus still survives in cathedrals, churches and monasteries, as well as a number of artefacts, dating from the 13th and 14th centuries. The music of the time was more ephemeral. Only from the latter half of the 14th century does slight evidence survive. A polyphonic Kyrie in the repertory of Avignon (*F-APT* 16*bis*, ed. in CMM, xxix, 20, and PMFC, xxiii *a*, 64–5) bears the word 'Chipre' (*see* CHIPRE). A list of composers in the text of a motet (*F-CH* 564, no.108) includes one or possibly two men from Cyprus. Minstrels accompanied Peter I, King of Cyprus, in his travels throughout Europe in the 1360s. Machaut told the story of those travels in his narrative poem *La prise d'Alexandrie*, which bears ample witness to Peter's love of music. Among the 'familiars' of Peter's court were clerks, chaplains and singers from the dioceses of Cambrai, Tournai, Arras and Liège. And in Venice, according to the Florentine historian Villani, Peter bestowed a laurel wreath on Landini for his organ playing. After Peter's assassination in 1369 his chancellor, Philippe de Mézières, returned to the West with a dramatized musical Office for the Presentation of the Virgin, which Philippe had seen in Cyprus and had himself translated from the Greek.

Suggestive as these bits of evidence may be, they scarcely foreshadow a sudden flowering of musical activity during the reign of King Janus (1398–1432). More than to Janus, that flowering must probably be credited to his second wife, Charlotte de Bourbon, who went to Cyprus in 1411. According to the Cypriot chronicler Makhairas, Charlotte arrived with a retinue of some 60 people, of whose names only 19 are known. Among them, however, is a group of men, including two priests, who probably formed the nucleus of Charlotte's private chapel. One of these was Gilet Velut: compositions attributed to him are found in the continental manuscripts *GB-Ob* Can.misc.213, *I-Bc* Q15 and *I-TRmp* 87, suggesting he was active on the European mainland after spending time in Cyprus in the years immediately after 1411. The other musician can be identified with Jean Hanelle, who, like Velut, had been a *petit vicaire* at Cambrai Cathedral in 1410–11. Both were apparently recruited from Cambrai as young men into the service of Charlotte of Bourbon. Unlike Velut, Hanelle



stayed in Cyprus for a considerable part of his career. He eventually became master of the royal chapel; this is shown by Savoyard court documents from 1434 and 1436. Yet another singer with demonstrable ties to Cyprus was Jehan Augustin du Passaige, who appears in the service of the King of Cyprus by 1433, but had returned to the chapel of the dukes of Burgundy by 1436. According to Tinctoris, Jehan's son, Philippus de Passagio, a singer at the Burgundian court between 1462 and 1477, was born while Jehan was in Cyprus.

The manuscript *I-Tn* J.II.9 provides a tangible witness to these musical activities. It is arranged in five large sections: a plainchant collection of two rhymed Offices and six mass cycles (see illustration); 17 polyphonic mass movements (three Glorias and seven Gloria–Credo pairs); 33 Latin and eight French motets; 102 ballades; 43 rondeaux and 21 virelais. A polyphonic mass cycle, complete except for the Agnus Dei, was later inserted between the sections containing the ballades and the rondeaux and virelais. The polyphonic sections of the manuscript were copied by several scribes working under the supervision of a single notator who also prepared the texts for the section devoted to rondeaux and virelais and provided additions and corrections to the remainder of the volume; moreover, there is evidence to suggest that the chant fascicle at the beginning of the manuscript was copied by the same team of scribes.

Ex.1 Tenor of mass cycle (1st section)

The dating, origins and early history of the manuscript remain unclear. Tradition (since Besseler) has it that it was copied in Cyprus and taken to Savoy in connection with the wedding of Anne of Lusignan, but there is little solid evidence to support this theory. The manuscript shows distinctive Italian features in its text scripts and illuminations; the style of the latter would seem to date from around 1430. A crest depicted on f.1*r* also appears to be of Italian origin, although its owner is unknown (the identification proposed by Besseler is spurious). The possibility must therefore be entertained that *I-Tn* J.II.9 was prepared for an Italian patron, most likely one with close ties to Cyprus, in about 1425–35, perhaps on the Continent. The manuscript seems to have found its way to Savoy at a relatively early stage. The added mass cycle, which appears to have been copied by a Savoyard, is evidence of this; in addition, by 1498 the manuscript was listed in a Savoyard inventory. It is possible that the manuscript was compiled under the supervision of Hanelle himself; this would be consistent both with Hanelle's documented movements on the Continent during the 1430s and with a significant Cypriot presence in Italy and Savoy from the late 1420s to the mid-15th century. It seems likely that the manuscript conceals within its anonymous repertory a considerable number of works by Hanelle and possibly Velut. This would explain the stylistic homogeneity of the repertory, which has been repeatedly remarked on.

Page from the plainchant section of J.II.9 showing the Office of St Anne (who is depicted in the initial), beginning with the chapter 'Mulierum fortem', followed by the great responsory 'Inter legis sacramenta' (I-Tn J.II.9, f.14r)

The most likely explanation for the unusual inclusion of plainchant in an otherwise polyphonic repertory is that it originated in Cyprus, probably in the first two decades of the 15th century. This is known to be true of the Office of St Hilarion with which the manuscript opens. At King Janus's request, the schismatic pope John XXIII approved the Office and sanctioned its performance in a bull dated 23 November 1413. With several relics of St Anne preserved in Cypriot churches, her Office in all likelihood was also a native product; it might be related to the birth (1419) or the nameday celebrations of Anne of Lusignan, daughter of King Janus and Charlotte of Bourbon. Cypriot origins may also be assumed for the plainchant mass cycles, as their melodies appear nowhere else. Three of them are complete, even including the Credo; three consist only of Kyrie, Sanctus and Agnus Dei. Each cycle is written in a single mode, and they thus become the earliest known examples of unified plainchant masses.

The polyphonic mass movements contribute a valuable addition to the repertory of Gloria–Credo pairs. In addition to being unified by mode, metre and style, the pairs provide characteristic examples of the three different styles of contemporary mass movement in western Europe: two in motet style with text in the two upper voices; two with text in all four voices; three in three-part song style with text only in the upper voice. The added mass cycle is unusual in having all its movements based on part or all of the same tenor melody while retaining archaisms in the style of the upper voices. Still unidentified, the tenor melody is in triple metre, with regular rhythms and a clear phrase structure that suggest secular origin (ex.1). Wherever or whenever this cycle was composed, it

must be one of the first tenor masses. It is conceivable that this mass is a product of the Savoyard court chapel; it may have been composed during the 1430s, when English compositional techniques, including the use of a tenor as a unifying device, first appeared on the Continent to a significant extent.

The most important aspects of the 41 motets are the use of four-part writing in all but three pieces, the appearance of isorhythm in all but one, and the concentration on sacred texts. Even a majority of the French texts praise the Virgin Mary, and only two seem to be entirely secular; their texts were partly erased, perhaps to be replaced with a sacred contrafacta. Eight Latin motets (nos.23–30) with texts that trope the 'Great Antiphons' for the *Magnificat* constitute a unique series of pieces composed as a unit; they would have been performed, one each day, in the week preceding Christmas. The texts of motet 12 establish a connection with earlier continental music by using the same poetic forms and rhymes as the texts of the motet *Impudenter/Virtutibus*, attributed to Philippe de Vitry. Similarly, the triplum text of motet 39 (*Mon mal en bien/Toustens*) is based on the triplum of the anonymous setting *Mon chant en plaint/Qui doloreus*, transmitted in the 14th-century manuscripts *I-IV* 115, *F-Pn* n.a.fr.23190 and *GB-DRc* C.I.20. Three motets (nos.6, 8 and 17) name King Janus and thus confirm that the repertory originated in the first decades of the 15th century in Cyprus. Motet 8 (*Gemma florens/Hec est dies*) appears to refer to the birth of Janus and Charlotte's heir, John II of Lusignan, in 1418.

The French songs are so similar in general style that they may be discussed together. Only 16 of the 166 pieces depart from normal three-part writing with text in the upper voice. One ballade has two upper parts with different texts; two-voice writing appears in four virelais and nine rondeaux, two of which have the text in both voices; one virelai has the text in all three voices; and the final rondeau is a four-voice canon.

In their rhythmic style the secular songs display a wider range than any other group of pieces. Some are scarcely more complex than the late works of Machaut. A few rival the complexities of late 14th-century Ars Subtilior style (*see* ARS NOVA and ARS SUBTILIOR). From these few, Wolf and Apel picked their illustrations of the Cypriot manuscript and caused it to be ranked undeservedly with such monuments of 'mannered' notation as the Chantilly and Modena manuscripts (*F-CH* 564 and *I-MOe* α.M.5,24). Only 'displacement syncopation' and the simpler proportions (3:2 and 4:3) occur with any frequency. Relative rhythmic simplicity characterizes the majority of songs in the manuscript, and the use of semiminims (semiquavers in transcription) and the presence of textless passages in the upper voice show that the Cyprus pieces differ in no way from exactly contemporary continental songs.

The repertory of *I-Tn* J.II.9 thus proves to be much more than a record of musical activity at a remote provincial court. By its quality, its stylistic range and its reflection of a variety of current practices it provides a comprehensive and unique survey of the state of music in the decades between 1411 and about 1440. Furthermore, its copying and early history offer invaluable clues to the cultural and political interaction among Cyprus, the Italian peninsula, Savoy and Europe in general during the early decades of the 15th century.

Czartoryska [née Radziwiłł], **Marcelina**, Princess (*b* Podłużne Polesie, 18 May 1817; *d* Kraków, 5 June 1894). Polish pianist. She was educated in Vienna and began studying music with Czerny; she was later a pupil of Chopin in Paris, and in a comparatively short time became a fine interpreter of his music. She was one of the few friends present at his death. In 1848 the Austrian government dismissed her from Vienna as a Russian subject. She moved to Paris where she formed a small group comprising the most eminent of the Polish émigrés and members of French artistic and literary circles. She gave charity concerts in Paris, London and Vienna, often with the most celebrated artists, including Vieuxtemps, August Franchomme, Pauline Viardot and Liszt. In 1867 she returned to Poland and settled in Kraków, where she formed, as in Paris, a group bringing together figures from the world of art and literature. She gave many Chopin concerts in different towns in Poland. Czartoryska also initiated Stanisław Tarnowski's Chopin lectures, which she illustrated herself, as well as two historic concerts in

Kraków in 1877, at which were performed works by Polish composers from Gomółka to Żeleński. She was regarded by many critics as one of the most authentic of all contemporary pianists in Chopin's own manner of interpretation.

ZOFIA CHECHLIŃSKA

Czech Nonet. Czech chamber ensemble. The nonet was originally formed from members of Reissig's student orchestra at the Prague Conservatory, for a performance in March 1923 of Taraba's *Three Meditations* for wind and string instruments. It was established on a permanent basis by the violinist Emil Leichner, took the name Czech Nonet, and gave its first concert in Prague 17 January 1924. That year its members moved to Lithuania to teach at the Klaipėda Conservatory for four years; they also gave concerts there. From 1928 the ensemble was again based in Prague. It toured throughout Europe, Africa, South and Central America (from 1945), the USA and Canada (from 1968), and it led to the founding of similar ensembles in Rome (the Gruppo Stromentale Italiano) and Leningrad. It played at the International Festivals of Contemporary Music in Paris in 1937, and London and Brussels in 1938. The personnel has changed many times but Leichner's longstanding membership helped to ensure continuity of style and tone-colour, and the high standards he set were maintained after he left the group in 1963. The first composer to write for the ensemble was Foerster (Nonet, op.147); others to have done so include Prokofiev, Hába, Martinů, Lutosławski, Bořkovec, Dobiáš, Kapr, Pauer, Novák, Kalabis and Karel Reiner. Its members in 2000 were Jiří Hurník, violin; Jan Nykrýn, viola; Simona Hečová, cello; Radovan Heč, double bass; Jiří Skuhra, flute; Jiří Krejčí, oboe; Aleš Hustoles, clarinet; Pavel Langpaul, bassoon; and Vladimíra Klánská, horn.

ALENA NĚMCOVÁ

Czech Quartet. Czech string quartet. It was formed in 1891 by pupils of Hanuš Wihan at the Prague Conservatory, and its original members were Karel Hoffmann (*b* Prague, 12 Dec 1872; *d* Prague, 30 March 1936), Josef Suk (i) (*b* Křečovice, 4 Jan 1874; *d* Benešov, 29 May 1935), Oskar Nedbal (*b* Tábor, 26 March 1874; *d* Zagreb, 24 Dec 1930) and Otto Berger (*b* Slatina nad Úpou, nr Náchod, 22 Jan 1873; *d* Machov, 30 June 1897). Berger left in 1894 and his place was taken by Wihan (*b* Police, 5 June 1855; *d* Prague, 1 May 1920), who was himself replaced in 1914 by Ladislav Zelenka (*b* Modřany, nr Prague, 11 March 1881; *d* Prague, 2 July 1957). Nedbal was replaced by Jiří Herold (*b* Rakovník, 16 April 1875; *d* Prague, 13 Nov 1934) in 1906. The original four first appeared as the Czech Quartet in 1892, and in 1893 made a successful visit to Vienna; their success there brought wider tours, including visits to Russia in 1895 and Britain in 1896. After World War I they began to teach at the Prague Conservatory; their last foreign tour was made to the Netherlands in 1931. An attempt to replace Suk on his retirement in 1933 failed, and the group disbanded with a concert in honour of Suk's 60th birthday on 4 December 1933. The Czech Quartet became a model for all Czech chamber groups. Wihan, their tutor and for 20 years a member of the quartet, brought to the group his great experience of chamber playing, particularly emphasizing phrasing and precise rhythm. The success that the quartet achieved throughout Europe was mainly due to their remarkable unity, freshness of approach and expressive range. Their activity led to the formation in Prague of the Czech Society for Chamber Music and had a strong influence on the work of Czech composers; Reger dedicated to them his Quartet in F minor op.121. Their extensive repertory included all the standard literature, and modern works, particularly by Czech and Slovak composers. They made a number of recordings.

ALENA NĚMCOVÁ

Czech Republic. Country in central Europe. It was established in 1992 after the break-up of Czechoslovakia into two separate republics. Czechoslovakia had been created in 1918 out of the former Habsburg territories of Bohemia, Moravia and Slovakia. This reflects the composition of the 9th-century kingdom of Great Moravia. Slovakia fell to the Magyars in 906 (and remained part of Hungary and later the Habsburg Empire until 1918); Bohemia, with a strong line of Přemyslid princes and kings, became dominant and in 1029 formally incorported Moravia as a margravate. The teachings of Jan Hus gave the kingdom a largely Protestant character, eroded neither by five assaults by imperial and crusader armies (1419–31) nor by the election of a Habsburg as king in 1526. After the Battle of the White Mountain (1620), in which the Czech nobility were defeated by the Habsburgs, Bohemia and Moravia became virtual provinces of the Habsburg Empire and were forced to adopt its language and religion. Reaction to this culminated in the 19th-century national revival, which in turn led to independence and union with Slovakia in 1918. As a result of the Munich Pact (1938) various border territories were annexed to Germany,

Hungary and Poland, and in 1939 the republic was dismembered with Bohemia and Moravia becoming a German protectorate and Slovakia an independent state. The country was liberated in 1945, largely by the Red Army, and in 1948 became a socialist state. Czechoslovakia became a federation of Czech and Slovak socialist republics in 1968. Following the fall of the communist regime in 1989, Czechoslovakia returned to democratic self-determination; in 1992 the two states separated into the Czech and Slovak republics.

1. Bohemia and Moravia: (i) To 1723 (ii) The period of migration (iii) Growth of Czech nationalism. 2. Czechoslovakia 1918–45. 3. Since 1945.

1. Bohemia and Moravia.

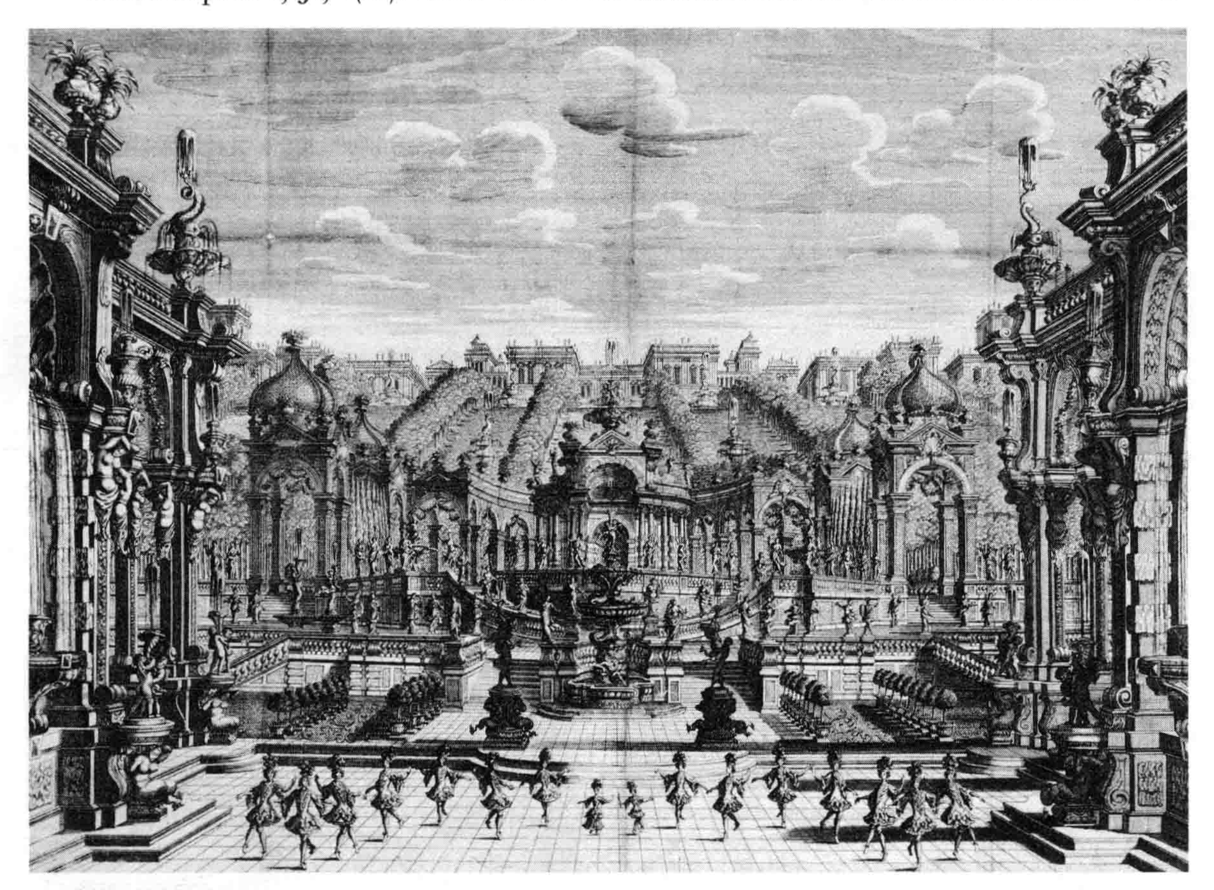
(i) To 1723. Christianity is believed to have been brought to Bohemia by Bavarian evangelists early in the second quarter of the 9th century. In about 863 the Byzantine missionaries Cyril and Methodius came to the Great Moravian Empire to preach Christianity in the Slavonic tongue. Although their introduction of a Slavonic liturgy received papal approval, the Roman Catholic priests and their bishop opposed this vigorously and resolved to make the Latin ritual prevail; on the death of Methodius in 885 the Slavonic liturgy was banned by Pope Stephen V. Byzantine chant was sung during this time, but early in the 10th century Gregorian chant became predominant. In the 11th century, singing in Old Church Slavonic was forbidden in the churches, so that the earliest surviving Czech melodies, although religious, are not liturgical. One of the first of these, *Hospodine, pomiluj ny* ('Lord, have mercy') appears in Jan of Holešov's tract of about 1397. The *Svatý Václave* ('St Wenceslas') melody, which was later used by Dvořák, Suk and Novák, occurs in a gradual of about 1473. With the founding of a university by the French-educated Charles IV in 1348 and his election to the imperial throne in 1356, mensural theory, based on the work of Johannes de Muris began to be studied. The first signs of mensural notation in settings are seen in *Buóh všemohúcí* ('Almighty God'), in the so-called Jistebnice Cantional (*c*1420), along with the *Vyšebrodský sborník*, the earliest Bohemian collection of spiritual songs. Another feature of church music developing in Prague in the 13th and 14th centuries was liturgical drama associated with Easter.

Sources for secular repertory are far less prevalent, but clearly visits from Minnesinger and later Meistersinger were frequent from the 12th to the late 14th centuries when the influence of trouvères began to emerge more strongly. Ceremonial music involving trumpets and drums also flourished through the 14th and 15th centuries and remained an important aspect of town music into the modern age. The simplicity of popular melody was clearly reflected in early 15th-century Christmas hymns in an age when congregational singing was becoming central to worship. Although some of the songs of the Hussites were original, a considerable number were adapted from Gregorian plainchant and vernacular sacred sources. The most famous of these melodies, *Ktož jsú Boží bojovníci* ('Those who are God's warriors'), fervently sung by Žižka's army on the battlefield and meant to strike fear into the hearts of their enemies, became a powerful symbol of national identity for Czech composers in the 19th and 20th centuries. The Jistebnice Cantional contains 77 of these songs, including this celebrated melody. At the turn of the 16th century the puritanical Bohemian Brethren (Unitas Fratrum, who developed from the more extreme radical wing of the Hussites) began publishing numerous Protestant collections of hymns and psalms, as did the more moderate Hussite group, the Calixtines or Utraquists. Some of these hymnals lack tunes, including the earliest, the *Písničky* of 1501, containing 88 songs. One of the Bohemian Brethren's more important collections with tunes is the famous *Písně chval božských* ('Songs in praise of God', Szamotuly, 1561) prepared by Bishop Jan Blahoslav, the translator of the New Testament. Šimon Lomnický's *Písně nové na evangelia* (Prague, 1580) is the first of many Catholic hymnals prompted by the growing impetus of the Counter-Reformation. Šteyer and Božan were assiduous collectors of hymns, whereas Michna and later Holan Rovenský introduced newly composed items for several voices with figured bass accompaniment. The use of songs and hymns to vernacular texts as part of the mass, a practice recommended by Jan Hus, became widespread in the liturgy, especially the so-called 'Rorate' chants. The interpolation of vernacular elements in the form of independent songs and tropes remained a vigorous feature of Roman Catholic worship in the Czech lands into the 20th century. From 1620 onwards, during the Thirty Years War (1618–48), leading Protestants were forced to flee from persecution, and consequently Tranovský's *Cithara sanctorum* was published at Levoča, Slovakia (1636), and Bishop Komenský (Comenius) issued his important *Kancionál . . . kniha . . . písni duchovních* at Amsterdam (1659).

Bohemian composers were slow to adopt polyphonic styles, and even in the second half of the 15th century, as the Kutná Hora Gradual shows, they were still writing in the Ars Antiqua manner. Jan Franus's Cantional (1505), however, includes some examples of the newer type of motet and even some five-part works. After this polyphonic music developed rapidly and before the close of the century Spongopaeus wrote a composition for eight-part double choir. Trojan Turnovský, Jiří Rychnovský and the nobleman and humanist Harant z Polžic a Bezdružic (beheaded in 1621) were the leading composers of the Renaissance. A single five-part mass, two motets and some motet fragments are all that survive of Harant's work, but these provide ample evidence of his original talent.

During most of the 16th century (Habsburg domination began in 1526) the three emperors, Ferdinand I (1556–64), Maximilian II (1564–76) and Rudolf II (1576–1612), maintained splendid musical establishments. Rudolf, though essentially conservative where music was concerned, took over his father's chapel with its concentration of fine musicians from the Low Countries built up by Monte. He was particularly fortunate in having such composers as Jacob Regnart, Kerle, Alessandro Orologio and Stefano Rossetto to serve him at Prague castle, where he preferred to reside. Outside the court, Jacob Handl (Gallus) worked for the Bishop of Olomouc and moved to Prague in 1586 as choirmaster of St John na Břehu. Prague thus became one of the most important European musical centres. Following the example of the imperial court, the powerful Rožmberk family established a fine orchestra and library of music at Český Krumlov. In the

17th century the Kinskýs, Czernins and Fürstenbergs had singers and instrumentalists at their Prague palaces. There were important musical establishments at the Moravian castles of Tovačov, Vyškov, Holešov (where Holzbauer was the director of music) and Jaroměřice nad Rokytnou, the seat of Count J.A. Questenberg and the home of the Míča family. But the most important group of musicians was at Kroměříž in the chapel of the Prince-Bishop Karl Liechtenstein-Kastelcorn of Olomouc. The most important musician there was Pavel Vejvanovský; Biber was there from about 1668 until he left for Salzburg in 1670.



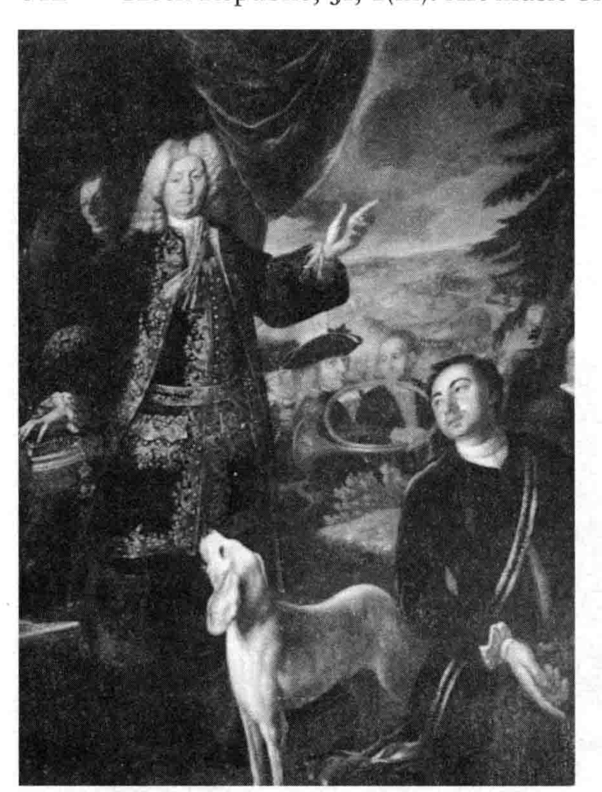
Jesuit colleges provided a thorough training for young church musicians, and monasteries and churches offered good opportunities for composers of sacred choral music, organ music, school and sepulchre dramas and Christmas pastorals. Michna, organist of one of these colleges, was in many ways the most original Czech composer of the early Baroque period. There are marked Italian influences, including aspects of the *concertato* style, in his music, but his use of indigenous elements has particular significance. His St Wenceslas Mass (*c*1668) is on a festive scale for six solo voices, six-part choir and an orchestra that includes trumpets. During the first half of the 18th century Zelenka was the most outstanding Czech composer. He studied with Fux and Lotti and became court composer at Dresden. Among his many compositions are three oratorios and an allegorical *Melodrama de Sancto Venceslao*, which he wrote in 1723 for the coronation of the Habsburg Emperor Charles VI as King of Bohemia (Fux wrote *Costanza e Fortezza* for this occasion; fig.1). Zelenka's contemporary Černohorský, who was the minorite choirmaster of St Jakub, Prague, was known as 'Il Padre boemo' in Italy and was highly regarded at home.

Though opera had been known in Prague since 1627, when a performance of an unknown pastoral comedy was given by a Mantuan company at the coronation of Ferdinand III on 27 November, it did not become a major part of the city's musical life until the opening in 1724 of Count F.A. Sporck's theatre; regular performances of Italian opera, including works by Vivaldi, were given both here, organized by Antonio Denzio, and, from 1724, at Sporck's country estate of Kuks. *La Libussa*, given in Wolfenbüttel in 1692, was almost certainly the first opera on a Czech subject; the composer is unknown. It was followed closely by Albinoni's *Primislao, primo re di Boemia* (Venice, 1697). Bartolomeo Bernardi's *La Libussa* was given in Prague in the 1703–4 season, the first opera on a native subject to be performed in the Czech lands. Another version of the same legend, *Praga nascente da Libussa e Primislao*, was performed at Count Sporck's theatre (Prague, 1734); the libretto was by Denzio and the composer may have been Antonio Bioni. Significant Czech composers of the 18th century showed no interest in native subject matter and composed opera to texts in Italian (Mysliveček, Gassmann and Johann Antonin Kozeluch), German (the Bendas) and French (Kohaut).

(ii) The period of migration. After Charles VI's coronation in 1723 there was little incentive for noblemen to spend much time at their Prague palaces or on their Bohemian and Moravian estates except for hunting. For a century the imperial court had been permanently established in Vienna, and Prague had consequently declined to the level of a provincial city. Many Czechs had found the crushing defeat in 1620 hard to bear; they were forced to use the language of their conquerors, and Protestants (e.g. the Bendas) found the lack of religious freedom intolerable; an increasing burden of taxation was another factor in driving Czechs from their native land. But perhaps the most serious aspect of the situation for musicians was the limited number of worthwhile posts that they could fill. The conditions that prevailed led to an unprecedented migration of Bohemian and Moravian Czechs to many parts of Europe (where most of them became known under the forms of their names – usually Germanized – that were used locally).

Johan Stamitz, his sons Carl and Anton, F.X. Richter and Fils contributed to the development of the pre-Classical symphony at Mannheim. Georg Benda experimented with the new art of melodrama at Gotha and his violinist elder brother Franz was Konzertmeister to Frederick the Great at Berlin. Opera drew Mysliveček southwards to Italy, where he followed up a triumph at Naples with successes in several other Italian cities as a composer of stage and instrumental music, and virtuosos such as the horn player Giovanni Punto and the pianist-composer Jan Ladislav Dussek travelled widely. František Adam Míča spent his time in Austria and Poland, and J.B. Vanhal first studied in Vienna, then travelled in Italy and finally returned to settle in the Austrian capital. Many other Czech and Moravian composers made Vienna their home: F.I.A. Tůma was composer to the Empress Elizabeth (Charles VI's widow) and director of her Kapelle; J.A. Štěpán was court piano teacher and had the princesses Marie Antoinette and Caroline as pupils; after making his mark as an *opera buffa* composer in Italy, Gassmann followed Gluck as director of the imperial theatre; Leopold Kozeluch, noted for his expressive piano music, became court composer after Mozart, and was in turn succeeded by Franz Krommer from Moravia; Paul Wranitzky (the composer of *Oberon, König der Elfen*) and his brother Anton were important members of the imperial opera orchestra. The harpist and composer Krumpholtz played in Prince Esterházy's orchestra, but he later went to Paris, where Josef Kohaut and Antoine Reicha, whose pupils included Liszt, Berlioz and Franck, also established themselves. Pichl was director of music and composer to the Archduke Ferdinand at Milan for 21 years, and Rosetti, a double bass player, was Count Oettingen-Wallerstein's music director. A few Czech musicians of stature remained at home during the second half of the 18th century, among them F.X. Brixi, who directed the music at St Vít, Prague, and F.X. Dušek, a piano teacher, composer and friend of Mozart.

After the Thirty Years War it was normal for composers to write Latin church music and operas in Italian, German or French. Czech words were rarely set; an exception may have been František Václav. Míča's Italian opera *L'origine di Jaromeriz in Moravia* (1730) of which there was a contemporary Czech translation. At about this time Zelenka used the Kralice Bible translation for his setting of Psalm 1, written at Dresden, and in the early 1760s Felix Benda (1708–68), a Prague organist, composed two Czech dramas. In the more Germanized metropolitan centres there was little opportunity for Czech opera to flourish, but the native language, often in dialect form, was often used in rural areas for Singspiel-type operas of a topical or didactic nature. Czech was also used in pastorellas, a widespread and popular genre in central Europe comprising settings of texts celebrating the birth



1. Royal gardens of Tarquinius on the Janiculum, Act III of Fux's opera 'Costanza e Fortezza', given in Prague Castle as part of the festivities in celebration of the coronation of Emperor Charles VI as King of Bohemia in 1723: engraving after designs by Giuseppe Galli-Bibiena

of Christ; vernacular pastorella texts were also used in the pastoral masses current in Bohemia and Moravia from the mid-18th to early 19th-centuries.

(iii) Growth of Czech nationalism. The strong literary and linguistic developments in Bohemia during the last decades of the 18th century represented a protest, by those who had read Rousseau and Herder, against the suppression of the Czech language. Dobrovský embarked on his vitally important philological and historical studies, and his literary work was continued by Jungmann. At Prague University a chair of Czech language and literature was founded in 1791. Thám published the first anthology of old and new poems in 1785 and in 1786 wrote a Czech play, *Břetislav a Jitka*, based on historical legend. The 'discovery' of the notorious 'Dvůr Králové' (Queen's Court) Manuscript over 30 years later was a more momentous literary event; supposedly dating from the 13th century, but now considered a forgery, it prompted numerous settings and a growing pride in the native literary tradition. Ryba succeeded in having a set of Czech songs published in 1800, and his example was followed several years later by J.E. Doležálek and Tomášek. Bilingual Czech-German performers of the so-called 'Patriotic Theatre' company staged the first Czech versions of German Singspiele in the early 1790s and gave a performance of *Die Zauberflöte* in Czech in 1794. Weigl's *Schweitzerfamilie*, given in a Czech translation in 1823, initiated a steady flow of translated works from abroad including operas by Mozart, Cherubini, Méhul and Rossini. Starting with *The Tinker* (1826), F.J. Škroup tried to establish himself as a composer of Czech operas composing two librettos based on historical mythology. But with competition from a strong Czech drama troupe and a superior German opera company, which Škroup also conducted, he felt obliged to turn to German texts.

Czech composers were pioneers of the salon piano pieces greatly favoured during the Romantic period. Tomášek published seven books of Eclogues from 1807, three books of Rhapsodies from 1810 and three Dithyrambs in 1818, while the Rhapsodies op.1 (1818) and more especially the Impromptus op.7 (1820) of his pupil Voříšek preceded and influenced those of Schubert. B.D. Weber was chosen to be the first director of the Prague Conservatory, which was opened in 1811, and when the Prague Organ School was started in 1830 for the express purpose of encouraging church music in Bohemia, Jan Vitásek became its head. Like Tomášek, Vitásek was a great admirer of Mozart, who had taken Prague by storm when he presented *Le nozze di Figaro*, *Don Giovanni* and *La clemenza di Tito* and whose influence among the Czechs remained strong for many decades after his death. The Cecilská Jednota (Caecilienverein) and the Žofínská Akademie (Sophien Akademie), both Prague concert-giving organizations, began in 1840. A growing interest in folksong became apparent when František Sušil issued his first collection of Moravian songs (1835) and Karel Erben followed it with a book of Czech songs (1842); both initiated a long succession of volumes resulting in a

2. Count Franz Anton Sporck at his country estate of Kuks

huge collection of national songs available to musicians by the 1860s.

The transformation of the political situation caused by the Austrian defeats in Lombardy in 1859 led to great optimism about the future course of Czech music. Plans laid as early as 1844 for a Czech 'stone' theatre came to fruition with the opening of the Provisional Theatre for the performance of Czech opera and drama in 1862. In order to establish a native repertory of historical and comic operas, Count Harrach instituted a competition in 1861 for scores and librettos; the winning entry, Smetana's *The Brandenburgers in Bohemia* (first performed in 1866), also proved one of the most popular works in the early years of the Provisional Theatre. The crucial role in the national revival played by the partsong was reflected in the founding of a series of Hlahol (male-voice choral societies) in Nymburk (1860) Prague (1861) and Plzeň (1862). Following the distinguished lead of the Moravian Křížkovský, all major Czech composers contributed to a growing repertory of choruses. The Umělecká Beseda, a society composed of the leading personalities in each of the arts, was founded in Prague in 1863. Smetana's decision to compose operas on historical and legendary subjects culminated in *Dalibor* (1868) and the epic festival opera *Libuše*, which was held in reserve until 11 June 1881, for the festive opening of the National Theatre. Within two months of the opening, the roof, auditorium and stage were destroyed by fire, but the theatre reopened in 1883. Smetana's cycle of six symphonic poems *Má vlast* represents the continuation and completion of his aim to glorify the Czech nation in his creative work. His insistence that national art should adopt contemporary compositional methods and not be based on folksong led to opposition from traditionalists and misunderstanding by the public. They enjoyed *The Brandenburgers in Bohemia*, *The Bartered Bride* (1866; fig.3) and to a lesser extent *The Kiss* (1876), but failed to appreciate *Dalibor*. During his eight years as principal conductor of the Provisional Theatre (1866–74) Smetana broadened the repertory, mainly by reducing its Italian content and including several new Czech works by such composers as Šebor, Rozkošný, Bendl, Vojáček and Blodek; even so, the proportion of operetta in the repertory, much of it by Offenbach, also increased. With his own compositions he raised the quality of Czech music to a level of distinction, and at the same time established a style that has come to be seen as quintessentially Czech.

Smetana was an ardent patriot who had little interest in having his works performed abroad, and whose aim was to provide a repertory of Czech music. When Dvořák (his junior by 17 years) became known, the struggle to give Czech art and culture its rightful place in the life of the nation had been largely achieved. He too was by nature a patriot, although not an extreme one. His music may also be seen as genuinely Czech, but he was perfectly willing to let the outside world share it with his own

3. Terezie Rückaufová as Mařenka at a revival of Smetana's 'The Bartered Bride', Provisional Theatre, Prague, 1867

people. His greatest successes were in fact in England and the USA. He was determined, however, to write a stage work that would win a permanent place in the hearts of the Czech people, and towards the end of his life he succeeded with *Rusalka* (1901), a fairy-tale opera of great lyrical beauty written partly on Wagnerian lines. His interest in Wagner and Verdi influenced his work at various times, but his admiration for Brahms also left a lasting impression. While he rarely quoted folksong, the rhythms of national dances often give his music a direct popular appeal; after 1875 the essentials of his personal style did not change fundamentally, even under the impact of the music he heard in the USA.

Melodrama was an important strand in later 19th-century Czech music and reached its apogee in Fibich's trilogy of full-length stage melodramas, *Hippodamia* (1890–91), which makes use of a complex leitmotif system. Karel Kovařovic, composer of the patriotic opera *The Dog Heads* (1898), and Otakar Ostrčil, who wrote the melodious one-act opera *The Bud* (1911), were both pupils of Fibich and distinguished conductors of the National Theatre, Prague. While there were major contributions to the traditional national operatic repertory in the 1890s, notably Fibich's *Šárka* (1897) and Dvořák's *The Devil and Kate* (1899), a growing interest in *verismo* subject matter led to such operas as Rozkošný's *Stoja* and J.B. Foerster's *Eva* (1899). None of these men was able to score a major international success such as Weinberger later had with *Švanda dudák* ('Schwanda the Bagpiper', 1927), though Dvořák's pupils Nedbal and Friml had active careers as composers of operetta in Vienna and the USA respectively.

Dvořák's Moravian friend Janáček waited 12 years for the Prague première of his *Jenůfa* (Brno, 1904), but this belated recognition encouraged him greatly and in the final years of his life he composed five more operas (*The Excursions of Mr Brouček*, Prague 1920, *Káťa Kabanová*, Brno, 1921, *The Cunning Little Vixen*, Brno, 1924, *The Makropulos Affair*, Brno 1926 and *From the House of the Dead*, Brno 1930), as well as the *Glagolitic Mass*, the Sinfonietta and his finest chamber music. Janáček was steeped in Moravian folk music; his extremely personal style, which relied greatly on the repetition of brief melodic and rhythmic fragments and resulted in a kind of musical mosaic, proved to be a potent vehicle for the expression of intimate and intensely passionate thoughts and emotions.

The music of Josef Suk (i), the second violinist in the Bohemian Quartet, acquired greater depth of feeling after the double blow of the death of his teacher Dvořák and of his wife, Dvořák's daughter Otilie. His masterpiece, the *Asrael* Symphony (1905–6), the symphonic poem *Ripening* (1912–17) and the Second String Quartet date from this period; he composed no operas. Vítězslav Novák, another of Dvořák's pupils, was an outstanding teacher whose pupils included Ladislav Vycpálek, Dobiáš, Jaroslav and Otakar Jeremiáš, Axman, Vomáčka, Jan Kunc, and Alois and Karel Hába, as well as the Slovak composers Cikker, Alexander Moyzes and Suchoň. Novák's operas have a strong national tone and include *Karlštejn* (1916) and *The Lantern* (1923). The themes that recur most frequently in his music, however, are nature, often associated with Slovakia, and love.

2. Czechoslovakia 1918–45. After the deaths of Janáček (1928), Suk (1935) and Ostrčil (1935), the remaining active 20th-century Czech composers of stature were Novák and Foerster. Their legacy formed the link for the mainstream of modern Czech music, which, while it was influenced by Impressionism and schooled in the works of Mahler and Strauss, and also took its inspiration from jazz, folksong and social poetry, basically did not exceed the bounds of the established Czech style. Among the composers in that style were Vycpálek, Karel, Otakar Zich, Otakar Jeremiáš, K.B. Jirák, Křička, Vomáčka and others. The organizational links between them were

4. Design by Edmund Chvalovský for Act 1 (the sitting-room of Paloucký's house) of Smetana's 'The Kiss', Provisional Theatre, Prague, 7 November 1876

primarily Prague institutions, the Spolek pro Moderní Hudbu (Society for Modern Music, 1920–39), the Umělecká Beseda (1863–1973, re-established in 1990) and its journal *Listy Hudební matice*, later renamed *Tempo*. Above all this group of composers enriched the Czech tradition of choral song and raised its musical quality; they also developed symphonic and chamber music.

The Czech inter-war avant garde split away from this movement; one important group was formed by Alois Hába and his pupils, including Karel Hába, Šrom and Reiner. They took their inspiration from the Expressionists and moved towards the techniques of the Second Viennese School. Their music is characterized by atonality, an athematic style and Hába's micro-intervallic system (quarter-tone, sixth-tone etc.). Hába's experimentation and the construction of quarter- and sixth-tone instruments (including the piano, the harmonium and the clarinet) was a Czech contribution to the development of composition and resulted in the establishment in 1923 of a special Hába composition class at the Prague Conservatory. In 1935 the society for contemporary music, Přítomnost ('The Present'), was founded by that sector of the Czech avant garde with the journal *Rytmus* as their official publication. The strong tendency of Hába's group to social criticism attracted to Přítomnost a further group of Czech composers, also active in the communist proletarian movement, Svaz DDOČ. Those composers (e.g. Vít Nejedlý and Schulhoff) were orientated towards Soviet music and the German Kampflied and subordinated their art to the demands of the working class and the struggle against fascism.

At the other end of the spectrum of the Czech avant garde were a number of composers, among them Martinů, who were receptive to contemporary trends, in particular neo-classicism. Both Martinů and Schulhoff, an excellent pianist, also showed a strong interest in jazz in the 1920s. Other members of this group, organized within Mánes Music Group, were Bořkovec, Iša Krejčí and Ježek. Hlobil and E.F. Burian, whose works synthesize most of the tendencies of the inter-war avant garde, were loosely connected with this group.

In Moravia it was Janáček who significantly advanced the development of music through the quality of his composition and the establishment of the Brno Organ School in 1882. His pupils, including Vladimír Ambros, Kvapil and Petrželka, formed the Klub Moravských Skladatelů (Club of Moravian Composers, 1922–49) in Brno. Some composers in his circle were influenced by the late Romantic style of Mahler and Reger, and by Impressionist music, while others, notably Kaprálová, were French-orientated. Only Haas and Harašta, who explored a method of modal composition and the rhythmic layering of structures, productively assimilated Janáček's compositional technique.

A group of German-speaking composers, which included Finke and Ullmann, also played a progressive role. This group was drawn primarily towards Expressionism and the Second Viennese School; they were organized in Prague as the Verein für Musikalischen Privataufführungen and published the journal *Der Auftakt*. In the 1930s they cooperated with Czech-speaking artists, in particular with Hába's circle and Přítomnost. Under the artistic directorship of Zemlinsky and Szell, the Neues Deutsches Theater in Prague became an important institution with a repertory that pioneered works by Janáček, Schoenberg, Shostakovich, Milhaud and Krenek, among others.

Several artistic institutions played an important role in Czech musical life at the end of the 1930s: in the National Theatre the classics of the Czech repertory were much enhanced by distinguished performances by Ostrčil, who also introduced operas by Debussy and Szymanowski; his high standards were maintained by his successor Talich, who augmented the repertory with works by, among others, Martinů. As conductor of the Czech PO Talich created a repertory representative of Czech music (mainly Smetana, Dvořák, Novák and Suk), while in Brno the Moravian Municipal Theatre gave premières of almost all Janáček's operas, as well as works by Martinů, Ostrčil, E.F. Burian and non-Czech composers such as Prokofiev. In Ostrava, Vogel and Schulhoff created the conditions for the growth of modern music and Stravinsky, Prokofiev and Hindemith gave premières of their own works there. Professional musicians were trained in Prague and Brno and in the university extension 'masters schools'. The network of societies for chamber music and the hundreds of choral societies affiliated to the organization Pěvecká Obec Československá (Czechoslovak Choral Council, 1868–1951) made concerts possible in virtually all the larger towns in Czechoslovakia. The Czechoslovak radio extended this network with its stations in Prague (1923), Brno (1925), Ostrava (1929) and later Plzeň (1946). This gave wide publicity to the most famous performing bodies and soloists in Czechoslovakia.

The departments of musicology at the Charles University in Prague and at the Masaryk University in Brno facilitated the study of musicology. Conservation of musical materials (mainly at the music department of the National Museum, Prague, and at the Moravian Museum, Brno) and instrument making achieved a high standard. There were several established private publishers (in Prague, the Urbánek family, 1871, F. Chádim, 1906, Melantrich, 1936 and the Umělecká Beseda, 1871; in Brno, the Pazdírek family, 1911). As in the 18th and 19th centuries, Czech musical life in the 20th century was characterized by continuity across the generations, notably in the case of the Suk and Jeremiáš families. In general, between the wars Czech music had a well-developed institutional basis that not only satisfied its own demands but was open to international contacts, the most prominent of which were those with central, western and south-eastern Europe.

The 1935 festival of the ISCM foreshadowed the onset of fascism. Originally to have been held in Berlin, it was moved (after political disputes within the German section of the ISCM) to Karlovy Vary (Karlsbad). German pro-Nazi members, in the majority in the Karlovy Vary council, withdrew their cooperation at the last minute; the festival was therefore organized from Prague and passed off successfully.

The Munich Pact (1938), the formation of the independent Slovak state (1939) and the Nazi occupation of Czechoslovakia (1939) complicated and progressively limited Czech musical life, which during World War II was conducted within the framework of Hitler's Reich (1939–45). The inter-war avant garde was dispersed and individual European national cultures were isolated. Czech music suffered grave losses: Martinů fled to the USA, and Kaprálová (1940) and Ježek (1942) died in exile in the West; Zdeněk Nejedlý emigrated to the USSR.

Many professional Czech musicians, including Vít Nejedlý, died in the free Czech army. Karel Reiner, E.F. Burian, Karel Ančerl, the musicologist Vladimír Helfert, the singer Karel Berman and many others suffered in Nazi prisons and concentration camps; Rudolf Karel and the musicologist Zdeněk Němec among others died in prison. Many artists of Jewish extraction who did not choose or were unable to emigrate in time died in concentration camps, among them the composers Schulhoff, Krása, Haas, Gideon Klein and Ullmann, the jazz performer and arranger Fritz (Bedřich) Weiss and others. The closing of the universities made the study of musicology difficult. The Czech opera theatres in Prague, Brno, Ostrava, Plzeň and Olomouc were closed. Many Czech artists reacted to the Nazi occupation with violent opposition, illegal activities (many works with anti-Nazi themes were written) or passive resistance. The music written during the occupation shows a marked simplification of musical language as well as a dependence on national folk materials. Some artists continued their struggle even through the Nazi campaign against *entartete Kunst*: Hába continued his composition class at the Prague Conservatory; quarter-tone and athematic compositions were still performed at concerts of Přítomnost; and the Prague festival on the 120th anniversary (1944) of Smetana's birth was a highly successful manifestation of Czech musical culture, in spite of the opposition of the occupying forces.

3. SINCE 1945. With the liberation of Czechoslovakia in 1945 new perspectives opened for Czech musical life. The suspended international contacts were re-established. In 1946 the annual music festival Prague Spring was begun in Prague, bringing renewed contacts between Czechoslovak musicians and those of both the West and the East. Similar traditions of regular festivals with international participants were established elsewhere in Czechoslovakia (Brno Music Festival, Ostrava Musical May, the Chopin Festival in Mariánské Lázně etc.).

With the establishment of a socialist state in 1948 a new phase began in the country's musical life. The process of nationalization began with the Czech PO (1945), and in the 1950s several new symphony orchestras were established. State philharmonic orchestras were founded in Brno (1956), Ostrava (1954, from 1971 the Janáček PO), in Olomouc (Moravian PO, 1951), in Zlín (Gottwaldov) (Workers' PO, 1958), in the west Bohemian spa towns (Karlovy Vary, 1951, Mariánské Lázně, 1954), and in north and east Bohemia. All the existing theatres passed into state hands, including the new Czech opera houses which had been taken over from the Germans in 1945 (Neues Deutsches Theater in Prague and the houses in Opava, Liberec, Ústí nad Labem and Teplice). All the Prague theatres became part of the National Theatre organization: the Estates Theatre (renamed the Tyl Theatre in 1945) was devoted to plays and Mozart's operas; the Grand Opera of the Fifth of May (Velká Opera 5. Května), which had taken over from the Neues Deutsches Theater, became the Smetana Theatre.

Instrument making, previously in private companies, was concentrated into a few well-known factories, for example Petrov pianos, Amati wind instruments and Krnov organs. The former Ultraphon and Esta gramophone companies were merged into Supraphon (1946). The nationalized Czechoslovak film industry with studios in Prague-Barrandov and Gottwaldov acquired the Film SO (1945), and the radio stations in Prague, Brno, Ostrava and Plzeň also had orchestras. The television network was established in Prague (1953), Ostrava (1955) and Brno (1961). The music schools, museums, libraries, archives and collections were taken out of private hands. The publishing houses and music printers were centralized into large state publishing institutions (Státní Nakladatelství Krásné Literatury, Hudby a Umění). Private concert agencies were replaced by Pragokonzert (from 1962, after succeeding the Musical and Artistic Exchange in Prague, 1948–57).

The total rebuilding of the organization of Czech musical life meant abandoning old organizations. The network of choral and musical societies was abolished (the Czechoslovak Choral Council, the Sokol and working-class choral bodies etc.). The Syndicate of Czechoslovak Composers (1946–9) was replaced by an ideological organization, the Czechoslovak Composers' Union (1949–70) with branches in Brno, Ostrava and later Plzeň, which had at its disposal the musical information media in Prague and Brno, the journal *Hudební rozhledy* (joined after 1969 by the Brno journal *Opus musicum*), the Czech Musical Fund (1953, to safeguard continuing musical creation) and later the publishing house Panton (for scores, books and gramophone recordings, from 1958). Along with the musical societies and their network the function of church music in the life of society was much reduced. A central music archive was established in the music department of the National Museum in Prague and the Moravian Museum in Brno from the libraries of the monasteries and church organizations and private archives. Museums devoted to the foremost composers were established (in Prague the Smetana and Dvořák Museums, in Brno the Janáček Archive of the Moravian Museum).

All music education came under state control. A new system of specialist schooling was created with primary schools (from 1960 the so-called Folk Schools of Art), secondary schools (from 1960 the music conservatories with centres in Brno, Ostrava and Plzeň), and universities (from 1946 the Academy of Musical Arts in Prague, and from 1947 the parallel Janáček Academy of Musical Arts in Brno). Music teaching was studied at university level at institutes with departments of music education (Prague, Brno, Ostrava, Olomouc, Plzeň, České Budějovice, Ústí nad Labem, Hradec Králové). The study of musicology was based at the arts faculties of the universities of Prague, Brno and Olomouc. The basic methodological approach in theory, musicology and education became the Marxist–Leninist philosophy, Pavlov's theory of the conditioned reflex and in particular Asaf'yev's theory of intonation, developing Kurth's concept: Nejedlý, Sychra and Jiránek were considered the foremost exponents. Czech musicology had its research basis in the Musicology Institute (1962–71), and, from 1972, in the Institute for the Theory and History of Art in the Czech Academy of Sciences; important periodicals are *Miscellanea musicologica* and *Hudební věda*.

While composers in the West were concerned with the Second Viennese School, in Czechoslovakia the development of music was determined by the aesthetic of socialist realism and distinguished by the principles of socialist content and popular form. The style was essentially late Romantic, emphasizing programmatic elements, the expression of new socialist ideals, the simplification of

musical language and the stylization of traditional folk materials. It consequently isolated itself from modernist tendencies and new developments in Western music. The function of music was seen as an ideological lever for the achievement of current political goals (the composition of mass songs, *častušky*, folk cantatas etc.). Most composers in Czechoslovakia went through this evolutionary stage (*c*1950–65): Dobiáš, Kapr, Jan Seidel and E.F. Burian. Those associated with the Composers Collective of JAMU, a young group at the Janáček Academy of Musical Arts in Brno (1951–4), composed in this spirit. At Prague Conservatory Hába's department of quarter-tone composition was disbanded once again in 1950. Jazz was excluded as a possible source of artistic inspiration, and formalistic tendencies were noted in the work of Czech composers living abroad (Martinů, Jirák, Husa).

By the beginning of the 1960s a number of distinct tendencies were noted. One group comprised composers who had never severed their connection with Czech tradition (e.g. Řídký and Horký). But the largest group consisted of those whose styles had been influenced by non-serial 20th-century composers (e.g. Eben, Kalabis, Pauer, Sommer, Hurník, Jirko, Kovaříček, Bárta, Dvořáček, Gregor, Matys). A third group consisted of composers who developed their style independently of the influence of socialist realism (O.F. Korte, Hanuš, Jaroch, Slavický, Doubrava); some of them leant towards experimental music and created conditions for its realization in Czechoslovakia (Burghauser, Rychlík, Vostřák, Kabeláč). Kabeláč also taught the youngest generation of Czech composers the techniques of electronic music and *musique concrète* (Klusák, Loudová, Jan Málek, Miroslav Hlaváč, Zdeněk Lukáš, Rudolf Růžička, Josef Slimáček etc.).

A movement towards re-establishing contacts for the development of Czech music with the international mainstream is evident from the first half of the 1960s, when Czech artists once again entered the international music forum. Their participation at international festivals of new music was significant, for example at Warsaw and the Darmstadt summer courses; in Prague an annual international jazz festival was established in 1964 as an adjunct to Prague Spring. Apart from the Novák Quartet the performers of such new music were young groups who also performed at ISCM festivals: in Brno, Musica Nova (1961) and Studio Autorů (1963); in Prague, Musica Viva Pragensis (1961), Chamber Harmony (1960), Sonatori di Praga (1964) and the QUaX Ensemble (1967). Of considerable importance was the founding and construction of the studios for electronic music and *musique concrète* at the Czechoslovak radio in Plzeň (1964), followed by the workshops at JAMU in Brno and at the film laboratories at Prague-Barrandov. Studios were begun at the conservatory in Ostrava (1966) and at the Czechoslovak radio in Prague (1968) but never finished.

Thanks to these foundations, Czech composers made a substantial contribution to the composition of experimental music. New creative groups were established: in Brno, Group A (1963; Josef Berg, Ištvan, Jan Novák, Piňos, Pololáník, Pavel Blatný, Kohoutek, Miloš Štědroň and Parsch) and in Prague, the Prague New Music Group (1965; Vostřák, Vladimír Šrámek, Komorous, Kopelent). Kučera worked in the artistic group Syntéza ('Synthesis'), Ladislav Simon in the Sonatori di Praga, Milan Báchorek was active as a composer of experimental music in Ostrava. In the mid-1960s several composers adopted serial technique. Czech composers of electronic music and *musique concrète* (e.g. Kučera, Lukáš) preferred French methods to the systematization of the German Cologne School; Komorous and Kotík used live electronic techniques in combination with aleatory music in the style of Cage, while Kabeláč and Rychlík used a synthesis of several techniques. Herzog, Lébl and Kohoutek are among the most significant writers on new theories; important periodicals include *Hudební rozhledy* and *Opus musicum*, with *Konfrontace* (1968–70) and the collection *Nové cesty hudby* ('New paths of music', 1964, 1970) being devoted to experimental music.

After the federation of Czechoslovakia into the Czech and Slovak Socialist Republics in 1968, the Czechoslovak Composers' Union was dissolved (1970); for Bohemia and Moravia, its functions were assumed by a new Union of Czech Composers and Concert Artists, with its headquarters in Prague and branches in Brno, Ostrava and Plzeň.

Although no major figures emerged in Czech opera, the 1970s and 80s saw a number of premières, including works by Kašlík and Jiří Pauer. In 1983 Prague's National Theatre reopened, after a six-year refurbishment, with a performance of Smetana's *Libuše*; next to it was constructed the New Stage (Nová Scéna), sometimes used for small-scale opera. After the pioneering efforts of the conductor Munclinger, the harpsichordist Růžičková and Venhoda, the founder of the Prague Madrigalists (1956), early music began to flourish, and annual courses of the Early Music Society of Czechoslovakia were held at Kroměříz and later Valtice. With the death of Nejedlý (1962), musicology gradually became less ideologically based and began to reflect a growing interest in a broader historical range of Czech music. Major projects undertaken in the 1970s and 80s included the publication of the complete correspondence of Dvořák, the complete works of Janáček and a series of catalogues of major Czech and Moravian historical music collections.

After the fall of communism at the end of 1989 and the establishment of an independent Czech Republic in 1992, the introduction of free-market economics had a marked effect on musical life. Many organizations, used to large government subsidies, have been forced to look for sponsorship and there has been a significant increase in the commercial exploitation of music, particularly in the proliferation of music festivals. The large state companies, notably Supraphon, have been broken up and parts have been sold to foreign concerns. Numerous small recording and publishing companies have emerged in an enterprising if volatile market. The National Theatre plays a significant, albeit somewhat diminished, role in the musical life of the nation, and with the change from the Smetana Theatre to the Prague State Opera in 1992 is now in competition with its former ancillary stage. Among composers, the only one to have developed a genuinely international profile with consistent performances abroad is Petr Eben. The fall of the communist regime also meant that a number of distinguished composers and performers returned to contribute to Czech musical life, including the composer Karel Husa, the pianist Rudolf Firkušný and the conductors Zdeněk Macal and Rafael Kubelík.

II. Traditional music

Traditional music of the Czech Republic falls broadly into two types: the instrumental music of the western areas and the vocal music of the eastern. In Bohemia and the adjoining part of Moravia, bordering on Germany and Austria, melodies have strong western European features; in Moravia and Silesia, bordering on Slovakia and Poland, melodies, harmonies and rhythms suggest

west Carpathian influences. These stylistic differences have arisen as a result of cultural and economic exchange during the 17th and 18th centuries. With the onset of the Counter-Reformation after the Thirty Years War, Bohemian traditional music was influenced by the Baroque and Classical musics of western Europe while the eastern regions of Moravia and Silesia, particularly the mountain regions, had almost no contact with the West.

1. Bohemia: (i) Early history and sources (ii) Vocal music (iii) Instrumental music. 2. Moravia and Silesia: (i) History and sources (ii) Vocal music (iii) Instrumental music (iv) Recent trends.

1. BOHEMIA.

(i) Early history and sources. Throughout its history, traditional music of Bohemia has interacted with and been influenced by other musical forms. When Christianity took hold in the 9th century, exisiting musics were influenced by religious music, as the 11th-century religious folksong, *Hospodine pomiluj ny*, illustrates.

The earliest evidence of traditional melodies dates from the 14th century. The Czech reformation of the 15th century and, above all, the Hussite movement in Bohemia, resulted in a hitherto unparalleled cultivation of religious song. It also contributed to the rapprochement between village and town leading to the development of 16th-century song-types such as lyrical, political and students' humorous songs. The same melody was often used for more than one song text. From that time a three-part repetitive song form emerged with melodic features and structural characteristics that remained part of the traditional music repertory until the 20th century.

During the Counter-Reformation, traditional musicians played in churches and in Baroque ensembles for the aristocracy. An example of the way in which different musics interweaved is the institution of the *kantor*, a village school teacher responsible for the organization of musical activities. This individual played church music, looked after the choir, and played classical music for the aristocracy as well as traditional music at village dances.

The majority of traditional songs and dances collected in the 19th century consist of rural material, selected from a much wider repertory. Most of them had survived from the 18th century with melodic types frequently rooted in instrumental dance music. Only a few types are of earlier origin. Among these are the *koledy* (*see* KOLĘDA), ritual carols performed at Christmas, New Year and Easter. They are accompanied by rites to secure longevity and fertility, ceremonies which suggest a pre-Christian origin. Melodic features related to those of *koledy* may also be found in harvest and wedding songs. Collections of these songs are housed in the archives of the Institute of Ethnography and Folklore of the Academy of Sciences in Prague and Brno.

(ii) Vocal music. Bohemian traditional song has been influenced by instrumental music and characteristic features are chordal motifs together with the elongation of a single syllable over several beats (ex.1). It uses a declamatory vocal style and has links with dance, trumpet signals, military marches, Gregorian chant and other types of church singing. It has also been influenced by melodies and song texts of neighbouring ethnic groups as well as by secular composed music.

Ex.1 Bohemian dance-song (Erben, 1862–4)

(a) Song. Song melodies from Bohemia and west Moravia are dominated by the major triad. Modulation in the strict sense of the word is exceptional. Most songs are monophonic, though in some cases a second voice is added in 3rds or 6ths. The overall structure, mainly based on the repetition of identical phrases (either at the same pitch or in sequence) consists of 16 bars divided into four four-bar phrases; these can be further subdivided into two-bar sections. The opening of the second section of a melody, contrasting with the first, is usually a repetition of the third and fourth bars (occasionally also the seventh and eighth). In south Bohemia, close to the Moravian border, there also occur songs of 10, 12 and 14 bars.

The first half of the 19th century saw the development of the 'social song'. These were composed songs that expressed bourgeois tastes. Their texts were epic, patriotic and lyrical; melodies were based on traditional ones and they soon became part of the general song repertory in rural as well as in urban areas. The broadside ballad was an urban product with its printed text usually suggesting performance to the tune of a well-known song. Workers' songs emphasized social and political themes and drew on the traditions of both rural and urban musics. These songs gave rise to the 'songs of the people' which were intended to form the basis of the song repertory for the 'new society' of postwar Eastern Europe. Instead it was the *lidovka* that served this funtion. This sentimental, popular song form was accompanied by orchestras, eventually consisting mostly of brass instruments, and drew on the lyrics and melodies of traditional songs including broadside ballads. A well-known example of *lidovka* is Jaromír Vejvoda's 'Beer Barrel Polka'.

Camp-fire songs, *trampská písen*, became popular during the 1920s and 30s.

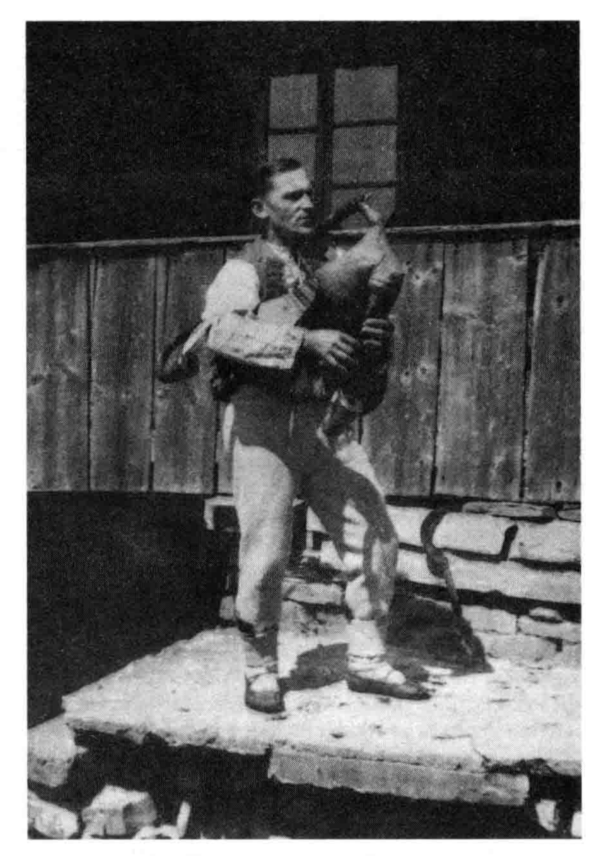
(b) Dance-songs. In the earliest manuscript collection of folksongs from Bohemia (1819–20), more than 80% are dance-songs or songs sung to dance.

Circle dances are accompanied by songs in triple time during which the 'held back' dance step emphasizes the first and third beats set against the syncopated rhythms of the melody. The influence of bagpipes is seen in the way that melodies slide down to the lowest attainable bagpipe tone and in the absence of the lower minor third, which is beyond the range of Czech bagpipes. During the 20th century, the circle dance became influenced by the music of brass bands, examples of which survive in south-west Bohemia. These dances are also related to the *umadum*, a German dance from west Bohemia, or the Serbian *reja*.

(c) Dances. By the end of the 18th century there were an increasing number of couple-dances. With the growing popularity of the polka, melodies in duple time became more common and this trend continued into the 20th century. The prototype of duple-time dance is the *obkročak* ('circular step'), in which dancers turn on the ball of each foot, this figure being interrupted by a short hop. Other dances derive from the *obkročak*, either by transforming the hop into an upwards leap (*vrták*, 'drill step') or by performing two leaps, *skočná* ('hopping step') or *třasák* ('trembling step').

Dances in triple time developed more independently as, for example, the *sousedská* (a quasi-ländler) and *do kolečka* (round-dance). Great popularity was achieved by the *rejdovák* and the *rejdovačka* ('romping' dances), generally performed in succession, the *rejdovak* in 3/4 at a moderate tempo and the *rejdovačka* in 2/4 time at a very lively pace (ex.2). This combination became so

Ex.2 *Rejdovák* and *Rejdovačka*, Bohemia (Erben, 1862–4)



popular that it became the chief rival of the waltz and the galop.

Dances which mix metres by alternating duple-time and triple-time, the *mateník* ('muddling' dances), use steps from the *obkročak* or ländler. There are connections between Bavarian dances (especially *hochfalz*, *zweifachen*, *dreher-walzer*) and those performed by Germans in Bohemia. Both share the *furiant*, the text of which concerns an ostentatious small farmer, and which consists of sections of two-syllable metric feet in which the dancers' steps consistently follow the 3/4 metre of the melody. The ländler, a round dance for individual couples, with its slow 3/4 metre, strains consisting of eight bars and tendency towards arpeggio figures, shows the influence of traditional Alpine song. The Alpine *dudler* and *jodler* were transformed into the *jukačka* in the south-east Bohemian borderland. After 1830 the polka made its way into Europe from Bohemia, while Bohemia imported the waltz. Since then these two dances have formed the basis of the rural and urban dance and song repertory.

(iii) Instrumental music. Early Czech instruments include the wooden shepherds' pipe, the cow- or ox-horn used by night watchmen to signal the time, and the *mušle* or conch-shell trumpet, sounded in rituals to prevent rain. There were also transverse and end-blown flutes, less common in Bohemia than in Moravia, as well as panpipes and the elliptical ocarina.

The character of a melody is to a certain extent determined by the instruments on which it is played. The most widespread instrument is the *dudy* (bagpipe; fig.5), known in Bohemia since the 13th century. It was used to accompany singing, either solo or with other instruments. The tuning of the chanter originally expressed indigenous tuning patterns. When the Western tempered scale was adopted in the 17th and 18th centuries the pattern changed and the tonic stabilised around E. The smaller bagpipe with a tonic of *g′* or *a′* and the larger instrument with a double chanter were the most common. At the turn of the 20th century bagpipes with bellows came to Bohemia from Germany and France.

The *skřipsky*, a home-made fiddle which had three or, in its larger version, four strings, survived, together with the *skřipkařsky bas*, in Jihlava district, but disappeared during World War II. The short-necked violin is found in south and west Bohemia, and is adjusted for playing with clarinet and bagpipe by the '*capo tasto*' technique. The double bass began to be used relatively recently, probably during the 19th century. This expensive instrument was made by amateur instrument makers and usually had three strings. Professionally-made double basses were not used until the end of the 19th century. The basset was used until the 1930s. This small, three-string instrument reminiscent of the bass viol was fitted with a leather strap that enabled the player to stand or walk. Less common in traditional music was the sharp, strident string instrument *trumajt*. The *niněra*, a popular medieval instrument, was capable of producing more than one note simultaneously and sounded similar to the bagpipe. It disappeared after the Middle Ages experiencing only a temporary revival in the 18th century when it was played by travelling musicians and beggars. Reference is made in 1738 to the use of the dulcimer for wedding music and its popularity is also apparent from folksong texts. German-speaking inhabitants of Bohemian cities also favoured this box zither. During the first decades of the 19th century, it fell into disuse. It was revived after 1945.

5. *Dudy or gajdy (bagpipe)*

The most common instrumental combination was the bagpipe and violin, later complemented by clarinet as a 'small barn band'. This combination is still used in the Chod district of west Bohemia. Later, the double bass was added and some instruments were doubled up. A combination of strings, dulcimer, flugelhorn and transverse flute has been documented in Polabí at the beginning of the 20th century. In the second half of the 20th century, different combinations of traditional instruments were used by both amateur and professional ensembles. Brass bands, introduced in the first half of the 19th century, are still popular today. In addition to large professional and

semi-professional ensembles, there are smaller bands consisting of two flugelhorns, clarinet, tenor horn, baritone, accompanying trumpet in F, tuba and percussion. Their repertory is based on the *lidovka*, and on arrangements of folksongs, polkas and waltzes.

2. Moravia and Silesia. Moravia and Silesia are divided musically by the river Morava: musics performed west of the river share features with those in Bohemia; those living east of the river are closer to the musics of neighbouring Slovakia. Music of western Moravia has been influenced by the major and minor scale system of western European classical music. Melodies are largely in triple time and have regular rhythms. Eastern Moravian music tends to be independent of the western tonal system. Among the scale-types encountered are those that contain a tritone or minor 7th above the tonic. The relationship between text and melody is close and many melodic rhythmic structures derive from textual rhythms. Characteristic forms include 'long-songs' performed in a rubato style. The most common dances are 'spinning' dances or rotating-dances.

(i) History and sources. The earliest references to traditional musics come from 12th-century Church prohibitions against singing and joking on graves. Similar bans were issued in Moravia until 1674. Specific songs were recorded in the 15th and 16th centuries as incipits in hymn books or as secular melodies with religious texts. Longer fragments and entire songs are recorded elsewhere. The city of Brno magistrates' records from the 16th century, for example, document the text of a love song, while the Košetický Collection of the late 17th century includes a Valach brigand song. The arrival of Valach shepherds in the eastern region during the 16th and 17th centuries influenced local musics, as did Baroque and Classical styles through folk musicians who played at the homes of the aristocracy, mainly in western Moravia.

The earliest conscious attempt to survey the traditional musics of the Austrian monarchy regions was carried out in 1819 and recorded not only rural traditions but also composed items and musics that were fashionable in urban areas. Later collections, dating from the 19th century onwards, focussed on song repertories from rural areas. These were carried out both by individual collectors, for example František Sušil, and institutions, such as Das Volkslied in Österreich headed in Moravia by Leoš Janáček. Much of the material collected is held by the Institute of Ethnology of the Czech Academy of Sciences in Brno. This collection comprises over 70,000 song transcriptions, cylinder recordings from 1909–12, later audio recordings and performances on video. Many theoretical studies were published in the periodical *Národopisné aktuality* (later renamed the *Národopisná revue*).

(ii) Vocal music. Performers divide vocal music into songs that accompany dance and those that do not. Songs are predominantly monophonic, but duets performed in parallel 3rds and 6ths are common in southern and eastern Moravia. Features of older songs include: a small ambitus and the repetition of melodic and rhythmic motifs.

Moravian and Silesian songs are characteristically arranged in stanzas and have regular rhyming patterns. The greatest part of the repertory consists of love songs; this theme also crosses over into other genres such as military songs, wedding songs and ballads. Songs that were traditionally performed outside include: children's pastoralist songs or yodels (*halekačky* or *hojakačky*); pastoralists' songs from the Beskydy mountains (*salašnické*); harvest songs sung by both men and women (*kosecké*, *žatevní*); and women's hay-making songs from eastern Moravia (*trávnice*).

Epics, which have lyrical elements, include legends and ballads depicting family and social life. Brigand songs found in eastern Moravia suggest links with the musics of the Carpathians. Many of the numerous military and conscription songs date back to the start of obligatory military service in the 18th century. Some of the military songs refer to famous battles and Turkish conquests. The more descriptive reporting of events was left to broadsheet ballads and street songs gave information on current social and political events. Ritual songs included *koledy*, post-harvest songs, feast and wedding songs and, from eastern Moravia, rare instances of funeral laments.

The spinning-dances of eastern and north-eastern Moravia are accompanied by a number of different songs. In Moravian Slovakia, these dances include *vrtěná* ('drilling dance'), *danaj*, *skočná* ('skipping dance'), *sedlcká* or *sedlácká* ('farmer's dance'), *starosvětská* ('old world dance'), and *hrozenská* ('dance of Hrozenkov'); in Valachia *gúlaná* or *točená* ('round-dance') and *valaský* (Valach dance); and in Silesia *ověnžok* ('garland dance') or *taněc* ('dance'). Polonaise-like walking-dances form an important part of the repertory. They have a characteristic three-beat rhythm and are known as *zavádka* ('ushering'), *cófavá* ('stepping-back dance') or *starodávný* ('old time dance'). Solo 'leaping' dances (*verbuňk*, *odzemek* or *skok*) are performed by men.

Dance-songs have fixed forms and metres. In eastern and southern Moravia, many dance-songs are performed in a 'drawn-out' manner with rhythmic variations. In general, the 'drawn-out' songs are determined by the physical movements of the dancers, for example 'walking songs' (*chod'ácké*) are performed at a walking pace and 'harvest songs' (*kosecké*) match the rhythms of working. However, they are also influenced by contexts, such as performing in the open air, and by the role of the lead singer.

(iii) Instrumental music. Early iconography depicts a pipe and small drum, and, from the 13th century onwards, the bagpipe (*gajdy*; fig.6), which was widely used for both solo performances and in ensembles. Pipes and signal

6. Bagpipe band from Hrčava, Silesia

7. *String band from Velká nad Veličkou, East Moravia*

horns were played unaccompanied by pastoralists. Other traditional instruments include the fiddle, the double bass and the dulcimer.

The *gajdoš* or fiddle and bagpipe duo, in which the fiddler played the melody and the bagpiper provided richly decorated ornamentation, was found until the 1950s around the Silesian town of Těšín, an area influenced by Slovak and Polish mountain bagpipe music. The bagpipe died out in western and central Moravia in the mid-19th century and in eastern Moravia survived until the end of the century. It was mostly replaced by dulcimer and different variations of string bands of the first fiddle, a small double bass (initially with three strings) and a second fiddle, which enabled the progress of a more lively harmonic thinking. These instruments produced rhythmic tension by accenting the second and fourth quavers of each bar while the first fiddle decorated the vocal melody. When string bands consisted of first and second fiddles, double bass and, from the 18th century, clarinet, the first fiddle played a richly ornamented melody, the clarinet played a second melodic line and the second fiddle and bass provided a harmonic accompaniment. When accompanying spinning-dances in 2/4 time, the second fiddle and bass used the *duvaj* or 'double stroke' technique, that is, smooth bow strokes emphasizing light, even beats. Accompanying parts consisted of melodic lines frequently based on parallel 3rds, 4ths and 5ths.

The dulcimer was either placed on a table or hung from the player's neck. In Moravia it became so popular that it came to be included with string instruments and clarinet in ensembles. In some regions of southern Moravia, the instrument was still used in traditional contexts until the 1930s when the large Hungarian dulcimer or cymbalom was introduced into Moravia by Slovaks and became popular in organized folklore ensembles.

In the second half of the 19th century traditional bands began to play the 'Streich', in which string instruments were completed by wind or brass instruments. In some regions, such as Moravian Slovakia and Silesia, wind bands, usually consisting of two clarinets, bugle, bass bugle, two trumpets and helicon, replaced dulcimer bands. Wind bands flourished in the mid-19th century when musicians returned from military service where they had played in military bands. In the Haná region wind bands were considered to represent national traditional music from the mid-19th century. These bands had a double effect: their technical limitations led to simplifications in both the melodies and harmonies of traditional melodies, but their widespread popularity in some regions enabled the continuing survival of traditional forms.

A tradition of *skřipkařská* or 'fiddlers' bands' was documented only in Velký Beranov near Jihlava until the 1950s and was formerly also performed in German-speaking areas. The players used home-made instruments, which resembled medieval fiddles in shape. The Beranov band comprised two small fiddles, a big fiddle and a bass fiddle.

The fiddle tradition has been perpetuated by professional and amateur string bands. Other bands, comprising from three to six musicians, performed at celebrations such as weddings. They used a variety of instruments, for instance the fiddle, accordion, double bass and percussion instruments, including the *ozembouch* ('hit the ground'), which consists of a staff surmounted by a bow hung with various kinds of rattles.

(iv) Recent trends. As in the past, the current repertory is not homogeneous but comprises both traditional and 'folkloric' items. Song styles have been influenced by many different genres including music-hall songs, popular hits, operetta and film music. These genres influenced the musics of western and central Moravia more rapidly than eastern Moravia, where more of the traditional repertory has been retained, supplemented by composed items in traditional style.

The present repertory consists of traditional Moravian and Slovak songs, songs arranged and performed by folklore ensembles and brass bands, songs composed in 'folk' style (such as those by Fanoš Mikulecký), urban music and *trampské písně* (camp-fire songs). Vocal ensembles are formed by different local, professional and interest groups, with popular folksongs or *lidovky* comprising a major part of the repertory. Since the 1970s the professional arrangements of the Brno-based ensemble Moravanka, which focus on the songs of Moravian Slovakia and western Slovakia, have been popular with local people of all ages and even beyond the region's borders.

Trampské písně, with guitar accompaniment (the most popular instrument also for accompanying popular songs and folksongs), are mostly composed songs with lyrics inspired by the American West, and music – in minor keys and sentimental in feel – influenced by postwar Czech popular musics such as jazz, cabaret, operetta and brass bands. Originating in the 1920s, they have been transmitted orally and are the antecedents of contemporary urban folk and country musics.

Young people prefer music transmitted by the mass media, including modern dance music and urban folk music. Since 1989, because of a lack of standardized music syllabuses in schools, music teaching has been influenced by local music traditions. Repertories vary also according to age group and changing fashions. For instance, the folksongs popularized by Moravanka in the 1970s had been replaced by the 1990s by urban folksongs such as those composed by the Nedvěd brothers.

At the end of the 20th century traditional music, songs and dances were performed only in a few small regions of southern and eastern Moravia. Contexts of performance for folkloric ensembles include folklore festivals, such as Strážnice (founded in 1949), Rožhoštěm (1969), Velká and Veličkou (1959), and Dolní Lomná (1969).

Czeczott [Czeczot; Danilewicz-Czeczot], **Witold** (*b* Boracin, nr Nowogródek, 20 Dec 1846; *d* Pińsk, 24 Jan 1929). Polish composer and pianist. He studied with Żeliński at the Music Institute in Warsaw, and with Liszt in Weimar, concluding his studies at the Brussels Conservatory. In 1869 he also completed a law course at St Petersburg University, and studied further in Heidelberg; there he gained his doctorate in 1871.

In 1878 Czeczott entered a seminary in Warsaw, becoming a priest after three years. In 1883 he was made professor at the theological seminary in St Petersburg. From then he worked mainly as a priest, as well as publishing many articles and theological and literary

works. His activity as a musician was incidental, belonging to the early period of his life. In his youth, Czeczott often gave concerts as a pianist, and also composed chamber works, piano music and songs, some of which are in print. His compositions include a string quartet, variations, polonaises for piano, a Suite op.3 for piano and songs for voice and piano.

ZOFIA CHECHLIŃSKA

Czegert, Josef. *See* SEGER, JOSEF.

Czekanowska(-Kuklińska), Anna (*b* Lwów, 25 June 1929). Polish ethnomusicologist. She studied musicology with Adolf Chybiński and statistical methods with Jan Czekanowski at the University of Poznań (1947–52). She also studied theory of music and methodology under Józef Chomiński at Warsaw University. In 1958 she took the doctorate at Warsaw University with a dissertation on the songs of the Biłgoraj region, and in 1968 she completed the *Habilitation* at the same university with a dissertation on Slavonic folksong. Since 1969 she has been reader and head of the ethnomusicological department at Warsaw University, where she was appointed director of the Institute of Musicology in 1975, professor in 1976 and full professor in 1986, and since 1972 she has been head of the working group on the ethnogenesis of the Slavonic people at the Polish Academy of Sciences. She has been a visiting lecturer in ethnomusicology at the universities of Seattle (1963), Pittsburgh (1980), Mainz (1983–4), and Durham (1995). Her main research interests are Slavonic music, its origin and development, and a comparative approach to the methodology of contemporary ethnomusicology. She has also undertaken studies of the music of central Asia.

ZYGMUNT M. SZWEYKOWSKI

Czernohorsky, Bohuslav Matěj. *See* ČERNOHORSKÝ, BOHUSLAV MATĚJ.

Czernowin, Chaya (*b* Haifa, 7 Dec 1957). Israeli composer, active in the USA. She studied at the Rubin Academy of Music, Tel-Aviv University (BA 1982) with Abel Ehrlich, Sadai and others, in Berlin with Schnebel (1983), at Bard College (MFA 1987), where her teachers included Eli

Yarden, and at the University of California at San Diego (PhD 1993) with Roger Reynolds, Ferneyhough and others. She has taught at the Darmstadt summer courses (1990–98), where she received the Kranichstein prize (1992), and at the University of California, San Diego (from 1997). Her other honours include an Asahi Shimbun Fellowship for a year residency in Tokyo (1993–4), a year residency at the Akademie Schloss Solitude in Stuttgart (1996), a Heinrich Strobel Stiftung Fellowship (1997–9) and a commission for Ensemble Intercomtemporain employing IRCAM technology (1998).

Most of Czernowin's vocal works set Hebrew texts and many of her instrumental works bear Hebrew titles. Stylistically, she stands at 'an impossible crossroads' between Ferneyhough and Scelsi, influenced by gagaku music and free improvisation. In her compositions she strives to reach an inner, unattainable world through what she has described as 'truthful, unidealized, unrefined musical experiences, not descriptions'. Her early style, epitomized in *Dam sheon hachol* (The hourglass bleeds still, 1992) and *Amber* (1993) celebrates continuity through change. Elongated, dense clusters alter their tonal configuration through slow metamorphic processes, while occasional brief, sharp sounds emphasize omnipresent delicate tints. Later works, such as *Die Kreuzung* (1995), the String Quartet (1995) and *Afatsim* (1996), question earlier continuities through intentionally disfigured, non-linear forms and textures.

RONIT SETER

Czerny, Carl (*b* Vienna, 21 Feb 1791; *d* Vienna, 15 July 1857). Austrian piano teacher, composer, pianist, theorist and historian. As the pre-eminent pupil of Beethoven and the teacher of many important pupils, including Liszt, Czerny was a central figure in the transmission of Beethoven's legacy. Many of his technical exercises remain an essential part of nearly every pianist's training, but most of his compositions – in nearly every genre, sacred and secular, with opus numbers totalling 861, and an even greater number of works published without opus – are largely forgotten. A large number of theoretical works are of great importance for the insight they offer into contemporary musical genres and performance practice.

The primary source of information about Czerny is his autobiographical sketch entitled *Erinnerungen aus meinem Leben* (1842). In it, he describes his paternal grandfather as a good amateur violinist, employed as a city official in Nimburg (Nymburk), near Prague. Czerny's father, Wenzel, a pianist, organist, oboist and singer, was born there in 1750, and received his education and a good musical training in a Benedictine monastery near Prague. After marriage, Wenzel settled in Vienna in 1786, where he earned a meagre existence as a music teacher and piano repairman. Czerny, an only child, was born in Vienna in the year of Mozart's death. He and his parents resided together until his mother's death in 1827, and his father's in 1832. He never married, and lived alone for the remainder of his life.

Czerny describes his childhood as 'under my parents' constant supervision... carefully isolated from other children'. He began to study the piano with his father at an early age, and by ten was 'able to play cleanly and fluently nearly everything of Mozart [and] Clementi'. His first efforts at composition began around the age of seven. In 1799, he began to study Beethoven's compositions, coached by Wenzel Krumpholz, a violinist in the Court Opera orchestra, who introduced him to Beethoven when he was ten. Czerny played for him the opening movement of Mozart's C major Piano Concerto, K503, the 'Pathétique' Sonata, and the accompaniment to *Adelaide*, which his father sang. Beethoven indicated that he wanted to teach Czerny several times a week, and told his father to procure C.P.E. Bach's *Versuch*. Czerny describes the lessons as consisting of scales and technique at first, then progressing through the *Versuch*, with the stress on legato technique throughout. The lessons stopped around 1802, because Beethoven needed to concentrate for longer periods of time on composition, and because Czerny's father was unable to sacrifice his own lessons in order to take his son to Beethoven. Czerny nevertheless remained on close terms with the composer, who asked him to proofread all his newly published works, and entrusted him with the piano reduction of the score of *Fidelio* in 1805.

In 1800, Czerny made his public début in the Vienna Augarten hall, performing Mozart's C minor Concerto K491. He was renowned for his interpretation of Beethoven's work, performing the First Concerto in C major in 1806, and the 'Emperor' in 1812. Beginning in 1816 he gave weekly programmes at his home devoted exclusively to Beethoven's piano music, many of which were attended by the composer. Apparently he could perform all of Beethoven's piano music from memory. Although his playing was praised by many critics ('uncommonly fiery', according to Schilling), he did not pursue a career as a performer. He made arrangements for a concert tour in 1805, for which Beethoven wrote a glowing testimonial, but although he describes himself at this time as quite proficient as a pianist, sight-reader and improviser, he concedes that 'my playing lacked the type of brilliant, calculated charlantry that is usually part of a travelling virtuoso's essential equipment'. For these reasons, in addition to political instability and the modest income of his family, he chose to cancel the tour. He also apparently decided at this point never to undertake the life of a travelling virtuoso, a path that would have made him more widely known as a performer. Instead, he decided to concentrate on teaching and composition.

He spent a good deal of time with Clementi when the latter was in Vienna in 1810, becoming familiar with his method of teaching, which Czerny greatly admired and incorporated into his own pedagogy (His op.822 is entitled the *Nouveau Gradus ad Parnassum*). In his early teens Czerny began to teach some of his father's students. By the age of 15, he was commanding a good price for his lessons, and had many pupils. In 1815, Beethoven asked him to teach his nephew, Carl. As his reputation continued to grow, he was able to command a lucrative fee, and for

the next 21 years he claims to have given 12 lessons a day, 8 a.m. to 8 p.m., until he gave up teaching entirely in 1836. In 1821, the nine-year-old Liszt began a two-year period of study with Czerny. The teacher noted that 'never before had I had so eager, talented, or industrious a student', but lamented that Liszt had begun his performing career too early, without proper training in composition. Czerny also taught Döhler, Kullak, Alfred Jaëll, Thalberg, Heller, Ninette von Bellevile-Oury and Blahetka.

Around 1802, Czerny began to copy out many J.S. Bach fugues, Scarlatti sonatas and other works by 'ancient' composers. He describes learning orchestration by copying the parts from the first two Beethoven symphonies, and several Haydn and Mozart symphonies as well. He published his first composition in 1806 at the age of 15: a set of 20 Variations concertantes for piano and violin op.1 on a theme by Krumpholz. Until he gave up teaching, composition occupied 'every free moment I had', usually the evenings. The popularity of his first ten opus numbers issued in 1818–19, and of his arrangements of works by other composers, made publishers eager to print anything he would submit, and he earned a substantial amount from his compositions.

The quantity and diversity of Czerny's compositional output is staggering . He divided his works into four categories: 1) studies and exercises; 2) easy pieces for students; 3) brilliant pieces for concerts; and 4) serious music. As Kuerti (1995, p.7) notes, it is interesting and revealing that he did not regard the 'brilliant pieces for concerts' as 'serious music'. The compositions for piano illustrate the explosion in the number of works published for the instrument at a critical time in its development. In addition to approximately 100 technical studies, Czerny published piano sonatas, sonatinas and hundreds of shorter works, many of which were arranged for piano, four to eight hands. He also published a plethora of works

Carl Czerny: lithograph by S. Parmenter

based on national anthems, folksongs, and other well-known songs. Works for other instruments and genres include much symphonic and chamber music, as well as sacred choral music. Mandyczewski's tabulation of the works remaining in manuscript in the Vienna Gesellschaft der Musikfreunde includes over 300 sacred works. Czerny published approximately 300 arrangements without opus numbers. These works are based on themes from approximately 100 different operas and ballets, plus symphonies, overtures and oratorios by such composers as Auber, Beethoven, Bellini, Cherubini, Donizetti, Halévy, Handel, Haydn, Hérold, Mendelssohn, Mercadante, Meyerbeer, Mozart, Rossini, Spohr, Verdi, Wagner and Weber.

The predominant view of Czerny at the end of the 20th century – of the pedagogue churning out a seemingly endless stream of uninspired works – is that propagated by Robert Schumann in his reviews of many Czerny compositions in the *Neue Zeitschrift für Musik* ('it would be hard to discover a greater bankruptcy in imagination than Czerny has proved', review of *The Four Seasons*, 4 brillant fantasias op.434). However, Schumann's rather cavalier dismissal of Czerny was not uniformly shared. During his sojourn in Vienna (1829), Chopin was a frequent visitor at Czerny's home, and a good deal of correspondence between the two survives. One of Liszt's letters from Paris to his teacher in Vienna (26 August 1830) describes his performances of Czerny's Piano Sonata no.1 in A♭ major op.7, and the work's enthusiastic reception. He urged Czerny to join him in Paris. Liszt's high regard is again seen in his inclusion of Czerny as one of the contributors to his *Hexaméron*, the Grand Variations on the March from Bellini's *I puritani*, arranged by Liszt, and including variations by Chopin, Czerny, Herz, Liszt, Pixis and Thalberg, composed in 1837. Perhaps even more striking and challenging is Kriehuber's famous portrait (1846), which depicts, assembled around Liszt at the piano (in addition to a self portrait of the painter), Berlioz, Czerny and the violinist Heinrich Ernst, who was regarded as one of the greatest virtuosos of the 19th century. All are lost in the Romantic reverie evoked by Liszt's performance. Perhaps this symbolizes Beethoven's spirit as transmitted by Czerny to Liszt, Berlioz and Ernst.

Czerny's complete schools and treatises combine sound pedagogy with remarkable revelations about contemporary performing practices, and present a detailed picture of the musical culture of the day. He assigned prominent opus numbers to his four most ambitious instructional works. In the *Fantasie-Schule*, opp.200 and 300, he uses stylized models and what he terms a 'systematic' approach to improvising preludes, modulations, cadenzas, fermatas, fantasies, potpourris, variations, strict and fugal styles and capriccios. His *Schule des Fugenspiels*, op.400, comprising 12 pairs of preludes and fugues, is intended as a study in multi-voiced playing for pianists. His most substantial work, the *Pianoforte-Schule*, op.500, covers an extraordinary range of topics, including improvisation, transposition, score reading, concert decorum and piano maintenance. The fourth volume (added in 1846) includes advice on the performance of new works by Chopin, Liszt and other notable composers of the day, as well as on Bach and Handel, and Czerny also draws on his reminiscences of Beethoven's playing and teaching. In his last major treatise, the *Schule der praktischen Tonsetzkunst*, op.600, he returns to the models of form and descriptions of style first expounded in his op.200, but

here uses them for the instruction of composers (for further discussion of op.600 *see* ANALYSIS, §II, 3).

Czerny's works reveal, in addition to the familiar pedagogue and virtuoso, an artist of taste, passion, sensitivity, drama, lyricism and solitude. Douglas Townsend sees in the four-hand sonata in C minor op.10 (*Sonata sentimentale*) a fine example of the composers who straddled the classical tradition and early romanticism. Kuerti (1995, p.491) has described the Third Sonata in F minor op.57 as 'outstandingly original'; because it is in the same key and carries the same opus as Beethoven's 'Appassionata', Kuerti suggests that Czerny may have been challenging his former master to a duel in the work. Townsend describes the Concerto in C major for piano four hands and orchestra, op.153 as 'an interesting example of the late classical piano concerto combined with the emerging bravura piano technique of the mid-nineteenth century'. Certain of the exercises stand as fine compositions in their own right, such as some of the character pieces found in the *Left Hand Etudes*, op.718, and the *Art of Finger Dexterity*, op.740.

Czerny's will (published in *Dwight's Journal of Music*, 15 August 1857) details the sizable fortune he had amassed from his published works and wealthy pupils. He left his considerable library to the Gesellschaft der Musikfreunde.

WORKS

for a listing by opus number see PazdírekH

PIANO SOLO

Edition: *[32] sonates pour le piano* (Bonn, 1856–60)

Sonatas: no.1, A♭, op.7; no.2, a, op.13; no.3, f, op.57; no.4, G, op.65; no.5, E, op.76; no.6, d, op.124; no.7, e, op.143; no.8, E♭, op.144; no.9, b, op.145; no.10, B♭, op.268; no.11, D♭, op.730; 1 unpubd; 2 other unpubd sonatas, mentioned in Mandyczewski; 'Sonate à la Scarlatti', 1 movt, op.788

28 sonatinas: 2 as op.49; 3 as op.104, vn, vc ad lib; 3 in op.158; 6 as op.163; op.167; 3 as op.349a; 6 as op.410; 4 as op.439

Numerous variations, potpourris, dances and character pieces

OTHER INSTRUMENTAL

Orch: 6 syms., c, op.780; D, op.781; C, d, E♭, B, unpubd; 1 other unpubd sym., mentioned in Mandyczewski; 6 ovs., unpubd; 6 pf concs., F, op.28, C, pf 4 hands, op.153, a, op.214, 3 unpubd, mentioned in Mandyczewski; 2 pf concertinos, C, op.78, C, op.210; 3 cadenzas to Beethoven's C major Pf Conc., op.315

Chbr: 8 pf trios, E♭, vn, vc/hn, pf, op.105, A, op.166, E, op.173, C, A, op.211, a, op.289, 2 unpubd; 1 str trio, unpubd, mentioned in Mandyczewski; 7 pf qts, c, op.148, F, G, op.224, C, E♭, F, op.262, 1 unpubd; Qt, C, for 4 pf or for pf, pf 4 hands, orch/str qt, op.230; Qt, 4 pf, op.816; 5 str qts, mentioned in Mandyczewski

For vn, pf: 3 sonatas, b, op.686, 2 unpubd; 5 sonatinas, 2 as op.51, 3 as op.390

For pf 4 hands: 6 sonatas, op.10, C, op.119, G, op.120, F, op.121, f, op.178, B♭, op.331; 8 sonatinas, 2 as op.50, 3 as op.156, 3 as op.158

Miscellaneous: hundreds of pieces and arrangements, for pf 2–8 hands, 2 pf, pf and chbr ens, incl. variation sets, potpourris, rondos, caprices, divertimentos, impromptus, fantasias, souvenirs, toccatas, romances, polonaises, waltzes, marches

SACRED CHORAL

Grads and offs: Grad pastorale, op.154; Off pastorale, op.156; 6 Grad, op.318; Grad, op.666; Salve Regina, off, op.726; Off, op.737; Off, op.757; Off, op.760; Off, op.812; Salvos fac nos Domine, grad, without op. no.; 106 unpubd grad and offs

Other sacred: Ave maris stella, hymn, op.743; De profundis, ps, op.784; Pange lingua, hymn, 6 settings, op.799; 11 masses, 2 TeD, cants., unpubd; other unpubd sacred works, mentioned in Mandyczewski

EXERCISES AND STUDIES

for pf 2 hands unless otherwise stated

100 Exercises in Progressive Order, op.139; Grand Exercise on the Shake, op.151; Grand Exercise in All the Keys, Major and Minor, op.152, 48 études en forme de préludes et cadences, op.161; 40 études célèbres de la vélocité, 2 pf, op.229b; 50 Duet Studies, op.239; Grand exercice de la gamme chromatique, op.244; Grand exercice des gammes en tièrces et des passages doubles, op.245; 101 Progressive Exercises, op.261; 10 exercises, for beginners, op.277; School of Velocity, op.299

School of Legato and Staccato, op.335; 24 esercizi, op.336; 40 Daily Studies, op.337; The School of Embellishments, Turns and Shakes, op.355; First Lessons for Beginners, op.359; School of Virtuosity, op.365; Grand Exercise in Thirds, in All the 24 Keys, op.380; Etudes préparatoires et progressives, op.338; 10 Grand Studies for the Improvement of the Left Hand, op.399; 50 études spéciales, op.409; 60 Exercises for Beginners, op.420; Etudes progressives et préparatoires, op.433

110 Easy and Progressive Etudes, op.453; 50 Lessons for Beginners, op.481; 42 études, pf 4 hands, op.495; 2 exercises pour les jeunes pianistes, op.499; 6 exercises des octaves, op.553; Pianoforte Primer, op.584; Sequel to the Pianoforte Primer, op.599; School of Expression, op.613; 12 études, op.632; Preliminary School of Velocity, op.636; L'encouragement à l'étude, 24 Irish Airs as Studies, op.684; 24 grandes études de salon, op.692; Etudes for the Young, op.694

STEPHAN LINDEMAN (with GEORGE BARTH)

Čžerný, Jiří. *See* ČERNÝ, JIŘÍ.

Czerný, Joseph. Austrian music publisher; the firm of CAPPI bore his name from 11 April 1828 to 7 May 1831.

Czerwiński, Wilhelm (*b* Lwów, 1837; *d* Lwów, 13 Feb 1893). Polish composer, teacher and pianist. He received his musical education in Vienna, where he studied composition with Fischhof, Sechter, Hellmesberger the elder and Nottebohm. He studied the piano with Mikuli in Lwów, with Liszt in Weimar and with Jaëll in Paris. From 1857 he appeared as a pianist in Germany, Switzerland and the south of Poland, without much success. He then settled in Lwów and devoted himself to composing and teaching, eventually establishing a school of music; he also became conductor of a choral society. Czerwiński's compositions include a symphony, a piano concerto, a cello sonata, songs without words, nocturnes, mazurkas and polonaises for piano, an opera, an operetta, a cantata and numerous songs. During his life, only his piano music achieved much popularity, mainly in Vienna, where some of it was published. His song *Marsz sokołów* ('March of the Falcons') was also widely known in Poland. The remaining works, technically defective and rarely performed even in his lifetime, are now completely forgotten.

ZOFIA CHECHLIŃSKA

Cziak, Benedikt. *See* SCHACK, BENEDIKT.

Czibulka, Alphons (*b* Szepesváralllya [now Spišská Nová Ves, Slovakia], 14 May 1842; *d* Vienna, 27 Oct 1894). Hungarian composer. At the age of 15 he was performing as a pianist in Russia; then he became a music teacher, and later a conductor in Wiener Neustadt (1864–5), Innsbruck, Trieste, and at the Carltheater in Vienna. He then entered military service, becoming bandmaster of several Austro-Hungarian infantry regiments. During the 1880s and early 90s he conducted 'Monster Concerts' in the Prater in Vienna, and he composed much successful dance and salon music, and several operettas, of which the first, *Pfingsten in Florenz* (1884), was the most successful. Around 1889–90 he arranged dances on themes from *The Yeomen of the Guard* and *The Gondoliers* (for Bosworth & Co.), at the time when these works were being performed in Germany.

WORKS

(*selective list*)

OPERETTAS

Pfingsten in Florenz (3, R. Genée and J. Riegen), Vienna, An der Wien, 20 Dec 1884; Der Jagdjunker der Kaiserin (3, F. Zell and Genée), Berlin, Walhalla, 3 Dec 1885; Der Glücksritter (3, Genée, W. Mannstädt and B. Zappert, after A. Dumas *père*), Vienna, Carl, 22 Dec 1887; Gil Blas von Santillana (3, Zell and M. West), Hamburg, Carl Schultze, 23 Nov 1889; Der Bajazzo (3, V. Léon and H. von Waldberg), Vienna, An der Wien, 7 Dec 1892; Monsieur Hannibal (3, Mannstädt and K. Dreher), Munich, Gärtnerplatz, 5 Sept 1893

DANCES, MARCHES, SALON MUSIC

Over 300 works incl. Ballszenen, op.258, waltz; Waldesflüstern, op.275; Stephanie-Gavotte, op.312; Sérénade italienne, op.330; Gavotte de la Princesse, op.334; Waltz/Polka française (The Yeomen of the Guard), opp.354–5, *c*1889; Liebestraum nach dem Balle, op.356, intermezzo, *c*1890; Myosotis, op.358, waltz, 1890; Waltz/Auf der Piazetta/Casilda Gavotte (The Gondoliers), opp.359–61, 1890; Wintermärchen, op.366, waltz; Österreichische Militär-Revue, op.377, march; An dich!, op.390, waltz-serenade

ANDREW LAMB

Cziffra, György [Georges] (*b* Budapest, 5 Nov 1921; *d* Paris, 17 Jan 1994). French pianist of Hungarian birth. Born in dire poverty, he earned money as a child for his family by improvising on popular melodies at a local circus. In 1930 he took up serious study with Dohnányi at the Liszt Academy in Budapest, and between 1933 and 1941 he gave numerous successful concerts in Scandinavia, the Netherlands and Hungary. Conscription into the army led to his capture as a prisoner-of-war; and in 1950 he was again imprisoned, this time for his political beliefs. In 1956 he escaped with his wife and son to Vienna,

where his début recital the same year caused a furore. Further concerts in Paris and London confirmed his extraordinary virtuoso status, and in such works as Balakirev's *Islamey* and Liszt's Transcendental Studies and Spanish Rhapsody he found an ideal outlet for his scorching bravura. Of his many recordings, those of Liszt are exceptional, while a recital of his own paraphrases – brilliantly vulgar confections – is spun off with dazzling panache. Cziffra's response to the critical backlash he suffered from the more sober-minded members of his audiences was unforgiving; and in his memoirs, *Des canons et des fleurs* (Paris, 1977), a hallucinatory journey through privation, acclaim, hostility and personal tragedy, he saw his critics as capable of little beyond a 'piranha-like erudition'. In 1966 he founded the Festival de la Chaise-Dieu, in the Auvergne, and in 1969 inaugurated the piano competition in Versailles that bears his name.

BRYCE MORRISON

Czyż, Henryk (Modest) (*b* Grudziądz, 16 June 1923). Polish conductor and composer. He took up his first conducting post (1948, with the Bydgoszcz PO) while still studying philosophy at Toruń University. He subsequently went to the Poznań Conservatory to study conducting with Bierdiajew and composition with Szeligowski. He was conductor and artistic director of the Łódź PO (from 1957), the Warsaw Opera (from 1960), where he conducted the Polish stage première of *The Rite of Spring*, and the Kraków PO (from 1964); from 1969 to 1972 he was Generalmusikdirektor in Düsseldorf. Engagements throughout Europe included appearances with the Berlin PO and Leningrad PO. In 1966 he conducted the world première of Penderecki's *St Luke Passion*. He became a professor at the Warsaw Academy of Music in 1980.

His compositional output is relatively small, though it includes three stage works of great panache and melancholic comedy. His use of popular dance idioms, jazz and blues often gives his music a surreal flavour, a quality also reflected in his essays and memoirs, among them *Jak z nut* ('Effortlessly'; Warsaw, 1993) and *Nie wczesne żarty* ('Delayed Jokes'; Warsaw, 1995).

WORKS
(*selective list*)

Stage: Białowłosa [The Girl with the Flaxen Hair] (morality op, 2, Czyż, after D. Baduszkowa), 1962, Warsaw, State, 24 Nov 1962, rev. 1971; Kynolog w rozterce [Cynologist at a Loss] (comic op, 1, S. Mrożek), 1964, Polish TV, 1965; Inge Bartsch (op-musical, 2, L. Janowicz, after K.I. Gałczyński), 1982, Warsaw, Wielki, 11 Dec 1982

Other: Ww Qt, fl, ob, cl, bn, 1949; Etiuda, orch, 1950; Wariacje na temat polski [Sym. Variations on a Polish Theme], orch, 1950; Divertimento, orch, 1951, rev. 1977; Pieśń o planie [Song about the Plan] (mass song, K. Nowacki), 1951; Jazz Etude, qt, 1982; film scores incl. ADRIAN THOMAS

D

D. *See* PITCH NOMENCLATURE.

Dabadie, Henri-Bernard (*b* Pau, 19 Jan 1797; *d* Paris, May 1853). French baritone. He studied at the Paris Conservatoire and made his début in 1819 at the Opéra as Cinna in Spontini's *La vestale*. During the 16 years he sang at the Opéra, he created several roles in operas by Rossini: Pharaoh in *Moïse et Pharaon* (1827), Raimbaud in *Le comte Ory* (1828) and William Tell (1829). He sang Pietro in the first performance of Auber's *La muette de Portici* (1828). Having created Belcore in Auber's *Le philtre* (1831) in Paris, he sang the same role at the première of Donizetti's *L'elisir d'amore* (1832) in Milan. Back at the Opéra he sang Count Dehorn in the first performance of Auber's *Gustave III* (1833) and created Ruggiero in Halévy's *La Juive* in 1835, the year of his retirement. His wife, the soprano Louise Dabadie, frequently sang with him.

ELIZABETH FORBES

Dabtarā [debtera]. A musician in the Ethiopian Orthodox Church. *See* ETHIOPIA, §I.

Daça, Esteban. *See* DAZA, ESTEBAN.

Da capo (It.: 'from the head'). An instruction, commonly abbreviated D.C., placed at the end of the second (or other later) section of a piece or movement, indicating that there is to be a recapitulation of the whole or part of the first section. The word 'fine' (end) or a pause sign marks the point at which the recapitulation ends. If the recapitulation is to start later than the beginning the starting-point is marked with a special sign and the end of the second section is marked 'dal segno' (D.S., 'from the sign'). The principle of recapitulation, which may be summarized by the formula *ABA*, was observed by composers before the sign 'da capo' was used as a way of avoiding the labour of writing out the first section again. The term is nowadays used equally as an adjective (a 'da capo section') or a noun (the 'da capo of the first section').

Examples on a small scale from Monteverdi are the madrigal *Si ch'io vorrei morire* (1603), the shepherd's recitative at the opening of Act 1 of *Orfeo* and the aria 'Lieto cammino' sung by Telemachus in Act 2 of *Il ritorno d'Ulisse*. The da capo aria became the standard form in the cantata and the *opera seria* of the late Baroque period (*see* ARIA, §4(i)); it was generally understood that the repeated section would be ornamented. The form was also used in Baroque instrumental music, for example in the first movement of Bach's Violin Concerto in E. Sometimes sets of variations (e.g. Bach's Goldberg Variations) had a da capo of the theme at the end. In the Classical symphony 'da capo' was regularly indicated after the trio of a minuet or scherzo. Sometimes composers required the omission of internal repetitions in a recapitulation of the first (or main) section and indicated this by writing 'D.C. senza repetizione'. If a coda was to follow the recapitulation this was indicated by 'D.C. e poi la coda'. The scherzo of Beethoven's Third Symphony is one of the first examples of a recapitulation (with modifications) written out in full.

JACK WESTRUP/R

D'Accone, Frank A(nthony) (*b* Somerville, MA, 13 June 1931). American musicologist. He received BMus and MMus degrees from Boston University, where his teachers included Karl Geiringer. At Harvard University he studied with Nino Pirrotta, A. Tillman Merritt, Randall Thompson and Walter Piston, taking the MA in 1955 and the PhD in 1960, with a dissertation on music at Florence Cathedral and its Baptistry in the 15th century. From 1960 to 1968 he taught at SUNY, and from 1968 to 1994 he was professor of music at UCLA. He has been general editor of the American Institute of Musicology's series Corpus mensurabilis musicae since 1983, and co-editor of *Musica disciplina* since 1988.

D'Accone is primarily interested in Florentine and Sienese music of the 14th to the 17th centuries. His 12-volume edition of this music constitutes a major source for students of the period. His articles in scholarly journals have covered a wide variety of topics, ranging from individual composers, such as Gagliano, Isaac and Pisano, to the musical activity in specific institutions, such as the baptistry of S Giovanni in Florence. These writings combine to give a broad view of the musical scene in Renaissance northern Italy.

PAULA MORGAN

Dach, Simon (*b* Memel, East Prussia [now Klaipėda, Lithuania], 29 July 1605; *d* Königsberg [now Kaliningrad], 15 April 1659). German poet. Born into a poor but educated family, he attended school at Königsberg, Wittenberg and Magdeburg. In 1626 he matriculated at the University of Königsberg, the outpost of German culture in East Prussia where he spent the rest of his life. He was at first a teacher at the cathedral school and from 1639 a professor of poetics at the university. He supplemented his meagre income by writing a steady stream of occasional poems – usually intended to be sung – for weddings, baptisms and funerals. He was a close friend of Heinrich Albert, who set many of his poems to music. Albert also composed the music (now lost) for two dramatic allegories by him, *Cleomedes* (1635) and *Sorbuisa, oder Prussiarchus* (1645). Albert and Dach were at the centre of an intimate circle of friends known after their meeting place in a suburban garden as the Kürbs-Hütte ('Pumpkin Hut'). Unaffected by the Thirty Years War, this group, which included Dach's patron Robert Roberthin, Valentin Thilo, Christoph Kaldenbach and other, lesser poets, devoted themselves to poetry and music, particularly the Baroque lied. Just as, from the musical point of view, Albert is considered the father of the German lied, so Dach is his poetic counterpart. Dach's most famous love-song, *Anke van Tharaw*, in the High German version by Herder, has remained popular to this day in the somewhat sentimental setting by P.F. Silcher as *Ännchen von Tharau*.

The standard edition of Dach's poetry is the four-volume one by W. Ziesemer (*Simon Dach: Gedichte*, Halle, 1936–8); an anthology of musical settings of the period is provided in *Preussische Festlieder: zeitgenössische Kompositionen zu Dichtungen Simon Dachs*, ed. J. Müller-Blattau (EDM, 2nd ser., *Ostpreussen und Danzig*, i, 1939).

TRAUTE MAASS MARSHALL/LOTHAR HOFFMANN-ERBRECHT

Dachstein, Wolfgang [Egenolf] (*b* Offenburg an der Kinzig, *c*1487; *d* Strasbourg, 7 March 1553). German composer and organist. He belonged to a family of theologians and musicians that had originally come from Dachstein, near Strasbourg. In the summer of 1503 he began his studies in theology at Erfurt University where Martin Luther, a contemporary, was also studying. By 1520 he had taken the vows of the Dominican order and was organist of Strasbourg Cathedral. On 11 March 1521 he became organist at St Thomas's, also teaching at the school associated with St Thomas's. He remained in Strasbourg for the rest of his life. By 18 June 1523 he had converted to Lutheranism. He retained his post at St Thomas's even after his conversion. In 1541 he once again became organist at the cathedral. In 1542 he and Matthias Greiter became teachers at the Gymnasium Argentinense. On 27 October 1549, during the suspension of Protestantism in Strasbourg (1549–1560), Dachstein reverted to Catholicism, enabling him to keep his position at the cathedral. A pamphlet he wrote criticizing the magistrate resulted in his dismissal from St Thomas's in 1551.

Together with Matthias Greiter, Dachstein created some of the most famous melodies of the Reformation. He composed melodies for the psalms *Der Töricht spricht: Es ist kein Gott* (Ps.xiv), *O Herr, wer wird sein Wohnung han* (Ps.xv) and *Aus tiefer Not schrei ich zu dir* (Ps.cxxx), and a hymn melody, 'Ich glaub darum red ich', in the *Strassburger Kirchenampt* of 1525; and *An Wasserflüssen Babylon* (Ps.cxxxvii) in *Psalmen, Gebett und Kirchenübung* (Strasbourg, 1525). The latter served as a model for the psalm melody in the 1541 Genevan Psalter (Calvin heard Dachstein's melodies in Strasbourg in 1538).

Dachstein's melodies resemble the 'Hofweise' style, but much simplified, with sparing use of melismas and

cadences, as they were intended for the general population. They are also similar to the melodic odes of Petrus Tritonius, Heinrich Glarean and Ludwig Senfl. Two lines predominate in his polyphonic settings of Psalms xiv, cxxv and cxxxvii (*Grossen Kirchen-Gesangbuch*, 1572), making them especially suitable for popular use. One polyphonic song by him is also extant: *Ach Elslein, ach Elslein wilt mit mir in die Ernte*, in *CH-Bu* F.X.1–4. Some of his compositions may be described as quodlibets, combining as they do a newly composed melody with a familiar one.

HANS-CHRISTIAN MÜLLER/ANGELA MIGLIORINI

Da Costa, Noel (George) (*b* Lagos, 24 Dec 1929). Black American composer, violinist and conductor. His missionary parents, originally from Jamaica, left Nigeria when he was three years old and settled in the West Indies. When he was 11 the family moved to New York, where he began violin lessons with Barnabas Istok. He studied at Queens College, CUNY (BA 1952) and Columbia University (MA 1956), where his teachers included Luening and Beeson. A Fulbright Fellowship enabled him to pursue further study in Florence with Dallapiccola (composition) and in Siena at the Accademia Musicale Chigiana (conducting). He has taught at the Hampton (Virginia) Institute, Queens and Hunter colleges, CUNY and Rutgers University. Also active as a performer, he has played the violin in chamber and orchestral ensembles and has conducted the Triad Chorale (from 1974).

Early influences on Da Costa's compositional style include the music of the Caribbean, black American spirituals and the poetry of Countee Cullen. He has also explored freely atonal and 12-note frameworks in *Five Verses/With Vamps* (1968), *Occurrence for Six* (1965) and *Four Preludes* (1973) for trombone and piano. Later works, such as *A Ceremony of Spirituals* (1976), *Primal Rites* (1983) and *Blue Memories* (1987), return to folk and vernacular styles.

WORKS
(*selective list*)

LUCIUS R. WYATT

Da Costa, Paulinho (*b* Rio de Janeiro, 31 May 1948). Brazilian percussionist. He began playing *pandiero* with neighbourhood samba bands at the age of seven, and later toured Europe and South America playing percussion for dancers. In 1973 he moved to the United States to tour and record with Sergio Mendes and Brazil '66, with whom he worked until 1977. He then recorded with several jazz artists including Dizzy Gillespie, Milt Jackson, Freddie Hubbard and Joe Pass, and also recorded two solo albums for Pablo, *Agora* (1976) and *Happy People* (1979). By the late 1970s he was a 'first call' player in the Los Angeles recording studios, and over the past two decades has appeared on hundreds of albums by a wide variety of artists, including Rod Stewart (*Footloose and Fancy Free*, 1977), Natalie Cole (*Dangerous*, 1985), Barbra Streisand (*The Broadway Album*, 1985), the Yellowjackets (*Shades*, 1986), Miles Davis (*Tutu*, 1986), Anita Baker (*Rapture*, 1986), Bob Seger (*Like a Rock*, 1986), Michael Jackson (*Bad*, 1987), Kenny G. (*Silhouette*, 1988), Manhattan Transfer (*Brasil*, 1988), Rickie Lee Jones (*Flying Cowboys*, 1990), Bob Dylan (*Under the Red Sky*, 1990), Paula Abdul (*Spellbound*, 1991), Bonnie Raitt (*Luck of the Draw*, 1991), Al Jarreau (*Tenderness*, 1994), B.B. King (*Deuces Wild*, 1997) and Madonna (*True Blue*, 1998). His solo album *Breakdown* was released on A&M in 1991. He received Most Valuable Player awards from the National Academy of Recording Arts and Sciences in 1980, 1981 and 1982. Although he typically brings over 200 different percussion instruments to recording sessions, his parts are often sparse and he is

known for his apposite choice of timbres and timings within a variety of musical genres.

RICK MATTINGLY

Dactalus de Padua. *See* BARTOLINO DA PADOVA.

Daddi, Francesco (*b* Naples, 1864; *d* Chicago, 1945). Italian tenor, later bass. He trained as a singer and pianist at the Naples Conservatory and made his stage début at Milan in 1891. The following year at the Dal Verme he sang Beppe in the première of *Pagliacci*, and this was also his role in his single season at Covent Garden in 1900. He sang in the Rome première of Mascagni's *Le maschere* in 1901. Having become one of Italy's leading comprimario tenors, he emigrated to the USA in 1907, singing with the Manhattan Company usually in small parts but also as Corentin in *Dinorah* with Tetrazzini. From 1911 to 1920 he appeared regularly in Chicago, where he enjoyed considerable success in comic bass roles such as Dr Bartolo in *Il barbiere di Siviglia*. His recordings, made as a tenor, include Beppe's Serenade in *Pagliacci* and many Neapolitan songs graced by an agreeable lyric voice and an idiomatic sense of style.

J.B. STEANE

Dadelsen, Georg von (*b* Dresden, 7 Nov 1918). German musicologist. He studied musicology at Kiel University (1946, with Blume), the Humboldt University (1947, with Vetter), and the Freie Universität, Berlin (1948–51, with Gerstenberg); and as subsidiary subjects he studied philology and philosophy with Leisegang. In 1951 he took the doctorate with a dissertation on archaic style and techniques in 19th-century music. He was an assistant lecturer in the musicology institute of Tübingen University (1952–8) and conductor of the university orchestra (1953–9). In 1958 he completed the *Habilitation* in musicology at Tübingen University with a dissertation on the chronology of Bach's works. He was subsequently professor of musicology at the universities of Hamburg (1960–71), and Tübingen (1971–83). He became general editor of Das Erbe Deutscher Musik in 1959, and served as director of the Bach Institute at Göttingen, 1962–92, and general editor of the selected musical works of E.T.A. Hoffmann from 1971. His chief interests have been Bach, on whom he produced definitive works, on the use of sources in research, editorial methods and criticism of style and authenticity. The *Festschrift Georg von Dadelsen zum 60. Geburtstag*, ed. T. Kohlhase and V. Scherliess (Neuhausen-Stuttgart, 1978) was published to honour his contributions to music scholarship.

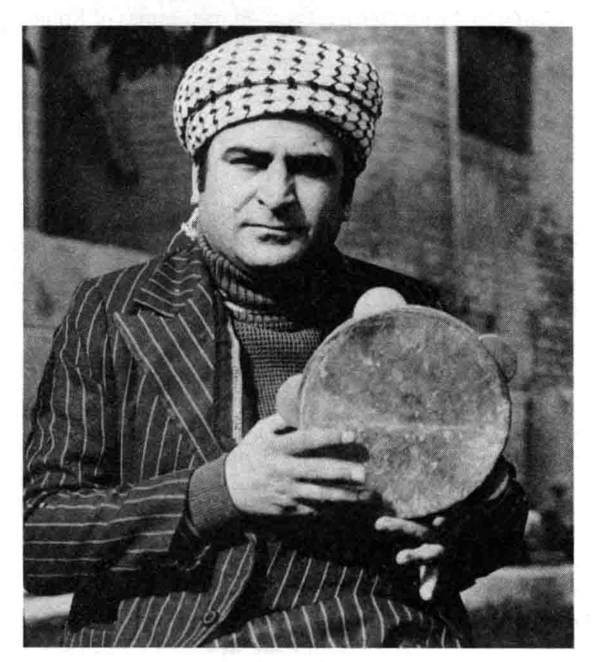
HANS HEINRICH EGGEBRECHT/KONRAD KÜSTER

Daff [daf, dap, def, defi, diaff, duff]. Round single-headed frame drum connected with Muslim cultures. In varying forms it is found in West Asia, the Caucasus, the Iranian plateau, Central Asia and south-eastern Europe. The drum is used in a wide variety of settings: folk music, art music, entertainment and dance music and Sufi religious rituals.

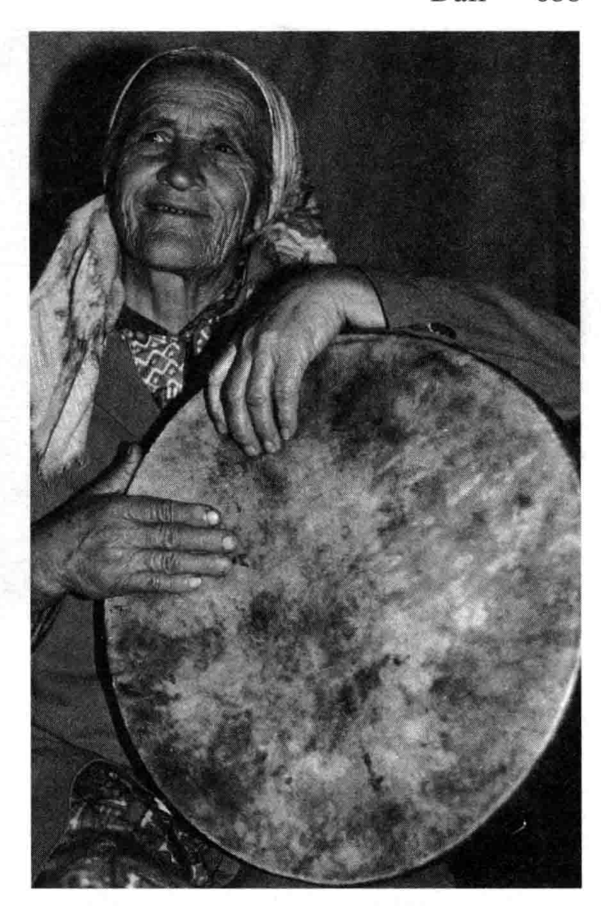
This type of frame drum is historically related to the pre-Islamic Arabian *duff* and Hebrew *tof*. Their various onomatopoeic names derive from the sound of the beaten drum. Terms related to *duff* spread to parts of Africa, South Asia and Latin America. Variant examples appear in Armenia (*dap*); in Azerbaijan (*diaff*, *deff*); among the Uighurs of Central Asia (*dap*); in Kurdish areas, Turkey, Albania, Serbia, Bosnia-Hercegovina and Macedonia (*def*); in Greece, particularly the north (*defi*); and in East Africa (*duff*), where it is used by the Swahili and Swahili/Nguja people of Dar es Salaam and Tabora, Tanzania. The instrument probably travelled to South Asia in the 12th century (*daph*), and to Iberia and Latin America (*adufe*).

The *daff* is closely linked with frame drums known by other terms. In Iran, Turkey and Kurdish areas the terms *daff/def* and *daire/dayre* are both used without clear distinctions, although *daire* is generally associated with women and folk music (*see* DĀIRA). In Macedonia and Thrace the *defi* is commonly called *daires* or *daire*. In Azerbaijan and Armenia, the terms *dahira* and *ghaval* are also used. In Turkey and Syria the term MAZHAR distinguishes religious use of a large drum similar to the *daff*. The RIQQ, used in art music, is a virtuoso instrument related to the *daff*.



Typically, the *daff*'s frame is wooden. The large *daff* played by Qādirī Sufis in Kurdistan is particularly heavy (of nut, plane or chestnut wood). Sometimes the frame is richly ornamented with inlay, as in Azerbaijan and Armenia. The membrane glued to the frame is usually of goatskin; in the Caucasus catfish skin or plastic is used and the Uighur *dap* uses ass hide. Metallic jingles are often attached inside the frame, e.g. pellet bells, rings, chains of rings, coins, or pairs of small cymbals or discs

inserted into slits in the frame. Some drums have a hole, notch or groove for the thumb to act as a support.



Sizes vary between 20 and 60 cm in diameter and 5–7 cm in depth. In Iraq the *daff* is usually 40–50 cm; a variant used in entertainment music, *daff zinjārī* ('Gypsy *daff*'), is generally smaller (about 25 cm; fig.1). In Iraq and Iran, *daffs* used in Kurdish Sufi ceremonies may be up to 60 cm in diameter and metallic rings or chains are intrinsic to the performative effect. In Syria the *daff* is relatively small (25–30 cm); some are copies of the small frame drum called *riqq*. The *dap* of China's Xinjiang Uighur Autonomous Region is about 25 cm, but in Badakhshān (a region overlapping Afghanistan and Tajikistan) the *daf* is usually large (fig.2). The *def* of south-eastern Europe and Turkey is about 25 cm in diameter and 5 cm deep; four or five pairs of slightly convex or flat brass discs are inserted into the frame. A Turkish term, *zilli def*, is applied to the *def* with metal rings. (For an illustration of *defs* used in connection with *köçek* dancers during the early 18th-century Ottoman period *see* OTTOMAN MUSIC, fig.2.)

Playing techniques vary. Usually the player holds the drum in one hand and beats the skin with the fingers, thumb and palm of the other hand. Occasionally the drum is held with both hands and played with the free fingers. Metallic percussive effects are obtained by tilting or shaking the drum, or hitting the frame. The player may kneel, sit, stand or move about while playing the drum. In art traditions onomatopoeic words are sometimes used to describe the sounds: *dum/düm* for the heavy, low sound and *tak/taka/tek* for the light, high sound.

The historical Arabian *duff* is among the instruments most frequently cited in the sayings of the Prophet Muhammad (*ḥadīth*). During the Prophet's lifetime (7th century) it was used in connection with entertainments, celebrations, religious festivities, battles and poetry. For instance, it accompanied poetry sung to welcome travellers home, and a *ḥadith* attests that a slave said to the Prophet Muhammad: 'I have vowed if Allah makes you

1. *Daff (frame drum): small variant used for entertainment music, daff zinjārī, ('Gypsey daff'), Iraq, 1970s*

2. *Mahjan Nazardarova playing the larger daf, Badakhshān, Tajikistan, 1992*

safe and sound to beat the *duff* above your head' (as a form of blessing). Female slave musicians known as QAYNA used it both in ensemble music and to scan poetic metres, so the drum was considered as pedagogic and mnemonic in that capacity.

After the Prophet Muhammad's death, the *duff* was frequently cited in the controversy about the legitimacy of musical instruments. It evaded the official condemnation applied to other musical instruments, since some scriptural traditions upheld the Prophet's approval of its use. However, according to one *ḥadith* the Prophet warned that the end of the world would come when a devastating wind destroys the ungodly who drink wine, play *duffs* and frequent taverns with *qayna* entertainers. The drum's links with dancing and illicit sex are an aspect of its history.

The historical Arabian *duff* was probably square, rectangular or octagonal. This angular shape, mentioned in several 10th-century writings (notably the anonymous Egyptian treatise *Kashf al-ghumūm*) survives in Morocco, Algeria (Ghardaia) and in Saudi Arabia under the name *'ulba* ('the box'). However, frame drums from the rich excavations of Phoenicia, Palestine, Syria and Mesopotamia attest to a small circular instrument (25–30 cm). A text by MAJD AL-DĪN AḤMAD AL-GHAZĀLĪ (*d* 1126) suggests that the early *duff* (*duff al 'arab*) carried no accessory jingles. Small cymbals, pellet-bells and rings appeared around the 9th and 10th centuries. Some Islamic scholars regard the five pairs of small cymbals as mystical,

relating to the five members of the Prophet's family (Muhammad, Ali, Fatima, Hasan and Husayn).

This type of frame drum has been consistently used in traditional art music in most parts of the Muslim Middle East and beyond. The *daff* (or modern *riqq*) is used in the *takht* ensemble of Arab art music. Until the 19th century it was used in Persian classical music, when it was replaced by the *tombak* (goblet drum), but since the early 1980s the *daff* has gradually been revived.

The drum had been widely used in folk and entertainment music. In Turkey, Syria, Iraq, Iran and elsewhere it has historical and contemporary associations with Sufi rituals (*see* ISLAMIC RELIGIOUS MUSIC, §II). In the Arab world the *daff* is notable as an instrument played by all classes of people: male and female, professional and amateur, adult and child, secular and religious. The drum has historical connections with Gypsies: in Turkey Gypsy men play it, especially to accompany performances by dancing bears, and Greek Gypsies use it with the street organ (*laterna*). In south-western Turkey, semi-professional Gypsy women (*delbekçi kadınlar*) play the *delbek* (a variant term) at rural weddings. In Turkey during the 1920s it was used by the female dancers and singers of the *café-aman* (a kind of 'oriental' *café-chantant*), but is now mostly played by women in private settings. In the small Muslim towns of south-eastern Europe it has been regarded as a domestic instrument.

R. CONWAY MORRIS, CVJETKO RIHTMAN, CHRISTIAN POCHÉ/VERONICA DOUBLEDAY

Dagincourt [d'Agincourt], **François** (*b* Rouen, 1684; *d* Rouen, 30 April 1758). French organist and composer. After his apprenticeship at Rouen he continued his training in Paris, probably with Lebègue. From 1701 to 1706 he was organist of Ste Madeleine-en-la-Cité, Paris; he then succeeded Jacques Boyvin at Rouen Cathedral, a post he was to occupy, together with that of organist of St Herbland and of the abbey of St Ouen, until his death. In 1714 he was also appointed one of the four organists of the royal chapel and in 1726 organist of St Jean, Rouen.

His *Premier livre de clavecin*, which contains 43 pieces, is the most remarkable of his works. It is similar to works by François Couperin, whom Dagincourt admired, particularly regarding its organization into *ordres* (D minor, F major, D major and E major), its formal structures, the use of ornamentation and the presence of character-pieces, including personal or even dual portraits (e.g. *Les deux cousines*, *La villerey ou les deux soeurs*), genre scenes (*Le colin maillard*) and nature tableaux (*Le val joyeux*, *Le moulin à vent*, *Les violettes fleuries*). Notable pieces include *La Couperin*, an allemande in homage to Couperin, *La sincopée*, an attractive exploration of rhythm, and *La moderne*, which Dagincourt judged to be 'of a very different taste from the others'; it includes indications for changes of manual, and was written to meet the demand for novelty from amateurs.

His organ pieces, which consist of short versets for ecclesiastical use, are classified according to the first six church modes (excluding mode 3). Their style, more advanced than that of similar works by Couperin, suggests a late date of composition; they exhibit *galant* characteristics and make frequent use of the diminished 7th chord. The first three suites (on modes 1, 2 and 4) each consist of three short versets with an introductory Plein jeu of no more than 20 bars and a short final dialogue. The remaining pieces, however, are rather more developed and make satisfying use of techniques already employed experimentally by Boyvin, as in the *Concerts pour les flûtes* with their florid lines and graceful triplets. He makes sensitive use of the *basse de cromorne* and the *récit de nasard* (usually in 6/8 or 3/8), and in the suite on mode 5 Dagincourt is particularly ambitious, in his setting of the second Plein jeu in the manner of a highly ornamental recitative and in his treatment of the ensuing Fugue and Cornet.

FRANÇOIS SABATIER

Daguerre, Louis-Jacques-Mande (*b* Corneilles, Seine-et-Oise, 18 Nov 1787; *d* Bry-sur-Marne, 10 July 1851). French stage designer and inventor. After attending school in Orléans, he was apprenticed to the Paris Opéra's scene painter Degotti (1803–7); in 1810 he married an Englishwoman, Louise Arrowsmith. From 1807 to 1815 he collaborated with Pierre Prévost on panoramas of Rome, Naples, London, Jerusalem and Athens. As a scene painter at the boulevard Théâtre de l'Ambigu-Comique (1816–22), he made many experiments with light to create spectacular landscapes with coloured filters (in *Le songe, ou La chapelle de Glenthorn*, 1818, there was a summit view of a crumbling Gothic chapel in changing moonlight). He was also a scene painter at the Paris Opéra (1819–22), where his and Ciceri's lavish setting for Nicolas Isouard and Angelo Benincori's *Aladin, ou La lampe merveilleuse* was the first to use gas lighting (1822; see illustration).

Daguerre invented the diorama (1822), a 'drama of light', which usually consisted of backdrop paintings on transparent cloths lit by movable coloured filters. Dioramas became a feature of 19th-century pantomime decor, especially in London at Drury Lane and Covent Garden. He also developed the photographic process that bears his name, daguerreotype. *L.J.M. Daguerre: the History of the Diorama and the Daguerreotype*, a biography by Helmut and A. Gernsheim, was published in New York in 1969.

DAVID J. HOUGH

Dagues, Pierre (*b* ?Montricoux; *d* before 9 Jan 1571). French singer and music teacher active in Switzerland. Although he was proposed by Calvin as the successor to Guillaume de La Moeulle as choirmaster at Geneva

Stage design attributed to Louis-Jacques-Mande Daguerre for the original production of Isouard and Benincori's 'Aladin, ou La lampe merveilleuse' (Act 3 scene i, showing the throne room and, through the arches, a courtyard with fountains), Paris Opéra, 1822 (Bibliothèque et Musée de l'Opéra, Paris)

Cathedral, the town council appointed Pierre Vallette in October 1556. Dagues was, however, responsible for teaching singing to the boys at St Gervais and La Madeleine between December 1556 and 1568. In June 1561 Théodore de Bèze paid 'Me. Pierre' ten florins for setting his psalms to music, but this could equally have been Vallette, or, more likely, Pierre Davantes. Dagues left Geneva after his wife died during the plague in November 1570, but was himself reported as deceased on 9 January 1571. (See also P. Pidoux: *Le psautier huguenot du XVIe siècle*, i, Basle, 1962, pp.80–173.)

FRANK DOBBINS

Dahl, Ingolf (*b* Hamburg, 9 June 1912; *d* Frutigen, nr Berne, 6 Aug 1970). American composer, conductor and pianist of Swedish-German parentage. He began his formal musical education at the Cologne Hochschule für Musik, then fled the Nazi regime to continue his studies in Switzerland at the Zürich Conservatory and the University of Zürich. Later he studied composition with Boulanger in California. Dahl's professional career began with coaching and conducting at the Zürich Stadttheater. In 1938 he left Europe for the USA and settled in Los Angeles. From then on the range of his musical activities and involvements was immense, including work for radio and film studios, composing, conducting, giving piano recitals and lecturing. He joined the faculty of the University of Southern California in 1945 and taught there until his death. Among his better-known former students is the conductor Michael Tilson Thomas.

In addition to teaching composition, conducting and music history, Dahl directed the university's symphony orchestra (1945–58, 1968–9), performing much contemporary music. He introduced to the West Coast important new works by Americans (including Copland, Diamond, Foss, Ives, Piston and Ruggles) and by Europeans (Berg's Chamber Concerto, Schoenberg's *Pierrot lunaire*, Hindemith's *Marienleben* and Stravinsky's *The Wedding* and *Perséphone*), and promoted performances of early music. He also planned and conducted the famous Concerts on the Roof and the Monday Evening Concerts in Los Angeles. His close collaboration with Stravinsky resulted in numerous lectures and performances, some arrangements of his music, and his translation, with Arnold Knodel, of Stravinsky's *Poetics of Music* (Cambridge, MA, 1947).

Dahl organized the Tanglewood Study Group at the Berkshire Music Center in 1952 and directed it for five years. He gave concerts in Europe (1961–2) sponsored by the US State Department, and directed and conducted at the Ojai Festival (1964–6). Among his awards are two Guggenheim Fellowships (1954 and 1958), a grant from the National Institute of Arts and Letters (1954), and the 1964 Alice M. Ditson Award. A series of annual Ingolf Dahl lectures on the history and theory of music was initiated at the University of Southern California in 1981.

Although Dahl wrote music from an early age, his output was fairly small; his varied career provided little time for composing, and he wrote slowly and meticulously. Though his work reflected the changes in his musical environment, the individuality of his style remained strong. His early works exhibit the dissonant and densely polyphonic texture typical of German Expressionism in the 1920s. The impact of the USA and, later, his collaboration with Stravinsky resulted in increasing clarification of texture, a trend towards diatonicism and a pronounced interest in timbre and instrumental virtuosity. Dahl used serial techniques in his music beginning with the Piano Quartet (1957), and evolved large, imaginatively conceived structures held together by motivic and tonal interrelationships and complex but compelling harmonic forces. This development led to his remarkable Sinfonietta for concert band (1961) with its unabashed leanings towards Stravinsky, then reached another peak in his formidable, almost neo-romantic *Aria sinfonica* of 1965. Thereafter Dahl's works exhibit increasing concentration: leaner instrumentation, compact forms and a stern focus on essentials.

WORKS
(selective list)

Orch: Conc., a sax, wind, 1949, rev. 1953; Sym. concertante, 2 cl, orch, 1952; The Tower of St Barbara, sym. legend, 1954; Sinfonietta, concert band, 1961; Aria sinfonica, 1965; Quodlibet on American Folktunes (The Fancy Blue Devil's Breakdown), 1965

[arr. of pf work]; Variations on a Theme by C.P.E. Bach, str, 1967; 4 Intervals, str, 1967, arr. pf 4 hands, 1967; Elegy Conc., vn, chbr orch, 1970, completed D. Michalsky, 1971

Chbr and solo inst: Allegro and Arioso, ww qt, 1942; Music for Brass Insts (Brass Qnt), 1944; Variations on a Swedish Folktune, fl, 1945, rev. 1962, arr. fl, a fl, 1970; Conc. a tre, cl, vn, vc, 1946; Duo, vc, pf, 1946, rev. 1948; Notturno, vc, pf, 1946; Divertimento, va, pf, 1948; Couperin Variations, rec/fl, hpd/pf, 1957; Pf Qt, 1957; Serenade, 4 fl, 1960; Pf Trio, 1962; Duettino concertante, fl, perc, 1966; IMC Fanfare, 3 tpt, 3 trbn, 1968; Fanfare on A and C, 3 tpt, hn, baritone, trbn, 1969 [for Aaron Copland]; Sonata da camera, cl, pf, 1970; 5 Duets, 2 cl, 1970; Little Canonic Suite, vn, va, 1970; Variations on a French Folksong, fl, pf, 1973

Pf: Rondo, 4 hands, 1938; Prelude and Fugue, 1939; Pastorale montano, 1943; Hymn and Toccata, 1947; Quodlibet on American Folktunes (The Fancy Blue Devil's Breakdown), 2 pf 8 hands, 1953; Sonata seria, 1953; Sonatina alla marcia, 1956; Fanfares, 1958; Sonata pastorale, 1959; Reflections, 1967

Vocal: 3 Songs (A. Ehrismann), S, pf, 1933; A Cycle of Sonnets (Petrarch), Bar, pf, 1968; A Noiseless, Patient Spider (W. Whitman), female chorus, pf, 1970

Arrs.: I. Stravinsky: Danses concertantes, 2 pf, 1944; Scènes de ballet, pf, 1944; Petite suite, 2 pf 4 hands, 1944

Principal publishers: Associated, Boosey & Hawkes, A. Broude, European American, Presser

KURT STONE/GARY L. MAAS

Dahlhaus, Carl (*b* Hanover, 10 June 1928; *d* Berlin, 13 March 1989). German musicologist. As a historian, analyst, editor and organizer he was perhaps the leading figure in his field in the latter half of the 20th century. His teachings and voluminous writings explored new methods and fields of study that changed the nature of musicological discourse.

1. Life. 2. Influence. 3. Historical method.

1. Life. Dahlhaus studied musicology from 1947 to 1952 under Gurlitt in Freiburg and Gerber in Göttingen, where he took the doctorate in 1953 with an analytical dissertation on the masses of Josquin. Rather than embarking on an academic career, he then entered the worlds of theatre and journalism, becoming literary adviser to the Deutsches Theater in Göttingen (1950–58) and an editor at the *Stuttgarter Zeitung* (1960–62). At this time he earned a reputation as a polemical critic and as an active proponent of the Darmstadt school, with which he was early associated. In 1962 he took up an academic appointment at Kiel University, where he completed the *Habilitation* in 1966 with a pioneering study on the origins of tonality. He then served briefly on the staff of Saarbrücken University before being appointed, in 1967, to succeed Stuckenschmidt at the small musicology department at the Technische Universität, Berlin. Over the next 20 years he built up the department to a position of international stature, attracting a large following of students from all over the world.

Although chronically ill for much of his later career, Dahlhaus maintained an extraordinarily busy schedule as a teacher, editor and administrator. He was a member of the Board of Supervisors of the German Music Council, president of the Gesellschaft für Musikforschung (1977–9), co-creator of Germany's 'open university' (*Funkkolleg*), editor-in-chief of the Richard Wagner collected edition (1970), and the guiding spirit behind the new edition of the *Riemann Musik Lexikon* (1972–5), the multi-volume *Neues Handbuch der Musikwissenschaft* (1980–95) and *Pipers Enzyklopädie des Musiktheaters* (1986–97). Most remarkable, however, was his unbroken series of seminal publications on a very broad range of topics that placed him among the most prolific and provocative writers in his field. By the mid-1980s he was generally recognized both at home and abroad as a leading figure in Germany's intellectual life. In 1984 he was inducted into the order *Pour le mérite* (an honour previously accorded to Furtwängler and Richard Strauss) and one year later he was awarded the Grosses Verdienstkreuz der Bundesrepublik Deutschland. At the time of his death from kidney failure he was writing a concise history of Western music which would have been his first book to be published directly in English.

2. Influence. By the end of his career Dahlhaus was the most influential figure in international musicology; hardly a paper could be presented without invoking his name or ideas, and his voluminous writings were being translated into most major languages. Yet he had always been a figure of controversy: his unusual career path and his wide-ranging interests provoked suspicion among his German colleagues, who accused him of neglecting the standard musicological disciplines of bibliography, philology and archival research and felt that his attraction particularly to music theatre and the avant garde drew him away from the great Austro-German tradition (ironically, musicologists outside Germany accused him of Germanocentrism). In the end the force of his writings and the sheer number of his pupils outweighed these cavils, however, and his influence was soon felt in several directions at once: (1) the re-establishment of aesthetics as a central musicological discipline, (2) the elaboration of an intellectual framework for the history and analysis of 20th-century avant-garde music, (3) a broadening of the accepted fields of study to include systematic musicology, institutional history, salon music and other formerly ancillary subjects, and (4) a resurgence of historical interest in the musical culture of the 19th century.

After his death Dahlhaus's influence immediately entered a decline. Always a broad-based historian who drew conclusions from the research findings of other scholars, he was faulted for factual shortcomings, for the alleged obscurity of his language and for his allegiance to the German Classic-Romantic tradition. Influential papers criticized his misuse of the Weberian concept of the 'ideal type' (a minor tool in his historical methodology) and his submission to Germany's left-wing student movement of the late 1960s (he regarded it with avuncular detachment and awaited the fruits of its scholarly labours). More serious complaints concerned his misunderstanding of such basic concepts as the alienation effect and a tendency to equate the notion of 'work' too readily with the written score. Other critics pointed to limitations in his interests: Dahlhaus had little to say about ethnomusicology, contemporary vernacular music or some of the wilder

excrescences of the avant garde (such as Giacinto Scelsi) with which he felt out of sympathy. Yet few would deny the extent of his achievement as a whole: he may be said to have set the terms of discussion in the study of 19th- and 20th-century music, and his writings on all subjects abound in insights and intuitions that have lost none of their ability to provoke and inspire.

3. HISTORICAL METHOD. Dahlhaus was profoundly influenced as a young man by two schools of historical thought: the French structuralist historians associated with Fernand Braudel, and the critical theory of the Frankfurt circle. From the former he drew his view of history as a long-term succession of complex interacting layers whose elements are captured by the historian in a momentary suspension of flux – a view that accounts for his general lack of interest in narrative history and biography. From the Frankfurt school (especially Walter Benjamin) he borrowed the images of the 'constellation' and the 'force field' as organizing principles for written history: any historical topic presents a complex pattern of constituent parts, some more dominant, others less so, but each standing in a dynamic state of attraction and repulsion to all the others. Dahlhaus's historical essays are therefore fundamentally non-linear in structure, and they do not offer 'material' except as it relates to his historical argument. Both factors make his writings difficult at first reading, as do his notoriously long and elaborately constructed sentences (essentially constellations in miniature). Another legacy from the Frankfurt school was his attitude towards analysis, which he employed not primarily to reveal hidden musical connections in a work but to probe the 'sedimented history' (Adorno) within it. A brilliant analyst, Dahlhaus believed in presenting not the steps of his analyses, nor even the findings, but the historical conclusions to be drawn from those findings – these too to be worked into a larger historical argument.

Perhaps Dahlhaus's most important contribution to music historiography was his firm commitment to a self-reflective methodological pluralism. His essays frequently change their methodological attack, often explaining and justifying his reasons for doing so and pointing out the limitations in each new method adopted. It is this self-reflective quality, often conveying the impression that his essays are in conversation with themselves and constantly challenge their own assumptions, that has led his writings to be called 'dialectical'. In the end, Dahlhaus's broad-ranging interests gave him a very large arsenal of methods to choose from and a flexibility of approach unusual for scholars in his field. But for all their diversity, his writings converge again and again on the fixed midpoint of his musical thought: the great masterpieces of Western music in their present cultural context, and the profound mystery of the artistic experience.

J. BRADFORD ROBINSON

Dahlström, Fabian (*b* Turku, 19 June 1930). Finnish musicologist. After studying at the Sibelius Academy, where he gained a clarinet diploma (1951) and a music teacher's and conductor's diploma (1955), he read

musicology at Turku University, receiving the doctorate there in 1976 with a dissertation on the instrumental works of Crusell. He held the posts of director of music in Hanko (1955–67) and music teacher at the teacher training college in Tammisaari (1967–74). In 1974 he was appointed head of the musicology department of Turku University, where he later became professor (1978–93). His research interests include the history of Finnish music and the works of Crusell and Sibelius; he is the editor-in-chief for the forthcoming collected edition of Sibelius's works. He also frequently performs on the recorder and clarinet as a soloist and chamber musician for Finnish radio and television.

VESLEMÖY HEINTZ

Dahm, Johann Jacob (*b* Kempenich, Eifel; *d* Mainz, 10 July 1727). German organ builder. He spent the first part of his life in Würzburg, where he married in 1682, and was probably apprenticed to Nikolaus Will; he is also said to have worked in Bamberg. In response to a summons from the prince archbishop of Mainz, Lothar Franz von Schönborn, to Dahm and other Franconian artists, he settled in Mainz, where on 12 May 1698 he was made a freeman of the city. Seven years later he was engaged as organ builder for the cathedral chapter there. His style was influenced by the organ-building Schleich family from Frankfurt, and he built an organ for the Karmeliterkirche in Frankfurt as well as several instruments in Mainz, including those at the Sebastianskapelle (*c*1700), Liebfrauenstiftskirche (*c*1707), Dahlheimer Kloster (*c*1709; removed to Bretzenheim in 1803), St Nikolaus (in Mainz-Mombach; 1715), St Emmeran (1719) and Reichklarenkloster (1720). His organ in Mainz Cathedral (1701), with its beautiful Baroque case and its pipes surrounding the housing on three sides, is sublimely majestic. Dahm is an important figure in the Mainz organ-building tradition, which also produced the distinguished Joseph Gabler.

WALTER HÜTTEL

Dahmen [Damen]. Dutch family of musicians of German extraction. Many members of the family achieved distinction, mainly as flute, horn or string players. Wilhelm (*b* Duisburg, 1731; *d* Harlingen, 11 Nov 1780), a versatile musician who was primarily a teacher, had a large family of sons, of whom five were specially important. Herman (bap. Sneek, 26 Sept 1755; *d* Rotterdam, 29 Aug 1830) and Wilhelm (*b* Harlingen, 1769; *d* ?Spain) were both noted horn players who visited London: the latter died as a British soldier in the Peninsular War; Herman also composed music for two violins (opp.3, 4, 5, 8) and for orchestra (opp.8, 13). Peter (*b* Deventer, *c*1757; *d* Sneek, 1835) composed chamber music which was published mainly in England. Johan Arnold (i) (bap. The Hague, 9 March 1766; *d* London, 1794) was a cellist and composed a number of works for strings. Arnold (bap. Harlingen, 19 May 1768; *d* Amsterdam, 17 Dec 1829) was a teacher (his pupils included L.P.F. Drouet) and a celebrated flautist.

In the next generation, Herman's sons include Wilhelm Hendrik (*b* Amsterdam, 27 March 1797; *d* Nijmegen, 15 Dec 1847), a distinguished violinist and esteemed teacher; Jacob (*b* Amsterdam, 4 May 1798; *d* Amsterdam, 12 Jan 1875), a violinist (court employee at The Hague in 1829) and composer of chamber music (opp.16, 17 and 19 are known); Johan Cornelis (bap. Rotterdam, 18 Jan 1801; *d* Rotterdam, 16 Feb 1842), who also played string instruments and was an admired teacher; Herman Jacob (*b* Rotterdam, 9 Nov 1805; *d* Utrecht, 4 July 1881), who led the Utrecht orchestra, 1825–75; and his twin brother Johan Arnold (ii) (*b* Rotterdam, 9 Nov 1805; *d* The Hague, 6 May 1853), who was a teacher and horn player in the court orchestra at The Hague, 1829–41. Of Arnold's sons, Johan Arnold (iii) (*b* Amsterdam, 3 Aug 1805; *d* Amsterdam, 28 Oct 1834) and Pieter Wilhelm (*b* Amsterdam, 5 Aug 1808; *d* Amsterdam, 20 June 1886) were solo flautists, the former (who also composed chamber music for flute and strings) at the French Opera,

Amsterdam, and in The Hague, the latter at the Park Concerts, Amsterdam; and Hubert (*b* Amsterdam, 5 Dec 1812; *d* Amsterdam, 21 Dec 1837), who played the cello in the French Opera orchestra; his compositions, the opera *Azalais*, four overtures and solo instrumental works, achieved some popularity. Pieter Wilhelm's son Johan Francis Arnold Theodor (*b* Amsterdam, 2 Aug 1837; *d* Sloten, 1912) was probably the most distinguished flautist of the family and a fine pianist. He made his début at the age of 15 and later played in the Park Orchestra, transferring to the Concertgebouw on its foundation.

Two other members of the family achieved distinction: Jacob Arnold Wilhelm and Jan both led the Concertgebouw, and the latter the Berlin PO, Dresden Opera and Göteborg orchestras as well. (*MGG1*)

PHILIP BATE

Dahomey. *See* BENIN.

Daija, Tish [Matish] (*b* Shkodra, 30 Jan 1926). Albanian composer and teacher. His early musical encounters were with Shkodran folk and urban song, and with the region's organized musical activities, then dominated by Gjoka and Dom Miqele Koliqi. He studied the violin from the age of six, and started composing at 18, becoming known with such songs as *Kënga e krushqve* ('The Song of the Wedding Procession', 1944–5), *Çikë, o mori çikë* ('Little Puss, O Little Puss', 1944–5) and *Me lule të bukura* ('With Beautiful Flowers', 1945). He taught music in Vlora (1945–50) before becoming one of the first Albanians to study at the Moscow Conservatory (1950–56), where his teachers included Bogatïrov, Regal-Levitzky, Fere and N.I. Pejko. On his return to Tirana he worked as inspector of music at the Ministry of Education and Culture (1956–62) before being appointed artistic director of State Ensemble of Folksongs and Dances (1962–80), with which he toured Europe, Asia and Africa. He became a state-salaried 'free professional composer' in 1980, but continued to teach composition at the Tirana Conservatory. He was elected member of the Albanian Academy of Sciences in 1999.

Daija's music demonstrates a capacity to assimilate and exploit the most varied musical styles. His early works include operettas and an impressive string quartet (1954–5). His ballet *Halil dhe Hajria* (1963), on a late 18th-century folk epic, may be the first Albanian work in the genre; the score draws on folk and urban songs – Turkish as well as Albanian – and its colourful orchestral writing occasionally features imitations of folk instruments. His next ballet *Bijt e peshkatarit* ('The Fisherman's Sons', 1972) is if anything finer, but was dismissed on account of its musical novelties, including dissonant, percussive at times, cluster-like chords. Also neglected were his operas, on account of the political sensitivity of their subject matter. *Vjosa* (1972) nonetheless testifies to his dramatic instincts, and contains an exquisite Puccinian aria for soprano. Outstanding among his orchestral scores is the brilliantly orchestrated Symphonic Dance no.1 (1971), a progressive work full of dissonant chromaticism. He has also composed hundreds of art and popular songs. In the 1990s Daija moved with astonishing ease to a dramatically intense and melodically eloquent linear atonality, illustrated in *Ngulmim fatal* ('Fatal Persistence', 1997).

WORKS
(*selective list*)

DRAMATIC

Ops: Klasa VIIb [Class VIIb] (operetta, 2, Daija), Vlora, 1948; Nora e Kelmendit (3, I. Zanbuti), 1955–6, inc.; Lejlaja [Lejla] (operetta, 3, L. Shllaku), Shkodra, 1957; Pranvera [Spring] (2, Ll. Siliqi), Tirana, 1960; Vjeshta e artë [Golden Autumn] (operetta, 2, A. Banushi), Tirana, 1964, lost; Borëbardha e shtatë xhuxhat [Snow White and the Seven Dwarfs] (children's operetta, 3, K. Jakova), Tirana, *c*1969; Briarta [Golden Horn] (children's operetta, 3, Jakova), Tirana, *c*1969; Vjosa (prol, 2, Siliqi), Tirana, 10 Feb 1980; Të rinjtë e uzinës [The Youth of the Factory] (children's operetta, 3, K. Petriti), 1982, inc.; Lulet e Çajupit [The Flowers of Çajupi] (operetta, 3, G. Zheji, after A.Z. Çajupi), 1987–90, unperf.

Other dramatic: Festa e sportit [Sports Festival] (musical tableau, 1, Daija), Vlora, 1949; Halil dhe Hajria (ballet, 3, P. Kanaçi), Tirana, 1963; Bijt e peshkatarit [The Fisherman's Sons] (ballet, 2, Kanaçi, after S. Pitarka), Tirana, 1972; Martesa e Halilit [The Marriage of Halil] (ballet, 3, N. Luca, choreog. Kanaçi), 1990–92, inc.; many short choreographic works, 6 film scores, incid music for 3 plays

VOCAL

Songs: Oj, oçë (S. Gera), Bar, pf, 1945–6; Gju me gju me popullin [Close to the People] (A. Banushi), T, mixed chorus, ens, 1970; Komisari i kuq/Këngë për komisarin [The Red Comissar/Song for the Comissar] (Banushi), T, male chorus, orch, 1973; No pasaran/Kënga zjarr [The Song of Fire] (Banushi), Bar/Mez, mixed chorus, orch, *c*1974–5; Mic Sokoli (trad.), T, orch, 1978; [3] Motive myzeqare [Motifs from Myzeqeja] (trad., D. Agolli), Mez, Bar, orch, 1979–80; Nëne Kosova [Mother Kosova], T, small orch, 1993; I dëbuemi [Turned Away] (Gj. Fishta), T, pf, 1993; Krishtlindjet [Christmas] (Daija), S, gui, org, 1994; Dimërimi i dhenve [The Wintering of the Flock] (B. Mustafaj), S, pf, 1995; Vajzën takoj djali i ri [A Maiden Met with a Young Man] (Daija), S, pf, 1996; Cikli kangë të Malësisë [Malësian Song Cycle] (Daija), 1v, pf, 1996–7; Moj riviera jonë [Our Riviera] (Daija), S, pf, 1997; Hoj, hoj, hoj (Daija), S, pf, 1998

Popular songs: Çikë, o mori çikë [Little Puss, O Little Puss] (L. Serreqi), 1944–5; Kënga e krushqve [The Song of the Wedding Procession] (Daija), 1944–5; Me lule të bukura [With Beautiful Flowers] (Gera), 1945; Erë pranverorë [Spring Breeze] (Siliqi), 1962; Hai nem cem qe xhi [We Have Friends in the World] (Mao Tse Tung), 1967; Me zërin e atdheut [With the Voice of the Fatherland] (Petriti), 1984; Kur vjen pranvera [When Spring Comes] (B. Londo), 1985; Drejtë planetit i ri [The Rights of the New Planet] (A. Boshnjaku), 2vv, ens, 1993; 8 Songs (Daija), 1994

GEORGE LEOTSAKOS

Dāira [dairea, daire, daireh, dahira, dajre, dara, dayre, doira]. Round single-headed frame drum (*see* DRUM, §I, §2(vi) found in Iran, Afghanistan, Turkey, the Central Asian republics, the Caucasus, south-eastern Europe and parts of India. The term, derived from Arabic (*da'ira*: 'circle'), has many variant spellings and transliterations. In many areas there is some overlap with the term DAFF.

The *dāira* consists of a hoop of wood, 5 to 8 cm deep, with a diameter of 20 to 50 cm, over which is stretched and glued a thin membrane of skin (commonly goatskin). Metal jingles are usually attached: pellet bells, rings or coins fitted inside the frame, or small pairs of cymbals inserted into it. The drum is tuned by heating the skin to make it taut, or wetting it to lower the tone.

Many playing styles exist, varying according to regions and social groups. The drum is usually held in one hand, leaving the other free to strike different parts of the skin with the fingers and thumb, and (sometimes) also the palm and heel of the hand. Additional sharp finger-flicks are produced by the hand holding the frame. The player's elbow, shoulder or knee may be used against the drum, which may also be thrown upwards or sideways in a regular beat, for jingling effects. A delicate tremolo is obtained by shaking the instrument; rubbing the skin creates another sound effect.

In some styles the drum is supported in both hands, the fingers beating the outer edge of the skin. Sometimes a string is attached to the drum for support. The drum may also be placed on or between the legs, leaving both hands free to beat with equal force.

The drum is variously played solo or in groups of two or more, sometimes with polyrhythmic effects (in the Ferghana Valley of Uzbekistan popular groups contain up to 14 drums). It is used to accompany singing, dancing, instrumental ensembles and ritual wedding processions. In Iran (*dāire*), Afghanistan (*dāire/dāira*), Turkey (*dayre* or *def*) and Azerbaijan (*daire* or *daf/def*) it is associated with folk music, often the province of amateur women performing in a domestic setting. In Afghanistan and Uzbekistan professional female musicians specializing in entertainment music at weddings used the drum and were formerly known as *dāira-dast* ('drum-in-hand').

The *dayra/doira* is particularly important in Central Asia, a compulsory instrument in classical and folk musics. A considerable repertory of named solo drum pieces exists, and in Uzbekistan and Tajikistan drumming is taught in art music academies. Musicians memorize drum patterns with syllables denoting low or high pitches, e.g. '*bum-ba-ka*' (low-high-high), playing in a very forceful style. In Central Asia it is also used in male virtuosic displays involving juggling. In northern Tajikistan *baxshy* shamans (female and male) use it in therapeutic rituals, where it may be alternatively termed *childerma*.

Zuleikha, a female professional musician, playing the dāira (frame drum) in a wedding procession, Herat, Afghanistan, 1975

In Caucasian areas (*dahira, daira*) it comes in various sizes, sometimes made with fish-skin; the frame may be inlaid with mother-of-pearl. There it is used for solo performance accompanying song or dance. Common in south-west Bulgaria, it accompanies solo or group singing and instrumental playing (especially the *tambura*) but rarely dance. In Serbia, south-west Montenegro and Macedonia it is generally used by Gypsy women to accompany dance, and in *calgije* ensembles. In Romania (*dairea, dara*) it was formerly used by Gypsy showmen to

accompany bear-dances; now it has a place in masked New Year processions, representing the bear's costume. It is used in urban instrumental ensembles in Albania (*daire*) and, in eastern Albania, in conjunction with the *gajde* (bagpipe).

Dairo, I.K. [Isaiah Kehinde] (*b* Offa, 1930; *d* Efon-Alaiye, 7 Feb 1996). Nigerian musician and religious leader. 'Father' of modern JÙJÚ, Dairo practised numerous professions while playing in *jùjú* bands in the 1940s before forming his own early *jùjú* bands in the mid-50s, the Morning Star Orchestra, which later reformed as the Blue Spots. Perhaps the first internationally recognized African recording musician, Dairo's successful *jùjú* performances and recordings helped to displace highlife as the principal popular genre in Nigeria in the early 1970s. His *jùjú* music drew on traditional Yoruba drumming and praise-singing, while introducing Cuban rhythms, the button accordion and elements of Christian hymnody. Dairo released hundreds of recordings, influencing the younger generation of *jùjú* artists, including 'King' Sunny Adé, Chief Commander Ebenezer Obey and Sir Shina Peters. Dairo was awarded the MBE in 1963 by Queen Elizabeth for his musical contributions to the Commonwealth, the only African musician ever to be so honoured. The founder of the Aladura Christian movement in Lagos, Dairo also served as the president of the Performing Rights Society, Nigerian Chapter, and founded the Musical Copyright Society of Nigeria.

GREGORY F. BARZ

Dakshinamoorthy, Yalpanam (*b* Jaffna, 20 August 1933; *d* Jaffna, 15 May 1975). Sri Lankan *tavil* player. His family originally came from Thanjavur District in Tamil Nadu, India, but his father, Viswalingam Pillai, had emigrated to Sri Lanka. He was one of the few musicians to become an expert in all aspects of playing the *tavil*: in accompanying the *nāgasvaram* and *tavil* players resident in Sri Lanka he participated in *nāgasvaram* performances in India and Sri Lanka. His concert engagements also took him to Malaysia and Singapore. He accompanied and enhanced the performances of most of India's distinguished *nāgasvaram* players. He is remembered for many feats, including playing solo in a particularly difficult rhythmic cycle for nearly three hours. He was unusual in not always carrying his own drum to engagements and was happy to perform on a borrowed instrument. (B.M. Sundaram: *Maṅkalam icai mannārkal* (Madras, 1992))

N. PATTABHI RAMAN

D'Alamanya, Johan. *See* ALAMANI, JO.

Dalayrac [D'Alayrac], **Nicolas-Marie** (*b* Muret, Haute Garonne, 8 June 1753; *d* Paris, 26 Nov 1809). French composer. His father was a king's counsellor and a wealthy aristocrat either by birth or through personal ennoblement. Nicolas' musical talents were cultivated at Toulouse College, where he went from the age of eight, and, on his return to Muret six years later, in singing lessons and playing the violin in a local orchestra. He was obliged by his father to study law, in which he qualified by the age of 21. In 1774 he went to Versailles, where a commission had been obtained for him as a sub-lieutenant in the personal guard of the Count of Artois, later Charles X. In Paris, Dalayrac encountered influential musicians and musical amateurs such as the Baron de Bésenval and the Chevalier de Saint-Georges; he later received composition lessons from Honoré Langlé. Grétry reported in his *Mémoires* that Dalayrac was admitted to his study, but was not a formal pupil.

Dalayrac's earliest compositions were violin duos and string trios and quartets, some of which are lost. Published under an Italian pseudonym, the quartets were very popular; Pixérécourt related how the composer's identity was found out. Surviving sets of quartets start with op.4; the earliest known publication date for any Dalayrac work is 1777 when the *Gazette de France* of 28 November announced 'Six [unidentified] quatuors concertants'. Pixérécourt wrote that Dalayrac was a member of the masonic Lodge 'Neuf-Soeurs' and that in 1778 he composed music both for Voltaire's masonic reception and for that of Franklin at Mme Helvétius's. None of his masonic music has been preserved (Porset, 1990).

In 1781 Bésenval asked Dalayrac to set two stage works to music for private performance: *Le petit souper* and *Le chevalier à la mode*. These were well received, and the following year, under the protection of Marie-Antoinette, *L'éclipse totale* became Dalayrac's first public opera. He rapidly consolidated his position, and by 1786 could be viewed as Grétry's successor. Before the Revolution his chief successes were *Nina* (1786), *Azémia* (1786) and *Les deux petits Savoyards* (1789). Most of his output was published in full score; Beethoven possessed copies of *Les deux petits Savoyards* and *La soirée orageuse*.

From about 1790, Dalayrac was obliged to spell his name in a non-aristocratic fashion (rather than D'Alayrac). In 1792 he married the actress Gilberte Sallarde, who later, during the Directory and Consulate, presided over a lively salon. In the difficult days of 1793–5 Dalayrac's musical popularity seems to have guided him safely through. He wrote one or two Republican songs, but his most usual contribution was indirect: others adapted his popular operatic tunes to Republican words. The ubiquitous 'Veillons au salut de l'empire', for example was originally from his *Renaud d'Ast* (1787). In 1795 he was a co-signatory with the foremost Parisian composers to a prospectus advertising the sale of Republican music. Yet his success set him somewhat apart from the 'Conservatoire school' (Méhul, Cherubini, Gossec etc.) and he could afford not to join the Conservatoire staff.

In 1798 Dalayrac was awarded membership of the Swedish Royal Academy, and in 1804 he was made one of the first members of the Légion d'honneur. He put particular effort into *Le poète et le musicien*, which was intended for Napoleon's coronation anniversary (4 December 1809), but caught a fever and died before the destined day. Pixérécourt stressed the composer's modest, friendly nature and his restrained style of living. That Dalayrac never received a government annuity was

ascribed by Pixérécourt to his retiring disposition. A marble bust of the composer by Pierre Cartellier, funded by subscription, was placed in the foyer of the Opéra-Comique in 1811.

Dalayrac's work, almost totally within the *opéra comique* tradition, formed a logical continuation of Grétry's. He wrote mainly for the same company that held Grétry's allegiance, the Comédie-Italienne. Like Grétry, he tackled a wide range of dramatic subjects, while never tiring of the appeal of comedy. *Azémia*, for example (partly inspired by Shakespeare's *The Tempest*), portrayed young love, exotic scenery and final rescue from a remote island. *Nina* showed the woman 'crazed for love' (see illustration). *Sargines*, set in the Middle Ages, centred on King Philip-Augustus (1165–1223) and the battle that decisively broke Anglo-Angevin power in France. (It stands as a pro-monarchist statement on the eve of the Revolution.) *Raoul, sire de Créqui* shows the rescue of a medieval 'good seigneur' from atrocious conditions of imprisonment, and emphasizes the affection of his people. *Camille* and *Léon* share strong elements of Gothic fantasy: the former, the story of an imprisoned wife, was also taken up by Ferdinando Paer in a successful setting (1799). On the other hand, works like *Maison à vendre* provided light musical settings that acted as a vehicle for comic intrigue. To some extent, Dalayrac always adapted his musical style according to the subject.

Louise-Rosalie Dugazon in the title role of Dalayrac's 'Nina, ou La folle par amour', Comédie-Italienne, Paris, 15 May 1786: engraving by André Dutertre after Jean-François Janinet from Le Vacher de Charnois' 'Costumes et annales des grands théâtres de Paris' (1786)

Sargines is consistently striking for its warlike and patriotic idiom.

Although Dalayrac was a skilled composer of ensembles, his more memorable music was designed for solo voice. He provided a new generation of French singers with up-to-date lyricism modelled on foundations laid down by Paisiello and Sacchini, and he cultivated, more particularly, a naively tuneful style, as accomplished as it was popular. This is typified by the lilting 6/8 melody 'Quand le bien-aimé reviendra' from *Nina*; adapted for liturgical use, it became, at Berlioz's first communion in 1815, one of his early musical experiences. At least four songs were parodied on the same melody and published. In 1810 *Azémia* and *Gulistan* were revived in Paris, and a music journalist could still rhetorically ask 'who does not know by heart' music from the former, such as 'Ton amour, ô fille chérie', 'Aussitôt que je t'apperçois' and 'J'ai peur et ne sais pas pourquoi'. Dalayrac's increased use of italianate melody later in his career was criticized by Martine (1813), but there is conspicuously virtuoso solo writing already in Verseuil's aria 'Quel moment' in *Les deux petits Savoyards*. In general, his musical style became more lightweight, with shorter phrases and, typically, triplet accompaniment figures.

Poisson de La Chabeaussière (in the dedicatory epistle of *Azémia*) and Marsollier des Vivetières (1825) paid tribute to the composer's active and astute contribution to the dramatic planning of various operas. Pixérécourt, another of his librettists, wrote Dalayrac's biography. Yet it was for the redoubtable François-Benoît Hoffman that Dalayrac produced possibly his most polished score, *Léon* (1798). It is meticulously planned with regard to its key scheme, recurring themes for the two moral messages of the fable and three recurring motifs associated with the lovers. Then, in *Léhéman* (1801), eight recurring elements are found, including the *romance* 'Un voyageur s'est égaré' ('A pilgrim lost'). Carl Maria von Weber, in his review, found 'especially interesting' the *romance*'s 'interweaving with the progress of the whole plot' which forges a conceptual and musical unity throughout.

Dalayrac seems never to have left France, but his works were very popular abroad, especially in Germany, Scandinavia and Russia. A few were adapted in England; they were known in Vienna; Beethoven played in the Bonn orchestra when *Nina*, *Azémia* and *Les deux petits Savoyards* were in repertory; and Weber conducted *Adolphe et Clara* and *Les deux petits Savoyards* in Prague in 1814. *Camille* and *Adolphe et Clara* were still sung in Paris in the 1840s; *Maison à vendre* was probably the universal favourite, revived in Paris up to 1853.

The orchestration of Dalayrac's operas is resourceful rather than brilliant. Woodwind solos are favoured, particularly those for bassoon, and muted strings are often found in *romances*. *Col legno* is used in *Une heure de mariage* (1804). *Lina* (1807) provides perhaps the first printed indication anywhere in a full score of soft-ended timpani sticks, in calling for 'baguetes garnies'. In *Léhéman* offstage trumpet-calls in the first finale announce the capture of Léhéman's ally by enemy troops. This 'warning' technique was afterwards used by Méhul in *Héléna*, and subsequently by Beethoven in *Fidelio*.

Dalayrac's only published writing was *Réponse de M. Dalairac à MM les directeurs de Spectacles* (Paris, 1791); he left some unpublished, including 'La folle de St Joseph:

anecdote qui a fourni le sujet de Nina, ou La folle par amour' (other writings are listed in *MGG1*).

DAVID CHARLTON

Dal Barba, Daniel [Daniele] **(Pio)** (*b* Verona, 5 May 1715; *d* Verona, 26 July 1801). Italian composer, violinist, singer and librettist. In 1737 he began his 50-year career as a violinist and teacher in Verona. Employment by the Archbishop of Vác (Hungary) and the Mingotti opera troupe in Pressburg (now Bratislava) (1741) established him as a composer and singer. His Veronese stage début in Pietro Chiarini's *I fratelli riconosciuti* (1743) was followed by a leading part in *Il Siroe* (1744) and in his own *opera seria*, *Il Tigrane* (1744). During a stay in Venice in 1746–7, he sang in several *opere buffe* (Teatro S Angelo) and composed a parody, *Il gran Tamerlano* (Teatro Vendramin). Appearances in the Trent summer opera productions *Artaserse* and *Il Demetrio* preceded a post at the Trent Bishopric.

In 1749 Dal Barba succeeded Domenico Zanata, former *maestro di cappella* at Verona Cathedral, as *maestro di cappella* of the Filarmonica and Filotima academies in Verona. Except for a three-year absence, he remained *maestro* of the Accademia Filotima until its dissolution in the 1790s. Among his later operatic ventures *Ciro in Armenia* (1750) is notable for its cosmopolitan, all-female cast. In 1752 he contributed to a poetic anthology in honour of the new Venetian doge. Dal Barba met Leopold and Wolfgang Mozart at the Accademia Filarmonica in January 1770; Leopold noted in a letter (11 January 1770) that he 'sang extempore the most beautiful verses about Wolfgang'.

From 1740 Dal Barba had occasionally provided sacred works for the cathedral liturgy. In April 1762 he was nominated temporary *maestro di cappella* at the cathedral and succeeded to the post on the death of Girolamo Zanata in 1770. In addition to composing a large quantity of masses, hymns and psalms, he taught counterpoint in the school of acolytes. He retired from this position in 1779, but continued composing until 1791.

Dal Barba's compositions reflect an easy command of the *galant* idiom. The 12 violin sonatas (*c*1747) feature supple melodic ideas, decorative lyric lines, and late Baroque formal designs. His undated cycle of five cantatas present a dialogue between the pastoral figures Fileno and Clori. The work is unusual in that his dedicatory verses to Maria Theresa are themselves set as a paired recitative and aria. His sacred works juxtapose declamatory choral and arioso solo sections, usually accompanied by violins and continuo. He continued writing polychoral settings of the Mass and vespertine psalms as late as the 1770s. The contemporary popularity his works enjoyed derived from their tunefulness, harmonic clarity and sentimental charm.

WORKS

OPERAS

music lost; printed libretto sources listed

Il Tigrane (os, 3, ? C. Goldoni), Verona, Filarmonico, carn. 1744; *I-VEc*
Il gran Tamerlano (parody, 1, 'Verdacchi Predomosche'), Venice, Vendramin, aut. 1746; *Vcg*
Lo starnuto d'Ercole (int, 5), Verona, Seminario, *c*1748; *VEc*
Il finto cameriere (int, 2, Dal Barba), Verona, S.E. Capitanio, carn. 1749; *VEc*
Ciro in Armenia (os, 3, G. Manfredi), Verona, Nuovo, carn. 1750; *VEc*
Artaserse (os, 3, P. Metastasio), Verona, Nuovo, carn. 1751; *VEc*
Alessandro nell' Indie (os, 3, Metastasio), Verona, Filarmonico, 1761; *VEc*

SACRED

C. Baronio guarito da una mortal malattia per le orazioni di S Filippo Neri, orat, Trent, 1748, lost; pr. lib *TRc*; Verona, 1748, pr. lib *VEc*; Florence, 1754, pr. lib *US-Wc*
82 works, *I-VEcap*, incl.: masses; Nunc sancte nobis spiritus, 4vv, insts, 1744; Responsori per l'esequie del Sommo Pontefice, 1769; Ky, 4vv, 1771; Salmi breve per tutto l'anno, 1772; Gl, 4vv, insts, 1776; Litanie della BVM, 4vv, insts, 1791

MICHAEL DUBIAGA JR

Dalbavie, Marc-André (*b* Neuilly-sur-Seine, 10 Feb 1961). French composer. He studied at the Paris Conservatoire (1980–86) where he won a number of first prizes, and subsequently spent five years in the musical research department at IRCAM. He also studied conducting with Boulez (1987–8). Dalbavie's work has been performed in most countries in Europe, the former USSR and Asia, as well as in the USA by ensembles such as the Los Angeles PO, the Orchestre National de France, the London Sinfonietta and the Ensemble Intercontemporain.

Dalbavie is one of the young European composers who found inspiration during the 1980s in the 'musique spectrale' represented particularly in the work of Grisey and Murail. Dalbavie enhances existing techniques by making some use of computer-assisted composition.

Diadèmes for viola, ensemble and electronics is representative of Dalbavie's early musical thinking, and clearly suggests the idea of a concerto. *Seuils* for soprano, ensemble and electronics employs polyphonic processes and plays on the notion of musical and semantic significance within seven symmetrically ordered movements. Dalbavie here tackles the issue of spatial writing. The orchestra faces the listeners, in the traditional manner, while the voice and the electronics are diffused spatially around them.

In works composed since *Seuils*, Dalbavie has sought to explore the possibilities presented by spatial music. In *Offertoire* the simulation of virtual spaces is realized in the choral writing, and in the Violin Concerto part of the orchestra is placed round the audience.

In the vocal cycle *Logos*, consisting to date of *Instances* for orchestra (1992) and *Seuils*, Dalbavie, who is greatly influenced by contemporary literature and plastic arts, is intent on creating visually arresting works integrating text, theatre, ballet and venue in a musical context.

ANNE SÉDÈS

Dalberg, Johann Friedrich Hugo, Freiherr **von** (*b* Mainz, 17 May 1760; *d* Aschaffenburg, 26 July 1812). German author, aesthetician and composer. Born into a noble family, he was tutored at home and then received theological training at Göttingen. Though physically deformed, he was a virtuoso pianist by the time he reached Göttingen. He became a canon at Trier, Worms and Speyer, and a privy counsellor to the Elector of Trier, but he was able to devote most of his time and energy to scholarly pursuits including music. He studied composition with Ignaz Holzbauer and travelled extensively in Italy and England. His works about music and his compositions were published regularly in his lifetime and professional musicians regarded them seriously.

Dalberg's writings cover such diverse subjects as meteorology, penal law and translations of works on oriental subjects. This wide range of interests that hints at the dilettante is also present in his writings on music. Their topics include the music of India, ancient Greek music, newly invented instruments and the history of harmony, and there is an important series of fanciful, highly imaginative works that reflect the aesthetic attitudes of early German Romanticism. Many of the latter reveal a strong interest in the nature of musical inspiration and its relation to the inner world of the artist. The earliest of these writings appeared in the 1780s and establishes Dalberg as one of the first musical Romantics. His *Blicke eines Tonkünstlers in die Musik der Geister* (1787) portrays an artist sick and discouraged, turning to his piano and finding on it

> Pergolesi's *Salve regina* as though sent by an angel. I sang through it and the heavenly 'O dulcis, o pia, etc.' filled my soul with such an exalted feeling of devotion and soft melancholy that I dissolved into tears.

Dalberg's book about the Aeolian harp is in the form of an allegorical dream that evokes an atmosphere similar to that found in many of E.T.A. Hoffmann's writings about music.

Dalberg's compositions were generally for piano, for chamber ensemble or for solo voice with accompaniment. Many of them were reviewed in contemporary journals, where they were received with respect but with occasional comments suggesting technical shortcomings.

WORKS

VOCAL

all for 1 voice, keyboard, unless otherwise stated

Sacred: Eva's Klagen bei dem Anblick des sterbenden Messias (declamation, F.G. Klopstock), with insts (Speyer, ?1783–4); Der sterbende Christ an seine Seele, with insts (Dresden, 1787); Todes-Feyer Augusts Grafen von Hatzfeld (Mainz, ?1788–9); Beatrice (cant., Dante) (London, ?1795); 6 geistliche Lieder, i (Mainz, after 1800); Jesus auf Golgotha (declamation, Klopstock) (Offenbach, ?1810–12); Das Saytenspiel (cant., J.G. Herder), with insts (Dresden and Leipzig, n.d.)

Secular: Lieder, ded. Princess of Zweibrücken, 3 vols. (Munich, before 1783); 6 canzoni (Munich, ?1791–2); 3 English Songs and a Glee, op.15 (London, *c*1795); [4] English Songs, op.15 (London, ?1796); 12 Lieder (Erfurt, 1799); 12 Lieder (Bonn, 1799); Ode an die Freude (J.C.F. von Schiller) (Bonn, 1799); 6 romances françaises, op.21 (Bonn, ?1803–4); Deutsche Lieder, op.25, 2 vols. (Bonn, 1806); *c*12 songs pubd singly

INSTRUMENTAL

HOWARD SERWER

Dalberg, Nancy (*b* Bødstrup, nr Slagelse, 6 July 1881; *d* Copenhagen, 28 Sept 1949). Danish composer. Brought up in a wealthy middle-class home, she first wanted to become a pianist but had to give it up because of an arm disease. From 1909 she studied music theory and composition with Johan Svendsen, and from 1913 with Carl Nielsen whom she assisted in orchestrating and copying some of his compositions. In 1918 she gave a composition evening at which Nielsen conducted three of her symphonic works, among them a three-movement symphony in C♯ minor; she later withdrew the first movement of this work and the *To orkesterstykker* remained. Besides instrumental music she wrote a large number of songs to texts by Selma Lagerlöf, Johannes Jørgensen and Martin Andersen Nexø. Her chamber music in particular was of a high standard; it was often performed, both in Denmark and abroad. (G. Holmen: 'Hilda Sehested og Nancy Dalberg: to danske komponister', *Forum for kvindeforskning*, vi/1, 1986, pp.29–36)

WORKS
(*selective list*)

Orch: Scherzo, str orch, 1918; To orkesterstykker, op.9, 1918; Capriccio, 1918
Chbr: Str Qt, 1914; To fantasistykker, vn, pf, 1918; Str Qt no.2, 1922; Scherzo grazioso, vn, pf, 1927; Str Qt no.3, 1927; To violoncelstykker, vc, pf
Vocal: 3 songs, 1914; To romancer og zigeunersang, 1922; 3 danske Duetter, 1931; Svanerne og fire andre sange, 1935

INGE BRULAND

Dalberto, Michel (*b* Paris, 2 June 1955). French pianist. He studied at the Paris Conservatoire principally with Vlado Perlemuter, receiving a *premier prix* in 1972 and completing the *cycle de perfectionnement* in 1975. He also studied with Raymond Trouard, Nikita Magaloff and Jean Hubeau. He won first prize in the Clara Haskil Competition (1975) and the Leeds Competition (1978), and these led to major recital and orchestral engagements throughout the world. In 1980 he made his Paris début with the Orchestre de Paris under Erich Leinsdorf. An active chamber musician, Dalberto has performed and recorded with Henryk Szeryng, Augustin Dumay, Boris Belkin and Viktoria Mullova. In 1991 he was named artistic director of the International Summer Academy and Festival at Les Arcs in the region of Savoie. His restrained temperament and refined musicianship have made him an ideal interpreter of the music of Mozart. His recording of Schubert's complete piano sonatas is outstanding, as are his poetic accounts of Schumann's *Kreisleriana* and late works of Brahms.

CHARLES TIMBRELL

Dalby, (John) Martin (*b* Aberdeen, 25 April 1942). Scottish composer. At the RCM he studied composition with Howells and the viola with Riddle, spending two years playing in the Orchestra of the Academy of Naples. There he encountered the music of Skalkottas, whose use of selected aspects of serialism inspired him to develop his own style on a similar basis, shown to greatest effect in his chamber music of the late 1960s. From 1972 until 1991 Dalby was the head of music for BBC Scotland, where he encouraged and provided work for many Scottish composers and produced with John Purser the 30-part radio series 'Scotland's Music', which heralded a re-awakening of interest in many aspects of the nation's musical culture. From 1995 to 1998 he was chairman of the Composers' Guild of Great Britain.

In *Whisper Music* (1971) aleatory elements are brought into play within a tightly controlled textural framework, and *The Dancer Eduardova* (1978), written for Peter Maxwell Davies's group The Fires of London, also reveals a naturally projected theatricality. Although some of Dalby's choral music is as tensely argued as his *Missa fi-fi* (1969), a Tridentine Mass written in protest at Vatican II, more accessible works like the carol *Mater salutaris* (1981) are well-crafted and unashamed *Gebrauchsmusik* in the tradition of Howells. In later works Dalby combines this approachability with a deep seriousness of expression and purpose, as in his cantata *John Clare's Vision* (1993). His essential lyricism and good humour are usually held in check by a darker, more complex force, as in his *Scotch Rhapsody* (1983), written for another viola-playing composer, Sally Beamish. Rather than an affectionate skit on aspects of Scottish traditional music as it was intended, the *Rhapsody* emerged as a powerfully rugged work.

Dale. English family of music publishers, music sellers and instrument dealers. The firm was established in London.

(1) Joseph Dale (*b* 1750; *d* Edinburgh, 21 Aug 1821). He founded a business in 1783 at his private house, and from there issued his first publications, including a number of operas such as Shield's *Rosina* and *The Flitch of Bacon*. A music catalogue of 1785 announced that the copyrights and plates of these and other works had recently been purchased from WILLIAM NAPIER; at about the same time he also purchased plates and copyrights from Charles Bennett, once the property of John Welcker. In January 1786 he moved to premises previously occupied by Samuel Babb, whose trade stock and large circulating music library Dale purchased. In 1805 he took his son William into partnership and the firm became known as Joseph Dale & Son (or Joseph & William Dale). The partnership was dissolved in 1809, when William set up in business for himself; Joseph continued alone in the firm until his death.

Joseph Dale was also a musician, and served as organist of St Antholin, Budge Row, Watling Street from 1777 to his death. He composed concertos and sonatas, and arranged vocal airs with variations for the harpsichord or piano. He also took out letters patent for improvements to the tambourine, and published music including its use. The tambourine parts of these works were elaborately conceived, employing an original notation, and were at least in part the work of his son, also Joseph, who was apprenticed to his father in 1797. His firm, particularly in its early years, issued music of every description, including the operas of Storace and others, piano music by Clementi, Dussek, Krumpholtz and Steibelt, collections of English and Scottish songs, country-dance music and vast quantities of sheet music.

(2) William Dale (*b* London, ?1780–85; *d* ?1827). Son of (1) Joseph Dale. He was in partnership with his father from 1805 to 1809, when he set up his own business as publisher, music seller and instrument dealer, issuing mainly sheet music. Elspeth Dale, presumably his widow, continued the business from 1827 until about 1832; it was then succeeded by Dale, Cockerill & Co., and in 1837 by G. Gange & Co., piano manufacturers and music sellers.

(3) James Dale (*fl c*1800). Perhaps a brother of (1) Joseph Dale. He was a composer of sonatas and other works for piano, some of which were printed and published by himself and others by Joseph about 1800.

WILLIAM C. SMITH/PETER WARD JONES

Dale, Arthur. *See* NEVIN, ARTHUR (FINLEY).

Dale, Benjamin (James) (*b* London, 17 July 1885; *d* London, 30 July 1943). English composer and administrator. He showed early musical promise, gaining a performance of his first orchestral work when he was 14. In 1900 he entered the RAM where he studied with Corder. One of his orchestral works written while a student, the *Concertstück* for organ and orchestra, remained in the repertory until World War I. Awarded many composition prizes, he came to wider attention with his large-scale virtuoso Piano Sonata in D minor (1902–5), a work taken up by contemporaries at the RAM, including York Bowen and Myra Hess. In the sonata Dale demonstrates a remarkable command of 19th-century Romantic pianism, looking not only to Liszt and Schumann as models but also to Balakirev and other Russian composers. The last two movements of his Suite for Viola (1906) were orchestrated, and conducted by Nikisch at Queen's Hall in 1911. Its slow movement 'Romance' became one of Lionel Tertis's encores; Tertis also championed the Phantasy for Viola and Piano, and for Tertis's pupils Dale wrote his Introduction and Andante for six violas.

Unable to leave Germany at the outbreak of war, Dale was interned until 1918 in the Ruhleben civilian prison camp, where he wrote music for camp entertainments. In 1919–20 he travelled as an examiner for the Associated Board to Australia and New Zealand. He was first appointed professor of harmony at the RAM in 1909, the post being expanded to include composition after his return. His introspective and largely elegiac Violin Sonata (1921–2) was followed by the Parryesque festival anthem *A Song of Praise* (1923). This conscious adoption of an occasional style was less successful than the vibrant atmospheric personal textures of his 1913 setting of Christina Rossetti's Christmas hymn, *Before the Paling of the Stars*. His Ballade for violin (1927), however, enjoyed some popularity. With his appointment as warden of the RAM in 1936, and work for the BBC's Music Advisory Panel in the 1930s (allowing him to air his antithetical views on the more advanced contemporary trends), Dale was increasingly occupied by administrative responsibilities. This, together with his music's fall from favour after the war, was responsible for the small size of his output. However, his last large-scale work, the expansive 27-minute tone poem *The Flowing Tide* (1943, first sketched in 1924), finds Dale introducing elements of Debussian Impressionism into a late-Romantic idiom with a striking ear for orchestral colour. The gradual revival of his instrumental music on CD has begun a wider reassessment of Dale's achievement.

WORKS
(selective list)

Orch: Ov., 1900; Ov. to Shakespeare's 'Tempest', 1902; Concertstück, org, orch; Concert Ov., g, 1904; The Flowing Tide, tone poem, 1943

Vocal: Before the Paling of the Stars (Christmas hymn, C. Rossetti), chorus, orch, 1913; A Song of Praise (festival anthem, pss, R. Heber), solo vv, chorus, orch, 1923; 6 carols, 3 partsongs, 3 solo songs

Chbr and solo inst: Sonata, d, pf, 1902–5; Suite, d, va, pf, 1906; Phantasy, D, va, pf, 1911; Introduction and Andante, 6 va, 1911, rev. 1913; 3 Pieces, vn, pf, 1916–20, orchd 1919–25; Sonata, E, vn, pf, 1921–2; Ballade, c, vn, pf, 1927; other pf pieces

LEWIS FOREMAN

Dale [née Richards], **Kathleen** (*b* London, 29 June 1895; *d* Woking, 3 March 1984). English musicologist, composer and pianist. Her music studies were pursued privately with York Bowen and Fanny Davies for piano and with Benjamin Dale (whom she later married) for composition. Active as a pianist in the early part of her career, she broadcast frequently during the period 1927–31. From 1926 to 1928 she studied Swedish language and literature at University College, London, and later published translations from that and other languages (e.g. Redlich's *Claudio Monteverdi* and Reifling's *Piano Pedalling*). She taught theoretical subjects at the Matthay School (1925–31) and taught and lectured for the Workers' Educational Association (1945–50, 1957). She served on the council of the Society of Women Musicians (1920–25, 1946–9) and acted as Ethel Smyth's musical executor in 1944. Kathleen Dale's work was mainly in the field of keyboard music, though she also wrote a biography of Brahms and personal reminiscences of Ethel Smyth and Marion Scott. She edited Schubert's E minor Piano Sonata D566 for its first complete publication (1931), and some of his songs. Her compositions (published under her maiden name) include partsongs, duets for two violins, pieces for violin and piano and for piano solo and duet (for list of compositions, see *WG* 'Richards, Kathleen').

Dalhart, Vernon [Slaughter, Marion Try] (*b* Jefferson, TX, 6 April 1883; *d* Bridgeport, CT, 14 Sept 1948). American tenor. He received some formal vocal training in Dallas. For several years, beginning in 1912, he sang light opera in New York; among his roles were Ralph Rackstraw in Gilbert and Sullivan's *H.M.S. Pinafore* (Century Opera Company) and Pinkerton in Puccini's *Madama Butterfly*. About 1915 he successfully auditioned for Thomas Edison and for 14 years recorded popular songs for Edison Diamond Discs. He also recorded for Columbia (1916–24), Victor (1918–38) and almost all the main labels, using more than 100 pseudonyms. His repertory included coon songs, arias from light operas, and patriotic, popular, and comedy songs. In 1924 he experimented with the hillbilly idiom and recorded *Wreck of the Old '97* and *The Prisoner's Song* for Victor; the latter appeared on more than 50 labels. After 1924 Dalhart recorded only country music, often with Carson J. Robison as his duet partner (until 1928). His record sales decreased considerably in the 1930s as a result of the declining quality of his arrangements, which became less authentic in idiom and relied heavily on studio recording techniques.

Although he recorded every type of country song, Dalhart excelled in moralistic ballads that describe dramatic and generally tragic incidents (e.g. *The Death of Floyd Collins* and *The Fate of Edward Hickman*). More than 75 million copies of his records, over two thirds of which were of country music, were sold during his lifetime. His recordings made him the first country-music artist to attain international renown.

BILL C. MALONE

D'Alheim, Mariya Alexeyevna Olenina. *See* OLENINA D'ALHEIM, MARIYA ALEXEYEVNA.

Dall'Abaco, Evaristo Felice (*b* Verona, 12 July 1675; *d* Munich, 12 July 1742). Italian composer. He was born into a family of high social standing, his father being a jurist. As a boy he learnt the violin and the cello, possibly under Torelli until the latter's removal to Bologna in 1685. In 1696 Dall'Abaco went to Modena, where his services as a musician were much in demand despite his not being attached to the court orchestra. His noted penchant for the French style may date from his Modena days, since the director of the orchestra, Ambreville, was French. After 19 September 1701 no further trace of Dall'Abaco exists in Modena, and the next mention of him is early in 1704 as a cellist in the Bavarian court, where one of his colleagues was J.C. Pez. The defeat of the reigning elector, Maximilian II Emmanuel, in the War of the Spanish Succession forced him to flee to the Netherlands, where he brought a large retinue including many of his own musicians. Setting up court in Brussels, Maximilian continued to patronize the arts extravagantly, but further French reverses caused him to withdraw to Mons in 1706. The capitulation of Mons following the battle of Malplaquet in 1709 sent the elector back to France, and a relatively impoverished court was established in Compiègne by grace of Louis XIV. Throughout these unsettled times Dall'Abaco remained at the elector's side. He had married Marie Clémence Bultinck in the Netherlands, and their son Joseph-Marie-Clément was born in 1709 or 1710.

Dall'Abaco must have deepened his acquaintance with the French style after prolonged residence in the Low Countries and France, though it was only after Maximilian's eventual triumphant return to Munich in April 1715 that specifically French traits began to creep into his published music. Dall'Abaco's loyalty and competence were rewarded by his appointment as Konzertmeister in the reconstituted court orchestra and his elevation to the rank of electoral councillor in 1717, a fact proudly advertised on the title-page of his fifth publication, a set of concertos for various combinations. He also participated as a soloist in 'academies', the precursors of the musical soirées of the 19th century, some of which were held at his own house. Dall'Abaco remained in the service of the Bavarian court after Maximilian's death in 1726 and the accession of the new elector, his son Karl Albrecht. Though a music lover like his father, the new elector favoured a more up-to-date style of music than his Konzertmeister would, or could, supply, with the result that Dall'Abaco's musical activities became increasingly relegated to the background. A second set of concertos, published by Le Cène in 1735 as Dall'Abaco's op.6, is the sole proof of his continued creative work during this final phase. He seems to have retired on a pension in 1740.

Dall'Abaco's surviving output is restricted to the 66 works published in his lifetime as opp.1–6. Like Corelli, he seems to have taken unusual care in preparing his works for publication. The result is a consistently high standard of craftsmanship allied to an original and inventive turn of mind, which shows itself in individual details no less than in the broad design. Although the musical materials Dall'Abaco worked with are accurately described as post-Corellian, he did not hesitate to adapt or embroider them for special effect. His movements, whether binary or unitary, are mostly long and restate material systematically, using large units. The French influence in his music does not often extend to harmony, melodic style or ornamentation, but is seen in the occasional adoption of the rondeau form and in French dance movements, such as the passepied, with no traditional cultivation in Italy, and in a marked fondness for the parallel key (also, more unusually, its satellite keys). Thus an excursion to G major in the course of a movement in E major, such as occurs in the opening movement (Ciaccona) of the 12th sonata in his op.1, is no novelty for him.

Although nominally *da camera*, the 12 op.1 sonatas for violin and cello (which can also be performed as keyboard solos) contain a mixture of abstract and dance movements, mostly in the Corellian four-movement sequence. 'Da camera' thus no longer denotes a distinct sub-genre, still less a prescribed context of performance, though its connotations are appropriate to the medium. The 12 *Concerti a quattro da chiesa* op.2 are roughly equivalent to contemporary concertos by Albinoni and Albicastro in that they reconcile their adoption of forms taken over from the sonata with the need for display passages allotted to a first or principal violin (more rarely cello) part. Frequent *forte* and *piano* indications stand in lieu of 'solo' and 'tutti' cues, and one might easily believe that they were intended as such, were it not for the ubiquity of Dall'Abaco's habit of marking dynamics carefully. (The question is not whether soloists should be extracted, but rather whether ripienists should be added.) The 12 *Sonate da chiesa e da camera a tre* op.3 show the same mixture of abstract and dance movements as op.1, though the former are concentrated in the first six sonatas. They continue along the same stylistic path, as do the 12 sonatas for violin and cello in op.4, which reproduce the formulae of op.1. The six *Concerti a più istrumenti* op.5, which include one concerto with two obbligato flutes and another with obbligato oboe, testify in their cautious way to the Vivaldi vogue of the 1710s. The final set of concertos, op.6 (presumably not to be identified with a second book of concertos, the projected complement of op.5), consolidates this more advanced style, introducing a few *galant* touches.

MICHAEL TALBOT

Dall'Abaco, Joseph-Marie-Clément [Giuseppe Clemens] (*b* Brussels, bap. 27 March 1710; *d* Arbizzano di Valpolicella, 31 Aug 1805). Flemish composer and cellist of Italian descent, son of EVARISTO FELICE DALL'ABACO. He was at first a pupil of his father, with whom his career has often been confused. The latter, employed at the Munich court, apparently sent his son to Venice to further his musical education; but on his return the young man could not find work in Bavaria, and on 29 March 1729 he joined the electoral chapel at Bonn as *Titular-Kammerdiener und Hofmusikus mit dem Violoncell*. On 26 August 1738 he was appointed director of the court chamber orchestra. In spite of his Bonn appointment he was able to travel, going to London and other English towns in 1740, and apparently to Vienna in 1749 when a work by him for five cellos was performed. In 1753 he left the court to go to Verona. He seems to have remained in contact with the Munich court, and on 22 September 1766 (*VannesD*) was created a baron. He died on his estate in Arbizzano di Valpolicella at the age of 95.

Dall'Abaco's cello sonatas, despite the advent of the new *galant* and pre-Classical styles, retain the gravity of the Baroque and the broad melodic span inherited, through his father, from Legrenzi, Bassani, Vitali and Lully (nearly 40, including many autograph and a few anonymous ones, are in *GB-Lbl*, three in *D-Bsb* and one in *A-Wgm*; he also wrote a cantata for the Bonn court, apparently now lost). His reputation, however, was mainly as an instrumentalist, and his fame as a composer did not match his father's. (M. Marsigny: *Joseph Clemens*

Dall'Abaco (v.1708–1805) et la sonate pour violoncelle au 18e siècle, diss., U. of Louvain-la-Neuve, 1980)

PHILIPPE MERCIER

Dalla Casa, Giovanni. Brother of GIROLAMO DALLA CASA.

Dalla Casa, Girolamo [Girolamo da Udine] (*b* ?Udine; *d* Venice, *c*Aug 1601). Italian composer and instrumentalist. Together with his two brothers Giovanni (*b* ?Udine; *d* Venice, 25 April 1607) and Nicolò (*b* ?Udine; *d* Venice, 8 Feb 1617) he formed the first permanent instrumental ensemble at S Marco, Venice, where they were appointed on 29 January 1568. Their duties, which had previously been assigned to available instrumentalists on an *ad hoc* basis, included the performance of *concerti* in the organ lofts on major feast days. Girolamo's initial salary of 75 ducats, from which he was expected to pay additional members of his group, was increased to 90 ducats in 1572 and 100 ducats in 1582. The group gradually increased in size until the 1580s, when Girolamo was named *capo de' concerti* at the basilica, head of the (often substantial) group of players who were to inspire the canzonas and sonatas of Giovanni Gabrieli.

Girolamo is today known largely as the author of *Il vero modo di diminuir, libri I et II* (Venice, 1584), a treatise on ornamentation which gives many examples of embellished melodic lines from motets, madrigals and chansons as performed in Venice during the later 16th century. Among the exemplars are works by Janequin, Courtois, Willaert, Rogier, Gombert, Sandrin, Clemens non Papa, Palestrina, Lassus, Rore, Striggio, A. Gabrieli and P. de Monte (some ed. in Erig). His figuration relies a great deal on scalic movement and regular motion in quavers and semiquavers and applies the *gruppo* (or trill) at cadences. In contrapuntal works the themes are usually left unadorned so that the phrase structure is clear; in this respect Dalla Casa differs from Bassano, his colleague at S Marco: Bassano's treatises on ornamentation offer several contrasting examples based on the same vocal originals. Although Girolamo's motets survive in an incomplete state, the remaining parts are clearly amenable to ornamentation in the ways suggested by his treatise. Nicolò published a volume of *Canzoni et madrigali à quattro voci, libro secondo* (Venice, 1591) and one five-part madrigal appeared in a collection (RISM 1593[3]).

DENIS ARNOLD/ANDREA MARCIALIS

Dalla Casa, Nicolò. Brother of GIROLAMO DALLA CASA.

Dall'Aglio, Bartolomeo (*fl* Este, 1626–7). Italian composer and organist. In 1626–7 he was organist of Este Cathedral, as is stated on the title-page of his only known publication, *Messe a quatro voci, una concertata a voce piena e due a voci pari con alcuni motetti a una, due, tre, & quattro, con il basso per sonare ... libro primo* (Venice, 1627; the dedication is dated 22 December 1626). Its contents are typical of the large amount of concertato church music for small forces written by provincial musicians for local use in early 17th-century Italy. (*EitnerQ*; *GaspariC*, ii)

GIUSEPPE VECCHI

Dalla [Della] **Gostena** [Lagostena], **Giovanni Battista** (*b* Genoa, *c*1558; *d* Genoa, Aug 1593). Italian composer, uncle and teacher of Simone Molinaro. He was a pupil of Philippe de Monte at the court of Maximilian II in Vienna. He had returned to Genoa before 1582 and on 26 April 1584 he became *maestro di cappella* at the cathedral, a post he held until 1589. Dalla Gostena was in contact with the leading figures of the Genoese aristocracy and cultural life, in particular with the poets Angelo Grillo and Gabriello Chiabrera, and with the painter Bernardo Castello. He was murdered by Simone Fasce in August of 1593.

Dalla Gostena's first published work, *Ohimé lasso*, appeared in Monte's third book of four-voice madrigals. His own first book of madrigals appeared in Genoa in 1582. The fact that he gave the name of his teacher together with his own on the title page suggests that he had not reached the age of majority (25) when the book was published. Four more books of madrigals and canzonettas appeared in his lifetime and a number of works appeared after his death. His setting of Tasso's *Poiché d'un cor*, on the murder by Carlo Gesualdo of his wife, Maria d'Avalos, and her lover, Fabrizio Carafa, is lost.

A leading figure in the musical life of Genoa, Dalla Gostena was a skilled contrapuntalist who took care to characterize his texts. Although his style is essentially conservative, some of the madrigals experiment with chromaticism as does his Fantasia XXV (which, however, also survives with an attribution to Diomedes Cato).

MARIA ROSA MORETTI

Dallam [Dalham, Dallans, Dallow, D'Allam]. English family of organ builders.

(1) **Thomas Dallam** (*b* Lancashire, *c*1575; *d* after 1629). In 1599–1600 he travelled to Constantinople with a mechanical organ-and-clock for the Sultan, described in the state papers as 'a Great and Curious present … which will scandalise other nations'. Dallam's Turkish diary was published by the Hakluyt Society in 1893 (partly reproduced in Mayes (1956); *see also* BARREL ORGAN). On his return to England he established an unrivalled reputation, building new organs at King's College, Cambridge (1605–6; see Hopkins and Rimbault); Norwich Cathedral (1607–8) St George's Chapel, Windsor (1609–10); Worcester Cathedral (1613, to the scheme of Thomas Tomkins); Eton College (1613–14); Holyrood Palace, Edinburgh (*c*1615, case by Inigo Jones); St John's College, Oxford (*c*1617); Wells Cathedral (1620); Wakefield Cathedral (1620); Durham Cathedral (1621); and Bristol Cathedral (1629, with (2) Robert Dallam).

(2) **Robert Dallam** (*b* 1602; *d* Oxford, 31 May 1665). Son of (1) Thomas Dallam. Like his father, he dominated English organ building during his lifetime. In 1642, being a recusant Catholic (he described himself as 'organist to the Queen of England', meaning Queen Henrietta Maria), he escaped with his family to Brittany, and worked there until 1660, when he returned to England. He submitted an ambitious French-style scheme to New College, Oxford, in 1661, and though a smaller organ was in fact built, his French experience coloured English organs for the next 80 years. He built organs at York Minster (1632–4); Magdalen College, Oxford (*c*1632, played by John Milton; case and some pipes moved to Tewkesbury Abbey and Stanford-on-Avon, *c*1737); Jesus College, Cambridge (1634–8); St John's College, Cambridge (1635–8); Lichfield Cathedral (1639); Gloucester Cathedral (1640–41); Quimper Cathedral (1643–8, three organs); Plestin-les-Grèves (1653); Saint Jean du Doigt (1654); Lesneven (1654); Saint Pol-de-Léon Cathedral (1658–61, with (3) Thomas Dallam); St George's Chapel, Windsor (1660–61); Eton College (1662–3); and New College, Oxford (*c*1663). The last three were built with (4) Ralph Dallam and (5) George Dallam. His daughter Katherine married the organ builder Thomas Harrisson (or Harris), their son Renatus becoming particularly well known (*see* HARRIS).

(3) **Thomas Dallam,** Sieur de la Tour (*b* England, *c*1635; *d* Brittany, after 1720). Son of (2) Robert Dallam. After his father's return to England in 1660 he maintained the family's reputation in Brittany, where the cases of ten Dallam organs survive. He built organs at Daoulas (1667–9); Locronan (1671–2); Ergué-Gaberic (1680); Sizun (1683–4); Pleyben (1688–92); Landerneau (1690–94); Brest (1694–6); Rumengol; Morlaix; Ploujean; Guimiliau; and Guipavas. The organ in Daoulas Abbey was thought as late as 1790 to be one of the best in north-west France.

(4) **Ralph Dallam** (*d* London, 1673). Son of (1) Thomas Dallam. He probably made the pipes for his father's organ at New College, Oxford, in 1663. Organs built by him or his brother (5) George Dallam include those at Norwich Cathedral (1664); Norton by Galby (1664); and St Augustine, Hackney (1665). He also began work on the instruments at St Alfege, Greenwich (1672), and Christ's Hospital, London (1672), which were completed after his death by his partner, the harpsichord maker James White.

(5) **George Dallam** (*d* 1685). Son of (2) Robert Dallam. He built the organs at Durham Cathedral (1662) and Dulwich College (1668–9). He built no new organs after his brother's death.

(6) **Toussaint Dallam** (*b* Saint Pol-de-Léon, 1659). Son of (3) Thomas Dallam. He assisted his father in the repair of organs in Brittany. On the death of his uncle (5) George Dallam he went to England to finish work at Dulwich College.

(7) **Marc-Antoine** [Mark Anthony] **Dallam** (*b* Daoulas, 1673; *d* York, 1730). Son of (3) Thomas Dallam. He arrived in England about 1710, probably undertaking tuning and maintenance for his cousin Renatus Harris. He built new organs at Whitchurch (1730) and Southwell Minster (chair organ, 1730).

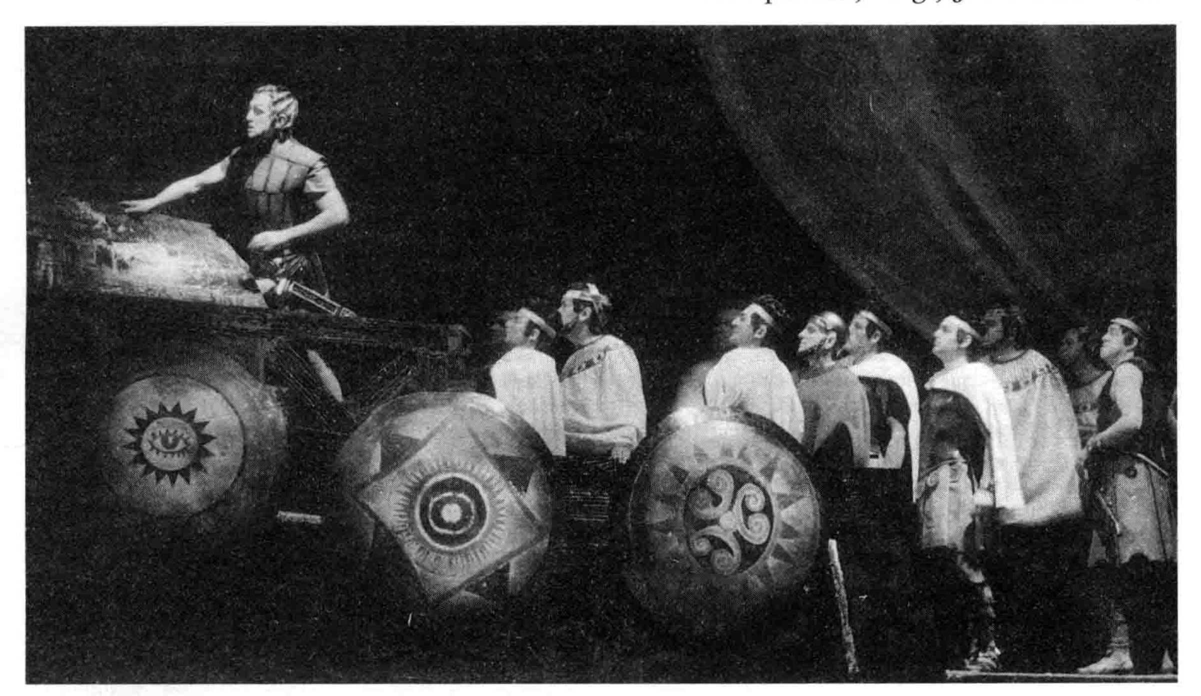
STEPHEN BICKNELL/MICHEL COCHERIL

Dallapiccola, Luigi (*b* Pisino d'Istria [now Pazin, Istra, Croatia], 3 Feb 1904; *d* Florence, 19 Feb 1975). Italian composer, pianist and writer. He was the principal pioneer of dodecaphony in Italy.

1. LIFE. The seeds of Dallapiccola's intense concern for liberty were sown early: born of Italian parents in a disputed territory (then part of the Austrian empire), he was still a child when the grimmer political realities of the time first affected him. In 1916 his father's school was closed by the Austrian government, and in March 1917 the family was interned at Graz, being suspected of Italian nationalism. Only after the war (21 November 1918) could they return to Pisino, Istria having been transferred to Italy.

During these early years Dallapiccola's musical education was inevitably disordered. Already in 1912–16 he



was learning the piano and even trying to compose. In Graz, where he no longer had access to a piano, his musical horizons nevertheless expanded: he went regularly to the local opera house, where he was impressed by the works of Mozart and Wagner. It was after a performance of *Der fliegende Holländer* in 1917 that he became fully aware of his vocation as a composer. Back in Istria, he was by 1919 growing discontented with the small-town limitations of Pisino. He therefore made weekly visits to Trieste to study the piano and harmony, the latter under the composer Antonio Illersberg; and he also travelled more widely: it was at Bologna that he came to know of Debussy, whose music (notably some of the piano pieces, *Pelléas* and *Ibéria*) soon began to obsess him. So strong, indeed, was Debussy's impact that in 1921 Dallapiccola stopped composing and did not start again until 1924, to give himself time to absorb this important influence. At about the same time as his discovery of Debussy, Illersberg aroused in him an enthusiasm (shared by many important Italian composers of the day) for early Italian music, notably that of Monteverdi and Gesualdo.

In 1922, having finished his general education, Dallapiccola moved to Florence, where he became a private piano pupil of Ernesto Consolo, entering the conservatory as a student of harmony and composition in the following year. His first composition teacher there (1923–4) was Roberto Casiraghi; later (1929–31) he attended the class of Vito Frazzi, a disciple of Pizzetti. In 1924 he had another crucial experience (not destined to bear fruit in his own works till many years later) when a performance of *Pierrot lunaire*, at a concert organized by Casella's Corporazione delle Nuove Musiche, first brought him into contact with the music of the Second Viennese School. Soon afterwards, having gained his diploma as a pianist, Dallapiccola began teaching and giving recitals – notably, from 1930, in duo with the violinist Sandro Materassi. In 1930 he visited Vienna and Berlin; in the former city Mahler's First Symphony came as another major revelation to him. In 1930–31 he taught the piano at the Florence Conservatory, as Consolo's substitute during his final illness; but it was not until 1934 that he gained an official teaching post, that of professor of 'pianoforte complementare' (i.e. the piano as a secondary study) at the same conservatory. He remained in this post until his retirement in 1967.

The mid-1930s were a particularly important period in Dallapiccola's development. His musical horizons continued to broaden: by now the music of Busoni, Berg and Webern had entered his field of vision, and he got to know Berg personally in 1934. Meanwhile he was himself becoming known as a composer, greatly helped by Casella's propaganda on his behalf: though more naturally in sympathy with G.F. Malipiero (a hearing of whose *Torneo notturno* in 1932 was yet another important milestone in his experience), Dallapiccola nevertheless retained a profound sense of gratitude to Casella for all he did to further his career, like those of so many other young musicians, in that period. Meanwhile important developments were taking place in Dallapiccola's inner life, with profound repercussions on his music. His preoccupation with liberty had lain comparatively dormant since its first awakening in his troubled childhood: indeed, until the mid-1930s (like so many Italians of otherwise sound judgment) he was sufficiently misled by Mussolini's flair for propaganda to give surprisingly whole-hearted support to the fascist regime. But his political views began to change under the impact of the Abyssinian campaign and the Spanish Civil War: as he himself put it, 'the world of ... carefree serenity closed for me, and without the possibility of return ... I had to find other timber in other woods' (1970, p.138; 1980, p.381). Soon afterwards, a mood of impassioned political protest found expression in his music, especially in the *Canti di prigionia* and *Il prigioniero*. The former was first conceived when Mussolini adopted Hitler's race policies (thus threatening the safety of Dallapiccola's Jewish wife), while both works gained still greater urgency under the cumulative experience of World War II. Dallapiccola's refusal at this time to bow to the dictates either of fascism or (in due course) of the occupying Nazis inevitably handicapped his career. But only for a short while was he forced to withdraw entirely, first (October 1943 to February 1944) into the relative safety of the village of Borgunto, outside Florence, and then (March to September 1944) into hiding in various apartments in Florence, including that of Materassi. Otherwise he managed to go on giving recitals, though only, as a matter of principle, in countries not occupied by the Nazis, notably Hungary and Switzerland. He nevertheless seized the opportunity, when passing through Austria in 1942, to meet Webern.

After 1945 Dallapiccola's life was relatively free from external disturbances. A few obstructive antagonisms survived from the war years, but on the whole he had little difficulty in resuming all his old activities and in adding a few new ones: for example, for two and a half years from 1945 he regularly wrote for the Florentine periodical *Il mondo* (soon renamed *Il mondo europeo*). In 1946 he played a major part in getting Italian composers readmitted to the ISCM, at whose first postwar festival the *Canti di prigionia* at last came before a large public, revealing Dallapiccola's major stature to the world at large. During the 1950s his travels abroad became even more wide-ranging: in 1951 Koussevitzky invited him to give a summer course at Tanglewood, and thereafter he visited the USA regularly, sometimes for quite long periods. He continued to travel in western Europe too, and his easy command of German, French and English, combined with his wide culture and his warm humanity, won him international success as a lecturer and so assisted the spread of his music. By the time of the première of his opera *Ulisse* (1968; fig.1), the eyes of the whole musical world were upon him; and if the critics may not on that occasion have been unanimous in their praise, that première may nevertheless be regarded as the climax of Dallapiccola's postwar career. After *Ulisse* he composed only intermittently: for several months after completing the work he concentrated instead on assembling and adapting his most important lectures and writings for the volume *Appunti, incontri, meditazioni*. In 1972 a brief crisis in his health persuaded him to curtail his travels and public activities and lead a more sedentary life. Thereafter he completed no more compositions, though a few fragments have survived, among them a sketch for the opening of a vocal work, left on his piano a few hours before his death.

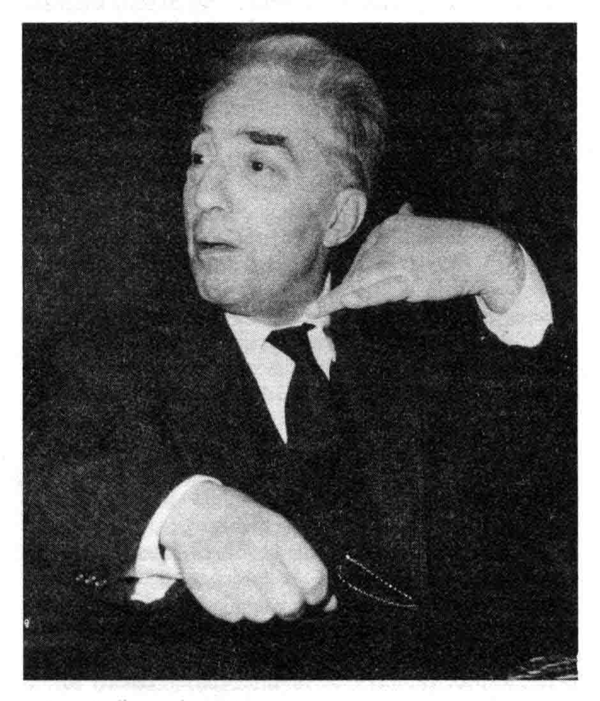
2. Works. Dallapiccola's music of the 1920s (apart from one movement printed in revised form in a periodical) is unpublished and long since repudiated: it was not available for study during the greater part of his life, and even now (in accordance with his wish that these

1. *Scene from Dallapiccola's 'Ulisse', Deutsche Oper, Berlin, 1968, with Erik Saedén in the title role*

pieces should not be performed) it is accessible only under strict protective controls. Nevertheless, as well as reflecting various influences these juvenilia already sometimes reveal his emerging personality: the last two songs in *Dalla mia terra* contain early manifestations of his interest in organized counterpoint; while the tense, passionate side of his nature is evident, for example, in the *Due laudi di Fra Jacopone da Todi*. Dallapiccola was still, however, worlds away even from rudimentary dodecaphony, and the same is true in his works of the early 1930s. Some of his pre-1935 music is almost completely diatonic – consciously archaic in its modal polyphony, and indebted to that 'neo-madrigalian' tradition established before World War I in the choral music of Pizzetti. Dallapiccola's most important essay in straight neo-madrigalism is the first pair of *Cori di Michelangelo Buonarroti il giovane*.

Alongside these explicitly 'archaic' compositions Dallapiccola was writing others juxtaposing diatonicism with a quite bold and intense chromaticism. Although the results are sometimes damagingly eclectic (this is the case in the uneven though imaginative *Partita*), hindsight reveals that he was groping towards his mature style from several directions at once. Moreover, his feeling for soft, evocative, multi-coloured instrumentation was evident from an early stage: his characteristic blend of Debussian sensuousness and Busonian ethereal contemplation led D'Amico to write (in 1947) of the 'soft and starry clime' of many of Dallapiccola's calmer, more lyrical textures.

Dallapiccola's development in the mid-1930s is epitomized in the stylistic changes between the first pair of *Cori di Michelangelo* and the last; although the three pairs were intended to be performed together, they do not form a homogeneous whole. The sombrely evocative *Coro degli Zitti*, in particular, is utterly remote from the radiant archaisms of the first pair. Some passages recall, in their rhythm and harmonic movement, the Sarabande in Busoni's *Doktor Faust*, while Dallapiccola's chromatic tendencies, though still interacting with diatonic elements, for the first time reveal his awareness of the Schoenberg school: this *Coro* makes sporadic but obviously deliberate use of two 12-note series.



Several years, however, elapsed before Dallapiccola began to use series systematically, rather than incidentally as melodies. In the beautiful *Tre laudi* the vocal line starts with a 12-note phrase (accompanied by a B major triad) followed by its retrograde; but this symmetrical serial unit is followed by a diatonic instrumental canon. Even so, modal and chromatic elements have achieved an inner equilibrium (as they have not yet in some earlier works), which makes such juxtapositions acceptable. Furthermore, the diatonic jubilation of the second *laude*, being dissonantly contrapuntal rather than triadic in basis, no longer has the down-to-earth, carefree quality still found, for example, in the *Coro dei Lanzi briachi* or the *Musica per tre pianoforti* – cf Dallapiccola's remarks, quoted earlier, about the impact on him of Mussolini's Abyssinian campaign. He was in fact exaggerating slightly in claiming that the 'world of carefree serenity' was now closed to him permanently. Nevertheless, the few post-1935 works which do re-enter that world are special cases, such as the disarmingly relaxed and radiant *Piccolo concerto per Muriel Couvreux*, dedicated to a child. The serenity to be found in Dallapiccola's other later music is, by contrast, of a different, usually more contemplative or otherworldly kind.

Dallapiccola's first stage work, *Volo di notte*, re-uses material from the *Tre laudi*. This transference of music originally associated with medieval religious texts to an opera about night flying in the Andes is less incongruous than it may seem, for Dallapiccola's libretto contains a strong element of religious symbolism. When, at the climax, the pilot Fabien rises above the storm and, just before death, glimpses the infinite, eternal beauty of the stars, his experience has mystical connotations: for

Dallapiccola the stars were a symbol of God (the same equation recurs, with a significant musical quotation from the earlier opera, in the final scene of *Ulisse*). *Volo di notte*, though richly imaginative, is rather mixed in style; the passages which do not derive from the *Tre laudi* sometimes reach out far into the realms of Bergian atonality, with at least one full 12-note chord.

In subject matter, the opera reflects Dallapiccola's growing concern about the predicaments of modern man. From there it was a short step to his first piece of overt 'protest music'. The *Canti di prigionia*, which can be rated among his highest achievements, are nevertheless in some ways atypical – the accompaniment, entirely for non-sustaining and semi-sustaining instruments, is closer to Stravinsky's *The Wedding* than to the soft, clarinet-and-viola-dominated textures found in so much of his own other music. In the *Canti* the only truly sustained notes are those of the voices, the effect being powerfully symbolic of humanity clinging to life amid menacing destructive forces. Nevertheless, the work follows on from the *Tre laudi* in coordinating modal elements (including fragments of the *Dies irae*) with two 12-note series. The latter are mostly confined to the more turbulent sections, in which the eruptively emphatic side of Dallapiccola's nature makes an unprecedentedly powerful impact. At the other end of the work's emotional spectrum there are passages, such as the middle section of the central movement, where modal lines interlace in textures of truly celestial calm: here, like Fabien, the music 'rises above the storm', giving a glimpse of the ultimate beauty which lies beyond, with its promise of liberation in the hereafter.

The second outstanding piece of 'protest music', *Il prigioniero*, is more pessimistic. Here the idiom is wholly if idiosyncratically dodecaphonic (several series are employed and free use is made of octave doubling and other irregularities): the series often, however, contain diatonic,

2. *Luigi Dallapiccola, 1969*

even pentatonic segments, which are prominently featured to symbolize the liberty for which the prisoner yearns, spurred on by the gaoler's golden promises. In the end this liberty is revealed as illusion (there is an insubstantial, mirage-like air about the liberty music throughout) and the work ends with a gaping question mark. Despite these differences, *Il prigioniero* can be regarded as, in many respects, a sequel to the *Canti di prigionia*, from which the opera's last choral section quotes. But *Volo di notte*, too, is an important predecessor: both operas owe a fair amount to Berg's influence – refracted, however, through Dallapiccola's profoundly Italian personality.

Dallapiccola has written that 'if one side of my nature demanded tragedy, the other attempted an escape towards serenity'. Nowhere is the truth of this remark more apparent than in his music of the 1940s, for it was between his two great 'protest' works, and during the worst years of the war, that he wrote two notable compositions which seek refuge in the remote, stable world of classical literature and mythology. *Marsia* is his last purely original work featuring straight diatonicism, to which he subsequently returned only in pieces on themes by Paganini and Tartini. The *Liriche greche*, by contrast, are his earliest completely dodecaphonic composition; but Dallapiccola's dodecaphony, here as in *Il prigioniero* (though to very different effect), has diatonicism absorbed into it, inherent in the interval structures of the series. This fact, combined with the continued 'soft and starry' quality of the instrumentation, places these exquisite songs firmly in the line of succession of the *Tre laudi* and worlds away from the Schoenbergian spirit.

If Dallapiccola's serial methods of the 1940s were unorthodox, and in some ways naive, the 1950s saw a marked refinement in his technique: 'crudities' such as octave doubling were eliminated, his rhythms became more flexible, his lines more angular, his textures more intricately organized. *Job*, though relatable in some ways to *Il prigioniero*, is his first large-scale work based mostly on a single series; and his immediately subsequent compositions show increasing signs of Webern's influence. The extent (and limitations) of this new influence can be seen if one places the *Goethe Lieder* alongside the Austrian composer's similarly scored op.16 canons: Dallapiccola's contrapuntal processes are comparable though less rigid, and he obviously learnt much from Webern's rhythmic and melodic methods; yet the fact that even here the basic series contains diatonic segments (one of five notes, one of six) is itself enough to prevent the result from sounding like Webern, and to establish a link with Dallapiccola's pre-1950 music. Nor had he lost sight of his earlier debt to Busoni: the *Piccola musica notturna* (perhaps his most perfect instrumental work) is a latter day, dodecaphonic counterpart to the older composer's *Berceuse élégiaque*.

From the mid-1950s Dallapiccola's style reached a state of stability: the new Webernian influence became absorbed, like its predecessors, into a personal language now of exceptional sensitivity, which thereafter changed very little. This stylistic stabilization entailed sacrifices: gains in refinement are offset by losses in dramatic impetus, and it is no accident that Dallapiccola's most universally accepted later pieces have on the whole been short and lyrical. Probably the most perfect embodiments of his late manner are the numerous further pieces for solo voice with instrumental ensemble, pieces whose

ancestry can still be traced back, through the *Liriche greche*, to the *Tre laudi* and beyond. The basically unchanging style of these later vocal works does not prevent them from giving apt expression to widely varied texts: compare, for instance, the *Cinque canti*'s picturesque word-painting with the subdued philosophizing of the *Parole di San Paolo*, or with the alternations between mystical contemplation and fierce, incandescent emphasis in the superb *Concerto per la notte di Natale dell'anno 1956*. Nor are there signs of declining inspiration even in such very late pieces as the *Commiato*, or the disarming *Sicut umbra* in which Dallapiccola's star fixation shows itself in a new way: musical figures are devised so that they look on paper like well-known constellations, while sounding as 'soft and starry' as ever.

Dallapiccola's larger pieces of his last 25 years proved more controversial. The set of *Canti di liberazione*, his third major composition on the theme of liberty, is the subtlest of the three in texture and rhythm. For this very reason, however, the work is less immediate in impact than are the *Canti di prigionia* and *Il prigioniero*; taken as a whole it lacks those pieces' overwhelming urgency, despite many impassioned pages. In *Ulisse* (his largest and most ambitious composition), too, it would be a mistake to look for the dramatic tension of *Il prigioniero* (the idiom is that of the post-1955 songs writ large). After its première the opera was criticized for its lack of theatrical qualities and for the uniformly slow pace underlying long stretches of the music. Later performances have, however, revealed that a less naturalistic, more stylized and oratorio-like production can make a much more favourable impression; and in any case several individual scenes (including the whole prologue) show imaginative qualities of the highest order. Being essentially a restrained philosophical meditation on modern man's search for a meaning to existence, *Ulisse* is never likely to be popular. But it will surely be remembered, and time may even put it in the same category as, say, Busoni's *Doktor Faust*. Moreover, in bringing together on a large canvas many characteristics seen separately in the preceding smaller pieces, the opera forms a culminating point in Dallapiccola's output.

WORKS

DRAMATIC

Volo di notte (op, 1, Dallapiccola, after A. de Saint-Exupéry), 1937–9, Florence, Pergola, 18 May 1940
Marsia (ballet, 1, A.M. Miloss), 1942–3, Venice, Fenice, 9 Sept 1948
Il prigioniero (op, prol, 1, Dallapiccola, after V. de l'Isle Adam, C. de Coster), 1944–8, RAI, 1 Dec 1949, staged Florence, Comunale, 20 May 1950 [also version with reduced orch, 1950]
Job (sacra rappresentazione, 1, Dallapiccola, after Bible), 1950, Rome, Eliseo, 30 Oct 1950
Ulisse (op, prol, 2, Dallapiccola, after Homer), 1960–68, Berlin, Deutsche Oper, 29 Sept 1968
3 film scores: 1948 (lost), 1948 (lost), 1953

CHORAL

Due canzoni di Grado (B. Marin), Mez, small female chorus, small orch, 1927, unpubd
Dalla mia terra (Istrian trad.), Mez, chorus, orch, 1928; only 3rd song pubd, in rev. version in *Agorá* [Turin], ii/8 (1946)
Due laudi di Fra Jacopone da Todi, S, Bar, chorus, orch, 1929, unpubd
Due liriche del Kalevala (trans. P.E. Pavolini), T, Bar, chbr chorus, perc, 1930; only no.1 pubd, in *Revue internationale de musique*, no.1 (1938), suppl.
La canzone del Quarnaro (G. D'Annunzio), T, male vv, orch, 1930, unpubd
Estate (Alcaeus, trans. E. Romagnoli), male vv, 1932
Sei cori di Michelangelo Buonarroti il giovane: Il coro delle malmaritate and Il coro dei malammogliati, chorus, 1933; I balconi della rosa and Il papavero, small boys'/female ens, 17 insts, 1934–5; Il coro degli Zitti and Il coro dei Lanzi briachi, chorus, orch, 1935–6
Canti di prigionia (Queen Mary Stuart, Boethius, G. Savonarola), chorus, 2 pf, 2 hp, perc, 1938–41
Canti di liberazione (S. Castellio, Bible: *Exodus*, St Augustine), chorus, orch, 1951–5
Requiescant (St Matthew, O. Wilde, J. Joyce), chorus, orch, 1957–8
Tempus destruendi – Tempus aedificandi (Paulinus Aquileiensis, Dermatus), chorus, 1970–71

SOLO VOCAL

Early songs (Marin), 1v, pf, 1924–6, unpubd
Partita (medieval Lat.), S in finale, orch, 1930–32
Tre studi (*Kalevala*, trans. Pavolini), S, chbr orch, 1932, unpubd
Rapsodia, studio per La morte del Conte Orlando (*Chanson de Roland*, trans. G. Pascoli), 1v, chbr orch, 1932–3, unpubd
Divertimento in 4 esercizi (13th century), S, fl + pic, ob, cl, va, vc, 1934
Tre laudi (Laudario dei Battuti, Modena, 1266), S/T, 13 insts, 1936–7
Liriche greche (trans. S. Quasimodo): 5 frammenti di Saffo, 1v, 15 insts, 1942; 6 carmina Alcaei, 1v, 11 insts, 1943; 2 liriche di Anacreonte, 1v, 2 cl, va, pf, 1944–5
Rencesvals (*Chanson de Roland*), Mez/Bar, pf, 1946
Quattro liriche di Antonio Machado, S, pf, 1948, arr. S, chbr orch, 1964
Tre poemi (Joyce, trans. E. Montale; Michelangelo; M. Machado, trans. Dallapiccola), S, 14 insts, 1949
Goethe Lieder, Mez, 3 cl, 1953
An Mathilde (H. Heine), S, orch, 1955
Cinque canti (Gk., trans. Quasimodo), Bar, 8 insts, 1956
Concerto per la notte di Natale dell'anno 1956 (Jacopone da Todi), S, chbr orch, 1957, rev. 1958
Preghiere (M. Mendes, trans. R. Jacobbi), Bar, chbr orch, 1962
Parole di San Paolo, Mez/boy's v, 11 insts, 1964
Sicut umbra (J.R. Jiménez), Mez, 12 insts, 1970
Commiato (attrib. B. Latini), S, 15 insts, 1972

INSTRUMENTAL

Musica per tre pianoforti (Inni), 1935
Piccolo concerto per Muriel Couvreux, pf, chbr orch, 1939–41
Sonatina canonica, pf, 1942–3 [after Paganini]
Ciaccona, intermezzo e adagio, vc, 1945
Due studi, vn, pf, 1946–7, adapted as Due pezzi, orch, 1947
Frammenti sinfonici, orch (1947) [from ballet Marsia]
Tre episodi, pf, 1949 [from Marsia]
Tartiniana, vn, orch, 1951 [after Tartini]
Quaderno musicale di Annalibera, pf, 1952, adapted as Variazioni, orch, 1954
Piccola musica notturna, orch, 1954, adapted for fl, ob, cl, hp, cel, str trio, 1961
Tartiniana seconda, vn, pf/orch, 1955–6
Dialoghi, vc, orch, 1959–60
Three Questions with Two Answers, orch, 1962

JOHN C.G. WATERHOUSE (bibliography with VIRGILIO BERNARDONI)

Dall'Aquila, Marco [Adler, Marx vom] (*b c*1480; *d* after 1538). Italian lutenist and composer. In 1505 the Venetian Signory granted him a ten-year privilege to publish lute tablatures in competition with Petrucci. Although no publications issued under this licence are known, the main source of Dall'Aquila's works (*D-Mbs* 266) may have been copied from a printed tablature now lost. His reputation was such that in about 1524 Pietro Aaron consulted him on a question of music theory, to the amazement of Giovanni Spataro who doubted whether a 'musician [Aaron] should seek to have the light of intelligence from a strummer of instruments'; Pietro Aretino, in a letter from Venice dated December 1537, mentioned 'my master Marco Dall'Aquila'.

Stylistically and chronologically Dall'Aquila stands slightly before Francesco da Milano, his junior by some 15 years. Although his prelude and two of the ricercares emulate the quasi-improvisatory abstract pieces by Petrucci's lutenists (published between 1507 and 1511), most of his ricercar-fantasias are mature examples of the point-of-imitation and dialogue style that Francesco later brought to a 'classic' phase. Dall'Aquila preferred the structural repetition of the frottola and Parisian chanson to the traditional continuously evolving form. His pieces are exceptional for their exploitation of figures, idioms and sonorities suited to the lute: a *ricercar senza canto* uses only the five lowest courses; another ricercare begins with brilliant passage-work on the lowest course, then the next highest course is added in a duo, and gradually the other courses are introduced until all strings are brought into simultaneous play.

In the preface to Francesco da Milano's 1536 lute publication, Francesco Marcolini cited him, Dall'Aquila and Alberto da Ripa as the three worthy successors of Giovanni Maria Alemanni (Hebreo) and Giovanni Angelo Testagrossa in the founding of a new style of lute music, an assessment fully justified by Dall'Aquila's compositions.

WORKS

3 fantasias in 1536[10] (repr. 1552[29], 1552[31]); 1 ed. in GMB
14 ricercar-fantasias, 6 chanson intabulations (incl. Passereau's Il est bel et bon and Janequin's La bataille), 1 prelude, 1 setting of the traditora dance formula, *D-Mbs* Mus.ms.266, ff.21*r*–61*v*

ARTHUR J. NESS

Dall'Argine, Costantino (*b* Parma, 12 May 1842; *d* Milan, 1 March 1877). Italian composer and conductor. His father, Luigi Dall'Argine (*b* Parma, 24 March 1808; *d* Parma, 11 Jan 1869), was a tenor and conductor. Costantino studied composition at Busseto and at the Milan Conservatory. He became famous for his ballets, of which he wrote more than 30; they owed their success to a facile brilliance conforming to the taste of the day: *Brahma* was acclaimed as a symbol of traditional Italian music in opposition to Boito's avant-garde tendencies when it was performed with his *Mefistofele* at La Scala (7 and 8 March 1868). Dall'Argine composed three operas. Two were performed in Milan in 1867: *I due orsi* (ob, 3, A. Ghislanzoni; S Radegonda, 14 Feb) and *Il diavolo*

zoppo (A. Scalvini; Fossati, 10 Dec). His unsuccessful attempt to set *Il barbiere di Siviglia* (C. Sterbini; Bologna, Comunale, 11 Nov 1868; vs, Bologna, *c*1870) aroused sharp but short-lived controversy, followed by rapid and complete oblivion for this mediocre score, dedicated to Rossini. Dall'Argine had a successful career as a theatre conductor in Italy, Egypt, Spain and the USA. His son Luigi Dall'Argine (*b* Imola, 10 Aug 1875; *d* Milan, 22 Feb 1950), studied in Milan and in Spain and was a composer of operettas.

FRANCESCO BUSSI

Dalla Rizza, Gilda (*b* Verona, 12 Oct 1892; *d* Milan, 4 July 1975). Italian soprano. She studied with Alerano Ricci at Bologna, making her début there in 1912 as Charlotte. She created Magda in *La Rondine* at Monte Carlo (1917) and was also the first Italian Suor Angelica and Lauretta (1919, Rome); at the first Covent Garden performances (1920) she failed to repeat her successes in these roles. After a performance of *La fanciulla del West* at Monte Carlo in 1921 Puccini said, 'At last I've seen my Fanciulla'; although he wrote Liù with her in mind, the role was created by another singer. Having first appeared at La Scala in 1915 as Yaroslavna (*Prince Igor*), she was engaged there from 1923 to 1939; her Violetta caused a sensation. She created 13 of the 58 roles in her repertory, including Zandonai's Giulietta and Mariella in Mascagni's *Il piccolo Marat*; she was the first Italian Arabella at Genoa in 1936. She retired from the stage in 1939, but played Angelica once more during the 1942 Puccini celebrations at Vicenza. A beautiful woman, generally considered a great singing actress, she was called the 'Duse of the Lyric Theatre'. Her early, acoustic recordings give a fair indication of why her impassioned singing was so much admired by her contemporaries.

HAROLD ROSENTHAL/R

Dall'Arpa, Giovanni Leonardo. *See* DELL'ARPA, GIOVANNI LEONARDO.

Dallas. American city in Texas. It is a centre of mercantile industry, high technology, electronics and aerospace manufacturing and finance, and one of the most important cultural centres in the south-west USA. The city's formal musical life began with Gilbert and Sullivan's *Iolanthe*, which opened the first Dallas Opera House on 15 October 1883; the house served itinerant musicians, acting troupes and touring opera companies for some years. In 1913 a committee appointed by the chamber of commerce invited the Chicago Grand Opera Company to visit the city and for about 20 years Texans heard such singers as Garden, Tetrazzini, Dalmorès and Chaliapin. During the 1930s Fortune Gallo took his San Carlo Opera Company to Dallas. In 1939, under the auspices of the Dallas Grand Opera Association, the Metropolitan Opera included Dallas in its annual tour and, except for 1941 to 1943 and 1961, returned every year until 1984, the year before domestic touring was discontinued.

The Dallas SO was founded in 1900 as the Dallas Symphony Club under the direction of Hans Kreissig, an itinerant German-born pianist and conductor; an ensemble of about 35 musicians, it continued under various conductors (Walter Fried, 1905–11 and 1918–24; Carl Venth, 1911–14; Paul Van Katwijk, 1925–38; Jacques Singer, 1938–42) until it was reorganized as a full-size orchestra under Antal Dorati in 1945. Four years later Walter Hendl became both the orchestra's first American conductor and, at 32, the youngest conductor to lead a major American orchestra. He was followed in 1958 by Paul Kletzki, who conducted until 1961, the year in which Georg Solti was appointed senior conductor. Solti left after one season because of disagreements with the symphony board, and was replaced in 1962 by the former assistant conductor Donald Johanos, who remained until 1970. Anshel Brusilow then tried unsuccessfully to combine the orchestra's popular and serious appeal, and was replaced in 1973–4 by Max Rudolf as artistic adviser. $1 million in debt, the orchestra suspended activities in March 1974, but was able to resume concerts in February 1975 under its guest conductor Louis Lane. Eduardo Mata was appointed music director in 1977 and held that position until 1994. Mata oversaw the rebuilding of the orchestra, enlarging it, strengthening its membership, actively pursuing a recording programme and exploring Hispanic repertory in its concerts. He was succeeded by Andrew Litton in 1994.

The Dallas SO season comprises 21 subscription programmes given three or four times each, plus a pops series and a summer festival of both orchestral and chamber performances. After 1919, performances took place in City Hall Auditorium until Fair Park Music Hall (cap. 4126) was built in 1936 for the Texas Centennial and Pan American Exposition. Between 1962 and 1972 concerts were held in McFarlin Memorial Auditorium (cap. 2404) at Southern Methodist University. In 1972 the orchestra returned to Fair Park Music Hall (now renovated, cap. 3420), a multi-purpose facility also used for performances by the Dallas Opera. The 180-voice Grand Chorus (founded 1942) from nearby North Texas State University frequently appeared with the Dallas SO until the formation of the Dallas SO Chorus (founded 1977). By then it was apparent that Fair Park Music Hall was an inadequate and acoustically inferior venue for the orchestra. The Dallas SO board determined that the orchestra's long-range success depended upon a permanent home with superior acoustics; and they opted for reduced capacity and design features emulating the Musikverein in Vienna and the Concertgebouw in Amsterdam. In 1982 Dallas voters approved a bond issue for an unusual public/private partnership to guarantee funding for the new concert hall. The Morton H. Meyerson Symphony Center, designed by architect I.M. Pei and acoustician Russell Johnson, with a capacity of 2062, opened in 1989 to wide critical acclaim and is considered one of the finest concert halls in North America (see illustration). The new facility allowed the orchestra to expand to a full-year season and resulted in the establishment of an independent orchestra for the Dallas Opera. The installation of the Lay Family Concert Organ in 1992 by the C.B. Fisk company added to the hall's prestige. The Dallas SO sponsored the first triennial Dallas

Eugene McDermott Concert Hall, Morton H. Meyerson Symphony Center, Dallas, opened 1989

International Organ Competition in 1997. The Meyerson Symphony Center has increased awareness of music in Dallas and provided a venue for dozens of performing organizations as well as its principal tenant, the Dallas SO.

In 1957 the Dallas Civic Opera was founded with Lawrence Kelly, former manager of the Chicago Lyric Theatre, as general manager and Nicola Rescigno as musical director. A performance of *L'italiana in Algeri*, designed by Zeffirelli and starring Simionato, in Fair Park Music Hall on 12 November 1957 inaugurated the company's activities; using international and local casts it presents a wide repertory. Callas played Cherubini's Medea in 1958, the year the Dallas Civic Opera established an annual autumn season of three or four productions. During the next 40 seasons the company produced 102 different operas, including the world première of Argento's *The Aspern Papers* and the American premières of Handel's *Alcina*, Monteverdi's *L'incoronazione di Poppea* and Vivaldi's *Orlando furioso*. Many singers have made their US operatic débuts in Dallas, including Sutherland (in *Alcina*), Berganza, Alva, Caballé, Vickers, Olivero and Domingo. In 1974 Kelly died and Rescigno was appointed general manager for two years. He became artistic director in 1977, when Plato Karayanis was appointed executive director, and held that position until 1990. Graeme Jenkins was appointed music director in 1994. Until 1989 the Dallas Opera drew its orchestra from the Dallas SO. After the opening of the Meyerson Symphony Center in 1989, the Opera formed its own instrumental ensemble, drawing on freelance musicians in the Dallas area and graduates of the area's three major music schools: Southern Methodist University, University of North Texas and Texas Christian University. The company presents five or six operas a season, each performed four times. It weathered Dallas's economic collapse in the 1980s, largely through conservative programming which helped to maintain financial stability. In a statement issued in 1994, the Dallas Opera expressed a stronger commitment to 20th-century and new works, and to innovatory new productions of standard repertory.

Other musical activities in Dallas have risen and fallen with the city's economy. A recital series sponsored by the Dallas Civic Music Association (founded 1930, renamed Allegro Dallas in 1989) was discontinued in 1992, when the city was emerging from recession. The Lyric Opera Theatre of Southern Methodist University, founded in 1950, performed two to four operas a year and gave concert performances of American one-act operas. In 1983 its function was subsumed by the newly founded Public Opera (1984; renamed Lyric Opera of Dallas in 1987), which performed Gilbert and Sullivan and opera until 1992, when it too fell victim to a faltering economy. Chamber music has thrived in Dallas, particularly in the closing decades of the 20th century. Visiting string quartets and other chamber ensembles are sponsored by the Dallas Chamber Music Society (founded 1942), one

of the oldest such societies in the USA. Voices of Change (founded 1974), an ensemble-in-residence at Southern Methodist University devoted to the performance of music by living composers, has commissioned more than 20 compositions and given over 40 world premières. Other well-established presenters are the Richardson Chamber Music Society (1989; renamed Chamber Music International in 1996), Walden Chamber Music Society (1981), Fine Arts Chamber Players (1981) and Dallas Classic Guitar Society (1969). The Dallas Bach Society (1982) presents performances of vocal and instrumental music before 1800, sometimes using period instruments. The Richardson SO (1961) and Dallas Chamber Orchestra (1977) have been joined in recent years by other community orchestras in surrounding suburbs. The city is home to many choruses, including the Turtle Creek Chorale, the Vocal Majority barbershop chorus, the Women's Chorus of Dallas and Mesquite Civic Chorus.

Fort Worth, 65 km from Dallas, is the home of the Texas Boys' Choir and the Fort Worth Opera Association, both founded in 1946, the Chamber Music Society of Fort Worth (1989) and the Fort Worth SO (1925), which performed at the Tarrant County Convention Center from 1968 to 1998, when it moved to the new Nancy Lee and Perry R. Bass Performance Hall. In addition to its regular season, the Fort Worth SO presents a chamber orchestra series at Texas Christian University's Ed Landreth Auditorium, and is the quadriennial host of the Van Cliburn International Piano Competition. The Cliburn Foundation also presents a recital series. These series and the Cliburn Competition all relocated to the Bass Performance Hall in 1998.

SUSAN THIEMANN SOMMER/LAURIE SHULMAN, DONNA MENDRO

Dalla Tavola, Antonio (*b* Padua; *d* Padua, 10 June 1674). Italian composer. He was a monk. In 1634 he was director of music in Montagnana in the Veneto, and in 1640 *maestro di cappella* of S Antonio, Padua. He published a book of masses for three to eight voices and continuo (Venice, 1634) and wrote music for *L'amor pudico*, a *torneo a cavallo* by Pio Enea degli Obizzi produced at Padua in 1643.

□

Dalla Viola [della Viola, de la Viola, Viola]. Italian family of musicians. They were active at Ferrara from about 1470 to about 1570. The relationship between them has not been firmly established. Apart from those discussed below, Andrea dalla Viola served the Ferrarese court from 1470 to 1506, and his brother, Zampaulo, was a court instrumentalist from 1478 to about 1500, and still active in 1512. One of Andrea's sons, Agostino, also known as Agostino da Ferrara, was a well-known singer and instrumentalist at the court from about 1497 to 1522.

(1) Alfonso dalla Viola (*b* Ferrara, *c*1508; *d* Ferrara, *c*1573). Composer and instrumentalist, possibly the illegitimate son of Agostino dalla Viola. He was in charge of the Duke of Ferrara's *musica da camera segreta* from 1528, and served the Este family for 40 years as a performer and composer. From about 1563 to 1572 he was *maestro di cappella* at Ferrara Cathedral. His fame as an instrumentalist is recorded by Messisbugo and other contemporary writers, including Luigi Dentice (*Due dialoghi della musica*, 1552) who described him as 'no less a marvel in counterpoint and composition than in playing the *viola d'arco* in concert'. He is said to have composed music for the wedding of Ercole II d'Este to Renée of Lorraine in 1528. He also provided music for performances at Ferrara of a number of plays, chiefly classical pastorals, over a long period, from about 1541 to 1567 (but he did not write the 'opera' credited to him by Berlioz in *Les soirées de l'orchestre*). Of this music for plays one fragment survives: a copy of Beccari's *Sacrificio* (printed in 1555) contains some manuscript pages with Alfonso's setting of a strophic invocation to Pan, a solo bass line said to have been sung and accompanied on the *lira* by (2) Francesco Viola's brother, Andrea, in a performance of the play in 1554. This source also contains chordal ritornellos for this scene and a four-voice canzone serving as a musical finale. The style of the music is close to the simpler pieces in surviving Florentine *intermedi* of the period. Many of Alfonso's madrigals have bass lines only slightly less declamatory than that of the invocation to Pan; its importance as an example of early monody has been exaggerated.

Alfonso's madrigal books include a few settings of Ariosto, whom he apparently knew, as well as Petrarchist verse typical of the period. The music is expertly written, showing full awareness of the style cultivated by Verdelot and Arcadelt, and has touches of individuality in declamation and tone colour. *Quando per dar al mio languir* shows that the new 'chromatic' madrigal, with its short note values, was known in Ferrara by 1540, but there is little suggestion in Alfonso's music of the style of Willaert or Rore.

(2) Francesco Viola (*b* Ferrara; *d* Ferrara, March 1568). Composer. He sang at Ferrara Cathedral from about 1522 to 1526, under Willaert's direction. His presence at the court musical establishment is documented from 1533. He taught Ercole II and was also patronized by Ercole's brother, Cardinal Ippolito II, who got him out of prison in 1539 and took him to Rome. In 1540 Francesco wrote music for an allegorical triumph designed by Benvenuto Cellini in honour of Pope Paul III. Returning to Ferrara, he collaborated with Antonio dal Cornetto and Jacques Brunel in the *Concerto della comedia* (music for *intermedi*) in honour of Pope Paul's entry into Ferrara. In 1553 he received a benefice from Ercole II. He accompanied Prince Alfonso d'Este to Venice in 1558, and edited and wrote the dedication to Willaert's *Musica nova*, published under Alfonso's patronage in 1559. In that year he succeeded Rore as *maestro di cappella* in the establishment of the prince as Duke Alfonso II. The text 'Inclitae Ferrariae Alphonso Duci quinto laeta longa secula' in the tenor of the Sanctus in Francesco's *Missa*

'Veni Sancte Spiritus' celebrates Alfonso's accession. Francesco visited Venice in the duke's company in 1562; he became a member of the Accademia dei Concordi, and figures, along with Willaert, as an interlocutor in the *Dimostrationi harmoniche* of Zarlino, who described him as his particular friend. Francesco's compositions have yet to be thoroughly studied.

Dallery. French family of organ builders. Charles (*b* Buire-le-Sec, 23 Jan 1702; *d* Amiens, 10 Jan 1779) built the organs at Corbie Abbey (1733) and Auchin Abbey (later moved to St Pierre, Douai) and restored the organ in Clairmarais Abbey, now at Aire-sur-la-Lys, Pas-de-Calais. Pierre (*b* Buire-le-Sec, 6 June 1735; *d* Paris, 3 Oct 1812), nephew and pupil of Charles, worked with his uncle and from 1767 to about 1778 was in partnership with François-Henri Clicquot, with whom he built the organs at St Nicolas-des-Champs, the Ste Chapelle and St Merry (all in Paris). He also built organs at the convent of St Lazare, Paris, La Madeleine, Arras, and Ste Suzanne in the Ile-de-France. Pierre-François (*b* Paris, 23 July 1764; *d* Paris, 3 Oct 1833), son of Pierre, was a godson and pupil of Clicquot, and worked with his father from 1801 to 1807. He built the organ in the church at Albert, but mostly repaired instruments, among them that at Notre Dame in Paris. Louis-Paul (*b* Paris, 24 Feb 1797; *d* Paris, 28 April 1870), son of Pierre-François, worked with his father until 1826; he built organs in the Sorbonne church (1825) and Notre Dame de Bonne-Nouvelle (1827), and made repairs at St Germain-l'Auxerrois and St Nicolas-des-Champs, Paris, and St Ouen, Rouen. He was employed to simplify the mixtures in the famous Couperin organ at St Gervais, Paris, in 1843 (that on the Positive survived the rebuilding of 1974) and he rebuilt the organ in the Meaux Cathedral in 1855–6. L.-P. Dallery may be considered the last staunch defender of the pure French classical tradition in Parisian organ building.

GUY OLDHAM/KURT LUEDERS

Dalley-Scarlett, Robert (*b* Sydney, 16 April 1887; *d* Brisbane, 31 July 1959). Australian music collector, conductor and composer. He studied with Arthur Mason and Gordon Lavers in Sydney. In 1912 he was appointed choirmaster at the Anglican church and conductor of the music society in Grafton, New South Wales. After war service he went to London for further study with Frank Bridge and R.R. Terry. He returned to Australia in 1919 and settled in Brisbane, where he served as choirmaster of St Andrew (1919–20), music director at All Saints and director of the ABC Choir (from 1937). In addition, he directed the University Choral Society (1920–30), the Australian Bach Festival, which he founded (1930), the Brisbane Handel Society (1933) and other organizations, and served as chief music critic for the *Courier Mail*. He was also the founder and first president of the Queensland Guild of Australian Composers. In 1926 he received the MusB and in 1934 the MusD of the University of Adelaide.

Dalley-Scarlett became renowned in Australia chiefly as a promoter of historical performance practice for the music of Bach and Handel. He produced almost all of Handel's operas and oratorios, either in concert or on the radio. His library, owned since 1960 by the University of Sydney, included many Handel first editions. In 1939 he received the Handel Medal of Halle for his services to Handel research. His compositions, almost all in manuscript, remain relatively unexplored.

ANDREW D. McCREDIE

Dallier, Henri (Edouard) (*b* Reims, 20 March 1849; *d* Paris, 23 Dec 1934). French organist and composer. At the Paris Conservatoire he was an organ pupil of Franck, obtaining *premiers prix* for both fugue and organ playing in 1878. From 1879 to 1905 he was organist at St Eustache, Paris, where he established a high reputation for picturesque and imaginative improvisation. In 1905 he succeeded Fauré as organist of the church of the

Madeleine, and played at Fauré's funeral there in 1924. From 1908 to 1928 Dallier taught harmony at the Conservatoire. His most admired compositions were the organ *Six grands préludes . . . pour la Toussaint* op.19 (Paris, 1891), *Cinq invocations à la Vierge* (1928) and a mass (1894). As well as numerous other organ and piano pieces Dallier wrote songs, a piano trio (1898), a string quartet, a piano quintet and a symphony op.50 (1908).

FÉLIX RAUGEL/DAVID CHARLTON

Dallis, Thomas (*fl* 1583–98). English musician. His name is associated with the 'Dallis' Lutebook (*IRL-Dtc* 410/1), so called because of the Latin inscription on p.12 of the manuscript: 'Incipi Nonis Augusti praeceptore Mro Thomas Dallis. Cantabrigiae Anno 1583'. He is mentioned in Thomas Whythorne's autobiography, on a slip of paper known as the 'musical scrap' dating from about 1592 or after. Here, among a number of other celebrated musicians, Bull and Dallis are named as the two doctors of 'lat[e] tym' and Dallis is described as 'of Trinite kollej in Cambrij'. In 1594 Edward Johnson, in a *supplicat* to Cambridge University, requested that Dr Dallis and Dr Bull might be his examiners for his MusB degree from Gonville and Caius College. Finally, in Francis Meres's *Palladis Tamia* (London, 1598), on f.288*v*, 'Doctor Dallis' is included among the English musicians of the time who can be compared to the great ones of ancient Greece.

Dallis's music is simple and requires no great technical skill from the performer. The settings of psalms and other vocal pieces, mainly intabulations of the voice parts, have a predominantly chordal structure. The 'Fansye' is, however, a pleasant, though unexciting, example of the English contrapuntal style. It opens in the traditional manner with a 'point' which then passes in imitation to other voices. The nine pieces in the 'Dallis' Lutebook are his only known compositions.

Dall'Oglio, Domenico (*b* Padua, *c*1700; *d* Narva, Estonia, 1764). Italian violinist and composer. He may have become a pupil of Tartini around 1721, when Tartini became *primo violino e capo di concerto* at the Basilica di S Antonio in Padua, or perhaps after the founding of Tartini's 'school' of violin instruction, 1727–8. Mooser's conjecture that Dall'Oglio may have begun his studies under Vivaldi in Venice was probably based on the understanding that Domenico was the son or a close relative of a Pietro Dall'Oglio who was *maestro di choro* in the Ospedale della Pietà there, 1713–18. However, recent scholarship has proved this unlikely as Dall'Oglio was a pseudonym used by Pietro Scarpari, a major figure at the Pietà. Certainly, Domenico appears to have been influenced by Vivaldi; certain aspects of his writing are reminiscent of his style. In 1732 Domenico was appointed violinist at the Basilica di S Antonio in Padua, but in 1735 he took leave of his duties and travelled with his younger brother, Giuseppe, a cellist, to Russia where they remained for 29 years in the service of the Russian court. Court records make frequent references to his activities as a virtuoso violinist, composer and participant in court intrigue. As an amateur he also made violins and lutes. He died on the journey home to Italy.

Most of Dall'Oglio's surviving compositions are instrumental (solo violin sonatas, symphonies and concertos). In the absence of the principal court composer, Francesco Araja, Dall'Oglio was called upon to contribute music for court ballets and for other festive occasions. He wrote a prologue for the performance in 1742 of Hasse's setting of *La clemenza di Tito* under the title 'La Russia afflitta'. His string music reveals him as a master of the 18th-century Italian virtuoso style. His work is replete with double stops and difficult passage-work in the high positions. In his violin sonatas he favoured a three-movement form (slow–fast–fast). The concertos, on the other hand, ordinarily begin with a brilliant Allegro followed by a Grave or Largo and conclude with another Allegro. The slow movements are frequently decorated with elaborate embellishments reminiscent of the Tartini school of florid melody.

His brother Giuseppe Dall'Oglio (*c*1710–*c*1794) served with him at the Russian court as a cellist; he married Marianna Madonis, daughter of a colleague in the orchestra. Giuseppe, who was travelling with Domenico when he died, spent some time in Berlin and then in Warsaw where he entered the diplomatic service of the King of Poland; he was later business representative of the Polish court in Venice.

Giovanni Battista Dall'Oglio (*b* Regio, 1739; *d* Modena, 1832) was not related to Domenico. A music theorist, he was a student of Padre Martini in Bologna, became organist at Rubbiera in 1764, and spent the last part of his life in Modena where he had much to do with the organization of the music holdings of the Biblioteca Estense. He was a prolific writer on acoustics, the music of the ancients, and the relationship between music and mathematics (many of his studies were published in the *Memorie della Società italiana delle scienze* at Modena); he took a progressive view of the disciplines of music theory, particularly of counterpoint, and aligned himself with his contemporary Antonio Eximeno in the belief that the science of mathematics had little to do with the art of music.

VINCENT DUCKLES/ELEANOR F. MCCRICKARD

Dallow. *See* DALLAM family.

Dallo [Dayo] **y Lana** [Lanas], **Miguel Matheo de** (*b* ?*c*1650; *d* Puebla, Mexico, 1 Sept 1705). Spanish composer, active in Mexico. Before leaving Spain he served as *maestro de capilla* at S María del Palacio, Logroño, and at the collegiate church of S Salvador in Seville (1684–5). In 1685 he applied for the post of *maestro de capilla* in Avila, but by 1688 he had emigrated to Mexico, where he replaced Antonio de Salazar as *maestro de capilla* of Puebla Cathedral on 17 December 1688, with an annual salary of 600 pesos; he remained there until his death.

In Puebla, Dallo y Lana composed villancicos for the SS Trinidad convent and the cathedral, but his most important works of this type were settings (whose present location is unknown) of four villancico cycles by the celebrated poet Sor Juana Inés de la Cruz, which were performed in the cathedral on four feast days in 1689–90. Their lively popular elements may be illustrated by the eighth villancico in the third cycle (for the feast of St Joseph, 1690), which is an *ensalada* containing a *jácara*, a *juguete* (a playful dialogue), an *indio* (i.e. including some Indian words) and a *negro* (or *negrilla*, with syllables imitating black dialects and rhythms); this was followed by four villancicos for the Mass — *a la epístola, al ofertorio, al alzar* and *al 'Ite missa est'*. The composer's Spanish reputation may account for the unusually wide dispersal of his villancicos in Latin American archives; his works are found in Bogotá, Guatemala, Mexico City, Puebla and Sucre. For his liturgical works he employed a flowing, sometimes imitative polyphony that, in the Spanish manner, required a figured continuo for harp, organ and violone but did not as a rule use concertato effects. Polychoral works are balanced by the many compositions for six voices, alternating either three pairs of duos or duos with four-part choir. The continuing popularity of his psalm settings is attested in Puebla by the addition in 1844 of a fuller accompaniment to one of his works and in Mexico City by the late 18th-century addition of two doubling clarinets.

ALICE RAY CATALYNE/JOHN KOEGEL

D'Almaine & Co. English music publishers, a continuation of the firm founded as GOULDING & CO.

Dalmas. Russian firm of music publishers. The founder, H.J. Dalmas (*d* ?St Petersburg, 1829), was a member of the French opera troupe in St Petersburg. In 1802, with the help of Boieldieu, he opened a music shop which swiftly developed into one of the most stable Russian publishing houses of the early 19th century. Among the earliest publications were works by Boieldieu, including extracts from operas written by the composers while in St Petersburg. Dalmas was particularly noted for his various journals of French and Italian opera excerpts, including *Le troubadour du nord* (1804–11) and *La muse cosmopolite* (1827–8). He also published collections of songs (among them *Nouveau choix d'airs russes, ukrainiens, kosaques, etc.*, 1816) and keyboard pieces, as well as a number of important individual works by Bortnyans'ky (the full score and parts of *Pevets vo stane russkikh voinov*, 1813), Cavos (a piano score of the opera *Kazak stikhotvorets*, *c*1812), Kozłowski (the score of the incidental music to V.A. Ozerov's *Fingal*, 1808) and others. In November 1812 the French troupe left St Petersburg, but Dalmas remained and took Russian citizenship. From 1802 to 1829 he issued about 1500 publications. One of his most important relationships was with John Field whose music the firm published from 1810 to 1821. These publications are in many cases the earliest versions of Field's compositions and often formed the basis of later European editions. Field's first three nocturnes were published by Dalmas in 1812, two years before they

appeared in European editions. After the founder's death the firm was put up for auction and bought (1829) by the publisher M.I. Bernard.

GEOFFREY NORRIS/NIGEL YANDELL

Dal Monte, Toti [Meneghelli, Antonietta] (*b* Mogliano Veneto, 27 June 1893; *d* Treviso, 25 Jan 1975). Italian soprano. She studied in Venice with Barbara Marchisio and made her début at La Scala in 1916 as Biancafiore in Zandonai's *Francesca da Rimini*. In 1922 she sang Gilda at La Scala, and thereafter Rosina, Amina, Lucia, Linda di Chamounix, Norina and, notably, Violetta and Butterfly; she sang Rosalina in the première of Giordano's *Il re* in 1929. In the USA she sang Lucia and Gilda at the Metropolitan (1924) and appeared with the Chicago Civic Opera (1924–8). Her only Covent Garden appearances were in 1925 as Lucia and Rosina, after which she joined Melba's company for the latter's farewell tour. Her recordings, including a complete *Madama Butterfly* (with Gigli), show her highly individual timbre and subtle inflection of the text.

HAROLD ROSENTHAL/ALAN BLYTH

Dalmorès, Charles [Boin, Henry Alphonse] (*b* Nancy, 21 or 31 Dec 1871; *d* Los Angeles, 6 Dec 1939). French tenor. He began his musical career as a horn player in Paris, where he was at first refused admission to the Conservatoire because he was 'too good a musician to waste his time in being a mediocre singer'. He made his operatic début at Rouen in 1899, as Siegfried. He then went to the Brussels Opera, and in 1904 first sang at Covent Garden in *Faust*. He appeared in the British premières of Massenet's *Hérodiade*, Saint-Saëns's *Hélène*, Charpentier's *Louise* and Laparra's *Habañera*, as well as in the world première of Leoni's *L'oracolo* (1905). He also made a special study of Wagner, under Franz Emmerich, and in 1908 sang Lohengrin at Bayreuth. One of the most valued singers in Oscar Hammerstein's company at the Manhattan Opera House, New York (1906–10), he sang regularly with the Boston and Philadelphia-Chicago companies, and as a member of the Chicago Opera (1910–18) where his roles included Tristan and Parsifal. He later taught singing in France and the USA. A sensitive musician and a colourful personality, he was also admired for his acting. Recordings show that his powerful voice was used with much technical accomplishment and a sense of style.

J.B. STEANE

Dal Pane [Da'l Pane, Del Pane], **Domenico** (*b* in or nr Rome, *c*1630; *d* Rome, 10 Dec 1694). Italian singer and composer. At an early age he became a treble at S Maria Maggiore, Rome, and from 1641 to 1646 he studied with Abbatini, the choirmaster there. Between 1645 and 1649 he sang at S Apollinare under Carissimi, at the Borghese chapel of S Maria Maggiore and at the Chiesa Nuova, and in 1646–7 he was in Paris with a group of Italian musicians, performing mainly in Luigi Rossi's *Orfeo*. In about 1650 he went to Vienna as a soprano castrato in the imperial court chapel, for which he composed madrigals in the old style; some of these pieces, in honour of various members of the imperial family, were for official occasions, and in 1652 he published a collection of them, dedicated to the Emperor Ferdinand III. In 1654 he returned to Rome, where he entered the service of the Cappella Sistina on 10 June and in the same year also became a singer in the household of the Pamphili family.

During the later 1650s Dal Pane was one of the best-known castratos in Rome. According to Gualdo Priorato, he took part in Marazzoli's opera *La Vita humana*, performed on 31 January 1656 in the Palazzo Barberini in honour of Queen Christina of Sweden, and from 1658 he sang regularly at S Luigi dei Francesi. He became *maestro* of the Cappella Sistina in 1669 and retired in 1679. In 1675, 1677 and 1682 he was a member of the second choir at the oratory of S Marcello. Before this, at an uncertain date, Prince Giovanni Battista Borghese had entrusted him with the musical direction of the Corpus Christi services in the Borghese chapel at S Maria Maggiore, where in 1664 he also directed the music for the Quarant'ore celebrations. Some of his madrigals were performed at the musical academy founded by Abbatini. Between 1679 and 1687 he probably received a benefice, whose income must have derived from a priory or abbey, since in 1687 he held the title of abbot.

Dal Pane contributed *a cappella* music, for both single and double choir, to the papal chapel. His parody masses based on motets by Palestrina were published in 1687 in choirbook form: the number of voices does not always correspond to the number in the original motet. Dal Pane shows himself, in his melodic development and contrapuntal technique, to be a master of the Palestrina style. In Holy Year 1675 he published a book of sacred concertos and one of motets. The concertos, composed for ceremonies in the Borghese chapel, demonstrate his familiarity with the concerted style. Besides considerable virtuosity in the solo parts, there is no lack of imaginative word-painting, chromaticism and affective figures. The balance between expressiveness and virtuosity is as noteworthy as the unfailingly precise declamation of the text. In comparison the motets are less successful. There are few affective figures; on the contrary, virtuosity is now more pronounced. Dal Pane's two books of madrigals (1652, 1678), in five parts with *basso seguente*, together with publications by Lodovico Cenci (1647), P.F. Valentini (1654), Mario Savioni (1668) and others, afford evidence of the survival of the old polyphonic madrigal until well into the 17th century. In the first book Dal Pane adopted a retrospective approach and followed the style of Palestrina. In illustrating the words he used chromatic writing sparingly; he preferred dissonant suspensions, and Phrygian cadences resolving in an old-fashioned way on chords that include the minor 3rd. The general picture of him is that of a composer rooted in the Palestrina tradition, who also had experience of virtuoso singing that he was able to bring to bear on his handling of the concerted style, notably in the *Sagri concerti*.

WOLFGANG WITZENMANN

Dal Pestrino, Giulio. *See* ABONDANTE, GIULIO.

Dal Pozzo, Vincenzo [Puteus, Vincentius] (*fl c*1585–1612). Italian composer. The dedication of his first book of five-voice madrigals suggests that he was living in Pesaro about 1585. On 13 April 1586 he was appointed singer at the Munich Hofkapelle under Lassus's direction, and served there as an alto until at least late 1587. In 1600 he was *maestro di cappella* at Imola Cathedral and in 1611 he held a similar position at Faenza. His extant works are firmly in the late Renaissance polyphonic tradition and show the influence of Lassus. His first book of motets, for three voices with basso continuo, is an interesting attempt to combine a musical style based on the middle period of Lassus's work (e.g. *Liber mottetarum*, 1575) with elements of new Baroque technique (see *BoetticherOL*). Beyond Italy, Dal Pozzo's works were included in printed collections published in Strasbourg, Nuremberg and Munich. Particular evidence of his wide popularity is found in the Pelplin Tablatures (1620–30) which contain ten of his *Magnificat* settings.

MIROSŁAW PERZ

Dal Prato [Del Prato], **Vincenzo** (*b* Imola, 5 May 1756; *d* Munich, 1828). Italian castrato. He studied with Lorenzo Gibelli and made his début at the opera house in Fano in 1772. In 1780 Dal Prato was appointed to the court of Carl Theodor in Munich, where he spent the rest of his career. His voice was a high mezzo. His most famous role was Idamantes in Mozart's *Idomeneo* (1781), and he also sang in Salieri's *Semiramide* (1782), Holzbauer's *Tancredi* (1783) and Vogler's *Castore e Polluce* (1787). Mozart complained about the inexperienced singer's poor stage presence and had to teach Dal Prato his music. But Dal Prato was apparently eager to learn, and Mozart referred to him as his 'molto amato castrato Dal Prato'. His singing was admired more for its grace and polished execution than its power or dramatic qualities.

PAUL CORNEILSON

Dal S. *See* DAL SEGNO.

Dal segno (It.: 'from the sign'). An indication to repeat from the point at which a sign is placed; some of the signs used are shown in ex.1. The abbreviations 'D.S.' and 'dal S' (sometimes with the sign itself instead of 'S') are common.

Ex.1

𝄋 𝄋 ⊕

Dalton, James (*b* Ipswich, 11 Nov 1930). English organist and musicologist. He studied at the RCM under Thalben-Ball and Ralph Downes, was an organ scholar at Worcester College, Oxford, then graduate assistant at Oberlin College, Ohio, and organist of Wesleyan University, Connecticut before becoming organist and fellow of Queen's College, Oxford, and a university lecturer in music. At Queen's he designed with the builder the remarkable Frobenius organ built in 1965. Along with the 1954 organ in the Royal Festival Hall, it did more than any other instrument to encourage the organ reform movement in Britain. A fastidious performer, with a preference for the Baroque, Dalton has given recitals in Europe (including the former USSR) and the USA. He has made a number of recordings and published scholarly articles and reviews, mainly concerned with keyboard music and its interpretation, and edited an 18-volume anthology of early English organ music.

STANLEY WEBB/PAUL HALE

D'Alvarez [Alvarez de Rocafuerte], **Marguerite** (*b* Liverpool, 1886; *d* Alassio, 18 Oct 1953). Mezzo-soprano of Peruvian parentage. She studied in Brussels and made her operatic début at Rouen as Delilah in 1907 or 1908. In

1909 she joined Hammerstein's Manhattan Opera Company, first appearing as Fidès in *Le prophète*. With the Boston Opera Company in 1913 she made a strong impression as the Mother in Wolf-Ferrari's *I gioielli della Madonna* and at Covent Garden in 1914 her Amneris in *Aida* won acclaim for the power, rich quality and ease of her singing. She appeared as Carmen at La Scala and as Léonor in *La favorite* at Marseilles. After 1918 she sang principally in concerts, specializing in French and Spanish song, and gave her last London recital in 1939. She appeared in the film *Pandora and the Flying Dutchman* and wrote a colourful autobiography *Forsaken Altars* (London, 1954), published also as *All the Bright Dreams* (New York, 1956). Her recordings show an exceptionally rich and well-produced voice but are too few to do justice to her wide repertory. (M. D'Alvarez: *Forsaken Altars*, London, 1954)

J.B. STEANE

Dalvimare [d'Alvimare], **(Martin-)Pierre** (*b* Dreux, Eure-et-Loire, 18 Sept 1772; *d* Paris, 13 June 1839). French harpist and composer. He came from a wealthy family and showed natural talents for both music (he played keyboard instruments and the harp) and drawing. His connections obliged him to conceal his identity during the Revolution; from about 1797 he became known as a musician through his concert performances and publications. He joined the Opéra as a harpist in 1800 and became a member of Napoleon's private chamber orchestra in 1806; in the following year he was appointed harp tutor to Josephine. He produced *Le mariage par imprudence* (1809), but it failed, and thereafter he concentrated his efforts on the songwriting he had cultivated since the beginning of his career. An inheritance allowed him to retire in 1812 to Dreux, where he continued to compose and paint. His music shows the competent use of current expressive devices, more successful in slow than in sonata-allegro movements.

WORKS
(*selective list*)

all published in Paris

Vocal: Le mariage par imprudence (op, Jouy), Paris, Opéra-Comique, 4 April 1809 (1809); 5e recueil de 6 romances, op.15; 6e recueil (1804); at least 5 other collections and 14 separate romances (1806–15), texts by Baillif, Chateaubriand, Coupiny, de la Motte, Lemercier, Salverte

Unpubd sacred music, mentioned by Fétis

Dal Violin, Marc'Antonio. *See* PORDENON, MARC'ANTONIO DA.

Dalza, Joan Ambrosio (*b* ?Milan; *fl* 1508). Italian lutenist and composer. He was the composer and arranger of Petrucci's *Intabolatura de lauto libro quarto* (Venice, 1508), in the preface of which he is called 'milanese'. Dalza's book was the fourth of Petrucci's series of lute tablatures and is one of the precious few surviving sources of Italian lute music from the crucial period leading up to the first printed works by Francesco da Milano in 1536. Whereas intabulations of Franco-Flemish music had dominated Petrucci's earlier lutebooks by Spinacino and Giovan Maria, Dalza's book favoured dance forms and presented mostly original music that was almost entirely instrumental in conception. Moreover, Dalza's music differs from Spinacino's by its deliberately accessible style, the author justifying his choice of 'simple' pieces on the grounds of popular demand and promising to publish pieces for more advanced players at a later date. There are 42 dances (three for two lutes), nine ricercares, five *tastar de corde*, four intabulations of vocal pieces, and a piece called *Caldibi castigliano* (see *BrownI*). All pieces except the ricercares and intabulations are edited in Die Tabulatur, vi–viii (Hofheim am Taunus, 1967). The book is significant for being the first to contain the *pavana* and for giving useful information about the grouping and linking of pieces. Following the explanation of tablature notation that appears in all Petrucci's lutebooks, there is a note that each of the nine *pavane* (five *alla venetiana*, four *alla ferrarese*) has its own saltarello and piva. The grouped dances share a common modality as well as harmonic and melodic characteristics. Further grouping occurs in the free-form pieces; all but one of the *tastar de corde* are followed by a 'recercar dietro', which in turn can be associated with the dances, while the *calata spagnola* on f.48*v* concludes with a short 'recercar detto coda'. The Spanish influence evident in *Caldibi castigliano* and the *calate ala spagnola* may reflect the cultivation of the vihuela in early 16th-century Italy.

Dam, José Van. *See* VAN DAM, JOSÉ.

Daman [Damon(d), Dema(u)nde, Demawnde, Dyamond], **William** (*b* ?Lucca, *c*1540; bur. London, 26 March 1591). Italian composer and recorder player. A register of aliens living in London dated 1571 refers to a 'William de Man' brought to England six years previously by Thomas Sackville (later Lord Buckhurst) as his servant. Buckhurst was a noted patron of music and supported an establishment of musicians 'the most curious which anywhere he could have'. Daman became one of Queen Elizabeth's musicians in 1579, and remained in royal service until his death: an inventory of his goods was made on 2 June 1591 in the presence of his widow Anne and five children. Daman is chiefly remembered for his harmonizations of

the 'church tunes' from the Sternhold and Hopkins metrical psalter. His first publication was *The Psalmes of David in English Meter, with Notes of Foure Partes set unto them* (London, 1579) 'to the use of the godly Christians for recreatying themselves, in stede of fond and unseemely ballades'. Daman had apparently been in the habit of composing a new harmonization each time he visited a friend's house, for the friend's private enjoyment. According to the preface of the first of the two later sets, these settings had then been published without his permission. Both of the later sets were published posthumously in 1591. *The Former Booke* comprises simple chordal harmonizations of 'all the tunes of David's Psalmes, as they are ordinarily sung in the church', the tune being in the tenor; in *The Second Booke* the church tunes are in the upper part.

PETER LE HURAY/JOHN MOREHEN

Damance, Paul [Amance, Paul d'] (*b* c1650; *d* c1700). French composer. He belonged to the Trinitarians, an order founded in the 12th century for the redemption of captives, and was the organist at the order's monastery at Lisieux, Calvados. From his few surviving works we may deduce that his special concern was the provision of liturgical and organ music for religious communities in reduced musical circumstances.

Fétis alluded to some MS organ pieces in what is now the Bibliothèque Nationale, but only one short piece, a duo, exists there today in a volume of doubtful works by Lebègue (unless these are by Damance). The title hints at a direct or indirect link with Henry Du Mont, who published some two-part pieces entitled *Meslanges … contenant … plusieurs chansons, preludes et allemandes pour orgue et pour les violes* (Paris, 1657), which he mentioned as suitable for nuns playing the organ 'en façon de duo', presumably because they would be more suitable for amateurs. A second link with Du Mont is found in the series of *messes en plain-chant musical* allied to the five similarly entitled masses by that composer. As early as 1634 the French Oratorians had been pioneers in establishing *plain-chant musical*, a meretricious modernized arrangement of plainsong sung in unison, unaccompanied, in simplified notation and intended for use in country parishes and convents. Damance dedicated all his masses to specific convents in his locality.

WORKS

3 messes en plain-chant musical (Paris, 1687)
6 messes des 1r, 2d, 5e ton naturel, 5e ton transposé et 6e ton (Paris, 1701)

G.B. SHARP

Damaratsky, Wladzimir Alyaksandravich (*b* Gomel', 2 Sept 1946). Belarusian composer. He graduated from the Conservatory of Belarus, where he studied the piano with Ludmila Shelomentseva and composition with Petr Podkovïrov and later Smol'sky; he finally completed his postgraduate studies in 1981 under Ye.A. Hlebaw. From 1979 to 1982 he was conductor of the Belarusian Radio and Television SO, and in 1984 he became a piano teacher and accompanist at Music School no.9 in Minsk.

His work was initially associated with popular music and in early choral works strove towards simple art with a broad message. It was the music of Schnittke with its dramatic expression and novel sonorities which urged Damaratsky to discover his own voice through the writing of symphonic works. The resulting neo-classical works – such as the two trumpet concertos – are notable for their supple polyphonic technique, feeling for timbre and textural interplay. *Znamennïy* chants and Belarusian *popevki* are embodied in original musical structures and become the semantic centre points of his works (the Second Symphony, the Concerto for Orchestra and *Zvonï* ('Ringing') for cimbalom).

WORKS

Stage: Lunnïy den' [Moonlit Day] (musical, S. Tsiryuk, after J.B. Priestley), 1995
Choral (with orch, unless otherwise stated): Barmaley (cant., K. Chukovsky), 1977; Babushkinï pesni [Grandmother's Songs] (cant., N. Lïstsov), 1979; Kab vedali [So that they should Know] (cant., M. Tank), 1980; Maya Belarus' [My Belarus] (cant., Ya. Kolos), 1982; 5 khorov [5 choruses] (A. Blok, A. Fet, Tank, F. Tyntchev), 1983; 2 pesni [2 Songs] (P. Solov'yova), children's chorus, 1989; 5 pesen [5 Songs] (Fr. poets), children's chorus, 1991; 3 detskikh khora [3 Children's Choruses] (S. Chyorny), children's chorus, pf, 1994
Orch: Tpt Conc., 1980, rev. 1987; Sym. no.1, 1981, rev. 1990; Conc., hn, chbr orch, 1985; Conc. for Orch, 1987; Sym. no.2, 1990; Tpt Conc. no.2, 1992

Ḍamaru. *See* HUḌUKKĀ. *See also* INDIA, §III, 6.

Damascene, Alexander (*b* ?mid-17th century; *d* London, 14 July 1719). English countertenor and composer of French birth. He is described as a French Protestant in his letters of denization (22 July 1682). He was appointed to the 'King's Vocall Musick' and made 'composer in his Majesty's private musick in ordinary' in 1689. However, he is listed as one of the vocal musicians who remained in England with Queen Mary when William III went to Holland in 1691. Although he had sung with the Chapel Royal at the coronation in 1689, and had been 'extraordinary' since 1690, it was not until 1695 that he obtained a full place in the Chapel – the one vacated by Henry Purcell on his death. He sang solos in most of Purcell's court odes from 1690 onwards, as well as in *Hail! bright Cecilia* (1692). He again sang at the coronation of Queen Anne in 1702. In his will he described himself as 'of the Parish of St Anne's, Westminster, Gentleman', bequeathing his estate to Sarah Powell, his daughter-in-law.

He was a prolific composer of songs, many of which were published in such collections as *Choice Ayres and Songs* (RISM, 1684³/R1989 in MLE, A5), *The Theater of Music* (1685⁵–1687⁵/R1983 in MLE, A1), *Comes amoris* (1687⁴–1688⁸, 1693⁶–1694⁵), *Vinculum societatis* (1691⁷) and the *Gentleman's Journal* (1692–4). Some were popular enough to be included in *Pills to Purge Melancholy* (1707–20). An instrumental piece entitled *Sir John Guise's March* also survives (*GB-Lbl* Add.22099).

IAN SPINK

Damase, Jean-Michel (*b* Bordeaux, 27 Jan 1928). French composer and pianist. Born into a musical family, his mother being the harpist Micheline Kahn, he showed precocious musical talent. His studies began at a very early age; when he was five years old he began to attend the Samuel-Rousseau courses in piano and solfège. He started to compose at the age of nine when, after meeting Colette, he set some of her poems. When he was 12 he became a pupil of Cortot at the Ecole Normale de Musique in Paris, and in the next year he joined Armand Ferté's piano classes at the Paris Conservatoire. In 1943 he was unanimously awarded a *premier prix* in piano at the Conservatoire. Two years later he entered Büsser's composition class, and he began to study harmony and counterpoint with Dupré. At the age of 19 he won the first prize in composition with his Quintet, and his cantata *Et la belle se réveilla* won him the Prix de Rome in 1947. In the meantime his career as a pianist was flourishing; he appeared as soloist in the Colonne and Conservatoire concerts, and with the Orchestre National of the ORTF.

Damase's youthful compositional maturity helped to foster a considerable technical facility, and he has produced a great deal of music in a style that is attractive and elegant, remaining close to the traditions of the Conservatoire. All his works show a deep knowledge of the possibilities of instruments, and his orchestration is rich, full and varied. This idiomatic utilization of resources shows itself most notably in the chamber pieces and in the concertante works. Damase is a great lover of ballet and a close friend of several leading choreographers. His first ballet score was *La croqueuse de diamants*, written for Petit and first produced at the Marigny Theatre in Paris on 25 September 1950. Damase arranged an orchestral suite and several piano pieces from the music, and he collaborated with Petit again on *Lady on Ice* (1953). During the 1970s he was resident conductor at the Grand Théâtre in Bordeaux where several of his works were performed. Particularly important are his collaborations with Jean Anouilh, including *Colombe* (1958), *Madame de. . .* (1969) and *Eurydice* (1972), in which the Orpheus myth is transferred to a Paris railway station. All three works delight in the use of musical pastiche or parody, a technique also used in *Eugène le mystérieux* which includes quotations from Liszt, Adam and Offenbach.

WORKS

(*selective list*)

STAGE

Operas: La tendre Eléonore (opéra bouffe, 1, L. Masson), 1958, Marseilles, Opéra, 18 Jan 1962; Colombe (comédie-lyrique, 4, J. Anouilh), 1958, Bordeaux, Grand, 5 May 1961; Eugène le mystérieux (feuilleton musical, 2, M. Achard after E. Sue), 1963, Paris, Châtelet, 7 Feb 1964; Le matin de Faust (légende dramatique, 3, Y. Gautier and F. Dereyne), 1965, Nice, Opéra, 15 Jan 1966; Madame de. . . (roman musical, 1, Anouilh after L. de Vilmorin), 1969, Monte Carlo, Opera, 26 March 1970; Eurydice (comédie lyrique, 3, J. Anouilh), 1972, Bordeaux, Grand, 26 May 1972; L'héritière (4, L. Durcreux, after adaptation by R. and A. Goetz of H. James: *Washington Square*), 1974, Nancy, Grand, 13 March 1974

Ballets: La croqueuse de diamants (ballet-chantant, 4 scenes, R. Petit, A. Adam and R. Queneau), 1950, Paris, Marigny, 25 Sept 1950 [abridged film version in *Un-deux-trois-quatre* (Eng. title *Black Tights*), 1960]; Piège de lumière (J. Taras), 1952, Paris, Empire, 23 Dec 1952; Lady on Ice (R. Petit), 1953; Le prince du désert, 1955; La boucle, 1957; La noce foraine, 1961; Silk rhapsodie, 1968

ANNE GIRARDOT

Dambis, Pauls (*b* Riga, 30 June 1936). Latvian composer. He graduated from Valentin Utkin's composition class at the Latvian State Conservatory, Riga in 1962. From 1959 to 1962 he was music director at the Latvian National Theatre, and from 1965 to 1969 a producer for Latvian television. He was also deputy chairman of the Soviet Latvian Composers' Union (1968–78) and chairman of the Latvian Composers' Union (1984–9). In 1972 he was appointed to teach theory and composition at the Latvian State Conservatory, and was head of composition there from 1982 to 1988. In 1994 he was appointed professor at the Latvian Academy of Culture.

A composer of striking individuality, he is notable for his innovative use of timbre and texture in choral music, especially in works freely based on Latvian folk texts and folk melodies. His numerous chamber pieces are characterized by radically innovative technique and an intellectual approach to form.

ARNOLDS KLOTIŅŠ

D'Ambruys [Dambruys, D'Ambruis, Dambruis], **Honoré** (*fl* 2nd half of the 17th century). French composer and singing teacher. He was trained by Michel Lambert, to whom he dedicated his *Livre d'airs avec les seconds couplets en diminution mesurez sur la basse continue* (Paris, 1685), which is interesting chiefly for the embellishments announced in the title. Some 23 other *airs* by him appeared in eight issues of the *Mercure galant* between 1682 and 1702, in books of *airs* published in Paris in 1660, 1670 and 1680 and in *Recueils d'airs sérieux et à boire de différents auteurs* published there between 1696 and 1702; there are also two in manuscripts (*F-Pn*). (T. Gérold: *L'art du chant en France au XVIIe siècle*, Strasbourg, 1921/*R*)

FRÉDÉRIC ROBERT

Damcke, Berthold (*b* Hanover, 6 Feb 1812; *d* Paris, 15 Feb 1875). German composer. After studying theology, and later music with Aloys Schmitt in Frankfurt, he played the viola in the Hanover court orchestra (from 1834); he also continued his studies on the piano and the organ, and wrote some choruses for male voices and organ, studying further with Ferdinand Ries and J.N. Schelble. Later he conducted the music society and the Liedertafel in Kreuznach, where he composed an oratorio, *Deborah*. In 1837 he conducted the Philharmonic Society and the Gesangverein für Opernmusik in Potsdam, where he introduced his *Die Geburt Jesu* (1840) and Psalm xxiii and *Ave Maria* (1841). Moving to Königsberg in 1841, he conducted his opera *Käthchen von Heilbronn* (1845); he also played in Berlin in 1843. In 1845 he worked as teacher in St Petersburg (Berlioz recalled how he took the percussion part of the *Symphonie fantastique* on the piano). He lectured on music history in Brussels in 1855, and from 1859 acted as correspondent for Russian and German journals, also teaching at the Paris Conservatoire. He was a great admirer and advocate of Berlioz, who was grateful for many professional and personal kindnesses and referred to him as 'a composer of great merit and a very able teacher'. He worked on revising the Fanny Pelletan edition of Gluck. His other works include oratorios (*Tobias*), instrumental music (overture *Die lustigen Weiber*), choruses, songs and piano music.

JOHN WARRACK

Damen. *See* DAHMEN family.

Damenization. A system of solmization devised by Carl Heinrich Graun. He gave to the rising scale of C major the fixed syllabic names *da*, *me*, *ni*, *po*, *tu*, *la*, *be*, *da*. Sharps were represented by the suffix *as*, flats by *es*, giving the resources shown in ex.1. Advantages claimed for the system were the separate note names made available not only for chromatic but for certain enharmonic degrees,

Ex.1

and the opportunity provided for exercising all the vowels as well as the more explosive consonants so important in German enunciation. A disadvantage, however, was the lack of euphony of certain of the syllables – particularly where some keys were concerned. The scale of A♭ major, for instance, ran *les*, *bes*, *da*, *mes*, *nes*, *po*, *tu*, *les*. The system made little impression other than on Graun's own pupils and disciples, and has long been discarded.

BERNARR RAINBOW

Dameron, Tadd [Tadley Ewing Peake] (*b* Cleveland, 21 Feb 1917; *d* New York, 8 March 1965). American jazz composer, arranger, bandleader and pianist. After working with lesser-known groups he joined that of Harlan Leonard, for which he scored many arrangements, including *Dameron Stomp* and *A la Bridges*; he also wrote for Jimmie Lunceford, Coleman Hawkins (*Half step down, please*, 1947, Vic.) and Sarah Vaughan (*If you could see me now*, 1946, Musi.). In the late 1940s Dameron wrote arrangements for the big band of Dizzy Gillespie, who gave the première of his large-scale orchestral piece *Soulphony* at Carnegie Hall in 1948. Also in 1948 Dameron led his own group in New York, which included Fats Navarro; the following year he was at the Paris Jazz Fair with Miles Davis. After forming another group of his own with Clifford Brown in 1953, he became inactive on account of a problem with drugs, which led to his imprisonment in 1958. From 1961 he scored for recordings by Milt Jackson, Sonny Stitt and Blue Mitchell.

Dameron did not achieve full expression of his gifts as a composer because of his inability to maintain his own group for long. Navarro was the finest interpreter of his pieces, as their many joint recordings show. The best of these exhibit a pithy thematic invention uncommon in jazz: *Sid's Delight* and *Casbah* (both 1949, Cap.) reveal Dameron's powers at their height. Like Thelonious Monk, Dameron was repeatedly linked with bop, though he rarely employed its stylistic devices. With other arrangers for Gillespie, he attempted to adapt bop to big bands, failing, however, to transfer the crucial rhythmic procedures of this essentially small-group style. In spite of this, his best pieces for Gillespie, such as *Good Bait* (1947, Vic.) and *Our Delight* (1949, Musi.), show particular melodic and harmonic substance. Other notable compositions by Dameron include *Fontainebleau* (1956, Prst.), an extended piece without improvisation; *Hot House* (1945, Guild), recorded by a group led by Gillespie with Charlie Parker; and *Lyonia* (1949, Decca), recorded by Ted Heath.

MAX HARRISON/R

Damett [?Thomas] (*b* ?1389–90; *d* between 15 July 1436 and 14 April 1437). English composer. His name is always spelt thus in both musical sources, though archival records show variations. He was evidently the illegitimate son of a gentleman (according to Papal dispensations allowing him nonetheless to take orders and hold benefices); a 15th-century coat-of-arms for 'domett' survives. He seems to have taken his father's name, since his niece (? and therefore his brother) was named Damett. He was a commoner at Winchester College (possibly overlapping with Sturgeon) from some time after 1402 until 1406–7, when he cannot have been older than 18. There is no record of the university career which probably ensued, though he was described as 'Dominus' in 1421. In 1413 he was presented to the rectory of Stockton, Wiltshire; if we can presume him to have been 23 by this date, we can estimate his date of birth fairly accurately as 1389 or 1390. Also in 1413 his name appears in the accounts of the royal household, and thereafter in 1415 (at Harfleur), 1421 and 1430–31. Since successors to his prebends in St Paul's (held from 1418, residency canon from Easter 1428 until his death) and St George's Chapel, Windsor (held from 1431), were appointed on or by 5 August 1436, he may have died by that date, though he attended a chapter meeting at St Paul's on 8 July.

His will survives and is printed in translation in J. Harvey: *Gothic England* (London, 1947, 2/1948), pp.181ff. Damett's mother was still alive when he wrote his will on 15 July 1436 (proved on 14 April 1437). Music is not mentioned, but there are bequests of books, including a missal, and one other item is 'a silver cup chased and covered with writing and "Benedictus qui venit in nomine Domini"'. This invites the observation that his only apparent use of plainchant is in the tenor of his one isorhythmic motet, which uses 'Benedictus qui ve-' of the Sarum Sanctus chant 3 transposed down a tone (continued untransposed by Sturgeon as the tenor of his motet). Reasons have been given for associating this motet with the London celebrations which followed the Agincourt victory. The regular text of the sequence *Salvatoris mater pia* includes some substituted lines uniquely appropriate to Henry V. The texts of both Damett's other non-Ordinary compositions, both in score, as are two Gloria settings, show slight deviations from the standard forms: *Salve porta* is the second stanza of the sequence *Salve virgo sacra parens*, but is modified at the end, and the psalm antiphon *Beata Dei genitrix* adds an alleluia which renders it appropriate to the Easter season.

Nine works survive, all in the second layer of the Old Hall Manuscript, and possibly autograph. The two fragmentary concordances in *GB-Ob* University College 192 are from a royal choirbook similar to and slightly later than Old Hall (see Bent, 1984), and where they were part of the main body of the manuscript (for an illustration *see* SOURCES, MS, fig.12*a*). The paired Gloria and Credo are unified by the use of the same SQUARE in the tenor of each (the only Old Hall compositions, apparently, to make free use of an existing square, found also in Ludford's mass for feria iv, rather than being the source of a square melody), despite the discrepancy in ranges. Andrew Hughes has demonstrated their close structural and motivic unity (RBM, xix, 1965, pp.15–27, esp. 22–3); both have extensive duets. Similar melodic and harmonic parallels are found in Old Hall nos.37 and 72, though the clinching evidence of an identified tenor is not available in this case to overcome the same disparity of ranges (the Credo of each 'pair' being a 5th higher than its Gloria). Damett had mastered the techniques of proportional writing (specifying *subsesquitertia* even for part of a descant composition in score), and he used several specialized signatures and colorations. The contratenor

of the Credo (no.72) is to be sung in augmentation, a feature common in the works of Power. Damett showed a fondness for notation in low tessitura with partial signatures of up to two flats. (The Gloria, OH no.13, is illustrated in SOURCES, MS, fig.38).

MARGARET BENT

Damianus a SS Trinitate. *See* STACHOWICZ, DAMIAN.

D'Amico, Fedele (*b* Rome, 27 Dec 1912; *d* Rome, 10 March 1990). Italian music critic, son of the theatre historian and critic Silvio D'Amico. After taking a law degree and studying the piano and composition with Casella, he took up journalism. In addition to working as music critic for a number of newspapers, including *Il Tevere* (1931–2), *Voce operaia* (which he edited when it was banned in 1943–4), *Vie nuove* (1948–54), *Il contemporaneo* (1954–9), the Milan *Fiera letteraria* (1967) and *L'espresso* (1967–89), he held editorial positions on *Rassegna musicale* (1941–4), *Enciclopedia dello spettacolo* (music and dance section, 1944–57), the series Cultura e realtà (1950–51) and *Nuova rivista musicale italiana* (from 1967). He was also associated as administrator and music consultant with Lux Film (1941–4), the Accademia Filarmonica Romana (1948–55, as vice-president from 1950), the Società Italiana per la Musica Contemporanea (1949–59), the publishing firm Il Saggiatore (1958–66) and the Teatro dell'Opera, Rome (1963–8). In 1963 he began teaching music history at the University of Rome, becoming full professor in 1977, a position he held until his retirement in 1988. In 1985 he was appointed artistic director of the Maggio Musicale in Florence. In addition to his critical writing he contributed articles on 19th- and 20th-century music and music and dance for the theatre to other Italian and foreign publications. His many interests included writing texts for music (e.g. for Meyerowitz's cantata *I rabbini*) and translating librettos (for works by Mozart, Boccherini, Henze, Janáček, Weill, Hindemith, Stravinsky and Shostakovich). He also composed incidental music for Ugo Betti's *Il cacciatore d'anitre* (1941) and Chekhov's *The Cherry Orchard* (1942).

CAROLYN GIANTURCO/TERESA M. GIALDRONI

Dam-Jensen, Inger (*b* Fredriksberg, 13 March 1964). Danish soprano. She trained at the Royal Danish Conservatory and the Danish Opera School before winning the Cardiff Singer of the World Competition in 1993. She has sung regularly at the Royal Danish Opera in Copenhagen, where her roles have included Susanna, Rosina, Norina, Adina, a much admired Ophelia in Thomas's *Hamlet*, Sophie and Zdenka, the last two both notable for the effortless ease of her top notes. She made her Covent Garden début with the Royal Danish Opera as Ninetta (*The Love for Three Oranges*) in 1995. Dam-Jensen has since appeared with Covent Garden as an admired Blonde (1996) and Despina (1998), and in 1996 made her Glyndebourne début as Fiakermilli (*Arabella*). Her concert repertory includes Handel's *Solomon*, Mahler's Fourth Symphony (which she has recorded) and *Des Knaben Wunderhorn*, Strauss lieder and Britten's *Les illuminations*. She possesses a bright, attractive lyric-coloratura soprano, particularly suited to Strauss, and is a vivid actress.

ALAN BLYTH

Damm, Gustav. *See* STEINGRÄBER, THEODOR LEBRECHT .

Dammann, Rolf (*b* Celle, 6 May 1929). German musicologist. He studied musicology with Zenck and Gurlitt at Freiburg University (1948), with Blume at Kiel University (1948–50) and at Freiburg again (1950–52), where he took the doctorate (1952) with a dissertation on Jean Mouton's motets. He was appointed lecturer in the history of Protestant church music and hymnology (1953–64), and (from 1958) in music history at the Staatliche Hochschule für Musik, Freiburg; he also worked on the Sachteil of the *Riemann Musik Lexikon* (1955–64). He completed his *Habilitation* in musicology at Freiburg in 1958 with a work on the German Baroque concept of music. He then became a lecturer, supernumerary professor (1966–78) and professor (1978–95) in musicology at Freiburg; he held the chair of musicology at Heidelberg (1963–4), and at Freiburg during the summer terms of 1967 and 1973. He retired in 1995. His research is concerned with late medieval, Renaissance and Baroque

music. By adopting an approach based on the history of ideas, particularly of concepts, he has aimed to show the connection between the concept of music and the concrete music of a period, and to place both in their cultural historical context.

Damned, the. English punk rock group. Its original members were Captain Sensible (Raymond Burns; *b* 23 April 1955; bass guitar), Dave Vanian (David Letts; *b* 12 Oct 1956; vocals), Brian James (Brian Robertson; *b* 18 Feb 1955; electric guitar) and Rat Scabies (Christopher Miller; *b* Kingston upon Thames, 30 July 1957; drums). The Damned had the distinction of inaugurating the British punk movement by recording James's song *New Rose* (Stiff) in 1976. The group's frenetic musical style showed the influence of New York group the Ramones, but the Damned's stage act reflected the Hammer horror school of film-making with Vanian dressed in a costume inspired by Count Dracula. The group's first album *Damned Damned Damned* (Stiff, 1977) included such compositions as *Neat Neat Neat*, *Stab your Back* and *So Messed Up*. While these songs exhibited the darker lyric preoccupations of the genre, in contrast to the sterner personae of other punk groups, the Damned owed much to the English music hall tradition. Thus, in 1982, Captain Sensible (who frequently wore a tutu on stage) made a novelty solo recording of *Happy Talk* (A&M) from the musical *South Pacific*. By this time he had left a group which increasingly veered towards mainstream pop in its recordings, typified by the 1986 hit *Eloise*, a revival of a lightweight ballad from 1968.

DAVE LAING

Da Modena, Giacomo. *See* FOGLIANO, GIACOMO.

Damon (*fl* late 5th century BCE). Greek music theorist. A highly influential figure of the Periclean age. Damon had paramount importance among the pre-Socratics for doctrines of musical ethos. Dance and song 'necessarily arise when the soul is in some way moved', he maintained (Diels, 37/B/6), aware that purposive action originates in the soul. He went on to voice the primary tenet of all musical ethics, claiming that 'liberal [i.e. befitting a free man] and beautiful songs and dances create a similar soul, and the reverse kind creates a reverse kind of soul' (ibid.). According to a late author, ARISTIDES QUINTILIANUS (ii.14; Winnington-Ingram, 80.26–9; Diels, 37/B/7), this creative act was explained as having a twofold nature, masculine and feminine:

> That notes, even of continuous melody [i.e. one that follows scalar order], mold through similarity a nonexistent ethos in children and in those already advanced in age and bring out a latent ethos, the disciples of Damon showed. In the harmoniai transmitted by him, it is possible to discover that sometimes the feminine, sometimes the masculine of the movable notes either dominate or have been employed to a lesser degree or not at all, since it is evident that a harmonia is utilized in accord with the ethos of each soul. Therefore, of the parts of melic composition, the so-called repetition is considered the most useful on each occasion in the selection of the most necessary notes.

A number of noteworthy concepts appear in this passage: similarity, continuity and the particularity of each soul. Similarity (*homoiotēs*) was in all likelihood a Damonian principle originally separate from the Platonic principle of mimesis which incorporated it. The element of continuity appears to be intimately bound up with the process of repetition (*petteia*), which Aristides named as an important technique of the Damonian school. On the other hand, the phrase 'each soul' suggests late theory. No early source, moreover, connects Damon or his followers with the male–female concept; nor does the antithesis appear to have been a part of the early history of Greek music in any case.

As PHILODEMUS in his *On Music* (Kemke, 55; Diels, 37/B/4) presented Damon's belief, the virtues of the liberal and beautiful soul included 'not only courage and moderation but also justice', and 'in singing and playing the lyre, a boy ought properly to reveal' these qualities. The Platonic Socrates (*Republic*, iii, 400c1–4; Diels, 37/B/9) notes that Damon applied ethical valuation to metrical complexes as well as rhythms, taking these two elements separately or in combination. Finally there is the statement, attributed to Damon by Socrates in the *Republic* (iv, 424c; Diels, 37/B/10), that 'musical styles are nowhere altered without [changes in] the most important laws of the state'. This thesis, found in other cultures as well (e.g. that of ancient China), usually issues from a conservative or even reactionary point of view. Yet on several occasions Aristophanes, an arch-conservative, attacked Damonian positions (*Clouds*, 647–51, 961–71; *Frogs*, 729, 1491–9) as the chief spokesman for the poet-composers in their hostility towards the new, dogmatic philosophy of the Damonian school.

The possibility that Damon may have been a radical rests further, and chiefly, on a careful interpretation of the evidence of Plato. The passages in Plato's dialogues that seem to praise Damon (*Laches*, 180d2–3, 197d1–5, 200a2–3; *Republic*, iii, 400b1–c6, 424c5–6) take on an altered significance when one recalls the writer's dislike of versatility, technical skill and professionalism. Again, praise even from Socrates had no binding force on Plato himself. Yet Damon was viewed with respect: Plato saw him as no mere teacher of the elements of music but a professor of musical theory and ethics (*mousikos*) and evidently of 'logic' and political science as well. In later times, Isocrates (xv, 235) and Plutarch (*Pericles*, 4) were

to call him a Sophist; his association with Prodicus, Protagoras and Agathocles bears out the claim.

When Aristotle (*Politics*, viii, 1340b5–6) mentions statements about modal ethos 'made by persons who have devoted special study to this branch of education', he may be referring to the Damonian school. These harmonic theorists had already been attacked in the early 4th century by the author of an anonymous diatribe, preserved in the so-called HIBEH MUSICAL PAPYRUS, against doctrines of ethos. It cites various aspects of harmonicist method and theory: comparative criticism (*sunkrisis*), a strongly theoretical bent, insistence upon amateur status and the belief that music can make men just. Although these points are not always Platonic, they are usually Damonian. The final one eventually reappears in the passage already cited from the treatise by Philodemus, who rightly countered elsewhere (*On Music*, iv.24.9–35; Kemke, 92–3) that Plato did not equate justice with music but claimed only that the two are analogous. The tradition that Damon spoke before the court of the Areopagus, questioned by Philodemus (*On Music*, i.11.17–19, iv.34.1–5; Kemke, 7, 104–5), is insecurely based. It is equally doubtful that he 'discovered the relaxed Lydian mode', as stated in the Pseudo-Plutarch, *On Music* (1136e). At the same time, tradition would hardly have associated a noted conservative with one of the *harmoniai* which Plato condemned and banned in the *Republic*.

Although continental scholarship of the mid-20th century ascribed far too much to Damon, he was unquestionably a formidable figure. He expanded and codified doctrines of ethos in a notable and perhaps unparalleled degree; his view that music is connected with the soul's motion provided one of the main theoretical foundations on which Plato was to build; and his name enjoyed wide renown until the Roman period and even later (Cicero, *On Oratory*, iii.33; Martianus Capella, ix.926).

WARREN ANDERSON/THOMAS J. MATHIESEN

Damon(d), William. *See* DAMAN, WILLIAM.

Damoreau, Etienne-Grégoire [*l'aîné*] (*fl* 1750–65). French composer and violinist. His only known works, the six *Sonates à deux violons ou dessus de viole sans basse* op.1 (Paris, 1754), are firmly in the tradition of the Baroque *sonata da camera*, suggesting that Damoreau belonged to an older generation of composers. He was called *l'aîné* to distinguish him from his younger brother Jean-François Damoreau. (*La LaurencieEF*)

For further bibliography *see* DAMOREAU, JEAN-FRANÇOIS.

NEAL ZASLAW

Damoreau (des Aulnais), Jean-François [*le jeune*] (*fl* Paris, 1754–*c*1775). French organist, harpsichordist and composer, younger brother of Etienne-Grégoire Damoreau. His *Pièces de clavecin avec accompagnement de violon et sans accompagnement* appeared in Paris in 1754. He appeared at the Concert Spirituel on three occasions, playing organ concertos in April 1759 and April 1760 and a transcription of the overture to Mondonville's *Titon et l'Aurore* in June 1759 (the custom of performing organ transcriptions of orchestral works had originated with Balbastre in 1755–6 and remained popular for more than a decade). In 1763 he gave a series of public demonstrations on a harpsichord built by Le Gay, which had an action that both bowed and plucked, and could be heard every day at the Tuileries between 4 and 9 p.m. In 1771 Damoreau published his *1re suite en quatuor* (for piano or harpsichord; violin; flute or oboe), on melodies by Grétry, Monsigny and Philidor; the *2e suite en quatuor* (piano, harpsichord or harp; violin; horn or viola), on melodies by Martini and La Borde, appeared the following year. He was married to Marie Louise Mignot; they separated in 1775.

Damoreau *le jeune* should not be confused with the organist and composer Nicolas-Jean Le Froid de Méreaux, listed as 'Demereaux' or 'Desmereaux' in the Parisian *Almanach musical* and *Calendrier musical universel* between 1775 and 1789.

Dampierre, Marc-Antoine, Marquis de (*b* Franleu, Somme, 20 May 1678; *d* Versailles, 17 June 1756). French *veneur* (huntsman), musician and composer. He was the son of a Huguenot gentleman from the comté of Eu who went into exile in about 1696 to 'save the liberties of Europe', going to Stargard (Pomerania) and London. Dampierre entered the service of the Duke of Maine as a page in 1693 and a gentleman in 1698, becoming *Maître d'équipage du duc* in 1709. He acquired a sound musical training at the court of Sceaux, and remained faithful all his life to the friends he made there, including Campra, Bernier, Mouret, Lalande and Collin de Blamont, many of whom, like himself, played the viol. An experienced *veneur*, he

probably provided J.-B. Morin with the themes for his *La chasse du cerf* (1708).

Louis XV made him Gentilhomme des Menus-Plaisirs in 1722 and equerry to Queen Marie Leszczinska in 1725. Dampierre was a fine *trompe* (hunting horn) player, and it was at this time that he wrote his famous Lullian (Piétri) fanfares and hunting-calls, which are still in use and constitute some of the earliest French hunting music. He used old-fashioned instruments in F and D, known as *trompes Dampierre*, each coiled in one and a half circles and with a large diameter across the hoop; however, in 1729 he adopted a *trompe* with a two-and-a-half circle coil made by Le Brun. This design, called the *trompe Dauphine*, was easier to handle.

Dampierre also played the violin and the bass viol very well; he owned instruments made by Henry Jaye and Henry Smith. He composed many pieces for the bass viol, which were performed in concerts together with Mme de Langeais on the lute and Madame Adélaïde (one of the king's daughters) or Mondonville on the violin. He bequeathed his viol pieces to Mondonville, his best friend. Colin de Blamont conducted the music at his funeral in Versailles.

WORKS

Tons de chasse et fanfares, 1/2 hunting hn, Les dons des enfans de Latone: la musique et la chasse du cerf (Paris, 1734)
Fanfares nouvelles, 2 hunting hn/tpt, musettes, vièles, obs (Paris, 1738)
Fanfares de Saint-Cloud, 1751, *F-Pn*
Recueil de fanfares pour la chasse, 1/2 hunting hn (Paris, before 1775)
24 airs, wind insts, *Pn*
Pieces, b viol, lost, formerly in Mondonville collection

ÉRIC DE DAMPIERRE

Damrosch. German-American family of musicians.

(1) Leopold Damrosch (*b* Posen [now Poznań], 22 Oct 1832; *d* New York, 15 Feb 1885). Violinist, conductor and composer. After receiving a degree in medicine from Berlin University in 1854, he decided, against his parents' wishes, to devote himself to the study of music. He became a pupil of Hubert Ries, S.W. Dehn, and Böhmer, and in 1857 Liszt appointed him leading violinist in the court orchestra at Weimar. In 1858–60 he was conductor of the Breslau Philharmonic Society, and in 1862 he organized the Orchesterverein of Breslau, of which he remained director until 1871.

In that year Damrosch was called to New York to become conductor of the Männergesangverein Arion, a post he held until 1883. His energy, strong musical temperament, and organizing ability soon brought him influence in the musical life of New York, where in 1873 he founded the Oratorio Society, a choir devoted to the performance of oratorios and other works. After a financially unsuccessful season as conductor of the Philharmonic Society (1876–7) he formed his own orchestra, which gave the American première of Brahms's First Symphony, and which in 1878 was organized as the New York Symphony Society. He served as conductor of the Oratorio and Symphony societies until his death.

In 1880 Columbia College conferred the MusD on Damrosch. The following year he conducted the first great musical festival held in New York; with an orchestra of 250 and a chorus of 1200 he presented the American première of Berlioz's Requiem. In 1882 and 1883 he made successful tours through the western states with the Symphony Society. His compositions, some of which were published in the USA, included an oratorio, *Ruth and Naomi*, and a cantata, *Sulamith*, as well as other choral works and partsongs.

Damrosch was also instrumental in the establishment of German opera at the Metropolitan Opera, which had opened with an Italian season that was a disastrous financial failure. He presented a plan for German opera, gathered a company of German singers, and conducted nearly all the performances of the 1884–5 season.

(2) Frank (Heino) Damrosch (*b* Breslau [now Wrocław], 22 June 1859; *d* New York, 22 Oct 1937). Conductor and teacher, son of (1) Leopold Damrosch. He went to New York with his family in 1871, having studied composition and piano as a child. He first went into business in Denver, but soon devoted himself to music, founding the Denver Chorus Club in 1882 and being appointed supervisor of music in the Denver public schools in 1884. After his father's death he became chorus master at the Metropolitan Opera, where he remained until 1892. In that year he organized the People's Singing Classes in New York for instruction in sight-reading and choral singing; from this he developed in 1894 the People's Choral Union, with a mainly working-class membership of 500. He directed both groups until 1909. He also founded in 1893 the Musical Art Society of New York, a small chorus of professional singers devoted to the performance of *a cappella* choral works and modern choral music, and conducted it until it disbanded in 1920. From 1897 to 1905 he was supervisor of music in the New York public schools. He served as conductor of the Oratorio Society (1898–1912), succeeding his brother Walter, and presented a series of symphony concerts for young people. At various times he conducted choral societies in towns near New York, but resigned most of these posts to found in 1905 the Institute of Musical Art. He was its director until 1926, when it merged with the Juilliard Graduate School to form the Juilliard School of Music; he then served as dean until 1933. He was awarded an honorary MusD by Yale University in 1904.

(3) Walter (Johannes) Damrosch (*b* Breslau [now Wrocław], 30 Jan 1862; *d* New York, 22 Dec 1950). Conductor, music educationalist and composer, son of (1) Leopold Damrosch. He was devoted to music from his childhood and studied composition and piano in Germany and in New York, where he went with his family in 1871. When his father began his season of German opera at the Metropolitan Opera in 1884 Walter became assistant conductor, and after his father's death he continued in that post under Anton Seidl until 1891. He succeeded his father as conductor of the Oratorio Society and New York Symphony Society, holding the former post until his resignation in 1898, and the latter with a brief discontinuance, until the orchestra's merger in 1928 with the New York Philharmonic Society. He persuaded Andrew Carnegie to build Carnegie Hall as a home for the two societies, and brought Tchaikovsky to the USA for its opening in 1891. He presented the American premières of Tchaikovsky's Fourth and Sixth symphonies, and those of works by Wagner, Mahler, and Elgar. He also championed conservative American composers such as Carpenter, Loeffler, Daniel Gregory Mason, and Deems Taylor; he commissioned Gershwin's piano concerto and conducted the première of his *An American in Paris*. In 1894 he organized the Damrosch Opera Company with German singers, giving performances in New York and throughout the country for five years. He was conductor of the German operas at the Metropolitan from 1900 to 1902 and of the New York Philharmonic Society in the 1902–3 season.

Damrosch was honoured with the MusD by Columbia University in 1914. During World War I he organized a bandmasters' training school for the American Expeditionary Force in France and helped raise money for French musicians. These activities led in part to a tour of Europe by the Symphony Society in 1920 – the first European tour by an American orchestra – and to the founding of the American Conservatory at Fontainebleau, near Paris. In his later years Damrosch came to the fore as a director of broadcast orchestral music, and was the first to conduct an orchestral concert relayed across the USA. In 1927 he was appointed musical adviser to the NBC network; among other activities, he presented from 1928 to 1942 a 'Music Appreciation Hour' for schoolchildren throughout the USA and Canada, an application to broadcasting of his lifelong work in giving children's concerts and lecture-recitals in New York. In 1932 Damrosh was elected to the American Academy of Arts and Letters. Despite his untiring efforts for musical education and his busy conducting career, he never completely abandoned composition.

WORKS
(*selective list*)

OPERAS

The Scarlet Letter (3, G.P. Latrop, after N. Hawthorne), Boston, 10 Feb 1896
The Dove of Peace (comic op, 3, W. Irwin), Philadelphia, 15 Oct 1912
Cyrano de Bergerac (4, W.J. Henderson, after E. Rostand), New York, Metropolitan, 27 Feb 1913
The Man without a Country (2, A. Guiterman, after E.E. Hale), New York, Metropolitan, 12 May 1937

OTHER WORKS

Iphigenia in Aulis (incid music, Euripides), Berkeley, CA, 1915
Medea (incid music, Euripides); Berkeley, 1915
Electra (incid music, Sophocles), New York, 1917
An Abraham Lincoln Song, Bar, chorus, orch, 1935
Dunkirk (R. Nathan), Bar, male chorus, chbr orch, 1943; NBC, 2 May 1943
Chbr music, songs

H.E. KREHBIEL, RICHARD ALDRICH, H.C. COLLES/R. ALLEN LOTT

Damse, Józef (*b* Sokołów, Małopolski, 26 Jan 1789; *d* Rudna, nr Warsaw, 15 Dec 1852). Polish composer and actor. From 1809 to 1812 he was a clarinettist, trombonist and military bandmaster, and from 1813 a singer and actor, first in Vilnius and then in Warsaw. There he began to compose, writing music for the stage, including 40 comic operas and burlesques, 16 melodramas and three operas. He was a composer without any high artistic aspirations. His output is not of great value, particularly as in his stage works he pandered to popular taste, though there are reminiscences of Mozart and Rossini operas known in Warsaw at the time, as well as folk melodies. His best-known work was the ballet *Wesele w Ojcowie* ('The Wedding in Ojców', 1823), and his *Chłop milionowy* ('The Millionaire Peasant', 1829, based on a play by Raimund), created a sensation in Warsaw; his parody of Meyerbeer's *Robert le diable*, *Robert Birbanduch* ('Robert the Rake', 1844), was also a success. Damse's own arrangements for piano of excerpts from his stage works contributed to his popularity.

WORKS

STAGE

Klarynecik magnetyczny [The Magnetic Clarinet] (comic op, 3, L. Dmuszewski), Warsaw, 26 Aug 1822, Poznań Theatre Library
Wesele w Ojcowie [The Wedding in Ojców] (ballet), Warsaw, 14 March 1823 (excerpts pubd after 1823)
Chłop milionowy, czyli Dziewczyna ze świata czarownego [The Millionaire Peasant, or The Girl from Fairyland] (melodrama, 3, Damse, after F. Raimund), Warsaw, 26 Nov 1829 (Warsaw, 1830)
Bankocetle przecięte, czyli Aktorowie na prowincji [Snipped Banknotes, or Actors in the Provinces] (comic op, 2, S. Doliwa-Starzyński), Warsaw, 20 April 1836, *Pl-Kj*
Kontrabandzista [The Smuggler] (op, 3, S. Bogusławski), Warsaw, 1 June 1844 (Warsaw, 1844)
Robert Birbanduch [Robert the Rake] (comic op, 3, Damse), Warsaw, 12 July 1844

OTHER WORKS

3 masses, 1837, 1838, lost; cantata, gradual, offertories; songs; polonaises, mazurkas, waltzes, other dances, orch; over 100 polonaises and other dances, pf; Variations, cl, 1837, lost

ALINA NOWAK-ROMANOWICZ/BARBARA CHMARA-ŻACZKIEWICZ

Dan, Ikuma (*b* Tokyo, 7 April 1924). Japanese composer. He studied composition with Saburō Moroi and Shimofusa at the Tokyo Music School, from which he graduated in 1945. In 1950 he made a successful début as a composer with his Symphony no.1, written for the 25th anniversary of the Japanese radio competition. That year he finished his best-known and most representative work, the opera *Yūzuru*, which makes abundant use of folk-inflected pentatonic melodies supported by sparse orchestration. The simple lyricism and straightforward sentiment of the work established it as the most popular opera by a Japanese composer; within a decade it had received nearly 200 performances and been heard in Europe and the USA. It won a number of prizes, including the Kōsaku Yamada Prize for Composition, the Mainichi Music Prize and the Iba Opera Prize. In 1953 Dan joined Akutagawa and Mayuzumi in the Sannin no Kai (Group of Three); after that date he composed many vocal works and film scores, but he remains primarily a composer of opera and orchestral music. Although later compositions include more frequent dissonances, his music is always tonal, basically Romantic and tends to assimilate elements of traditional Japanese music. Two later operas, *Susanoo* and *Takeru*, both on the composer's own librettos in ancient Japanese, are based on Japanese mythology: Wagnerian in scale, in concept and in vocal requirements, they lack the expressive force and charm of his earlier operas. He is also popular as a writer of essays on music, among them *Paipu no kemuri* ('Pipe smoke') in 25 volumes (Tokyo, 1965–98), *Eskargo no uta* ('Songs of escargot', Tokyo, 1964) and many others.

MASAKATA KANAZAWA

Đàn bâù [đàn đoc huyen]. Single-string box zither of VIETNAM (for Hornbostel-Sachs classification, *see* CHORDOPHONE). The *đàn đoc huyen* (*đàn*: 'instrument'; *đoc*: 'unique'; *huyen*: 'string'; *bâù*: 'gourd') consists of a box without a base, formed by three wooden pieces (*ngô đong* wood for the soundboard, tulip wood the sides) of about 80 to 100 cm in length and from 9 to 12 cm in width. A flexible bamboo stem holds a gourd or an empty coconut shell for a resonator and is attached to one end of the soundboard. A steel string, often that of a guitar, is at one end tied to the bamboo stem, stretched obliquely along the soundboard and tied round a peg on the side of the box.

The instrument is put on the floor in front of the musician who holds it in place with his right foot. The player holds a 15 cm long bamboo stick like a pencil between the thumb and fingers of his right hand, and plucks the string with the bamboo stick, while the right edge of the same hand touches the string at vibration nodes, producing harmonics. The flexibility of the stem holding the gourd enables the musician to vary the pitch of sounds by pulling to the right or the left. The instrument is characterized by the exclusive use of harmonics and the variation of the tension of the string. Some musicians use a small plastic plectrum to pluck the string, creating special sound effects with tremolo technique reinforced by amplification.

According to a Vietnamese legend, a fairy devised this instrument for a blind woman so that its sound resembled the human voice. It is favoured by blind musicians who use it in epic narration. It was introduced to the Nguyễn court (1802–1945) at the end of the 19th century and became an element of chamber music in central Vietnam at the beginning of the 20th century. After World War II it became a vehicle for virtuosity and received international recognition with performers from the 1950s and 60s such as Manh Thang, Minh Con, Thanh Chuong (*d* Vietnam, 1972), Nguyền HŨu Ba; Khac Chi and Pham Đuc Thanh (active from the 1970s); and the popular compositions of Đuc Nhuan. A new *đàn bau*, named *hạnh phúc* ('happiness') has been invented by Phan Chi Thanh, developing ideas from both steel and electric bass guitars.

The *đàn bau* can be played as a solo instrument, in duets or in an ensemble. Several works have been composed for the *đàn bau* and Western-style orchestra by such Vietnamese composers as Nguyễn Xuân Khoát, Huy Thục, Nghiêm Phú Phi, Trần Quang Hải and Trương

Trủòng (*d* 1989). The amplifier which has been recently added can diminish the noise caused by the contact of stick and string and can multiply the harmonics; but the instrument loses its intimate subtlety and mysterious character and only produces artificial sounds, similar to those of the Hawaiian guitar.

For illustration *see* VIETNAM, fig.2.

TRÂN QUANG HAI

Danby, John (*b c*1757; *d* London, 16 May 1798). English organist and composer. He was a Roman Catholic and a pupil of Samuel Webbe (i). From 1781 until his death he is known to have lived in London; in 1785 he registered as a member of the Society of Musicans. He composed 92 glees, catches, solo songs and partsongs (according to Baptie), many of which appeared in three books published during his lifetime and in a posthumous collection issued in 1798 'for the benefit of his widow and four children'. He won eight prizes from the Catch Club for his compositions (1781–94). His glees are polished and graceful, and occasionally original, for example, *'Tis midnight, all* (1794) uses a mixture of time signatures in the different voices with good effect. He also published a vocal tutor and an elementary keyboard tutor with eight 'progressive lessons' and one duet attached.

Danby was also for some years organist of the chapel at the Spanish Embassy, Manchester Square, London, for the service of which he composed a number of masses and motets. Apart from a short setting of the Magnificat found in Novello's *Evening Service* (1822), and manuscripts of a three-part Mass and an *O salutaris hostia* in the British Library, a small number of sacred works are found in the Spanish Embassy chapel organ book, a manuscript held at St James's Spanish Place. These are textually sectional works in three or four parts, with or without soloists. Occasionally the organ is indicated to play the bass line (which is never figured); otherwise there is no accompaniment. The style is unashamedly secular and the music sometimes technically demanding, no doubt reflecting the musical taste and quality of the choir in the embassy chapel.

WORKS
(*selective list*)

printed works published in London, unless otherwise stated

COLLECTIONS

Danby's First Book of Catches, Canons and Glees, 3–5vv (1785) [D1]
Danby's Second Book of Catches, Canons and Glees, 3–5vv (1789) [D2]
Danby's Third Book of Catches, Canons and Glees, 3–5vv (1796)
Danby's Posthumous Glees, being a Fourth Set of Catches, Canons and Glees, 3–5vv (London and Bath, 1798)
The Professional Collection of Glees ... Composed by Callcott ... Danby (1791)
The Favorite New Glees Composed by Dr. Cooke ... Mr. Danby (1792)
Amusement for the Ladies, being a Selection ... of ... Glees and Madrigals ... by Messrs Atterbury ... Danby, 3 vols (?1800) [A]

SONGS

Canons: Jehovah reigns (1785); Lord in Thee (1783); O Lord, spare thy servants (1788), D2
Catches: A spendthrift to his wife, 3vv (1783); He shew'd to Nell, 4vv (1782); O let the merry peal go on, *GB-Lbl*, D2; On midsummer eve, 4vv (1788); So neighbour good morrow, 3vv (1785); To pass a dull ev'ning, 4vv (1787)
Duets: While Beams the Bright Morn: a Favourite Hunting Duett (1785)
Glees: Awake Aeolian lyre (?1784), D1; Come ye party jangling swains (?1785), D1; Could valour, patriotic flame (1783); Fair Flora decks, 3vv (?1795), D1, A; Fair thee well thou native vale, 4vv (1795); Gentle airs (1783), D1; Hail young spring (1781); Let harmony (1785); Now the woodland chorists (1788); O sleep! Thou flatterer (1787); Oh friendship thou balm (1781); Oh gentle love, assist, *Lbl*; Shepherd, wouldst thou here obtain, *Lbl*; Sure Chloe just (1788); Sweet Minstrel (1788); Sweet Thrush, 4vv (?1795), A; The Stout Limb'd Oak, 4vv (?1799); When flow'ring meadows (1782); When Sapho turn'd (?1782), D1, A; When sorrow weeps (1782); When the poor dove (?1799)
Songs and partsongs: Circle round the chearful glass (1780s); Dearest charmer (1780s); He vow'd to love me still (1780s); How fond is my Damon (?1780); My heart is ev'ry beauty's prey (1794); My lodging is on the cold ground, 3vv (?1790); O! What a charming creature (?1785); Say no more Anacreon's old (?1790); Stay Silver Moon (1796); Sweet Echo, 4vv (?1798); Shepherds I have Lost my Love, 3vv (?1780); The Merry Peal (1794); To Thee! O gentle sleep, 3vv (?1790); Turn O turn thee (1878)

SACRED

Short Magnificat, F, in V. Novello, ed.: The Evening Service (1822); Mass, 3vv, *Gb-Lbl*; O salutaris hostia, SATB, *Lbl*; other works in St James's Church, Spanish Place, London

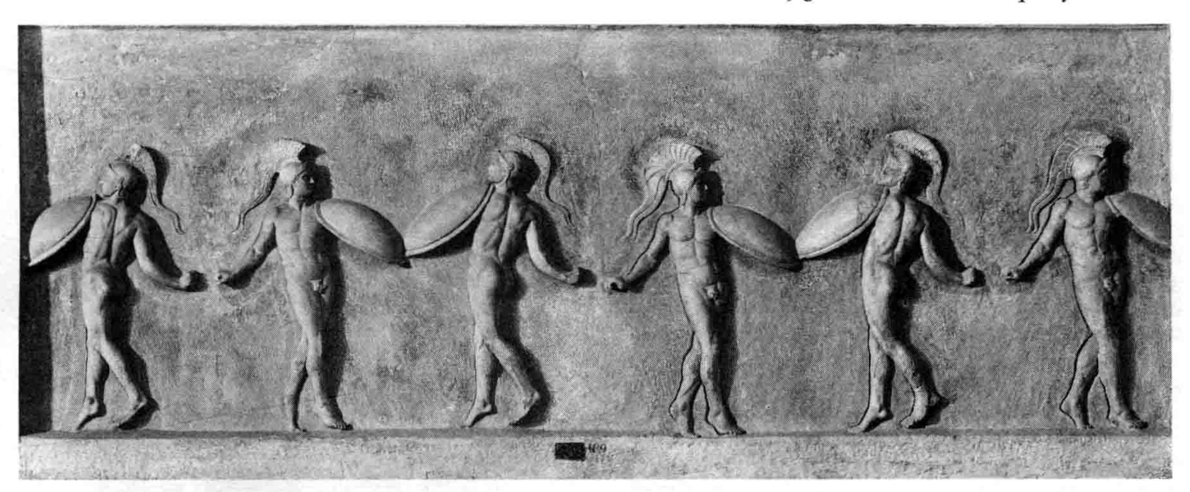
NICHOLAS TEMPERLEY/BENNETT MITCHELL ZON

Dance. Dance, like all the arts, finds expression in an apparently infinite range of styles, forms and techniques: it may satisfy the simplest inner needs for emotional release through motor activity, as in children's singing-games, or the most complex demands of the creative artist on the professional stage; it may be profoundly subjective or philosophical, or purely decorative or virtuoso; it ranges from the ecstatically Dionysiac to the calmly Apollonian, the hypnotic to the cerebral, the totally pantomimic to the totally abstract, the completely functional – that is, serving a social or ritual purpose – to art for art's sake. Like music, dance may be performed either in solitary privacy, or by groups for their own satisfaction, or in a concert or theatrical setting. Thus its pleasures may be gained either by direct participation or vicariously. As a theatrical art it goes hand in hand with costume and scenery, music and poetry. As such, it is frequently part of religious rites or put to the service of the state. These associations are not unusual for any art. What seems to be unique to dance, however, is that it appears never to stand alone, but always to be accompanied by musical sound, at however simple a level. For the ancient Greeks, in fact, music, dance and poetry were represented by the single term *mousikē* (art of the Muses).

1. INTRODUCTION. Western dance music, with which this article is concerned (for folk traditions and non-Western dance, *see* ETHNOCHOREOLOGY; see also the entries on the countries concerned), comprises two major divisions: music for dancing proper, such as a waltz or a Stravinsky ballet, and dance-inspired music, as heard in Bach suites, symphonic minuets or Chopin mazurkas.



Both categories range from musical simplicity to complexity, and within each there are masterpieces by some of the finest composers. With regard to dance music proper, it is essential that musicians understand the character, tempo, rhythmic needs and physical problems of the dances in order to perform the music. As for idealized dance music, recent research into the dances of the 15th to 18th centuries, for example, has aided musicians immeasurably in their attempts to transmute dance-like qualities into the music and to explore the problems of tempo, articulation, phrasing and character it presents. (For details of the choreography and repertory for specific dances, and for illustrations, see the entries on the dances concerned. For theatrical dance of the 18th to 20th centuries *see* BALLET.)

For lack of concrete evidence, the prehistories of music and dance are more heavily shrouded in mystery than those of the other arts. Tales of their origins, no matter how specific they appear to be, lack the corroboration that could prove them true. While known human migrations may logically be assumed to have included dance, any hypothesis in this area must be viewed with an awareness of the tendencies of conquerors to absorb artistic influences from the conquered. Even in recorded history, the problems of authenticating Western dance history are more severe than they are for Western music, because not even a rudimentary notation existed before the 15th century, and the notation systems in use since then rely on the reader's considerable knowledge and are essentially aides-mémoires. Most of these systems are essentially shorthands in which one symbol stands for a number of movements occurring either simultaneously or consecutively. Written descriptions of these movements in dance manuals, which also first appeared in the 15th century and are certainly the best sources on dance of the past, are often ambiguous. Furthermore, both in the notations and in the manuals, exact correlations of dance with music are often elusive. Today there are still problems, for the advent of sound film, valuable as it is, and the development of accurate and complete dance notations (for example, Labanotation) have not yet resulted in a record of dance remotely comparable in extent to current musical recordings and scores. It is, therefore, still the rule rather than the exception for dances to be revived from memory, a method that is notoriously fallible. It goes without saying that non-Western dance, taught largely by rote, presents the same problems.

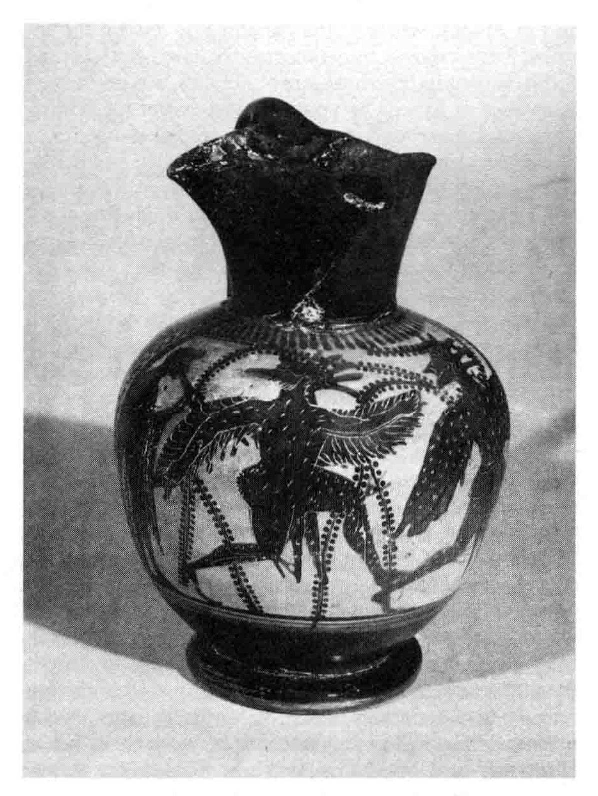
To flesh out the history of dance music much other evidence must be examined. Early iconographic sources tell of dance and its musical accompaniments quite clearly (Greek vases are a rich source, for example). Written records (memoirs, letters, plays, poems, tales and travellers' accounts) document the place and functions of dance in a society, of desirable or undesirable attributes in dancing, and of instrumental and vocal accompaniments. The more direct evidence supplied by dance music and poetry intended for dancing reveals something of its metre and character. But none of these sources either provides movement sequences, or describes how music and dance were correlated, or gives clear tempo indications. Concrete modern examples may demonstrate the possibilities for movement inherent in the human body, and the many ways these may relate to music, but they must remain largely hypothetical when dealing with the past, even when there may be a basis for thinking that certain ancient traditions have been maintained through reverential rote teaching. While the utmost caution must be observed, then, in using all types of evidence, and while much primary research remains to be done, some facts of dance history are indeed certain, and there is a considerable body of information on the relationships between music and dance.

Music for dance may be supplied entirely by the dancer by clapping, stamping, snapping the fingers, slapping the body or singing. These musical means may be extended by wearing bells, shells, *Lederhosen* or boots, by striking sticks, swords or shields, or by playing castanets, finger cymbals, tambourines or drums hung on the body. Except for the voice, these devices are largely percussive in nature, providing basic metrical and rhythmic accompaniments and accents for the dancer. Dance music may also be supplied by non-dancing singers or instrumentalists, or both. Here too there is great variety, for the accompaniment may use the resources listed above, may be assigned to one or many, to amateurs or to professionals; it may be improvised on a basic pattern or composed, and may extend from the pure 'mouth music' of nonsense syllables to the sophisticated musical resources of a symphonic ensemble or electronic tape. The manner of accompaniment varies widely in other respects as well. The 'accompanist' may, in fact, direct the dances, as in the case of the 18th-century dancing-master with his *pochette* violin; alternatively he or she may compete with the dancer, as in some of the German *Zwiefacher* which change metre rapidly in a guessing-game between dancers and musicians, or may both follow and lead, as when a musician pauses for a dancer's leap before resuming command of the beat. In short, the union between musician and dancer is achieved through multiple means.

The term 'dance music' usually implies strong pulses and rhythmic patterns that are organized into repeated metric groupings synchronizing exactly with those of the dance. Rhythmic accents and phrase lengths normally coincide with those of dance also, as does the mood of the music. It should be pointed out, however, that significant exceptions to these norms can easily be found which result in dance and music relating to each other in a contrapuntal manner (as in the hemiola minuet step, which is not always duplicated in the music, or as in some Balkan dances in which dance phrase and musical phrase do not coincide until the final cadence). Such elements as form, melody, harmony and texture can perhaps be more independent of the dance, as may be illustrated by 18th-century binary dances in which the form, the melodic material and the tonic–dominant–tonic harmonic movement are not mirrored by the footwork or dance paths, although each repetition of the music does encompass each dance figure. Nevertheless, it is entirely possible for musical form and dance form to coincide more closely, or for a choreographer to duplicate many other aspects of a pre-existing musical work, or, on the other hand, for music to be composed to mimic and support totally the structure of a pre-existing choreography. The multiplicity suggested here is balanced, however, by one seemingly immutable constant: the association of slow tempo with either a solemn or a tragic mood and of fast tempo with gaiety or dramatic climax. The corollary to this, that excitement is engendered by a speeding up of the basic pulse, seems to be found in all Western dance.

1. Pyrrhic dance: Hellenistic bas-relief copied from a Greek original, marble, 4th century BCE *(Museo Pio-Clementino, Vatican, Rome)*

2. Western antiquity. In ancient Greece dancing played a prominent role both in private life and in public ceremonial and ritual. Group dancing, more often than not by members of the same sex, was commonest, but solo dancing, usually of an expressive or blatantly imitative character, developed particularly in connection with the stage, though also at private entertainments. The most striking difference from modern Western society is the absence of evidence for dancing in pairs of opposite sexes. The Greeks regarded the whole body as being involved in the movements of the dance, especially arms and hands (for which the term *cheironomia* is frequently found), but even head and eyes. Literary evidence for the dance is supplemented by that of art, especially vase painting, but the latter must be used with caution because of artistic conventions in the portrayal of action.



The earliest references in Homer are to dancing of youths and maidens at country festivals and weddings, or as entertainment in royal palaces. When Odysseus (*Odyssey*, viii, 206ff) is entertained by the Phaeacians, who boast their pre-eminence in dancing, he witnesses a dance in which athletic movements and ball-throwing are part of the performance. The mention (*Iliad*, xvi, 183) of maidens dancing in the choir of Artemis shows that the cults of Olympian divinities then, as in later classical Greece, featured song and dance rituals which became stereotyped in various poetic genres (e.g. the *partheneia*, maiden songs, composed by Alcman, Pindar and others for performance in the appropriate shrine, hymeneals, epithalamia, paeans, dithyrambs etc.). The *pannuchis* ('all-night' festival) was a common setting, and deities such as Dionysus, Apollo, Artemis and (in Sparta) the semi-divine Helen were invoked as patrons of the choirs. The word *thiasos* was used of the company of votaries of a particular god, and such groups were widespread in mainland Greece and islands like Delos, Lesbos and Crete.

It was commonly held by the Greeks themselves that Crete had once made an important contribution to the development, even 'invention', of dancing, and archaeological evidence confirms that dancing in groups or circles played some part in Minoan religious ceremonies and entertainments, the executants sometimes ornately dressed, or engaged in athletic tumbling and somersaulting for which Cretans were famed and which the Greeks regarded as part of the dance. The agility in battle of the Cretan Meriones, one of the minor Achaean heroes of the *Iliad*, is attributed to his dancing skill, and the description of battle as 'the dance of Ares' becomes a traditional poetic motif. Among prominent Cretan myths is the legend that the infant Zeus was protected at birth by the beating of feet and clashing of weapons by the Curetes, which drowned his cries. (Some scholars would associate this with a well-established primitive belief in the magical 'apotropaic' powers of dancing.) Armed dances continued to be popular both in Dorian Sparta, where disciplined dance forms recalling tactical manoeuvres were prominent in the education of young men and were thought to contribute to the martial excellence of classical Sparta, and in Athens, where at the panathenaic festival the so-called Pyrrhic dance, sometimes said to have been invented by Neoptolemus (Pyrrhus), son of Achilles, was performed in honour of Athena by youths naked except for helmet, shield and spear, and consisted of a traditional series of movements and gestures mimicking offensive and defensive postures of combat (fig.1). References in Aristophanes, Demosthenes and others show that the dancing class, attended by youths according to their local tribe, was an important feature of education and social life.

Another dance said to be of Cretan origin was the *hyporchēma*, a lively dance of a pantomimic nature with instrumental accompaniment. This was occasionally danced at emotional moments in the lyrical passages of Attic tragedy, in which artistic choreography was greatly developed. The chorus punctuated the spoken dialogue of the play with songs and dances, accompanied by music of the double aulos, which varied in mood and metre according to the unfolding of the plot. The origins of tragedy are controversial, but one tradition, held perhaps erroneously by Aristotle, saw it as an extension or development of the dithyramb, originally sung and danced spontaneously in honour of Dionysus, god of fertility and wine. Certainly the association of Dionysus with both these poetic genres remained traditional, but in Athens the dithyramb itself continued to develop, and in the 5th century was a circular dance of 50 participants, and a prominent element in competitions between the tribes at Dionysiac and other city festivals. The tragic chorus numbered first 12, then 15, and seems to have danced formally in rectangular patterns in the so-called *stasima*,

or choral odes, performed in the *orchēstra* ('dancing-place'), where it remained throughout the play, from its first entrance (*parodos*) until its exit (*exodos*) to a marching anapaestic rhythm. The dances of Phrynichus and Aeschylus, the earliest notable tragedians (who traditionally wrote their own music and arranged their own choreography), were much admired. Sophocles, said to have been an elegant dancer, is known to have written a handbook 'On the chorus', which unfortunately has not survived. In his plays and those of Euripides the actors occasionally join with the chorus in lyrical exchanges, but seem not to have been called on to engage in the dancing.

Performed along with the tragedies were 'satyr plays', with the chorus masquerading as attendants of Pan or Silenus in grotesque caricatures of the tragic dances, and there is evidence of indecent dances such as the *sikinnis* and *kordax*. (Much terminology of specific dances is found in compendious works of later antiquity, particularly the *Deipnosophists* of Athenaeus, e.g. books i and xiv, and the lexicon of Pollux, iv, 99ff.) The *kordax* was associated also with Attic comedy, and many plays of Aristophanes end with scenes of violent revelry where the chorus and actors indulge in the energetic, whirling dances appropriate to the *kōmos* (revel). Another striking feature of his plays is the dressing of the chorus as animals, birds or insects, which may hark back to popular charades in which participants dressed in animal costume and imitated animal behaviour (fig.2). That such dressing up could also be used more seriously in ritual contexts is shown by another tradition of classical Athens, that of young girls at puberty dressing as bears and dancing in honour of Artemis at the neighbouring township of Brauron.

2. Two dancers dressed as birds, accompanied by an aulos: detail from a Greek oinochoe, c500 BCE (British Museum, London)

3. Professional dancing girl with clappers, accompanied by an aulos player: detail from a Red-figure kylix, c510 BCE (British Museum, London)

While dancing at festivals and religious rituals tended to produce stereotyped patterns, there was also the uninhibited ecstatic dancing, particularly in honour of Dionysus, but also of divinities from the East such as the Asiatic mother goddess (sometimes called CYBELE) and various fertility demons (Attis, Sabazius etc.), whose cults infiltrated Greece. The dancing associated with these rites resembled the outbursts of dancing mania that have periodically occurred in Europe and given concern to civic authority by the social disorder they aroused. Women were especially prone to such effects, and there is much literature (notably Euripides' *Bacchae*) about maenadism (called after the female votaries of Dionysus), while in art these dances are characterized by poses showing the tossing head, bulging throat and startled eyes of the devotee in a 'possessed' state. Much too is said of corybantism, called after the male devotees of Asiatic cults, whose excited dancing apparently induced hallucinatory states.

The contrast between such emotional and orgiastic dancing and the traditional use of the dance in education, and to some degree as a form of gymnastics, impelled Plato (in the *Republic*, and in more detail in the *Laws*) to recommend strict state control over forms of dancing permitted to free Hellenic citizens, who should concentrate on stately dances such as the *emmeleia* which imparted grace to body and soul alike, or on warlike dances in the Dorian tradition, allowing the more licentious dances to be performed, if at all, for entertainment by slaves and foreigners. (There are descriptions in Xenophon's *Symposium* of the sort of dances that might be provided by professional entertainers and enjoyed at Athenian dinner parties, where *hetaerae* might also be engaged to dance for the company; fig.3.) Elsewhere Socrates himself is quoted as saying that 'those who are best at dancing are also best at war', alluding of course to such dances as the Pyrrhic described above. Plato's views on music and dancing were much influenced (via Socrates) by Pericles' friend and adviser Damon, the musician and educationist, who held firm beliefs in the effect of melody and rhythm

on 'soul' and character; and, also, much subsequent literature on dancing, by for example Plutarch, Lucian and Libanius (the latter two being authors of extant treatises 'On the dance'), and by musical writers such as Aristides Quintilianus, concentrates on the ethical influences of dance rhythms.

In the Greco-Roman world also, literary sources include much censorious condemnation of dancing (Cicero, Seneca) or devastating satire (Juvenal) against what was now mostly a professional art; but needless to say the dances of prostitutes in the taverns were popular with the masses, to say nothing of the more artistic theatrical displays of Greek dancers like the famous Bathyllus and Pylades. The real virtuosos were the *pantomimi*, who interpreted a series of different roles during the spectacular choreography of mythical scenes, and attracted public lionization, large incomes and the favour of the imperial courts. The theatrical excesses of the reign of Nero, and his patronage of dancing among the other arts, were notorious; and indeed later a dancer, the celebrated Theodora, by her marriage to Justinian, actually became Empress of Rome. Inevitably the unremitting censure of moralists, pagan and Christian, directed against salacious women and effeminate men dancers, became a literary commonplace, and a far cry from the art idealized by the classical Greeks as the god-given gift of Apollo, Terpsichore and her sister Muses, and even, Lucian (*De saltatione*) declared, as the mortal imitation of the concord and rhythm manifested in the dance of the stars.

3. Middle Ages and early Renaissance. It would of course be absurd to talk about the dance history of the Middle Ages as if there had been no changes of style, no development of technique, no evolution of philosophical attitude and aesthetic approach towards the art of dancing during the nearly 1000 years of medieval cultural history. However, only the roughest subdivision of the whole period is possible. The reason is the absence of primary dance sources before the great instruction manuals of the 15th century. Up to about 1420, the year given on the first page of the Domenico treatise, knowledge of medieval dance must be gathered from literary references, from musical evidence and from iconographic representation. There is, happily, an abundance of these. However until the emergence of the medieval instruction book, or of eyewitness accounts such as those in the flyleaves of Nancy (1445), Cervera (*c*1496) and Salisbury (1497), or of the *pratica* collections of Foligno (mid-15th century), the Il Papa manuscript (early 16th century) and the Nuremberg manuscript (1517), information is limited to the mere mentioning of names and technical terms at worst and to the delineation of shapes at best.

(i) The Middle Ages. The key words *saltare* (*saltatio*), *ballare* (*ballatio*, *bal*, *ballo*) and *choreare* (*choreatio*, *chorea*, *choreas ducere*), as they were used by the church Fathers in either a critical or an approving sense, allow some admittedly rough conclusions about dance in the early Middle Ages. The classical Latin definition of *saltatio* was 'pantomime', that is, representative dance in the hands of professional performers. This became 'to jump' or 'to leap' and, as the technical term entered into the movement repertory of social dancing, merged with the corresponding Germanic 'springen' and 'hüpfen' to form the frequently mentioned *Hupfauff*, *Springdantz* and saltarello types of the late Middle Ages and the early Renaissance.

The most general of the medieval terms is *ballatio* (from Greek *ballein*) which is used in the widest understanding of dance (*ballator*, *ballatrix*: 'dancer') and dance festivity (*bal*, *bau*; *see* Ballo), as well as in juxtaposition to *chorea*. The latter, a classical term that eventually became identified with *choraula–carola–carole*, is used exclusively for group dances in line or circle patterns, while *ballatio* seems to imply other formations, such as the processional type of dance. Slightly overlapping in meaning with *saltare* is the Roman word 'tripudiare' (*tripudium*); originally the technical term for the Salian armed and victory dances (see Aeppli for etymological details and quotations), it was subsequently applied to other forms of formal dances with or without weapons and to religious dances like the two-voice *Stella splendens* of the 14th-century Spanish *Llibre vermell* which is accompanied by the remark 'Sequitur alia cantilena ... ad tripudium rotundum' (*AnM*, x, 72–3), and it finally acquired the general meaning of dance, the 'ars tripudii' of the Guglielmo treatises of the mid-15th century. The last of the general dance terms, *danzare* (*dancier*, *danser*, *tantzen*, with their nouns), did not enter the vocabulary until the late Middle Ages. Again the meanings are varied and ambiguous: besides the most general meaning, of any kind of choreutic activity, it is most often used for a pairing of *danser* or *tanzen* with another, contrasting term: 'Quaroler et dansser et mener bonne vie' (*Chevalier au cygne*; see Godefroy, i, 786), 'dancent et balent et querolent' (*Renart*; ibid., 787), 'tanzen unde reien' (*Stamheimer*; see Sachs, Eng. trans., 269) and so on.

As time progressed, the first proper names for dances began to appear. *Carole* and *espringale*, *reien* and *hovetantz*, *estampie*, *stantipes* and saltarello, *trotto* and *tresche* are all part of the repertory from the 12th century on. German peasants danced *firlefanz* and *hoppaldei*, *rìdewanz* and *gofenanz* (Böhme), their Italian counterparts the piva; the *cazzole* was performed at Easter in Sens Cathedral in the 13th century (Gougaud, 232).

Of all these only the *carole* emerges from the writings of medieval poets as a definite choreographic shape: it was the line dance *par excellence*, ancestor of the farandole and the branle, with the participants holding hands; it could have figures during its course (the 'bridge' appears frequently in iconographic representations: see the Lorenzetti fresco of the Siena Palazzo Pubblico, fig.4); it could be stretched out over a great space ('Tel carole ne fu pas veue/pres d'une quart dure d'une lieue': Phelipe de Remi, *La manekine*; see Sachs, op. cit., 271) or contracted into a closed circle; it could be quietly stepped or performed with lively hops and jumps. When *caroles* or *reyhen* were sung, all participants would join in, either in strophic songs or responding to the intonation of a leader, who could be either a jongleur or one of the festive company. Rondeaux, virelais and ballades were most frequently used for this purpose, but whether the choreography reflected in any degree the structural complexities of these vocal forms there is no way of knowing.

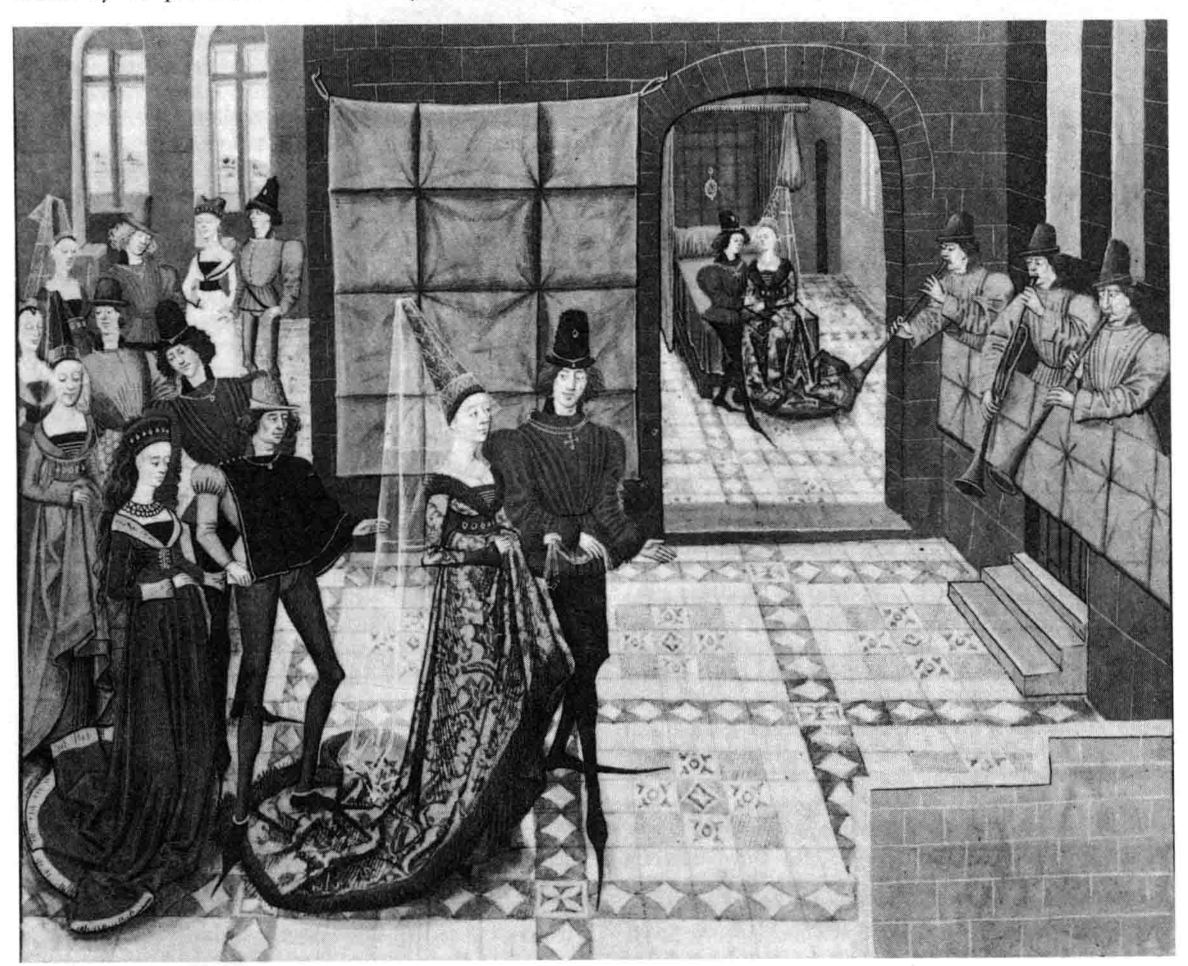
While the long or circular *carole* is documented for all levels of medieval society, the more formal *danse* (*danza*, *tantz*, *hovetantz*) for couples or groups of three was, at least initially, the particular property of the nobility. The key words for the dance-technical execution are 'to walk' (Middle High Ger. *gên*), 'to step', 'to slide', 'to glide' (Middle High Ger. *slîfen*); the embellishing *schwantzen* ('to strut'; literally, 'to wag the tail') is probably the

4. Carole: detail from the 'Effects of Good Government on Town and Country' by Ambrogio Lorenzetti, fresco, 1338–9 (Palazzo Pubblico, Siena)

medieval ancestor of the 15th-century *campeggiare* (Cornazano) and the *pavoneggiare* of the 16th century (Caroso, Negri), just as these elegant processional dances themselves stand at the beginning of an uninterrupted series which leads on to the classical Burgundian basse danse and the more elaborate Italian bassadanza of the 15th century, and then to the pavan of the high Renaissance (fig.5).

Medieval writers occasionally made a distinction between *danse* and *bal* (or *bau*: 'Danses, baus et caroles veissiez commencier': *Berte*; see Godefroy, i, 559). It is tempting to see in this the earliest trace of the characteristic division of the court dances of the 15th century into bassadanzas and balli, the former either purely processional or restrainedly ornamental, the latter predominantly expressive and dramatic, but there is simply not enough evidence from the Middle Ages to prove or to disprove this hypothesis.

The writings of medieval authors are full of references to the musical instruments that provided the accompaniment for dances. *Tambourin*, drums and bells, pipe and tabor, *frestels*, lutes, *psalterion*, *gìgen* (fiddles), organetto, bagpipes, shawms and trumpets – in short, the entire palette of instrumental colours, either singly or in a variety of combinations, could be and was used to accompany dancing. *Estampie* and *danse royale, stantipes, ductia* and *nota*, saltarello and *rotta*, well documented in medieval musical practice (*GB-Ob* Douce 139, *F-Pn* fr.844, *GB-Lbl* Add.29987) and theory (Johannes de Grocheo, *c*1300), have been subjected to much scrutiny and musicological discussion. From all this the forms of the instrumental dances emerge clearly enough: short, repeated sections (*puncta*) with *ouvert* and *clos* endings are the rule; their number can vary from three to seven. There are some pairings of saltarello and *rotta* which are early examples of the *Tanz–Nachtanz* idea. On the basis of Johannes de Grocheo's writings the relative speed for the *estampie* has been established as fairly sedate (Wagenaar-Nolthenius) while the *ductia*, 'cum recta percussione', seems to have been quite fast, 'levis et velox'. Occasional attempts have been made (by Sachs, Aubry, Reese) to connect the known repertory of medieval choreographies with the repertory of instrumental dance music, but in the present writer's opinion all of these attempts have failed. It is simply not known what dance went with what music: a medieval dancer could *caroler*, *danser* or *baller* to a saltarello just as conveniently as to a *ductia*, a *nota*, a *rotta* or an *estampie*.



While the raucous and joyous dances of the lower classes, like the folkdances of the present, seem to have been quite clearly defined as to their regional provenance and manner of execution (see Böhme, Sachs), the refined style of dancing of the medieval knights and their ladies amounted to a language that was spoken everywhere. One reason for this was that the teaching of dance and the playing of music apparently lay in the same hands. Choreographies, like epic tales and songs, were carried from castle to castle by professional entertainers; jongleurs, *Spielleute* and Jewish *letzim* sang and played, tumbled and mimed and, when called on to do so, led the dances which concluded the day's activities. The annual jongleur 'schools' provided welcome opportunities for exchanging ideas on the current trends of fashionable entertainment, and from these centres ideas and materials were carried back to princely residences everywhere. When the specialist in the teaching of dance began to separate himself from the general entertainer is not known; the first known name is Rabbi Hacén ben Salomo, who in 1313 taught a religious dance to members of the congregation of St Bartholomew at Tauste (Spain; see

Sachs). No-one else is mentioned during the 14th century, although the writings of Dante and Boccaccio, poems like *Les echecs amoureux* and *Le roman de la rose*, epic tales, chronicles and, as always, the critical voices raised by church and civil authorities, frescoes and marginal illustrations give ample proof of the continuous development of the art of dancing in this highly sophisticated historical period.

From time to time great waves of mass hysteria swept the lands in which the fear of death, a subject so central to medieval thought, expressed itself in the eruption of a dance-madness. From the 11th century to the 15th, according to the chronicles (see Sachs, Böhme), people were prone to this affliction which made them dance and leap, turn and twirl in an ever-increasing frenzy that could last for hours and days and was likely to end in complete exhaustion if not in death (fig.6). Depending on the place – often a church or a churchyard (see Gougaud) – or the day of their outbreak, these ecstatic dances were called *danse macabre*, 'St John's dance' or 'St Vitus's dance'; the area along the Rhine was particularly prone to the disease, but there are reports from other parts of central Europe as well. Italy during the same period knew a similar kind of dance-madness: the strenuous motions of the tarantella were said to be the only cure for the deep depression caused by the poisonous bite of the *Lycosa tarantula* spider; but when the dancing began it irresistibly drew hundreds of spectators into its mad revolutions and thus had the same effect as the *chorea major* of the north.

(ii) The early Renaissance. The culmination of the old tradition and the beginning of an entirely new phase of dance history came in the first half of the 15th century. The dance, which previously had not been much more than a loosely organized, companionable and entertaining, orally transmitted choreographic activity, seems to have become an art practically overnight, taught and written about by experts who not only compiled the fashionable repertory and developed methods of notation but also brought to their subject a philosophical attitude and aesthetic insights which went far beyond the merely pragmatic. While the traditional anonymity still dominated in the north (no author's or compiler's name is given with either the splendid Brussels basse danse manuscript or the Michel de Toulouse print *L'art et instruction de bien dancer*), the Italian dancing-master was a respected member of his home court, intimately involved with the private life and the public image of his prince, a man of status, well paid and much sought-after, teacher, performer, choreographer, writer and master of ceremonies all in one.

The line of illustrious names begins with DOMENICO DA PIACENZA (*c*1390–*c*1470), dancing-master of the Este

5. Processional dance (probably a basse danse) accompanied by a sackbut and two shawms: miniature by Loyset Liédet or his workshop, from 'L'histoire de Renaud de Montauban', Burgundian, 1468 (F-Pa fr.5073, f.117v)

6. *Dance of death: woodcut by Michael Wolgemut or Wilhelm Pleydenwurff from Hartmann Schedel's 'Weltchronik' (Nuremberg: Koberger, 1493)*

family, *saltatorum princeps* and *re dell'arte*, founder of the first Lombard school of dancing and teacher of GUGLIELMO EBREO DA PESARO (*b c*1425), and ANTONIO CORNAZANO (*c*1430–84). Lorenzo Lavagnolo, Giuseppe Ebreo, Giovanni Martino, Magistro Filippo and Giorgio were active in the second half of the 15th century; 'Il Papa' left a collection of dances from the early 16th century, thereby providing one of a handful of choreographic documents that connect the great 15th-century treatises with those of the late 16th century.

All the instruction manuals of the 15th century, whether anonymous or not, are structured in the same manner: the first half is devoted to the theory of dancing, to a description of steps and movements and their relationship to the accompanying music, and to style, ballroom manners (e.g. the delightful passage dealing with a young lady's proper behaviour in the Guglielmo treatises), dress and the like; in the second half the choreographies are given, many with their music, many without.

For the Franco-Flemish sources of the north the repertory consists almost exclusively of the basse danse, the stately, quietly gliding processional dance that enjoyed the favour of court and town well into the 16th century. Only five steps are used and these, having been explained in the introduction, are written in tablature: *R* stands for *révérence*, *b* for branle, *ss* for two single steps, *d* for a double step, *r* for reprise (sometimes replaced by *c* for *congé*). These steps are combined into *mesures* of different lengths (the system is full of ambiguities: see Sachs, 1933, Brainard, 1956, Heartz, 1958–63, for three different interpretations), a deceptively simple method of organization which allows for an amazing degree of expressiveness within so limited a repertory of movements. In the two main sources, the Brussels manuscript and the Michel de Toulouse print, each basse danse is given with its own tune, notated in tenor fashion in uniform blackened breves, each of which accommodates one step of the tablature (four melodies at the end of the manuscript are mensurally notated; three of these have concordances in Michel de Toulouse). The rhythmic subdivision of the melodies lay in the hands of the musicians, who would add improvised upper voices to the tenor and create the sonorities that the occasion called for, using *les instruments haults* for outdoor dancing and particularly splendid festivities, *les instruments bas* for indoors and intimate gatherings (see *Les echecs amoureux*: Abert, 1904–5).

Contemporary with the northern basse danse but stylistically much younger was the Italian bassadanza (for details see Brainard, 1970, 70ff). The Italian masters delighted in the invention of new shapes; figures alternate with processional passages, linear choreographies (*alla fila*) with others for couples or groups of three; an entire, newly developed range of dance-technical possibilities came into play. The result is that many of the bassadanzas of the early Renaissance look and feel exactly like their counterparts, the balli and ballettos by Domenico, Guglielmo and others. One major distinction lies in the use of the accompanying music: while each ballo, when it has music at all, has a tune of its own, carefully constructed to accommodate and underline the various phases of the choreographic plan, the bassadanzas have fully written-out step sequences only. Only Cornazano listed three 'tenori da bassedance et saltarelli gli megliori et piu usitati di gli altri' (f.3) of different lengths, the implication being that any tune of the right dimensions could be used to accompany a bassadanza. Whether the pairing of bassadanza and saltarello (Fr. *pas de breban*; Sp. *alta danza*), in spite of Cornazano's statement that 'detro ad ella se fa sempre lui' (f.10), was quite as automatic a process as Sachs would claim is hard to say. Although combinations of a slow, stepping dance with a lively, jumping dance are present in the literature and the music from the Middle

Ages (*tantz-hoppaldei*, *baixa et alta*) to the pavane–tourdion and pavane–gaillarde pairs of the 16th century, the Italian dancing-masters only rarely mentioned this sequence (for three *pratica* examples see *Otto bassedanze* nos.2, 5 and 8). On the other hand there are reports of festivities from Italy (e.g. *La festa del paradiso*) as well as from England, where one basse danse was followed by several others; only at the end of such a group did the dancing become so lively that a princely performer 'perceiving him selfe to be accombred with his Clothes sodainly cast of his gowne and daunced in his Jackett' (during the wedding celebrations of Prince Arthur and Catherine of Aragon, 1501; see Orgel, 22–3).

While the princes in private could behave much as they chose and dance whatever they liked, their code of conduct ordained that when dancing 'inpresentia di molti, e in loco pieno di populo' a certain dignity had to be observed, 'temperata però con leggiadra e aerosa dolcezza di movimenti' (Castiglione, *Il libro del cortegiano*, ii, 11); it was not suitable that a gentleman should display too much technical brilliance, 'prestezze de piedi e duplicati rebattimenti', which would make him look like a paid entertainer, nor was it advisable that he join in *moresche* and *brandi* (branles) unless he were well disguised (Castiglione). These remarks, coming as they do after the turn of the century, contradict to some extent the gist of the teachings of Domenico, Cornazano and Guglielmo Ebreo, whose goal was the training of the *ballarino perfetto* who could compete with ease and grace with the best of professional dancers at his court, just as the entire repertory of bassadanzas and intricate balli was created for 'sale signorile' and for 'dignissime madonne et non plebeie' (Cornazano).

Besides the two main types, the private repertory of court dances included the *calata*, *trotto*, *striana*, *alvadança* (possibly *altadanza*; see Prudenzani, *Saporetto*) and *roegarze* (Castiglione). The *chiarentana* (*chiarenzana*) was mentioned by Prudenzani in the context of chamber dances. Guglielmo (f.66*v*) and Giorgio (p.54) gave a fully choreographed balletto by that name, which is closer to an English longways than any other dance from the 15th century; it was also performed, side by side with torch dances, at princely weddings and other more public gala events (see Moe, 1956, p.62).

Soon after 1500 the first traces of a new repertory began to appear. The branle became visible both in the musical sources (Petrucci, Attaingnant, A. de Lalaing) and in the cheerful dance instruction book *Ad suos compagnones studiantes* by ANTONIUS DE ARENA (?1519 and later edns.). It was the characteristic dance of the common people (*see* BRANLE, fig.1), gay, uncomplicated, frivolous at times; 'and all those who take part in the dance acquit themselves as best they can, each according to his age, disposition and agility' (Arbeau, *Orchésographie*, 1588, trans. Beaumont, 113). *Tordiones*, *gallarda*, *l'antigailla gaya* and *pavana* were all mentioned in the university dancing-master's book, although he did not yet feel altogether secure with these novelties ('Hic tibi pavanas nolo describere dansas / Rarenter dansat iste paysus eas', p.79), and preferred to confine himself to the traditional basse danse. Not until 1560, when Lutio Compasso's *Ballo della gagliarda* was published in Florence, was the galliard's prominence asserted in the new dance repertory.

The strands of popular group dancing and professional solo dancing overlap and cross constantly in the *moresca* (morris, *morisque*, *Maruschka-Tantz*). From Portugal to Hungary, from Mallorca and Corsica to northern England, it appears from the Middle Ages to the present in nearly as many shapes and forms as there are documents attesting its popularity. However, during the early Renaissance three basic types predominate: the solo *moresca* with exotic movements, reminiscent of the sinuous, undulating dances that arrived in Europe via Spain with the invasion of the Moors (most pictorial representations of Salome dancing at King Herod's banquet are part of this tradition); the formation dance with swords or sticks (also known as 'Les mattachins' or 'Les bouffons', see Arbeau; for illustration *see* MATACHIN) representing the battles between Christians and heathens (see the *moresque* in the *Pas d'arbre d'or*, Bruges, 1468, as well as the sword and stick dances of the Basque country and England); and the competitive miming *morisca* in a circular pattern, in which each of the participants acts out a part and the most convincing obtains the prize from the person in the centre, usually a lady – 'Mayde Maryan' of the English morris – bearing a jewel, a rose or an apple (see the Israhel van Meckenem (ii) engraving in MORESCA; the illuminations to the Freydal manuscript of Maximilian I (fig.7); E. Grasser's figurines from the Rathaussaal in Munich). The movement is always strong, either grotesque or funny or exaggeratedly polished (Grasser); the dancers often paint their faces black (hence the *Schwartz-Knab* tunes in 16th-century German sources) or wear masks (Freydal; Arena, 73); bells are sewn to their clothes which emphasize each step and jump as the dancers gyrate to the accompanying pipe and tabor, bagpipe, tambourine, or, in more modern times, the fiddle and the harmonica. The figure of the fool who interferes with the pattern as well as with performers and spectators continues the tradition of the medieval devil, the prankster of the mystery and miracle plays; the horse evokes ancient fertility rites (see Sachs, 1933; Domokos).

Although the *moresca* in one form or another was part of the court repertory throughout the 15th century (the references in the Ambrosio treatise and festival reports attest that, as do the mumming pictures of the Freydal manuscript of 1502), the main carriers of the tradition were the well-to-do artisans in the late medieval cities and towns. In Nuremberg, whose coopers, butchers and knifesmiths were famous for their annual guild dances, and where the *Schembart* had been practised since the 14th century (see Sumberg), particular privileges were granted to have a *Morischkotanz* performed; an entire Fastnachtsspiel *Morischgentanz* survives from the early years of the 16th century. Similar events took place in Munich and Augsburg, and it is more than likely that the tradition remained constant until it surfaced again in Arbeau.

Although there are many literary references to national and regional styles of dancing in the Middle Ages and the early Renaissance – 'der alte tanze ... von Dürengen' (Wolfram von Eschenbach, *Parzival*), 'danzare all'ungaresca', 'ballare alla romana', 'calate de maritima et campagnia' (Prudenzani), 'la baixa moresqua' (Cervera manuscript), 'portugalisch tänz' (Leo von Rozmital) – it is impossible to say how these distinctions, apparently clear to contemporaries, were made in terms of the dance itself. Touches of costume were added to the fashion of

7. Moresca at a mumming scene: miniature from Maximilian I's romance 'Freydal', 1515–16 (Kunsthistorisches Museum, Vienna, PS 5073, f.64r); the emperor stands to the left holding a torch

each period (Salome and other biblical or exotic figures wear turbans with their 14th- or 15th-century dress); musical instruments, particularly percussion and wind, evoked specific localities (tambourines for Hungarian and Moorish numbers, bells for *morisques*, bagpipes for peasants or for the nobility in a rustic setting). On the whole, however, the language of dance, though changing through the ages, was essentially an international idiom that was spoken and understood everywhere.

Even the art of theatrical dancing, once it had left the medieval tumbling stage, followed largely the elegant example set by the ballroom, whose style and technique were either overemphasized and made fun of or transported directly on to the stage (see Brown, 1963). The break did not come until the late 18th century when the increasingly demanding art of the ballet dominated the stage while the ballroom cultivated a much simpler type of group dancing. During the entire Renaissance and through the Baroque period, however, theatrical dancing was simply an intensified and enlarged rendering of that which every courtier and patrician practised daily and performed nightly to his own and the observers' delight.

4. Late Renaissance and Baroque to 1730.

(i) Before 1630. From 1550 to about 1630 dance is well documented in choreographic and musical sources, descriptions of court spectacles, plays, memoirs, letters and iconography. These rich resources reflect realistically the great popularity of dance at that time as both a social and a theatrical art. The historian is particularly fortunate in the nature and scope of the four large published manuals on social dance from the second half of the 16th century, a number which would remain unequalled until the 18th century. Less fortunately, there are still lacunae in the documentation of dance as done by professional performers; despite many references, for example, there is no precise choreographic information on 'antyck' or grotesque dances, nor on the pantomimic or acrobatic techniques of such travelling entertainers as the *commedia dell'arte*.

Dance music of this period is not important solely as accompaniment to the dances themselves. The specific rhythmic patterns of the most popular dance types pervaded much vocal and instrumental music that was not necessarily intended for dance but was obviously meant to evoke it: in music ranging from lighthearted villanellas, canzonettas, *scherzi musicali* and ballettos to English falas and madrigals, and from simple settings for instrumental ensemble to virtuoso sets of solo variations, distinctive galliard, saltarello, canary and corrente rhythms are found; evocative dance rhythms and references appear also in more ambitious works (e.g. Monteverdi's *Zefiro torno*, constructed on the licentious *ciaccona* bass, or Dowland's pavan *Lachrimae, or Seaven Teares*). These rhythms found their way also into popular music still familiar today, like the national anthems of Britain and the USA (clearly a galliard). Furthermore, dance appears to have had a strong influence on the development of new forms and styles of the late Renaissance (1550–1600), which in the Baroque (1600–1750) were to prove so significant in all musical media. Central to the development of an instrumental style that was to become

independent of vocal models were formal designs such as ostinato variations, binary or ternary forms, or the compound forms of the dance suite and its related genres (*ordre*, *sonata da camera* and the orchestral *ouverture*), while the internal forms of smaller units, such as tunes built of two, three or more strains of eight *tactus*' length, often in period form, may have derived from dance. Furthermore, it was primarily the dance music of this time that began to exploit other specific elements of Baroque style, the most obvious of which were clear and regular metric organization with strong recurring accents and repeated rhythmic motifs, and simple basses supporting a chordal and homophonic texture based on functional harmony and standardized chordal schemes. It is most likely that performers would have followed the accepted norms in tempo and affect for clearly recognizable popular dance types, so an awareness of how the dances were actually done is vital to the interpretation of much of the dance-related music from this period, whether vocal or instrumental, sacred or secular.

Dancing skills were cultivated daily by the nobility and their middle-class emulators taught either by ubiquitous dancing-masters or at the Jesuit male 'colleges' on the Continent, for it was assumed that joyous flirtation and the exhibition through dance of feminine charms and lusty male prowess were healthy and desirable aspects of social intercourse. All occasions of state, great or small, required celebration and entertainment, often by dance, while personal aggrandisement and physical adornment were natural concomitants of the theatrical ambience of such public events. The regard in which skill in dancing was held throughout this period was reflected in a Neoplatonism that found its way into much of the prose and poetry of the time, as so vividly expressed in Sir John Davies's *Orchestra, a Poem of Dancing* (*c*1594):

> Dancing, bright lady, then began to be
> When the first seeds whereof the world did spring,
> The fire air earth and water did agree
> By Love's persuasion, nature's mighty king,
> To leave their first disorder'd combating
> And in a dance such measure to observe
> As all the world their motion should preserve.

The social dances performed at aristocratic gatherings included such large group dances as processional pavans, circular branles, or progressive longways dances 'for as many as will', but especially in southern Europe it was the individually choreographed ballettos (the direct descendants of the 15th-century Italian balli) which dominated such events. Ballettos were usually solo couple dances, but trios (e.g. Caroso's *Allegrezze d'amore*), or groups of two or three couples dancing simultaneously and in formations, were also popular. In such dances the partners either alternated solo and accompanying passages, or outlined on the floor a series of standard geometric and symmetrical figures while dancing simultaneously; such ballettos surely led to the noble *danses à deux*, *à trois*, and so on, of the later 17th century and the 18th, which had many of the same figures (for example, all of the figures of the standard minuet, often in the same order, were used regularly in 16th-century ballettos). Miming dances, like the battle between the sexes in Negri's *La battaglia*, or dancing embraces like the vaulting voltas, certainly enhanced the playful flavour of a ball, while dances that were essentially kissing-games (such as the popular Cushion Dance), or choreographed chases, as in Negri's *La caccia*, made the sport of love even more explicit. Young men dazzled their ladies with glittering galliards which could involve virtuoso 'tricks', including fast footwork, competitive hitch-kicks to a tassel raised high above the floor (fig.8), pirouettes or rapid air turns or beats ('capers'). From simple to complex in pattern, and from easy to difficult, there were dances to suit everyone; obviously, as Arbeau said, the chief purpose of social dance was to find a suitable, attractive and accomplished mate. The general style was international (with recognizable regional differences), light but vigorous, the affect normally bright, joyous, and certainly flirtatious; the emphasis was on leg and footwork, the torso erect and quiet, and the arms relaxed except when involved with a partner. Male and female, when dancing hand in hand, suited their styles to each other, but when dancing separately their styles were strongly differentiated according to their sex, the gentlemen displaying strength, elevation and athletic prowess, the ladies grace and charm.

A gradual change of style took place from the late 15th through the first half of the 16th century, documented by a variety of sources including Antonius de Arena's *Ad suos compagnones* (*c*1527; see also Sparti). From 1560 to 1630, however, there appeared a suprising explosion in print: four large dance manuals with full choreographies and music, instructions for steps and rules of behaviour, and six smaller collections of purely verbal descriptions of galliard, tourdion, canary and *passo e mezzo* variations; there are known manuscripts as well, but they are few and small (see list below). The chief authors of the large manuals, Fabritio Caroso (1581, 1600), Thoinot Arbeau (1588, 1596) and Cesare Negri (1602, 1604), were old men when their books were published; indeed, some of their dances can be traced by internal evidence back to the 1550s. That Caroso's and Negri's manuals were reprinted or copied up to 1630 also suggests their

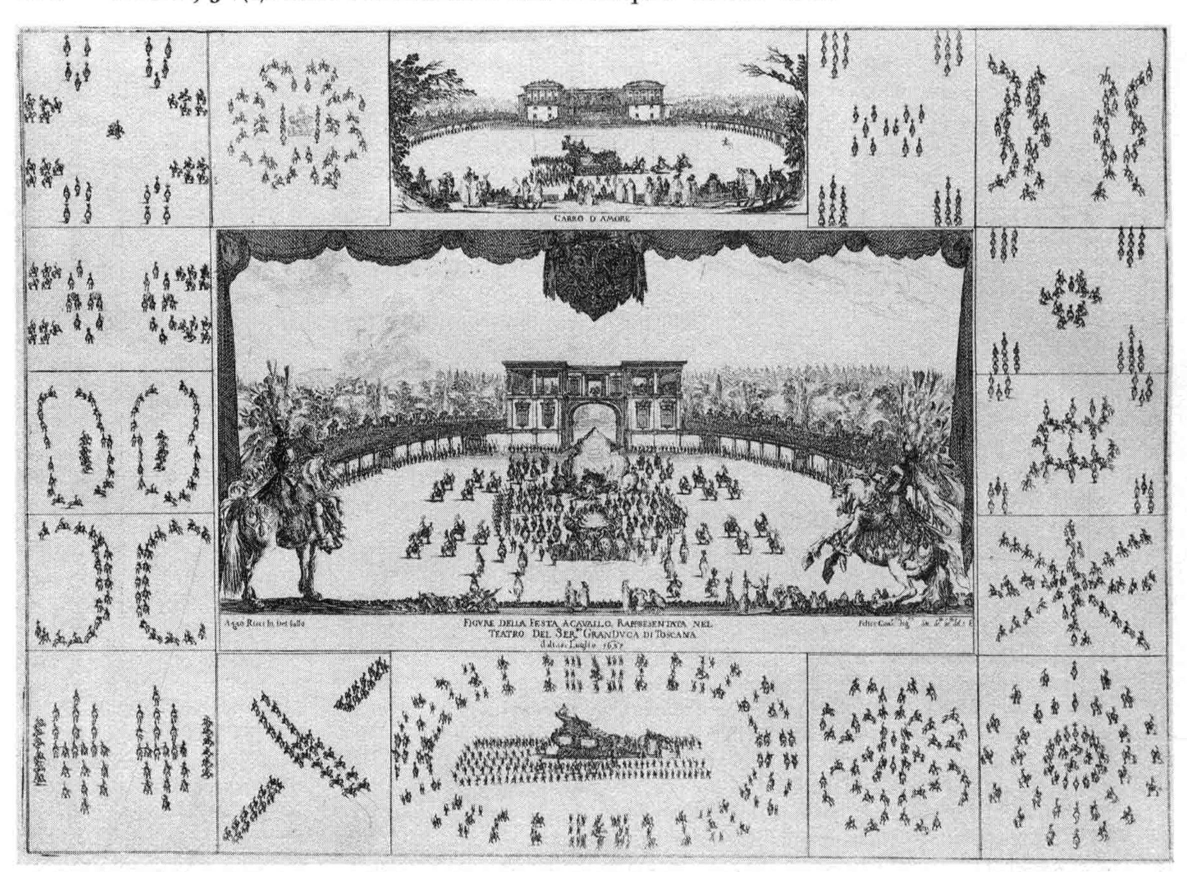
continued validity until well into the 17th century in Italy and Spain, although other publications (by F. De Lauze in 1623 and Mersenne in 1633) reveal that a different fashion, favoured by the French, was taking hold in France and England. That Italy probably dominated the realm of dance in the 16th century as it had in the 15th is however supported by the geographical provenance of nine of the publications, and also by the numerous Italian dancing-masters listed by Negri who were then working in France, Spain, the Netherlands and German-speaking countries. The Italian manuals contain the most elaborate and sophisticated steps, the most complex variations on the basic dance patterns, and four of the six surviving 16th-century choreographies of theatrical dances. Yet Arbeau is undoubtedly important, for he supplies ample evidence of the dance in France, and his manual is the only late 16th-century source for some types of French dance that were popular elsewhere, such as branles, the volta and the theatrical *matachin*. As for the English, the Spaniards and the Germans, much evidence that they were avid dancers comes from textual references: from Shakespeare, Cervantes and other writers, from letters or political reports, from cryptic aides-mémoires in manuscripts (see, for example, the Inns of Court MSS), or from travellers' accounts.

The large printed dance manuals just cited provide several hundred specific choreographies and music for social dances, many rules for the performance of the step patterns which constituted a basic vocabulary of movement, and rules of social etiquette often piquantly expressed by the dancing-masters whose function was to train their aristocratic young charges in social graces (Arbeau, for example, advises, 'Spit and blow your nose sparingly', while Caroso warns against tilting a chair too far onto its back legs).

On specially grand occasions, mellifluous poetry, brilliant costumes and colourful scenery were combined in the grand European spectacles (Italian *intermedio*, French *ballet de cour* and English masque) and related entertainments to produce a perfect delectation of the senses attested by all (fig.9). Also at this time new developments united song, dance and spectacle into yet

another significant and enduring genre, opera (e.g. Monteverdi's *Orfeo*, 1607, whose second act is almost completely dance-like, and which concludes with a dance as grand finale); even early oratorio included dance (e.g. Cavalieri's *Rappresentatione di Anima, et di Corpo*, 1600). The world of spectacle happily exploited the popular Neoplatonic conceit that in dance the harmonious movements of the parts of the body were comparable to the movements of all human bodies in a well-ordered world, and that these movements on earth mirrored the harmonious movements of the celestial bodies dancing to the music of the spheres; this conceit found full and explicit expression in sumptuous productions (indeed, Cavalieri's complexly organized finale to the famous Florentine *intermedii* of 1589, portraying the descent to earth, by order of Zeus, of Rhythm and Harmony, Bacchus and Apollo, the nine Muses and the three Graces, to teach humans to sing and dance so as to lighten their earthly load, is an allegory of this very myth). Geometrically figured dances for large numbers of performers, often of symbolic significance and designed to be viewed from above the dancing space, formed the main dances of the great spectacles cited above – Balthasar de Beaujoyeux's *Balet comique de la Royne* (1581), for instance, often misnamed the first ballet, incorporated 67 figures – and persisted throughout the 17th century; numerous charts of such figures (see fig.10 below) have survived, but the only complete source is Cavalieri's elaborate choreography of 1589 (cited above) to his own music, and with full scenic and costume descriptions.



Such expensive entertainments were intended fundamentally as propaganda to show invited guests and (in the case of grand processions through a city) the general populace that the rulers of an area represented the acme of society in riches, beauty, accomplishment and taste; hence, whether large or small, sacred or secular, many of them exceeded in equivalent cost that of Hollywood musicals in the 20th century. Their political ramifications were many, and more than a few were blamed for impoverishing state coffers; it is certain that they contributed to the economic disaffection that led to the Puritan revolution in England. Not incidentally, of course, the very best professional designers, machinists, painters and performing artists, including dancers, were employed in such displays. Because both titled aristocrats and professionals danced in court spectacles throughout the 17th century, however (the greatest gods often personified by princes of highest degree), the differences between professional dance and social dance appear to have been confined to the degrees of difficulty within a cohesive style.

Most of the extant evidence indicates that theatrical dances (i.e. those performed in special costumes on special occasions, whether or not on a stage proper) essentially used the international movement vocabulary and familiar dance types expounded by the manuals (for example, the dance types recognizable in the music of Monteverdi's sung and danced ballos, like *Tirsi e Clori*). Yet Cavalieri, among others, makes clear in the preface to his *Rappresentatione* that more demanding dance occurred as well: 'there will be more elegance and novelty if they [dances in an entertainment] can be made to appear different from normal dances; as would be the case of a *moresca* representing a fight, or a dance originating from sporting games' (trans. Pirrotta). Apart from Cavalieri's choreography of 1589, however, concrete evidence of how professional dance might have differed in style or technique from social dance is somewhat lacking. Cavalieri's unique choreography gives the names of the small group of professionals (e.g. Vittoria Archilei) who took the roles of the gods, singing, dancing and playing simultaneously; furthermore, descriptions of other ballos quite often refer to the same feat. Additional evidence may exist in some of the extremely difficult galliard variations described by Negri, which employ the highly advanced skills of beaten steps, multiple pirouettes and multiple turns in the air that are today standard in the male ballet dancer's bag of 'tricks'.

Theatrical dances could, of course, vary widely in scope, extending in their lesser forms from brief excuses for laudatory poetry at state dinners, or welcoming processions for visiting dignitaries, to mock battles (*moresche*), horse ballets (*carrousels*; fig.10) or small stage works combining all theatrical forces (balli). There could be solo dances by one or two male dancers (in the third *intermedio* of 1589, for instance, Apollo dances a duel with a python in different poetic metres, then performs a solo victory dance; *see* INTERMEDIO, fig.4); small group dances by males or females (as in Monteverdi's *Ballo delle ingrate*); or shows of skilled swordsmanship by teams of young gentlemen (*matachins*; see Negri's list, p.13, of eight of his 'scolari' who danced a 'combattimento' with longswords and daggers, yet another with lances, and also *mattacinos*). The documented balli incorporate running figures, circles, half-moons, hays, squares and wheels, in quick succession; showy galliards alternate with stamped canaries and walking passages, and tuttis with solos; in short, the available sources, though small in number, contain excellent clues to a variegated repertory of dance in Renaissance and Baroque court spectacle

The degree to which traditional dance may have nourished or descended from aristocratic dance is unknown, but that there were cross-influences is clear enough from the circumstantial evidence (as, for example, in the branles of different regions of France, still danced today, that found their way to court; or in comparing the capers and 'gallery step' in traditional Morris dance with standard 'tricks' of the galliard). Some such cross-influences are well proved, as in the case of the Mexican origins of the sarabande, but most claims of folk origins for dances adopted by the upper classes cannot be so precisely documented. Nevertheless, in this period as in later Western dance history, the cultivated arts of dance and music certainly drew inspiration from the folk and the exotic, whether real or imagined, for fresh ideas, renewed vigour and special 'character'. In every case that character was gradually remade in the current courtly or theatrical image until fresh inspiration was needed.

It is small wonder that throughout this period dance music found its way into instrumental collections for the educated amateur, but its sheer quantity and the profusion of titles are new and staggering. The collections range from instrumental manuals (Le Roy) to huge eclectic volumes (Besard). They are for solo instrument (Fitzwilliam Virginal Book) or ensembles (Mainerio), and extend from very simple pieces in two or three strains, with or without varied *doubles*, to huge sets of virtuoso variations on a tune or migrant bass. While it is unlikely that the latter were intended for dancing, it also remains debatable

10. Carrousel in Florence, July 1637: 'Figure della festa a cavallo, rappresentata nel teatro del Ser. Gran Duca di Toscana', engraving by Stefano della Bella; many of the geometric figures had symbolic significance

whether the simple *danseries* (as, for example, in Gervaise) were intended specifically to accompany dances: professional musicians, who worked from memory, would not have depended on these collections for their repertories. Frequent concordances and reprints among the sources may reduce the real repertory somewhat, but attest further its popularity and geographical spread. Among the instrumental publications of importance were those by Abondante, Gardano, Gorzanis and Barbetta in Italy; Gervaise, Le Roy, Morlaye, Du Tertre, d'Estrée and Francisque in France; Gerle, Wechsler, Schmid, Ammerbach, Waissel and Praetorius in Germany; Susato and Phalèse in the Low Countries; Barley, Dowland, Morley and Holborne in England; and Cabezón and Ortiz in Spain.

With regard to instrumental usage, Arbeau listed sackbuts, recorders, pipe and tabor, violins, transverse flutes, spinets, hautboys and 'toutes sortes d'instruments', adding that dances might also be sung. Caroso and Negri, however, gave the music only in lute tablature and mensural notation, and there is other evidence that in Italy, whether in social dance or in spectacle, a special tradition of appropriate instrumentation existed. Drums and double-reed instruments, for example, were considered to be grotesque or peasant types and were excluded from noble or Olympian scenes (see Weaver) and, it seems, high society. This tradition seems also to have been followed in the English masques and French *ballets de cour*. Huge complements of appropriate instruments accompanied dance in large spectacles, and were combined with vocal forces of all types: Cavalieri's ballo, according to the score and Rossi's description, called for several vocal choirs, the entire viol family (including contrabass), the entire lute family (including theorboes and chitarroni), the same for guitars, violins, harps, lira, citterns and mandoras, flutes, sackbuts and cornetti, psaltery, regal organs and harpsichords.

There are many musical concordances for the dances in the manuals based on well-known migrant tunes or basses, whether originally sacred or secular, vocal or instrumental; for example, Gastoldi's balletto *L'innamorato* was choreographed by Stefano, an associate of Negri's, as *Alta mendozza*, but the tune appeared in England as *Sing we and chaunt it* and in Germany as the chorale *In dir ist Freude*. Furthermore, the same dance music might appear in duple or triple metre in different sources (e.g. Arbeau's and Negri's canaries). Phrasings were usually regular but could occasionally be irregular, and changing metres or hemiola provided charm and interest. National differences in style emerged in dance music as elsewhere: the English, for instance, were in general more tuneful than the Italians, who tended to emphasize the basses and chordal schemes (romanesca, folia, *passo e mezzo*). Nonetheless, most of the music is rather commonplace; obviously the physical delights suggested by dance music and the social status dance enjoyed were more responsible for its great vogue than the quality of the music itself. Gems are to be found,

however, in (for example) Monteverdi's *Scherzi musicali*, while the famous sets of variations on dance themes by such composers as Sweelinck, Byrd and Cabezón exemplify the opportunities and challenges that dance music could suggest. Among the stage works it is Monteverdi, once again, whose ballos and *Orfeo* are masterpieces pervaded by dance; appreciation of these is increased by recognition of the dancing they evoke.

Popular individual dance types which appeared in both the dance manuals and the musical collections were the allemande (*tedesca*), branle (brawl, *brando*), canary (*canario*), courante (corrente), galliard (*gagliarda*), tourdion (*tordiglione*), volta (*volte*), pavan (*pavaniglia*, *paduana*, *passo e mezzo*) and saltarello. Some popular types, such as the *bergamasca*, *ciaccona* and sarabande, are not in the Renaissance manuals at all; perhaps they were still seen as too crude for courtly ladies and gentlemen. More difficult to explain are seemingly large discrepancies between frequencies of dance types in the manuals and the musical collections. Despite their large numbers in the musical sources, for example, there are few choreographed pavans or *passo e mezzi*, and the saltarellos that do appear at this time are movements in balletto suites which are indistinguishable from other quick after-dances called by various other names (e.g. *la rotta*). Perhaps the biggest difference of all between manuals and musical collections is that the typical paired dances of the musical sources – pavan–galliard, *passo e mezzo*–saltarello, or *Tanz–Nachtanz* (*Hupfauff*, *Proportz* or tripla), which continue the old duple–triple, slow–fast combinations – seem to be largely absent from the manuals. The multi-movement ballettos of the Italian manuals do, however, most often begin with these combinations. Of even more import historically is the fact that most multi-movement ballettos are essentially variation suites, although they begin with the slow–fast, duple–triple combination; this suggests that multi-movement danced suites may first have inspired the grouping of dances into the multi-movement musical suites which began to appear in the first half of the 17th century. Thus, knowledge of how to perform dances from the manuals can give valuable insights into the relative dance tempos in instrumental suites of the 16th and 17th centuries.

Apart from variation suites themselves, the variation principle obviously pervaded dances and music alike. Each of the individual dances consists of a series of variations (*mutanze*, or figures), one to each repetition of the music, which was also undoubtedly varied in performance even though in print the music for an entire suite is shown in one simple version. Further, the facts that there are no purely 'low' or 'high' dances, that almost all step patterns, including the seemingly immutable galliard, are adaptable to either duple or triple metre, that there are galliard variations and dance phrases of irregular five-, six- or seven-bar lengths, and that one dance can consist of many extremely brief sections in different metres (e.g. Negri's *Brando detta Alta regina*, in 11 sections of different metres and dance types), suggest a greater sophistication and flexibility in the dances of this period than has sometimes been imagined. Finally, the evidence that in the galliard, the *tordiglione*, the canary or the *passo e mezzo* the dancer as well as the musician could invent his own variations ad libitum, provided only that he matched the danced cadence (i.e. metre) to the musical cadence, again makes clear that improvisation and variation went hand in hand in dance as they did in music.

One last point remains to be made about the significance of dance music to late-Renaissance and later musical form: one of the givens at this time was that in any dance the symmetry of the body was paramount: whatever was danced beginning with the left foot (whether short step patterns or long choreographic combinations of step patterns) must be repeated beginning with the right. This mandate, of course, required repeated (or virtually repeated) music of exactly the same length, and it had to be clearly audible to the dancers (that is, musically related to the left-footed passage) served by the musicians. Whether in tiny internal repetitions, two-bar units, four-bar phrases or larger combinations, the choreographies in the Italian manuals particularly adhered to this 'True Rule' of symmetry, and the music reinforced it (see Caroso). As Caroso explained it, the perfect piece of music for dance was made up of multiples of two; indeed, it was a semibreve made up of two minims – a binary time value – that was now the 'perfect beat', rather than the ternary value of heretofore. While such aesthetic symmetry to meet the demands of dance was not entirely new (some 15th-century balli required it at times), the rigour of its application now may well have led to a new regularity of musical construction. Indeed, it is not beyond the realm of possibility that the almost iron-clad *Vierhebigkeit* of 19th-century music may have derived essentially from the needs of 16th-century dance.

(ii) 1630–1730. In the 17th century dance continued to be seen as a fundamental social grace and as a means of training the body for polite society, but its status as an art increased. Under the patronage of the French monarchy, dance achieved official recognition through the establishment in 1661 of the Académie Royale de Danse (eight years before a similar academy was founded to support opera), whose charter acknowledged the art of dance as 'l'un des plus honnêtes et des plus nécessaires à former le corps et à lui donner les premières et les plus naturelles dispositions à toutes sortes d'exercices'. During this period dance technique advanced rapidly, and the vocabulary it engendered – much of it still in use in ballet today – radiated along with French dances out to the rest of Europe. At the same time French dancing absorbed influences from other countries, especially Italy, Spain and, later in the century, England. Across Europe dance was not only a necessary practice for those wishing to demonstrate (or to achieve) social standing, but also a fundamental element in such politically charged spectacles as court balls and ballets. The rhythms of the dance even penetrated such genres as sacred music.

The enormous amount of dance music composed during this period falls into two broad and overlapping categories: dance music composed to set dancers in motion and dance music intended for listening. Although it is not always possible to separate the two functions from each other (theatrical music was not infrequently arranged for chamber performance), differences can be observed in both instrumentation and repertory. In France, the primary instrument for accompanying dancing was the violin (Mersenne, de Pure); in fact, so close was the relationship that dancing-masters were often violinists who composed their own music and accompanied their own classes. (Outside France dance was sometimes accompanied by plucked string instruments – the lute in

Italy and the guitar in Spain.) Functional dance music was generally performed by consorts – primarily members of the violin family, but also double reeds – or, as the century progressed, by the emerging orchestra. On the other hand, the dance music found in suites for solo lute or harpsichord, and later for viol, flute or other melody instrument with continuo, was composed for listening. As a consequence of this distinction, the repertory for such ensembles as the 24 Violons du Roi (also known as the *grands violons*), which played for balls and ballets, differs in content from the solo suites of composers such as Gaultier and Chambonnières in France or Froberger in Germany. Although such dance types as the courante and sarabande appear in both repertories, the various types of branle are much more numerous in the functional dance literature, whereas the allemande (rarely danced after the beginning of the 17th century) became one of the building-blocks of the Baroque solo suite.

Within the realm of functional dance music, there are also two overlapping categories: theatrical and social. (For the history of theatrical dance from its institutionalization *see* BALLET). Many of the courts in Europe cultivated some form of danced entertainment, called variously ballet, masque, ballo or intermedio, that involved both professional dancers and courtiers. Depending on the nature of the occasion and the means available, such spectacles could be extremely elaborate, with huge numbers of performers, elaborate sets and costumes, and even specially designed stage machinery. The content was often allegorical, with gods and heroes of ancient mythology standing in for members of the court, but at the same time a work might also contain comic or even burlesque elements. In the English MASQUE this dichotomy was formalized in the use of the antimasque that acted as a foil to the more serious portions of the masque as a whole, whereas in France certain grotesque ballets stood as independent works (e.g. *Le ballet royal du grand bal de la douairière de Billebahaut* of 1626, for which a large number of illustrations survive: see Christout, 1987). Indeed, during the reign of Louis XIII (1610–43) the burlesque ballet was particularly cultivated. However, even the most formal ballets performed for the highest state occasions could contain lighthearted elements, in keeping with Menestrier's precept that 'ballet requires that one mix the pleasant with the serious . . .' (*Des ballets anciens et modernes*, 1682): for example, in the ballet Lully interleaved between the acts of Cavalli's opera *Ercole amante*, performed in 1662 in honour of Louis XIV's wedding to Maria Theresa of Spain, an entrée for Jupiter and four kings of antiquity is preceded by an entrée for Mercury and a group of 16 thieves.

As this example suggests, mid-century French court ballets were constructed as a series of entrées or scenes, each performed by a single group of characters; these could contain from one to several dance pieces and might sometimes include a song or chorus. The sequence of entrées was held together by a loose story line or an overarching theme. Many ballets involved both men and women (although women participated in smaller numbers and in fewer works), and professional male dancers frequently performed alongside their aristocratic patrons in the same entrées; in France the tiny number of female professionals, such as Mlle Verpré, generally performed as soloists. Like his father, Louis XIV (reigned 1643–1715) was an enthusiastic dancer and performed in numerous ballets, by no means only as a god such as Apollo (fig.11): in the *Ballet d'Alcidiane* (1658), for example, he danced as Hatred, Aeolus, a demon and a Moor. Although he stopped performing on stage in 1670, he continued to dance at balls for another ten years.

Court spectacles were ephemeral, performed once and not revived. In France, thanks to the efforts of André Danican Philidor, the king's music librarian, music from roughly 130 ballets from the period *c*1575–1651 still survives, although often incomplete. Whereas these ballets contain some familiar dance types (e.g. pavane, courante, gavotte, canarie, gaillarde, bourrée, sarabande and various branles), most of the music is simply labelled with the names of the characters (e.g. '3e entrée, Les fous de la fête'). In other words, the ballet composers did not tend to move social dances on to the stage, but rather aimed to write music appropriate for the characters in each scene. (Michel de Pure, 1668, was but one among many theorists who insisted that ballet music must suit its dramatic context.) Similar character entrées form the basis of Jean-Baptiste Lully's ballets of the 1650s and 60s or of the ballets of Wolfgang Ebner and Johann Heinrich Schmelzer for the imperial court in Vienna. As the century progressed, the number of stage works involving court performers declined. In England, the Puritan era did not completely end the performance of masques, which mostly found their way into schools. In France, the emphasis at court shifted from ballet to opera (Lully acquired the privilege for the Académie Royale de Musique in 1672) or to smaller works such as mascarades. Although court

11. Costume design for Louis XIV who danced as Apollo in the 'Ballet de Pélée et Thétis', 1654 (F-Pi 1005, f.1r).

ballets did not die out immediately, they became less frequent and, with a few noteworthy exceptions such as Lully's *Triomphe de l'Amour* of 1681, less elaborate. The last gasp of the French court ballet occurred in 1720, when the 10-year-old Louis XV danced in Lalande's *L'Inconnu* and *Les Folies de Cardenio*; by then theatrical dancing had become the domain of professionals.

As with ballet, French ballroom dancing became a model emulated by most of the rest of Europe. The formal court ball followed a strict protocol, and was more of a spectacle than a participatory event. It opened with a series of branles, involving the restricted number of guests who had been chosen in advance to dance at the ball. After the final *branle à mener*, a progressive dance in which the leading couple worked its way down the line before returning to the top, came a series of *danses à deux*, in which only one couple danced at a time, generally in order of rank, while everyone else watched. For most of the 17th century the courante dominated the social dances; during the last quarter of the century it was gradually replaced by the minuet. Both of these dances were built on repeating step units subjected to a limited amount of variation, and could be performed to any suitable piece of music, which would then be repeated as many times as necessary to complete the floor pattern. (Courantes tended to have an odd number of bars – often five or seven – in each strain; 17th-century minuets also sometimes had irregular phrase lengths, although the four-bar phrases characteristic of the 18th-century dance may also be found.) Other couple dances performed at balls consisted of elaborate, through-composed choreographies by such dancing-masters as Louis Guillaume Pécour that were set to specific pieces of music; these dances had to be memorized by the dancers in advance of the event. At the turn of the century, from which time a number of choreographies have survived, the most frequently performed couple dances were the courante, minuet, passepied, bourrée and gavotte. In masked balls, where greater freedom was permitted, dances of a more theatrical character were also admitted, for example the sarabande, gigue, loure, canarie, rigaudon or even the chaconne. Dancers at court balls were held to a very high standard; the memoirs of Saint-Simon recount the unfortunate incident of a young man who was laughed off the dance floor at two successive balls in 1692.

The extent to which folk dances may have influenced courtly styles is difficult to measure. Many dance types were ascribed a regional or national origin (the passepied from Brittany, the bourrée from Auvergne, the forlana from Friuli, the sarabande from Spain), but even 17th-century writers provided conflicting and often fanciful stories about a dance's past. Moreover, even for the upper levels of society there is very little information about actual dance practices from the middle decades of the 17th century. The verbal instructions found in F. de Lauze's *Apologies de la danse* (1623), Mersenne's *Harmonie universelle* (1636–7) and Juan de Esquivel Navarro's *Discursos sobra el arte del dançado* (1642), which apply primarily to a limited range of social dances, are incomplete and ambiguous and lack music. The fullest instructions from the middle of the century come from *The English Dancing Master*, a series of publications begun in London in 1651 by John Playford (and continued through 18 editions until 1728), each volume of which contains the tune and floor patterns for a large number of country dances. Although the name of the genre suggests that the dances are traditional, Playford clearly aimed his collections at an urban, educated audience; moreover, both the dances and the music show signs of artistic tinkering or, in some cases, new composition. All involve at least four dancers; many are 'longways for as many as will', that is, danced in two columns with the men on one side, the women on the other. The steps are extremely simple; the interest lies in the figures through which the dancers move. In 1684 English country dances were introduced at the French court for the first time. They quickly became popular, but not without first undergoing adaptation to French taste, primarily through the addition of refined footwork drawing on the step vocabulary of French court dance. Renamed the 'contredanse', the Frenchified version spread to the rest of Europe.

At around the same time that André Danican Philidor, in his role of music librarian to Louis XIV, began his effort to preserve much of the music by Lully and his predecessors, the king took an interest in having the dances from his reign preserved as well. During the 1680s at least three different systems of choreographic notation were developed in France: one, for the notation of contredanses, by André Lorin; the second, a schematic staff notation by Jean Favier, which preserves the only completely choreographed theatrical work from the period, *Le Mariage de la Grosse Cathos* (1688), a mascarade set to music by Philidor; and a third system invented by Pierre Beauchamp, choreographer at the court and the Paris Opéra, but exploited commercially by Raoul-Auger Feuillet. Whereas the first two systems remained in manuscript, Feuillet's book *Chorégraphie*, published in 1700 along with two books of notated dances by Louis Guillaume Pécour, Beauchamp's successor at the Opéra, reached a wide audience throughout Europe. Not only did the choreographies published over the next 25 years by Feuillet and his successor Dezais help disseminate the French style of dance internationally, the system was used by other dancing-masters and notators to preserve their own works; to date over 330 choreographies in Feuillet notation have been located, the vast majority of them for one or two dancers (see Little and Marsh, 1992). In addition, Feuillet developed a simplified version of the system for notating contredanses; the hundreds of contredanses preserved in this way have not yet been inventoried.

The 80 pages of positions and step tables included in *Chorégraphie* reveal a richly developed and demanding technique within a clear conceptual framework, signs that the basic dance style had been in place for some time. Since Feuillet included only minimal indications on how to perform the steps, his book must be consulted in conjunction with technical descriptions found in dance manuals such as Pierre Rameau's *Le maître à danser* (1725). These reveal that the underlying technique and basic step vocabulary were the same for both the social and theatrical dances of the period. Both rely on the five basic positions of the feet (codified, according to Rameau, by Pierre Beauchamps), turned out to an angle of approximately 90°, with preparatory *pliés* followed by *élevés* on to the ball of the foot. Even the simplest ballroom choreographies demand an acute sense of balance and draw on an extensive movement vocabulary in which basic step units such as the *pas de bourrée*, *contretemps de gavotte*, *temps de courante* and *coupé* are

12. Minuet: 'Menuet de Strasbourg', engraving by Pierre Landry from the 'Almanach royal' (1682); Strasbourg was captured by the French in the previous year

subjected to variation (including changes to the rhythm) and combined in myriad ways. Each dance is through-choreographed: every strain of music, repeated or not, receives its own sequence of steps. The only dance types that rely on a repeating step unit, and may thus be performed to any suitable tune, are the courante, minuet and passepied, and even these are subject to variations. All other dances match a specific tune with a specially choreographed set of movements; hence there is no such thing as a 'standard' sarabande, gavotte or gigue. Movements of the arms are rarely notated, but follow a set of conventions based on coordination with the steps. The ballroom dances allow for modest leaps or hops, whereas the theatrical style calls for larger gestures and a more extensive step vocabulary, including virtuoso steps such as *cabrioles* and *entrechats*. Both styles demand precision, control, grace and an excellent memory. Feuillet notation has the virtue of revealing the floor pattern that the dancers trace, which generally follows principles of mirror-image symmetry. The dances are always orientated along an imaginary vertical axis that bisects the dancing space, and that leads from 'upstage' where the dance begins towards the real or imagined figure of the king, who always sat at 'downstage' centre (for illustrations *see* BALLET, fig.2, and FEUILLET, RAOUL-AUGER). This very frontal presentation, characteristic of both the social and theatrical choreographies, marks a significant shift from the orientation of many of the Italian dances from the beginning of the 17th century, in which the dancers are often turned inwards towards each other. This change in the use of space may be related to the growing use of the proscenium theatre as the century progressed.

Most dance pieces of this period have a binary structure, with both sections repeated. Dance notations, however, show flexibility in regard to the handling of repeats. Some choreographies require more than one repetition of the music (*AABBAABB*), others involve a *petite reprise*, a repetition of the last few bars of the strain, that either replaces or supplements the repeat of the *B* section (the schemes *AABp* or *AABBp* are both found in choreographies). In 17th-century dances the opening of the *B* section does not necessarily make use of melodic material presented at the start of the piece; rhythmic consistency is a more common means of unifying the two sections, although there is sometimes a change of metre at the start of the *B* section, particularly in pieces composed for the stage. The French also favoured rondeau structures (usually *ABACA*), which could apply either to untitled dances or to generic types (e.g. the *gavotte en rondeau* in the Prologue of Lully's opera *Atys*). A third structural category is made up of the chaconne and *passacaille*, which were built on continuous variations over a harmonic pattern, usually of eight-bar phrases divided 4+4. These are by far the longest dances in the repertory: the chaconne in Act 5 of Lully's *Amadis* has 862 bars. With the exception of the structurally regular chaconne and *passacaille*, dance music from this period is often quite irregular; phrases containing an odd number of bars are not uncommon, nor is it rare for phrases of different lengths to succeed one another even in such dance types as the gavotte or sarabande. Given the wide variety of both phrase structures and rhythmic patterns in dances for which choreographies survive, it is clear that dance steps did not impose structures on the music.

The development of dance notation accelerated the spread of French dancing and its music throughout Europe, a trend apparent since the beginning of the century. When Charles II was restored to the English throne in 1660, he established an ensemble on the model of the French king's 24 Violons. Although his efforts to import French musical practices were met with some resistance, such composers as Henry Purcell were not immune to the Lullian model; moreover, French dancers frequently crossed the Channel to perform for English audiences. The extent of French penetration can be measured by the publication in 1706 of two independent English translations of Feuillet's *Chorégraphie*, one by John Weaver, the other by Paul Siris; moreover, between 1706 and 1744 a large number of notated choreographies were published in England, a number second only to those originating in France. Several of these dances originated in royal celebrations, for example 'The Britannia, a new dance composed by Mr. Isaac performed at court on Her Majesty's birthday' (London, 1708); others reflect the longstanding English practice of providing dancing between the acts of plays in the public theatres, for example L'Abbé's *New Collection of Dances* (London, *c*1725). In Germany a number of substantial treatises on dancing in the French manner were published in the early 18th century, including Johann Pasch's *Beschreibung wahrer Tanz-Kunst* (Frankfurt, 1707), Samuel Rudoph Behr's *Wohlgegründete Tantz-Kunst* (Leipzig, 1709), Louis Bonin's *Die neuste Art zur galanten und theatralischen Tantz-Kunst* (Frankfurt and Leipzig, 1711) and Gottfried Taubert's *Rechtschaffener Tantzmeister* (Leipzig, 1717), the last of which – over 1000 pages long – is particularly informative. Moreover, many German courts had French dancing-masters in their employ, even those where Italian opera held sway. The accession of the Duke of Anjou, Louis XIV's grandson, to the Spanish throne in 1702 opened Spain to French musical practices, and whereas the Spanish embraced French dance styles less fully than did other countries, numerous arrangements of dance tunes by Lully and other French composers appear in Spanish and Latin American collections of guitar music; the mid-18th-century dance publications of Pablo Minguet y Yrol contain instructions and some choreographies for both French and Spanish dances. The most popular piece for arranging, known simply as *Amable*, was 'Aimable vainqueur' from Campra's opera *Hésione* (1700), whose choreography by Pécour as a ballroom dance was published many times between 1701 and 1765, two of them in Spain. French dances began to appear in Venetian ballrooms around 1690 (before that time French visitors to Venice considered Italian social dances as little more than walking), and in 1728 Giambatista Dufort's *Trattato del ballo nobile* discussed French dances, with emphasis on the minuet and contredanse, for an Italian audience.

This enormous dance activity in the 17th and early 18th centuries has left behind several kinds of musical objects. Dance music written for the stage was rarely published and, as a result, much of it has been lost, although some exists in incomplete or defective manuscript copies (as is the case with Lully's court ballets) or is only partly preserved in abridged arrangements, printed or manuscript. The most notable exception to the pattern of incomplete preservation occurred in France, where, starting in 1678 with Lully's *Isis*, most of the operas

performed in Paris – including the dance pieces – were published in full score. Nonetheless, even in France the tendency in the 18th century to publish short scores means that for many operatic dances, including some by Rameau, the inner parts have not survived. This situation is, however, far better than in Italy and Germany, where a good deal of the dance music performed between the acts of operas has entirely disappeared. Although some of the ballet music still extant has been published in modern editions, much remains in manuscript. There are a few surviving anthologies of music for the 17th-century French ballroom, most of them manuscript. The Kassel manuscript (ed. Ecorcheville, 1906) includes repertory, in full score, of the 24 Violons by such mid-17th-century composers as Dumanoir and Mazuel; the dances represented in the largest number are the courante, sarabande and branles of various types (including the gavotte), although the collection also includes a few bourrées and gaillardes, and one each of the gigue, passepied and minuet. Late in the century André Danican Philidor began collecting the melodies of a large number of ballroom dances into a manuscript anthology he entitled *Suite de danses pour les violons et hautbois qui se jouent ordinairement aux bals chez le roi* (*F-Pn* Vm^7 3555; see also the related *F-Po* ℞ 2359), of which he published a selection in 1699 under the same title. The print contains mainly branles, courantes, menuets, passepieds and contredanses, but the manuscript represents the full range of social dances, including the tunes to many notated choreographies; the title of the collection notwithstanding, the dances are arranged by type, not into suites. From the first half of the 18th century, when ballroom practices were shifting increasingly towards the minuet and contredanse, there are numerous anthologies of tunes for these two dance types.

By the end of the 17th century dance music composed for listening had its own conventions and was preserved in quite different types of sources. Whereas there was some overlap between the two repertories in that dances composed for the stage were frequently recycled for listening – the arrangements of Lully's theatrical music into trio suites arranged by key being a case in point – the only known instances of a dance composed for a solo or chamber suite later appearing on stage or in the ballroom occurred when a composer borrowed from himself. Rameau, for example, reused 'Les sauvages' from his *Nouvelles suites de pièces de clavecin* of 1728 in his *opéra-ballet Les Indes galantes* of 1735, but pieces by composers who wrote for the salon, such as François Couperin, do not appear in collections of practical dance music. The chamber suite thus followed its own line of development, although both its nomenclature and its content varied considerably across time and space (*see* SUITE). In France the earliest examples are for the lute, followed around 1660 for the harpsichord, and towards the end of the century, *pièces en trio* (two treble instruments and continuo) or suites for solo viol and continuo. (Despite the dominance of the violin in actual dance music, no solo suites for violin were composed in France during the 17th century.) French composers treated the order and choice of movements within a chamber suite much more freely than did their German counterparts, but as in Germany the allemande became a densely textured, contrapuntal piece, far removed from the simple processional dance it had been at the start of the century or from the rustic German character-dances that occasionally appeared on the stage. And whereas the opera scores published under Lully's direction support Le Cerf de la Viéville's contention that Lully's ornamental practices were quite restrained, French suites of the same period, particularly those for solo harpsichord, overflow with *agréments*: Jean-Henri d'Anglebert's ornament table in his *Pièces de clavecin* (1689) contains no fewer than 29 examples. It was perhaps the difference in ornamental practices between orchestral and solo dance music that provoked the theorist Saint-Lambert's comment that minuets for dancing were to be performed faster than harpsichord minuets (*Les principes du clavecin*, 1702).

In Italy dance pieces appeared both in collections such as Giovanni Maria Bononcini's *Sinfonia, allemande, correnti, e sarabande* op.5 (1671) or in *sonate da camera*, such as the same composer's op.2 trios (1667), whose title *Delle sonate da camera e da ballo* suggests that some of the pieces may have been put to use in the ballroom. Bononcini, whose residence in Modena put him within a French sphere of influence, was at ease in both the French and Italian styles, and Arcangelo Corelli's sonatas and concertos – especially, but not exclusively, those classified as *da camera* – also show signs of French influence, particularly in regard to the rhythmic play within some of the correntes. Composers in German areas, such as the violinist Heinrich Ignaz Franz von Biber, incorporated dance movements in both Italian and French styles into their sonatas. Although there are notable distinctions between such related dances as the Italian *giga*, the French gigue and the English jig, the language of the title of a dance does not necessarily indicate the national origin of its style. *Sonate da chiesa* and concerti grossi by Corelli and other composers across Europe also contain dance-based movements, although they may bear only a tempo marking such as 'Allegro' (*see* SONATA and CONCERTO). In fact, the *giga*, whether so marked or not, came to be the typical last movement of the Baroque sonata. When the Italian violin style reached France in the early years of the 18th century, both Italian dances and French dances that had acquired an Italian accent were incorporated into suites by such composers as Jacques Hotteterre and François Couperin, the latter's deliberate blending of the two national styles in *Les goûts réunis* (1724) being of particular interest.

The orchestral suite, because of its origins in arrangements of theatrical dance pieces for listening (e.g. Michel-Richard de Lalande's *Symphonies pour les soupers du roi*, MS copied 1703), had more varied contents than the chamber suite. In Germany, where orchestral suites were composed in great numbers following their introduction in the late 17th century by composers such as Georg Muffat and Johann Sigismund Kusser, both of whom had studied in Paris, they were generally called 'Ouvertüren' after their usual first movement, an overture in the French manner. In addition to dance movements familiar from the keyboard suite (sarabande, gavotte etc.), they often included ballroom dances such as branles or more theatrical types such as canaries or chaconnes, as well as pieces simply marked 'air' or 'rondeau', as was common for dances in operatic scores. Some ouverture-suites even allude to theatrical characters, either in individual movements ('Les combattants' in an *Ouvertüre* by Georg Philip Telemann) or throughout, as in Telemann's *Ouverture burlesque*, which attributes dances to characters from the

commedia dell'arte ('Scaramouches', 'Mezzetin en Turc' etc.). Although orchestral suites were probably not composed as functional dance music, they nonetheless stay closer to the actual practice of dancing, particularly the theatrical, than do the chamber and solo suites.

Although most dance music of the Baroque period was instrumental, there are references in France to dancing done 'aux chansons'. Moreover, many songs of the period clearly bear the imprint of the dance, both in the popular repertory such as vaudevilles and in art music by composers such as Michel L'Affilard, whose dance-songs, appended as examples to his *Principes très-facile pour bien apprendre la musique* (see in particular the fifth edition, 1705), indicate the type of dance on which they are based. In the operas of Lully and his successors, many of the instrumental dances in the divertissements are paired with songs or choruses in the same metre and with similar rhythmic and melodic profiles. But dance rhythms appear in vocal *airs*, both in France and elsewhere, even without dance in the vicinity and even within an italianate framework, as in some of Handel's operatic arias. Moreover, dance rhythms worked their way into sacred vocal music: there are numerous examples of dance-based movements within the motet repertory in France (Montagnier, 1996), and J.S. Bach's cantata *Himmelskönig, sei willkommen* BWV182 welcomes Jesus to the rhythms of a gavotte and ushers the believers into heaven to the strains of a passepied.

5. 1730–1800. The gradual disappearance of the suite did not lead to a decline in the composition of dance music: not only did dance remain an important component of theatrical entertainments throughout the 18th century, but dance-based movements infiltrated almost every genre of instrumental music, from the Italian opera overture to the solo sonata to the Viennese Classical symphony, although their presence was often masked by the simple tempo markings used to designate movements. Several Baroque dance types, such as the courante, almost ceased to exist, whereas others, such as the gavotte, held on for considerably longer, while new dance types emerged, particularly from central Europe. On a technical level the division between social and theatrical dance practices grew wider, but there remained some overlap in repertory, and the dance types found in instrumental genres were borrowed from both the stage and the ballroom. In the emerging 'absolute' instrumental music, composers began to treat dance as a topos which could draw on both a web of cultural associations and muscle memory.

Dancing remained an essential social grace in polite society, and, while balls continued to take place in courts and private homes, public venues also opened: many opera houses began to host masked balls as a means of increasing their revenues and other types of public dance halls began to appear as the century progressed. The publication of dances in Feuillet notation, however, almost ceased after 1730. Dezais' continuation of Feuillet's annual collections of ballroom dances had ended in 1725, and although the English dancing-master Kellom Tomlinson did not publish his *Art of Dancing* until 1735, he claimed on the title-page that the book had been written in 1724. Moreover, the emphasis on the minuet (to which a third of Tomlinson's book is devoted) was to become even more pronounced in later dance manuals. Although the republication of a few of Pécour's *danses à deux* as late as 1780 shows that they had achieved the status of classics, such dances were performed only at the most ceremonial of balls or else studied in dancing lessons for their pedagogic value; by mid-century social dancing was dominated by the minuet and the contredanse.

In the ballroom the minuet carried the weight of tradition and remained a vehicle for demonstrating proper deportment and the disciplined use of the body that was seen as essential for anyone aspiring to social standing. Although it was occasionally danced by two couples, it remained primarily a dance for a single couple, while everyone else in attendance watched. The minuet outlasted the French Revolution; it appears in English and German dance manuals into the early 19th century (see Aldrich, 1984). Collections of minuet music were published in large numbers; Haydn, Mozart and Beethoven, among others, composed orchestral minuets for the ballroom. Moreover, the minuet remained in the theatrical repertory and can be found in operas and ballets throughout the century. But it gained still more currency through its absorption into virtually all the instrumental genres of the 18th century – solo, chamber and orchestral (*see* MINUET). Most prominently, it became the third movement of the Viennese Classical symphony and string quartet, where it was not infrequently subjected to the compositional manipulations of the high style (e.g. Mozart's Minuetto in canone in the Quintet in C minor K406, 1787). Outside France the Italianized version of the name (minuetto or tempo di minuetto) tended to appear as the heading for a movement, but the minuet is not always identified as such every time it appears; a movement headed 'Rondo', for example, might be based on minuet rhythms. Whereas, according to evidence from both theoretical sources and pendulum markings, the minuet had a lively tempo at the start of the century, by its end the expansion in the minuet's uses not surprisingly resulted in a broader range of possible tempos (Harris-Warrick, 1993; Malloch, 1993).

One of the attractions of the contredanse was that it allowed several couples to dance at one time. The contredanse itself had various subcategories. The *contredanse anglaise*, often known simply as the 'anglaise', used a traditional English longways formation. The *contredanse française*, which came to be called the 'cotillon', involved two or, more often, four couples in a square formation. Both types generated huge amounts of material from all over Europe, both printed and manuscript: dance notations with and without music, verbal descriptions of figures, and collections of music (for a partial list, primarily of French sources, see Guilcher, 1969; for illustration *see* CONTREDANSE). Even though contredanses of both types involved a limited range of steps compared with the court dances, the sequence of figures could be quite complex. In his *Trattato theorico-prattico di ballo* (Naples, 1779) the Italian dancer Gennaro Magri praised the French practice of allowing at a ball only dancers who had memorized the steps and figures in advance; in fact, he stated, the contredanse should not be done at all if there was any doubt that its performance would not meet a high standard. Magri's own contredanses sometimes use large groups of dancers; one, composed for a mascarade, calls for 32 people. Following 1760 the *contredanse allemande* (sometimes, confusingly, called simply the 'allemande') swept Paris; according to La Cuisse (*Répertoire des bals*, 1765) it derived from the exposure the French army had to German dancing during

the Seven Years' War. This variation on the *contredanse française* added complex hand holds and passes under the arm to the figures of the dance. A group performing a *contredanse allemande* may be seen in the engraving *Le bal paré* (1774), by Duclos after Saint Aubin. (Behind-the-back hand holds and hands on the hips may be seen as markers of a German character in French dance as early as 1701.) In the last decade of the century yet another regional variant, the écossaise, began to appear in ballrooms.

The music for contredanses is generally in a major key and in duple metre, either simple or compound, with simple melodies and regular, four-bar phrasing. Many of the earlier dances have the rhythmic profile of the gavotte, with an upbeat of two crotchets within a time signature of ¢ or 2. Later contredanses tend to be in 2/4 or 6/8; the French tunes often start on the half-bar. A number of *contredanse allemande* tunes have a turning figure decorating the arrival on the tonic in bar 4; in Germany these also tended to have an upbeat. Some contredanse tunes were newly composed, whereas others were borrowed from a wide variety of sources, including popular songs and operatic music. There seems to be considerable overlap between contredanse tunes and the vaudeville repertory used in *opéras comiques*; presumably the borrowings went in both directions. Contredanses were often performed on stage, within divertissements, but especially as part of the vaudeville finale used to conclude many plays, ballets and *opéras comiques*. They were also seen on the stage of august theatres such as the Paris Opéra, when the nature of the divertissement within a ballet or opera allowed for a lighthearted dance of this type. Rameau's *acte de ballet Pygmalion* (1748), for example, concludes with a contredanse (*see* BALLET, §I, (iii)).

Because of its pervasiveness, the influence of the contredanse is hard to overstate. Not only did such composers as Mozart and Beethoven write contredanses for ballroom use (e.g. Beethoven, 12 Contredanses for orchestra, 1802), they also incorporated tunes with the profile of a contredanse into many instrumental works, particularly in rondo finales. Two examples among many include the Presto from Haydn's Symphony no.85 ('La reine') and Mozart's Rondo for piano and orchestra in D K382; Mozart even borrowed a tune from a subcategory of the *contredanse allemande* repertory known as 'Strassburger' for an episode in the last movement of his G major Violin Concerto K216 (see Reichart, 1984, and Dahms, 1997).

In the middle of the 18th century a group of triple-metre dances from southern Germany and Austria began to enter European ballrooms. Known collectively as 'Deutscher' ('Teutscher') or German dances, individual dances had names such as the Dreher, Schleifer, Ländler or (starting in the 1780s) Walzer. The most radical differences between these and the French court dances were that the dancers faced each other in a closed position and whirled rapidly around each other, qualities that to many eyes made them morally suspect and medically risky. Nevertheless they became extremely popular, especially in German-speaking countries; Haydn, Mozart, Beethoven and Schubert all wrote sets of Deutscher for balls in Vienna. In France in the 1760s such dances tended to be assimilated into figures within the *contredanse allemande*, but by the 1790s the waltz had become an independent dance there as well, its music generally notated in 3/8 rather than 3/4. It seems to have appeared in London at about the same time as in Paris. This dance, too, was sometimes called the 'allemande', and the French appellation, as well as the Italian 'ballo tedesco', even appears in German music anthologies. (Carl Maria von Weber chose to identify the 12 dances in his op.4, 1801, for piano by three apparently equivalent designations: allemandes, Walzer and deutsche Tänze.)

Because of their triple metre, German dances lent themselves to interplay with the minuet. Sometimes composers wrote a dance of this type for the trio in the third movement of a symphony or string quartet, as Mozart did in his Symphony no.39 in E♭ K543 and Haydn in his Symphony no.97 in C. But composers also alluded to the rhythms of the Deutscher in non-dance movements, as in the first movement of Beethoven's Piano Sonata in G (op.79), which is in 3/4 time and marked 'Presto alla tedesca', or in the many rondo finales with themes in a swinging triple metre. It has even been suggested that Beethoven paraphrased a Deutscher tune in the triadic opening theme of the 'Eroica' Symphony (Reichart, 1984), thus providing a certain symmetry with the contredanse tune of his own composition that he used as the basis for the finale. An extraordinary interplay between dance types occurs in the first-act finale of Mozart's opera *Don Giovanni* (1787), in which three separate stage orchestras simultaneously play a minuet, a contredanse and a 'teich' (Deutscher), while the various characters dance to the music appropriate to their social stations.

Other kinds of regional dances also made their way on to the stage and into instrumental works. The polonaise, in a moderate triple metre and danced in Poland as a processional, seems (despite its frenchified name) to have been particularly cultivated in German-speaking areas. J.S. Bach and Telemann both included polonaises in some of their suites, and in the second half of the 18th century there are polonaises by W.F. Bach, Kirnberger, Mozart and Beethoven (e.g. the latter's Allegretto alla polacca in the Serenade in D op.8). The polonaise was also used for local colour in operatic divertissements, as in François-André Danican Philidor's *tragédie lyrique Ernelinde* (1767). Another Polish dance, the mazurka, had considerably less currency during this period than it was to have later. Hungarian dances, such as the Gypsy-inflected *verbunkos*, began having a musical impact in Vienna in the last third of the century. From Spain, which had produced the *passacalle*, chacona and zarabanda in the 17th century, now came the *seguidilla* and the fandango; the latter appears in Boccherini's String Quintet op.40 no.2 (G341), and Mozart composed a fandango for the wedding scene in Act 3 of *Le nozze di Figaro*. Turkish music and dance, which had been imitated on stage as far back as Lully's *comédie-ballet*, *Le bourgeois gentilhomme* (1670), featured in numerous works in the 18th century including Rameau's *opéra-ballet*, *Les Indes galantes* (1735, Paris), Starzer and Hilverding's pantomime ballet *Le Turc généreux* (1758, Vienna), Favart's *opéra comique*, *Soliman Second, ou Les trois sultanes* (1761, Paris), Gluck's *opéra comique*, *Le cadi dupé* (1761, Vienna), and Salieri's *Tarare* (1787, Paris). Just as composers developed musical markers for the Turkish style while remaining within the parameters of European art music, so dancers probably put a veneer of gestures characterized as 'Turkish' on top of the basic ballet step vocabulary. The

13. Title-page of the piano score of Johann Strauss (i)'s 'Odeon-Tänze' op.172 (Vienna: Haslinger, 1845)

single extant choreography called a 'Turkish dance', set to music from 'La Turquie' in Campra's *opéra-ballet*, *L'Europe galante* and published by the English choreographer Anthony L'Abbé in 1725, uses certain character steps such as planting the foot flat on the floor and hopping backwards to mark the dance as exotic.

Although the paucity of dance notations after 1730 makes it much harder to discern precise features of the theatrical style than is possible for the start of the century, opera and ballet scores show that audiences saw and heard a much wider range of dance types than they themselves performed in the ballroom. Theatrical conventions governed the choice of dance types within a flexible, evolving framework that composers both within and outside the theatre could draw upon; the pastoral realm, for example, could be evoked by the sounds of a passepied, *musette* or gavotte. Such associations could be drawn upon in many musical contexts: Allanbrook has demonstrated the expressive and dramatic uses to which Mozart put dance 'topics' in his operas *Le nozze di Figaro* and *Don Giovanni*; she has also pointed out that a number of Viennese symphonies juxtapose the two leading social dances of the era, the minuet and contredanse, in their third and fourth movements (Allanbrook, 1983). Surely one of the responses audiences of the period would have had to such works would have been muscular. As investigations continue into the musical conventions of late 18th-century dance music, both theatrical and social, it will undoubtedly become possible to give nuance to our understanding of many genres, including those often viewed as 'absolute'.

6. 19TH CENTURY. During the 19th and 20th centuries, a period of extensive industrialization and development of leisure interests, dancing became a recognized pastime of the public at large; regular dance orchestras were no longer the prerogative of royal courts or the aristocracy but were able to maintain an independent existence, and directing dance bands and composing and arranging for them became a full-time activity very much in the public eye, its leading exponents enjoying international fame. In addition dance music increasingly came to be listened to as well as danced to.

The centre of 19th-century dance music was Vienna, and the upsurge of interest in dancing was prompted by the popularity of the waltz. During the 18th century the waltz had developed from various country dances in triple time (such as the German dance and the ländler) to make its way during the early years of the 19th century from the taverns in the suburbs of Vienna to the large dance halls that were being built in the city (fig.13). The significance of the waltz was to rival that of its predecessor, the minuet, and its period of survival as a ballroom dance was to exceed that of any other. It was the waltz that, in spreading through Europe, persuaded a wider public to take an interest not only in the dance itself but in the music.

In the early 19th century the waltz's chief rivals for ballroom popularity were the quadrille and the galop.

The quadrille, a formal square-dance, had developed from the country dance or contredanse as a 'quadrille de contredanses', and survived for most of the century as a more relaxed dance beside the other livelier dances. The quadrille had a complicated set of steps, by contrast with the galop which was one of the simplest dances ever invented. A lively dance, and a suitable way to bring an evening to an end, the galop's popularity finally faded during the second half of the century. Perhaps second only to the waltz in popularity was the polka, a hopping dance which came from Bohemia in the 1830s; it was the rage in Vienna and Paris by 1840 and in Britain and the USA during the following years, remaining popular until around the turn of the century. The polka was not only popular in the social dance arena but could also be witnessed on the professional stage. The choreographer Jean Coralli produced a version for the Paris Opéra in 1844, and Carlotta Grisi and her husband, Jules Perrot, performed their version at Her Majesty's Theatre in London. The polka also exerted an influence on music for the concert hall, though to a much lesser extent than the waltz. The first composer to develop it to any degree was Smetana, who not only composed polkas for dance orchestras but also incorporated the rhythm into weightier compositions like *The Bartered Bride* (1866).

There were, of course, many other dances that achieved lesser significance: the polonaise, a processional dance, served as a suitable way to start an evening; the cotillon reappeared in various forms as a novelty dance; and the mazurka achieved popularity either independently or in compound form as the polka-mazurka. There were indeed many variants of the main dances. The *valse à deux temps* was a quicker form of waltz with elements of the galop, while the *redowa* was another dance related to the waltz. The schottische achieved popularity around the mid-century and was closely related to the polka, while the polka itself was danced in German countries during the second half of the century either as the slower 'polka française' or as the quicker 'polka schnell'. The 'quadrille des lanciers', a variant of the quadrille which appeared in Britain about 1817 and reappeared throughout Europe in the 1850s, finally achieved popularity in Britain as 'the lancers'.

Of the chief dances the quadrille in particular was restricted in its format and in the scope its regular eight-bar phrases gave for musical development. Other dance formats allowed greater development and more scope for musical creativity, and the waltz in particular, by including an extended introduction anticipating the main themes, by allowing the melodies to expand, and by rounding off the whole with a recapitulatory coda, was able to achieve the status of a miniature tone poem. Indeed the importance of the 19th-century dance was by no means confined to the ballroom; quite apart from the extensive influence the waltz in particular had on serious music, as the minuet had before it, the main dance bands supplemented their playing at balls by giving concerts in parks and entertainment centres. The dance repertory was supplemented by operatic selections, instrumental showpieces and songs, but such dances as the waltz and polka became as much the main attractions of these concerts as of balls. Entertainment centres such as the Tivoli Gardens in Copenhagen were opened towards the middle of the century with such concerts as prime attractions, and many of the dance-band leaders of the time were at least as celebrated for their concerts as for their performances at balls.

Among the most celebrated dance-band leaders of the century were Lanner, the Strausses and Ziehrer in Vienna, Labitzky in Carlsbad, Gungl in Berlin, Musard, Isaac Strauss and Waldteufel in Paris and H.C. Lumbye in Copenhagen. The composition of the main bands developed from the orchestra for which Mozart composed his dances for the Vienna Redoutensaal: double woodwind, a small body of strings without violas, and percussion; yet the maintenance of a regular orchestra and the requirements of novelty items for popular concerts encouraged elements of showmanship and displays of instrumental technique that make these bands recognizable forerunners of the show bands of the 20th century. Certainly the spread of the waltzes of Johann Strauss (i) abroad during the 1830s in no way prepared audiences for the impression made by his orchestra on its international tours. In the *Journal des débats* in 1837 Berlioz enthused over the rhythmic precision of the band, the remarkable effect of the short, staccato themes being passed from one wind instrument to another and the thrilling effect of their *fortissimo*, and the enthusiasm was repeated wherever the orchestra went in Britain in 1838. Perhaps the greatest of the showmen was Jullien, whose orchestra produced all manner of eccentric sounds. By the 1860s, however, when the waltz had become somewhat institutionalized and when the most famous examples (such as *The Blue Danube* and *Tales from the Vienna Woods*) were written, the main dance-orientated orchestras had become similar to small symphony orchestras, the style more lyrical and the instrumentation more conventional.

7. 20TH CENTURY. Whereas during the 19th century the popularity of the leading dances spread from Europe to America, during the 20th century the traffic was reversed. Examples of American influence had been felt during the 19th century, for example the barn dance (or military schottische) which began a long popularity in British ballrooms during the 1880s. Of wider significance was the boston or 'valse boston'; though known in Europe during the 1870s, it was in the years immediately before World War I that it enjoyed considerable popularity in European ballrooms as danced to the waltzes of Archibald Joyce, Sydney Baynes and others. Although the boston itself in time fell out of favour, it was probably primarily responsible for breaking the hold that the fast, rotary Viennese waltz had on the public in favour of the more sedate 20th-century style of waltz. Even more of a sensation in the years preceding World War I was the tango, which was rhythmically related to the habanera and exported from Argentina to Paris where it was adapted to the ballroom. At a time when the afternoon *thé dansant* session was popular at fashionable hotels, 'tango teas' were very much the fashion at the height of the dance's popularity in 1912–14. A companion dance, the maxixe, which arrived at much the same time from Brazil, was less successful.

It was, however, the ragtime dances, of which the two-step and cakewalk had been direct precursors, that brought about a radical change in dance styles. Around 1910 the one-step, a dance based on a simple walking step, became popular in the USA, providing an entrée to the dance floor for commercial ragtime numbers such as *Alexander's Ragtime Band*. Variants of the one-step

included the bunny hug and turkey trot, and there were other ragtime dances such as the horse trot and fish walk. But it was the foxtrot, developed in the USA around 1912 and promoted by the dancing team of Vernon and Irene Castle, that really established a new era in dancing; it reached Britain in 1914 and in due course spread through Europe. After ragtime, the actual steps or the movement of the dances were no longer a central concern. Rather, the impetus for the new dance styles came from the rhythm. There was also a dramatic shift away from the uniformity that had dominated dancing in the past, towards an increasing emphasis on individuality and freedom.

After World War I interest in the new dance styles rapidly increased. New dances enjoyed periods of success, such as the shimmy, which reached Europe from the USA in 1921 and was characterized by a turning in of the knees and toes followed by a shake of the bottom. Another was the charleston, which featured vigorous side-kicks and which, like so many earlier dances, met with a good deal of opposition on moral and medical grounds before its brief period of acceptance in the mid-1920s. The waltz survived to lend rhythmic variety in the midst of the prevalence of common time, but its tempo was by then considerably slower than that of the 19th-century waltz. Like so many dances, it was subject to continual changes in steps and tempo; and the foxtrot came to be danced either as the 'slow foxtrot' or the 'quick foxtrot' which in due course came to be known simply as the 'quickstep'.

The rise of new styles coincided with mounting public interest in ragtime and jazz, and the syncopation and instrumental characteristics of such ensembles were taken over by the dance bands of the time. However, in seeking to satisfy the public the typical dance band eschewed the more revolutionary or suspect aspects of jazz, such as improvisation. Yet there was no firm dividing-line between jazz and dance bands, and the dance bands were probably as near as the general public came to jazz. Paul Whiteman, perhaps the most widely known bandleader of the 1920s, was popularly dubbed 'King of Jazz', yet his publicity proclaimed that he 'confined his repertory to pieces that were scored and forbade his players to depart from the script'. He was a violinist by training and in the early 1920s led his band on the violin as in the 19th-century dance band; soon, however, the violin was generally dropped as lead instrument and the standard dance-band instrumentation became two or more brass instruments, two or more saxophones (usually doubling other reed instruments) and a rhythm section consisting of piano, banjo and drums, sometimes with a brass bass or tuba. Later still the guitar replaced the banjo.

Whereas the fame of 19th-century band-leaders and their music had owed a good deal to sheet music and the bandstand, those of the 1920s and 1930s owed much to the gramophone and radio. It was especially through the growth of radio during the 1920s that the new dance-band sounds gained wide popularity and radio stations soon came to realize their commercial value. Notably in Britain, where dancing had during the 19th century been accepted as a pastime less than elsewhere in Europe, people learnt the new dance styles, and dance halls were introduced in many large towns. Hotels too realized the value of providing a large ballroom with its own band, which supplemented and eventually replaced the older 'Palm Court' ensemble.

A new feature of the 1930s was an interest in Latin American dancing to the accompaniment of a band whose rhythm section included maracas, claves and Cuban drums. The interest was sparked off by the arrival of the rumba in New York in 1931 and continued with the samba, a newer version of the maxixe. A later feature of the 1930s, and a more direct development from the earlier dance and show bands, was the advent of the swing bands of Benny Goodman, Glenn Miller and others. The associated dances, such as boogiewoogie and jitterbug, were free and improvised, and marked a notable move away from traditional formal dancing in close embrace.

The formalized dance steps and the dance bands which were so popular in the inter-war years began to lose their attraction after World War II. Two distinctive features in 1950s social dancing stand out: the continuing interest and development in Latin dancing, and the advent of rock and roll. The rumba and samba continued to be popular in the 1950s, as did Latin American dance bands like those of Edmundo Ros and Roberto Inglis. But Cuban music in the 1950s also began to be influenced by American jazz and swing, and this fusion gave rise to a different kind of rhythm which, in turn, demanded a new kind of Latin dance, the mambo, 'a dance with one beat in every bar in which no step is taken'. As mambo music developed so did the mambo style of dancing, and the triple mambo came to form the basis of the cha cha cha.

Although interest in Latin American dancing continued into the early 1960s, it did not have the mass appeal of rock and roll. Formal dancing, in effect, was dealt a decisive blow in 1955 with the release and popularity of the film *The Blackboard Jungle*, featuring the song *Rock around the Clock* by Bill Haley and the Comets. When the film *Rock around the Clock* was released in Britain the follwoing year large numbers of teenagers danced wildly in the cinema aisles as the film was showing. This gave rise to 'moral panic' in the press, where concerns were raised regarding the potential bad effects of rock and roll dacing on the behaviour of young people. Black American music had a strong influence on the development of popular music and social dance in the 20th century. The roots of rock and roll are to be found in the jitterbug, the lindy hop and swing. Rock and roll dancing became more simplified and less acrobatic as it continued into the 1960s and it remained largely a partner dance.

The establishment of rock and roll signalled the arrival of youth culture as a hedonistic and powerful force in the expanding world of leisure and consumerism. The introduction of cheap and virtually unbreakable LP and 45 r.p.m. records in particular ensured the swift circulation of commercial pop music, via individuals, the jukebox and the radio stations.

The history of social dancing since the 1960s has been largely bound up with specific youth subcultures and their identification with certain popular music groups or individual vocalists. With the advent of the twist craze, popularized through the records of Chubby Checker in the early 1960s, partner dancing in the dance halls appeared to be dead, except for the final slow 'smooch' dance. Solo dancing became the norm for teenagers and was later accepted by other age groups. One teenage dance craze followed another, and organized dancing gave way to the cult of self-expression. In the early sixties the centre of popular musical culture and the dance styles it engendered shifted from the USA to Britain. Traditional

dance bands were replaced by groups using electric guitars, electric organs and rhythm instruments. The new sounds, the Mersey sound, rhythm and blues and blue beat demanded new dances. By 1965 the twist was outdated and was supplanted by more dances of self-expression such as the blue beat and the shake and the numerous other dances that followed in their wake. The shake was closely associated with a distinct youth subculture called the mods, and the movement in its initial stages was linked to the rise to fame of pop groups like the Beatles and the Rolling Stones. Another youth culture, the rockers, did not embrace the new sounds or dances and instead favoured rock or the twist, if they danced at all. Afro-Caribbean music, particularly from Jamaica, had a significant impact on the popular music and dance scene, in the United Kingdom, from the mid-sixties through to the early eighties. Between 1969–72, for example, there were seventeen Jamaican based records in the top twenty of the popular music charts. The sounds of the blue beat, which the mods came to favour over the Mersey sound, ska, rock steady, and reggae with Bob Marley as its icon, came to be popular with various sectors of white youth culture as well as black Britons of Afro-Caribbean descent.

Dancing in the 1960s revealed a gulf between the generations. The older generation danced ballroom and Latin, jive and the twist, whereas the younger generation (aged 16–25) focussed on solo beat dances to express their individuality. The era witnessed the demise of the traditional dance halls (replaced by the discothèque) and the rise of club culture and the disc jockey who played the records for the clubbers to dance to.

The lack of formalism in social dancing in youth culture continued for most of the 1970s. The dance crazes of youth groups were closely associated with the musical style of their pop heroes. The smoothed-out rock and roll of the 1960s was recycled into glitter rock or glam rock, perhaps best exemplified in the music and style of David Bowie. The early punk rock movement, in a reaction to glam rock, found expression through earlier rock music and reggae before it took on the 'non-music music' style of groups like the Sex Pistols. The dance associated with the punks was called the pogo, and it consisted of jumping up and down and 'slamming' into dancers. In the late 1970s, however, disco music became the pre-eminent dance music. A new, more defined style of set disco dancing began to emerge, symbolized in the film *Saturday Night Fever*.

Dancing was more important in some youth cultures than others, and the 1980s witnessed the emergence of some significant social dance forms. Beginning in the black ghettos of New York and spread by disc jockeys like Afrika Bambaataa, break dancing and hip hop placed stress on individual skills, innovation and set moves. Exhibitionist and acrobatic in form, breakers or hip hop dancers were soon to be seen performing to rap music in the streets or the shopping malls of large western cities. Dancing is also central to rave culture, a phenomenon that burst on to the urban scene in the late 1980s, which, like disco, has its roots in urban black and gay club scenes in the USA. Ravers have no set or formal moves and tend to dance alone on the spot using sinuous body movements. The main aim is to dance continuously for long periods at a time to 'house' music mixed and synthesized by the disc jockey to the count of 120 to 130 beats a minute.

The late 1980s also witnessed the renewed popularity of Latin rhythms and partner dancing. First there was the snake-like sensuousness of movement characteristic of the lambada, then the tango and more recently the salsa. It seems that some 30 years after the explosion of the twist and the advent of solo self-expressive dancing, there is a resurgence of interest in learning the skills necessary for dancing with a partner.

JULIA SUTTON (1, 4(i)), E. KERR BORTHWICK(2), INGRID BRAINARD (3), REBECCA HARRIS-WARRICK (4(ii), 5), ANDREW LAMB (with HELEN THOMAS) (6–7)

Dance, Stanley (Frank) (*b* Braintree, 15 Sept 1910; *d* Rancho Bernardo, CA, 23 Feb 1999). American writer on jazz of English birth. After attending Framlingham College (1925–8) he first wrote about jazz in the French journal *Jazz-hot* (from 1935) and in 1937 moved to the USA, where ten years later he settled in Connecticut. He wrote for such publications as *Down Beat*, *Metronome*, the *New York Herald Tribune*, *Saturday Review*, *Jazz Journal* (to which he contributed a monthly column, 'Lightly and Politely', from 1948 to 1976) and *Jazz Times* (from 1980). His books consist largely of interviews with jazz musicians, and provide a rich source of oral history. He had a particularly close association with Ellington, whom he accompanied on several international tours. He won a Grammy Award for his liner notes to *The Ellington Era* (Col. C3L27, 1963), and the ASCAP-Deems Taylor Award in 1979 for his book *Duke Ellington in Person*. In addition to his work as a writer Dance was a record producer for Felsted, Columbia, Black Lion and RCA Camden.

Dance's wife, Helen Oakley Dance, collaborated with her husband and has also written a book on T-Bone Walker (*Stormy Monday: the T-Bone Walker Story*, Baton Rouge, LA, 1987/*R*); her interviews with jazz musicians have been published in *Coda* and *Down Beat* magazines.

DANIEL ZAGER

Dance, William (*b* London, 1755; *d* London, 5 June 1840). English pianist and violinist. He was the grandson of George Dance (1700–68), the famous architect, and other family connections of his were painters and playwrights. He was a violinist at Drury Lane Theatre in 1771–4, at the King's Theatre from 1775 to 1793 and led the orchestra at the Handel Commemoration of 1790 in the absence of Cramer. W.T. Parke, reporting his performance of a piano concerto at the Hanover Square Rooms in 1789, said that he 'displayed great taste and power of execution'.

The circular proposing the meeting which led to the formation of the Philharmonic Society was issued by 'Messrs. Cramer, Corri and Dance' from Dance's house on 17 January 1813, and Dance was a director and the treasurer of the society until his death. Mendelssohn was a friend of the family and inscribed the manuscript of his fourth Song without Words (14 September 1829) to Dance's daughter Sophia Louisa.

Nellie Curzon Smith, a great-granddaughter of William Dance, who married Henry J. Watt and died young, was a brilliant pianist. She was a pupil of John Farmer and later a protégé of Joachim at the Berlin Hochschule für Musik.

H.G. FARMER/R

Dănceanu, Liviu (*b* Roman, 19 July 1954). Romanian composer and conductor. He studied composition with Niculescu at the Bucharest Academy (1975–81) and later gained a post there teaching composition and music history. Dănceanu directed the International New Music Weeks in Bucharest between 1991 and 1993, becoming the director of the International Contemporary Music Days in Bacău in 1992. The founder and leader of the Archaeus ensemble, he has been president of the Romanian section of the ISCM. His awards include the Enescu Prize (1988).

A consistent proponent of new composition techniques, Dănceanu sustains an emotional intensity in his works. His active involvement with the Archaeus ensemble has influenced his compositional style, allowing the development of new internal structures which focus on the essence of sound. New perspectives deriving from this involvement have led Dănceanu to follow diverse stylistic directions in his works.

WORKS
(*selective list*)

Orch: Angulus ridet, sym. poem, op.7, 1981; Quasisimphonie (Sym. no.1), op.13, 1983–5; Quasitoccata, op.21, str, 1985; Marea unire [The Great Union], op.42, 1988; Bn Conc., op.49, 1989; Sapte zile [Seven Days], conc., op.56, trbn, orch, 1991–2

Vocal: Quasiricercare, op.14, 1–5 vv, perc, 1984; Trachos, op.46, chorus, ww qt, 1989; Sym. no.2, op.59, solo v, chorus, orch, 1992; other choral works

Chbr: Allegorie, op.3, wind septet, 1979; Qt, op.29 no.1, cl, bn, vn, vc, 1985; Qnt, op.29 no.2, cl, bn, vn, vc, perc, 1986; Octetto, op.36, cl, bn, vn, vc, gui, pf, 2 perc, 1986; Quasiconcerto, op.12, cl/sax, ens, 1987; L'effetto Doppler, op.47, 2 fl, pf, 1989; Palimpseste de Couternon, op.50, sax qt, 1990; Conc. sintoboe, op.53, ob, synth, 1991; Saxas, op.57, saxs, 1992; Andamento, op.64, cl, vn, perc, 1994

OCTAVIAN COSMA

Dance music. 20th-century club dance music. It developed out of DISCO and the invention of the synthesizer into a major worldwide force, eclipsing rock; unlike most others genres, it has developed at a very fast rate, aided largely by the continual invention of sub-genres and frequent artistic collaborations.

The roots of dance music can be traced to the early HIP HOP crews of the New York streets in the late 1970s. Hip hop was the fusion of early DJ techniques (*see* DJ (ii), MIX and SCRATCHING), RAP, break dance and, significantly, graffiti culture. The DJ's use of specially extended versions of tracks (on 12-inch singles) had begun in the last days of disco with records by the New York Citi Peech Boys, D Train and others. Artists such as Kool Herc and D.J. Hollywood began mixing and scratching records at block parties in the south Bronx. They were then joined by early rap artists, who gave the Jamaican art of toasting a more contemporary, political and lyrical vitality. Afrika Bambaataa further developed hip hop with *Planet Rock* (Tommy Boy, 1982), a record which, instead of scratching and mixing, incorporated the synthesizers and drum machines then being exploited by Germany's Kraftwerk and early UK synth-pop artists.

As rap and hip hop gained wider appeal, Blondie – an established white rock act – introduced the styles to a mainstream audience with their US number one single, *Rapture* (Chrysalis, 1980). In the same way, scratching and break dance was highlighted in the UK by the white artist Malcolm McLaren, with *Buffalo Girls* (Charisma, 1983).

In the late 1980s, hip hop developed into HOUSE when Derrick May, based in Detroit, combined it with funk and soul grooves, the use of 4/4 beat-based drum machines and early sampling techniques. Other early instigators of house included Carl Craig and Todd Terry. The first house records to achieve mass appeal in the UK were *Love can't turn around* (1986) by Farly Jackmaster Funk, followed by the UK's first number one house hit, *Jack Your Body* (DJ Int., 1986) by Steve Silk Hurley (based in Chicago), and later by the UK's first home-grown house number one, *Pump Up the Volume* (4 AD, 1987) by M/A/R/R/S, which was also one of the first INDIE MUSIC-dance music crossover tracks.

The term 'house' is said to have developed from the Warehouse club in Chicago, where the pioneer of the style, Frankie Knuckles, was the resident DJ. At the same time, New York's Paradise Garage club was gaining an equal reputation for attracting crowds of all types. Unlike disco or rock before it, people of all races and sexual orientations mixed in the new dance clubs. The Paradise Garage is also one possible origin of GARAGE music, which has co-existed with house ever since, most notably spawning 'speed garage' in the late 1990s.

House has remained a consistent area of experimentation and generated many other genres, most notably 'acid house' and TECHNO. Acid house was the term used to describe the sound of the 'squelchy' Roland TB-303 synthesizer bass effects achieved by the Chicago-based pioneer Marshall Jefferson and Phuture (the band he produced) on their inspirational single *Acid Trax* (1987). The style combined with the drug ecstasy and illegal rave parties in the UK, and began a transformation of dance music with an impact reminiscent of 1960s' psychedelia. This coincided with the rebirth of rap, which now ranged from the highly political (Public Enemy) to the intentionally irreverent (De La Soul). Acid house exponents in the UK included S Express, D-Mob, Jolly Roger and a host of imitators. The style also led to some of the mainstays of British dance music including Bomb the Bass, DJ Mark Moore (of S Express) and Liam Howlett (of the Prodigy).

The 'anything goes' attitude of acid house also inspired the ailing UK jazz scene, resulting in ACID JAZZ (ii). Consequently, live bands such as Corduroy, Brand New Heavies and JTQ (the James Taylor Quartet) acted as an antidote to the entirely synthesized doodlings of acid house. Over a couple of years, acid house transformed into the RAVE scene, which was fought by the UK establishment and influenced the Criminal Justice Bill in a bid by the authorities to outlaw outdoor dance events and the increasingly widespread use of ecstasy.

With acid house parties and then raves came the need for 'chill-out areas' to coexist with huge, often-outdoor dance events. Chill-out DJs originally played anything from Brian Eno, Jon Hassell and other ambient music innovators to environmental sound effects and Motown soul. These were soon combined on record and merged into the new form AMBIENT HOUSE, whose prime exponents were the Orb. Although the Orb have continued to develop the ambient house sound, other artists who can be considered early pioneers of the style, such as 808 State, Orbital and Future Sound of London, have since taken a more experimental, techno-oriented direction.

Ambient house and acid house converged in the Balearic islands soon after to create 'Balearic beats', which has continued to act as a testing ground for new styles and clubs. The 'Balearic beats' scene of the early 1990s included remixes of anything from teen pop (Mandy Smith) to industrial music (Nitzer Ebb). It was transformed in the late 90s into the Ibiza scene which regenerated TRANCE.

Rave music was such a widespread phenomenon that for a period it merged with traditional rock and guitar music. Such performers of indie music as Primal Scream worked with dance producers, and some bands (such as the Beloved, the Shamen and, latterly, Everything but the Girl) even converted to become completely dance based. This lead to the 'baggy' era, characterized by bands that included both guitarists and DJs or some element of dance production. Its notable bands included the Happy Mondays, the Farm, Inspiral Carpets and Stone Roses. Largely a UK development, some achieved massive success in the USA, notably EMF.

Although rave gained more commercial success than acid house (with artists such as Altern 8 and Praga Khan), it was quickly seen as a novelty and disappeared underground to transform into the even more pounding and unexpurgated sub-genres of 'happy hardcore' and 'gabba'. At the same time, techno became visible on a large scale. The term had originally been coined in the late 1980s by Derrick May, taken from the 'Techno Rebels as agents of the Third Wave' in Alvin Toffler's novel, *The Third Wave*. The style began as a harder, more funky and edgy version of house music, which then spiralled off in one direction as May spiralled off in another with the more subliminal 'deep house' sound. By the mid-1990s, techno was being explored by Europeans with the Berlin-based 'Teutonic beats' collective and the Belgian label R&S.

With commercial acceptance of all styles of dance music increasing, commercial flavours of techno became increasingly common, and acts such as 2 Unlimited and Snap (both featuring singers and dancers fronting the music of unseen producers) enjoyed huge success. In fact, some new sub-genres of dance music, such as the disco style 'handbag', existed only in the commercial space.

With such increasing commercialism, rebirth from the street level that had produced rap and hip hop was imminent and much needed. In Bristol, TRIP HOP was created in the mid-1990s when the slow, dark indie attitude was mixed with dance breaks, beats and samples in the work of Portishead and Massive Attack. As numerous other artists (including Morcheeba) developed the trip hop sound, it – like ambient house – became a key sub-genre of dance music which was not actually made for dancing.

Soon after in London, producers and DJs began sampling and playing at breakneck speed records saturated with a sense of rhythm, so creating BREAKBEAT and JUNGLE. Artists such as Goldie and record labels such as Movin Shadow defined a rhythmic renaissance which lost little of its original style or appeal after development into the widespread and more commercial genre, drum 'n' bass. The up-tempo onslaught of jungle was echoed with the next development of the indie music-dance music crossover, as witnessed by the 'big beat' sound of artists such as the Chemical Brothers and Bentley Rhythm Ace. 'Big beat' combined hardcore drum machine theatrics (inspired in part by early Art of Noise records such as *Beatbox*, 1984) with rock vocals and arrangements. At the same time, garage music was experiencing a rebirth with the equally hardcore 'speed garage'.

By this time, the USA had undergone a hard-fought battle to bring rap into the mainstream (via the 'Parental Advisory' campaign in the late 1980s to outlaw, or at least to highlight, explicit lyrics). With it, the R&B label had become a major force with artists such as TLC and R Kelly and producer-artists such as Puff Daddy and Babyface gaining national and international prominence. The label managed to combine street credibility with a multi-million-dollar industry, as did several other parts of dance music, notably the UK 'superclubs'. The superclubs' success was helped by the increasing fascination of the media and public with DJs who, through remix

and production work, had permeated into most other areas of pop music. DJs including Sasha, Paul Oakenfold, Carl Cox and Paul Van Dyk were able to command huge salaries and celebrity status. The superclubs of Cream, Ministry of Sound and Gatecrasher (based in Liverpool, London and Sheffield respectively) used aggressive marketing through such products as compilation albums and magazines to become brand names that far exceeded the prominence of many record labels and certainly many of the by now faceless dance music artists they played. All owed a debt not only to Paradise Garage and the Warehouse, but also to Manchester's Hacienda club, one of the first UK clubs to devote whole nights to dance music and one which was part owned by one of the UK's early synth bands, New Order.

IAN PEEL

Dance of death (Fr. *danse macabre*; Ger. *Totentanz*). A medieval and Renaissance symbolic representation of death as a skeleton (or a procession of skeletons) leading the living to the grave; in more recent times a dance supposedly performed by skeletons, usually in a graveyard. The 14th-century epidemics of bubonic plague in Europe are generally thought to have influenced the creation of the dance of death, but its literary origins can be traced at least as far back as the *Dit des trois morts et des trois vifs* (before 1280) of Baudouin de Condé. The illustrations in the *Danse macabre* (1485), published by Guyot Marchant, and in Heinrich Knoblochzer's so-called *Heidelberger Totentanz* (1490), as well as the famous woodcuts of Holbein in *Les simulachres et historiées faces de la mort* (1538; later known as *Totentanz*) depict skeletons playing musical instruments (see illustration; *see also* DANCE, fig.6); but musical activity is by no means always present in 15th- and 16th-century pictures of the dance of death, and in most of them dancing is not shown either. A possible derivation of the French 'macabre' from the Hebrew and Yiddish word for a gravedigger suggests

Dance of death: woodcut ('The Princess') from Hans Holbein (i)'s 'Totentanz' series, before 1526, published 1538

that the dance's origins may lie in the customs of medieval gravediggers' guilds.

A song of Spanish provenance which perhaps accompanied a 14th-century dance of death is quoted by Ursprung (p.155), but the earliest music that can definitely be linked with the dance is a *Mattasin oder Toden Tantz* in August Nörmiger's *Tabulaturbuch auff dem Instrumente* (1598). The 19th-century tradition of the dance of death as a midnight revel by resurrected skeletons drew its impetus largely from Goethe's poem *Der Todtentanz*. It was this, together with Andrea di Cione's fresco *The Triumph of Death* in the Campo Santo, Pisa, that inspired Liszt's *Totentanz* for piano and orchestra (1849), and Goethe's version of the dance is echoed in Adolphe Adam's ballet *Giselle* (1841). Saint-Saëns's symphonic poem *Danse macabre* (1874) was originally projected as a setting of a well-known poem by Henry Cazalis, similar to Goethe's, in which Death is represented as a gruesome fiddler of dance-tunes. Both Liszt and Saint-Saëns used the plainchant DIES IRAE, which in other music has assumed a macabre character of more general significance; it reappears in Mahler's *Das klagende Lied* (1880–99) and in Ligeti's *Le Grand Macabre* (1978), both of which are loosely connected with the oldest traditions of the dance of death.

MALCOLM BOYD

Dance organ. *See* FAIRGROUND ORGAN.

Dance royale. *See* DANSSE REAL.

Danchet, Antoine (*b* Riom, Auvergne, 7 Sept 1671; *d* Paris, 21 Feb 1748). French librettist. He studied first with the Oratorians of Riom, then in Paris with the Jesuits. A Latin poem on the taking of Mons won him a chair of rhetoric at Chartres in 1692, after a year he returned to Paris. In 1696 he found employment as tutor to two children in the home of Colbert de Turgis, but the great success of his first opera, *Hésione* (music by André Campra, 1700), alarmed the puritanical de Turgis family. He refused to stop writing librettos, and a trial ensued that was decided in his favour.

Danchet first collaborated with Campra on a divertissement, *Vénus, feste galante*, performed on 27 January 1698 at the home of the Duchesse de la Ferté. Between 1698 and 1740 Danchet provided Campra with librettos for 18 works: eight *tragédies en musique*, three *opéras-ballets*, three divertissements, two *fragments* and two ballets. In addition he supplied Campra with eight cantata texts and wrote four five-act tragedies for the theatre. The Académie des Inscriptions, Médailles et Belles-Lettres admitted Danchet in 1705 and he achieved the rank of associate the following year. In 1712 he was elected to the Académie Française. From 1727 he took charge of the *Mercure de France*, which he directed until his death.

Idomenée, *Télèphe* and *Camille, reine des volsques* (all Campra, 1712, 1713 and 1717 respectively) are true tragedies. *Camille*, a political tragedy, minimizes the role of the supernatural. *Achille et Déidamie* (Campra, 1735) is a weak work for which librettist and composer were accused of 'completely drowning the subject in divertissements. No one wished to honour it by calling it a tragedy'.

In *Les fêtes vénitiennes* (Campra, 1710) music and text are equal partners; the work conforms exactly with Rémond de Saint-Mard's definition of *opéra-ballet*: 'Each act must be made up of a fast moving, light and, if you wish, a rather *galant* intrigue … two or three short scenes and the rest of the action in *Ariettes*, *Fêtes*, *Spectacles* and other such agreeable things'. The format of *opéra-ballet* gave Danchet an opportunity to test his original dramatic ideas. Thus in the third entrée of *Les fêtes vénitiennes* he fashioned the action to accommodate an 'opera' within an *opéra-ballet*. It is subdivided into four scenes; the first two have an identity separate from the entrée, and the third serves as a divertissement for both the 'opéra' and the entrée. The action of the two is coordinated from this point to the end of the entrée.

JAMES R. ANTHONY

Danckert, Werner (*b* Erfurt, 22 June 1900; *d* Krefeld, 5 March 1970). German musicologist and ethnomusicologist. He studied natural sciences and mathematics at the University of Jena, and musicology with Riemann and Abert at the University of Leipzig, with Becking at the University of Erlangen and with Schering at Leipzig Conservatory, where he also studied the piano and composition (1919–21). In 1924 he took the doctorate at Erlangen with a dissertation on the history of the gigue and then worked there as Becking's assistant (1924–5). In 1926 he completed the *Habilitation* in musicology at the University of Jena with a dissertation on styles of melodic writing. His project of assembling the Jena collection of early musical instruments (1933) was co-sponsored by the State Museum in connection with its new series of museum concerts. He served as music critic for the *Thüringer allgemeine Zeitung* in Erfurt from 1932 to 1937. He was named reader at the University of Jena in 1937 but moved to the University of Berlin in the same year, where he was named supernumerary professor in 1939. He served temporarily as head of the musicology

department in Graz from 1942 until the end of the war. After the war he was judged in the Soviet sector to be unsuitable for an academic post, owing largely to his service for the music division of the Nazi ideologue Alfred Rosenberg's cultural operation. He became a professor in Rostock, East Germany, in 1950 but was forced to flee in the same year to Krefeld, West Germany. Thereafter he was unable to obtain an academic post and had to eke out a living as a music teacher and through his publications.

As an ethnomusicologist Danckert contributed greatly to the study of melody, particularly pentatonicism. Using the theoretical concepts of the German anthropologists of the so-called 'Kulturkreis' school, he undertook a study of European folk music, *Das europäische Volkslied* (1939). One of the two substantial works dealing with symbolism in music that were left unpublished at his death was published posthumously. Towards the end of his life he published several arrangements of early French and English songs and dances for wind and string duets and trios.

ISRAEL J. KATZ/PAMELA M. POTTER

Danckerts, Ghiselin (*b* Tholen, Zeeland, *c*1510; *d* after August 1565). Netherlandish composer, singer and writer on music. Although he mentioned in an unpublished treatise on music that he was at one time in the service of Pierluigi Caraffa, member of a well-known Neapolitan family, his principal post was as a papal singer. He remained a member of the Cappella Sistina from 1538 until August 1565, when he was compelled to retire as part of a reorganization of the chapel on the grounds that 'he has no voice, is exceedingly rich, given to women, useless' ('vocem non habet, excellens dives, mulieribus deditus, inutilis'). He served at various times as the chapel's *punctator* and *camerlengo*; De Bruyn deduced from the partly published diaries of the Cappella Sistina that Danckerts was rarely absent from his post.

As a composer he was evidently little known and sparsely published; no single collection of his works remains. In 1551 Danckerts was chosen along with Bartolomé de Escobedo to judge the debate between Don Nicola Vicentino and Vicente Lusitano on the role of the chromatic and enharmonic genera in contemporary musical practice. The debate was won by Lusitano but its most lasting consequences were the writing of Vicentino's well-known treatise, *L'antica musica ridotta alla moderna prattica* (Rome, 1555) and Danckerts's own unpublished treatise, written in the wake of the debate. De Bruyn dated the first redaction of the treatise at about 1551, followed by two later versions written *c*1555–6 and 1559–60. Its importance lies mainly in its presentation of Danckerts's views on the musical developments of his time; it is in part drawn from his experience as a papal singer. In one interesting chapter in what is taken to be the second version, Danckerts described a controversy about the application of accidentals between two Roman singers of the church of S Lorenzo in Damaso, which must have taken place between 1538 and 1544. This revealing passage is one of the few in contemporary writings which give some idea of the practical difficulties faced by 16th-century singers in coping with the problem of applying unspecified accidentals to polyphony (see Lockwood). In

another important passage Danckerts attacked what he called the 'nuova maniera' in music of his own time, by which he meant the tendency of composers of about 1550 to introduce degree-inflecting accidentals into their works, to use the terms 'cromatico' and 'misura di breve' in titles of publications, to confound the traditional meaning of certain mensuration signs and most of all to undermine the traditional eight-mode system. Even though it remained in manuscript, the treatise became known beyond Roman musical circles as a contribution to the conservative side of musical thought in the second half of the 16th century. The Bolognese theorist Artusi later issued a defence of Danckerts's and Escobedo's sentence against Vicentino, which he eventually incorporated into his *Imperfettioni della moderna musica*, i (Venice, 1600).

WORKS

Laetamini in domino, 8vv, 1545^2

Tu es vas electionis, 5vv, Suscipe verbum, 6vv, formerly in *I-TVd* destroyed during World War II

2 madrigals, on texts by Ariosto, 4vv, 1555^{27}

4 other Ariosto settings attrib. 'Ghiselij' *B-Bc* 27731 (cantus only), by Danckerts according to Van den Borren

Several puzzle canons, incl. 2 in P. Cerone: El Melopeo y maestro (Naples, 1613)

WRITINGS

Trattato di Ghiselino Dankerts, three versions in *I-Rv*: R56 no.15, R56 no.15b and R56 no.33 (the first two evidently autograph, the third a contemporary copy); another copy in *Rc*

LEWIS LOCKWOOD

Dancla. French family of musicians.

(1) (Jean Baptiste) Charles Dancla (*b* Bagnères de Bigorre, 19 Dec 1817; *d* Tunis, 10 Nov 1907). Violinist, composer and teacher. He was the most celebrated member of the family. He studied the violin locally with Dussert and at the age of nine played for Rode, who was then living in retirement in Bordeaux. He played and sight-read so well that Rode gave him letters of introduction to Baillot, Cherubini and Kreutzer. From 1828 to 1840 he attended the Paris Conservatoire; he studied the violin with Paul Guérin and Baillot and won a *premier prix* in 1833; he then studied counterpoint and fugue with Halévy and composition with Berton; his fellow pupils included Gounod, Bousquet and Franck. While a composition student, he played the violin in Paris theatre orchestras (he succeeded Javault as leader at the Opéra-Comique) and thus supported his family and enabled them to study at the Conservatoire. He was associated with Habeneck's Société des Concerts du Conservatoire as early as 1834 and was its leading violinist from 1841 to 1863.

Dancla's interest in chamber music was stimulated by Baillot's performances of quartets by Boccherini, Haydn, Mozart and Beethoven. About 1839 the Danclas formed their own chamber music group, and from the 1840s their concerts at Hesselbein's home were a regular feature of the Paris season. Owing to internal politics at the Conservatoire, his ambition to succeed Baillot in 1842 as principal professor of violin was not fulfilled, despite Habeneck's support. Six years later he refused the post of assistant conductor at the Opéra-Comique and left Paris because of the unsettled conditions. For two years he was the postmaster of Cholet; he continued to play the violin in the Cholet area and, occasionally, with his family in Paris. Reviewing a Paris concert in 1849 at which Dancla's Fourth Quartet in B♭ was performed, Henri-Louis Blanchard wrote: 'He is still a good composer even though circumstances have forced him to become a man of letters'. He returned to Paris to work as an official in the postal administration, and was finally offered a position at the Conservatoire in 1855. Five years later he was made professor of violin, a post he held until his unwilling retirement in 1892; at the age of 75 he still played his own works in public.

Although impressed by Beriot's style and elegance and overwhelmed by Paganini's virtuosity, Dancla's model was Vieuxtemps. He did not tour, so his reputation outside France was based on his compositions. Blanchard had some reservations about his playing, which he attributed to Dancla's nervousness and irritability, but praised his trill, his lightness of bowing and his brilliance. He was highly respected at the Conservatoire, but had fewer eminent pupils than did his colleague Massart. He was a prolific composer (Fétis numbered his works at over 140) and won prizes for four of his 14 string quartets and three of his works for male chorus; but it is only through his numerous didactic works that his music survives, the most important being the *20 études brillantes et caractéristiques* op.73 and the *Ecole du mécanisme* op.74. He may be regarded as the last exponent of the classical French school of violin playing.

(2) Arnaud Phillipe Dancla (*b* Bagnères de Bigorre, 1 Jan 1819; *d* Bagnères de Bigorre, 1 Feb 1862). Cellist and composer, brother of (1) Charles Dancla. He studied the cello locally with Peres, a Bagnères amateur, and with Norblin at the Conservatoire, where he won a *premier prix* in 1841. He was a regular member of the Société des Concerts from 1847 to 1861 and also a member of the orchestra of the Opéra-Comique. Illness forced his early retirement to his native town. He wrote studies and concert pieces for the cello, notably a *fantaisie* on Auber's 'La sirène', and a number of religious pieces for cello with organ or harmonium accompaniment.

(3) (Jean Pierre) Léopold Dancla (*b* Bagnères de Bigorre, 1 June 1822; *d* Paris, 29 April 1895). Violinist, cornettist and composer, brother of (1) Charles Dancla. Like his brother he studied the violin with Dussert. At the Conservatoire he studied the cornett with Meifred, winning a *premier prix* in 1838, and the violin with Baillot, winning a *premier prix* in 1842. He played in the orchestra of the Société des Concerts from 1846, gave concerts (often featuring a sinfonia concertante, in which he would play the viola) with his brother Charles, and was a cornettist in the national guard. In 1853 he joined the orchestra of the Opéra, and five years later the

orchestra of the Théâtre Italien. He was a prolific composer of chamber music, character pieces and transcriptions for the violin, and sacred choral and vocal music.

(4) **(Alphonsine Geneviève) Laure Dancla** [Déliphard] (*b* Bagnères de Bigorre, 1 June 1824; *d* Tarbes, 22 March 1880). Pianist and teacher, sister of (1) Charles Dancla. She studied at the Conservatoire and won a *premier prix* in solfège in 1837. She performed chamber music with her brothers and for many years taught music in Tarbes, in the Pyrenees. Some of her piano pieces and songs were published in Paris.

ALBERT MELL, CORMAC NEWARK

Danco, Suzanne (*b* Brussels, 22 Jan 1911; *d* Fiesole, 10 Aug 2000). Belgian soprano. She received her entire musical education at the Brussels Conservatory, where she carried off many prizes and diplomas, for piano and the history of music as well as for singing. The unusual breadth of her musical culture was shown by her command of many different styles. In opera she was best known for her Mozartian interpretations, notably of Fiordiligi and Donna Elvira, which were applauded throughout Italy as well as at the festivals of Edinburgh, Glyndebourne and Aix-en-Provence. In England she sang parts as different as those of Mimì (1951, Covent Garden) and of Marie in a BBC concert performance of Berg's *Wozzeck*; and she made a touching and exquisite heroine in Ansermet's first recording of *Pelléas et Mélisande*. As a concert singer she was in demand for unusual music of all periods and schools, but was most at home in the songs of Debussy, Ravel and Berlioz, of which she left several recordings. Her versatility was the more remarkable in that her clear, cool soprano offered no great richness or variety of colour; but it had been admirably trained, and could manage the roulades of Mozart as easily as the most difficult intervals of Berg.

DESMOND SHAWE-TAYLOR

Dancourt [d'Ancourt], **Louis Hurtaut** [Heurtaux] (*b* Paris, 1725; *d* Paris, 29 July 1801). French librettist, dramatist and actor. He failed to make his mark as an actor in Paris, and pursued his career in the provinces (in Rennes, Strasbourg, Bordeaux and Rouen) and on various foreign stages (Bayreuth, Munich, Berlin and Brussels). While in Berlin sometime after 1755 he wrote the libretto of the divertissement *Le triple horoscope* which was set to music by Gaultier. With the warm recommendation of Favart, Dancourt then joined the French company in Vienna in 1762. During the 1763–4 season he wrote the libretto of *La rencontre imprévue, ou Les pèlerins de la Mecque*, which was set by Gluck. This work derived from Lesage and D'Orneval's play *Les pèlerins de la Mecque*, and had its first performance in 1764. Dancourt revived it in Brussels (1765), in Bordeaux (as *Ali et Rezia*, 1766) and in Paris, with music arranged by Solié (as *Les fous de Médine, ou La rencontre imprévue*, 1790). Adapted and translated into Italian by Carl Friberth, it inspired Haydn's *L'incontro improvviso* of 1775.

Dancourt subsequently wrote many other librettos. His pastoral *Scamandre*, set to music by Rozière, Dugué and the younger Feyseau, was performed in Bordeaux in 1766. He collaborated with Prosper-Didier Deshayes (*Le faux serment, ou La matronne de Gonesse*, 1785), Louis-Sébastien Lebrun (*L'art d'aimer, ou L'amour au village*, 1790), Claude Le Petit (*Le combat nocturne, ou Les morts vivants*, 1769), Henri-Joseph Rigel (*Ariane, fille de Minos*, 1784; *Jephté*, 1783; *Atine et Zamorin, ou L'amour turc*, 1786; *Le magot de la Chine*, 1800), Jean Joseph Rodolphe (*Le mariage par capitulation*, 1764), and Jean-Claude Trial (*Éscope à Cythère*, 1766).

A great supporter of the exaggerated comedy of the Théâtres de la Foire writers, Dancourt defended *opéra comique* in vaudevilles, and opposed the influence of the bourgeois and sentimental dramas of the time in his own *comédies mêlées d'ariettes* and *opéras comiques*.

MANUEL COUVREUR

Ḍaṇḍā [ḍaṇḍī, ḍaṇḍiā]. Concussion sticks of northern South Asia. Clashed wood or bamboo sticks, natural or lathe-turned, plain or painted, with or without jingles, are widespread in South Asia, especially in dancing. Common northern names are *ḍaṇḍiā*, *ḍaṇḍa*, *ḍaṇḍī* and *cāṛ*, all meaning 'stick'; the equivalent southern terms are *kōlu* and *karra* (*katta*). The *lī-keli* of Sri Lanka is a related instrument. Each dancer usually has a pair of sticks, which he or she clashes together and against those of the other dancers, as in the famous *ḍaṇḍā rās* of Gujarat; in the southern *pinnāl kolāṭṭam*, a maypole stick-dance, the dancers have only one stick each.

The *ḍaṇḍiā* of Gujarat are often comparatively short and thick, lathe-turned and given an ornamental lacquer. Small metal pellet-bells (*ghuṅgrū*) are sometimes hung from the end of one stick on strings. The *ḍaṇḍiā rās*circle-dance is performed primarily by men, during the autumn festival of Navarātrī. The *ḍaṇḍiā* of neighbouring Rajasthan are used in fertility dances of the springtime *holī* festival, as well as at the autumn harvest. The *ḍaṇḍā* of Madhya Pradesh are long sticks (about 60 cm) used by Ādivāsī peoples in the *sailā* dance, while those of adjacent Bihar appear to play the sticks (with pellet-bells) as clappers, in one hand. The *ḍaṇḍo*of Sind is a single stick rattle.

South Asian percussion or stamping sticks include the *tippani* of Gujarat and the *gedi* of Madhya Pradesh; the *cimṭā* of the Punjabi areas, the *cinpiā* of Rajasthan and the *ṭokā*of Assam are metal clappers with sprung joints.

ALASTAIR DICK/R

Dandelot, Georges (Edouard) (*b* Paris, 2 Dec 1895; *d* Saint Georges de Didonne, 17 Aug 1975). French composer. Son of the Parisian impresario and musicographer Arthur Dandelot, he studied the piano with Louis Diémer, intending to train for a career as a virtuoso. He was also an enthusiastic athlete, and twice won running championships (in 1912 and 1913). His studies were interrupted by World War I, in which his courageous conduct won him a citation. Demobilized in 1919, and having given up the idea of becoming a concert pianist, he went to study theory at the Paris Conservatoire, studying with Caussade and Jean Gallon, while also attending Widor's composition classes. He completed his musical training with Dukas and Roussel. A remarkable teacher, he taught at the Ecole Normale de Musique from 1919, and was then professor of harmony at the Paris Conservatoire (1942–65). He also wrote a considerable number of didactic and educational works. In 1929 the publication of his first collection of *Chansons de Bilitis* made him known as a composer; his reputation was established by the oratorio *Pax*, a stirring indictment of war which displays the loftiness of his inspiration.

The musical language of Georges Dandelot gives priority to formal and textural clarity. Faithful to tonality, he nonetheless frequently made use of polytonal elements. He composed in all genres, and excelled in the field of the *mélodie*, where he wrote some particularly successful works, including his *Cinq poèmes précieux*, of which the 'Pont Mirabeau', a setting of Apollinaire, enjoyed a certain celebrity.

WORKS
(*selective list*)

Stage: Le souper de famine (ballet), 1943; La création du monde (poème chorégraphique, Du Bartas), Paris, 1944; Midas (oc, 3, R. Rey), 1947, Lyons, 1955; L'ennemi (op, 3, Dandelot), 1948, unperf.; Pierrot et la rose (children's ballet), Paris, 1948; Le jardin merveilleux (ballet, 1), 1950, unperf.

JACQUES TCHAMKERTEN

Dando, Joseph (Haydon Bourne) (*b* London, 11 May 1806; *d* Godalming, 9 May 1894). English violinist. He had his first lessons from his uncle, Gaetano Brandi, and from 1819 to 1826 was a pupil of Nicolas Mori. He was a member of the Philharmonic Society's orchestra, 1831–55, and also played regularly at provincial festivals. Especially prominent in musical life in the City of London, Dando led the orchestras of the Classical Harmonists' and Choral Harmonists' Societies, and the amateur concerts at the London Tavern. In September 1835 he organized and performed in the first public chamber music concert in England, at the Horn Tavern, Doctors' Commons. He also played the viola in the regular ensemble for the Quartett Concerts, set up by Henry Blagrove at the Hanover Square Rooms in 1836, and in other West End chamber music concerts. When Blagrove withdrew from the Quartett Concerts in 1842, Dando took over as leader and ran the series in the Throne Room of Crosby Hall, Bishopsgate, until 1859.

Dando was a committed teacher, known affectionately as the 'father of amateurs'. According to a tribute in the *Musical Herald* (1892), he did much to encourage women to play string instruments. In the 1870s a stiffening of the third finger of his left hand forced him to give up performing professionally, and from 1875 he taught the violin at Charterhouse, Godalming, where he occasionally conducted and led quartets in school concerts.

In his youth Dando sang at the Bavarian Chapel in London, St Paul's Cathedral and the Foundling Hospital, and for 31 years was a member of the choir at the Temple Church. He was a founder member of the Bach Society (1849) and a contributing fellow of the Musical Institute (1851–3).

CHRISTINA BASHFORD

Dandrieu [Dandrieux, d'Andrieu, d'Andrieux]. French family of musicians.

(1) Pierre Dandrieu (bap. Angers, 21 March 1664; *d* Paris, 20 Oct 1733). A priest as well as a musician, he was organist of St Barthélemy, Paris, when in 1691 Louis Marchand tried unsuccessfully to displace him from the position by inducing a 'fille de mauvaise vie' to accuse him of having got her with child. There is circumstantial evidence that he had at one time been a pupil of N.-A Lebègue (François-Sappey, 1982). At his death he was living in two luxuriously furnished rooms in the house of his elder brother Jean in the Île de la Cité. Only one work is attributable to him with reasonable certainty, a book of 36 noëls with variations and five miscellaneous pieces, although it has been suggested that even this could have been published under his name by his nephew (2) Jean-François Dandrieu (Hugon, *RMFC*, 1979). As the words 'le tout revû [et] augmenté' on the title-page indicate, this was a second edition of a lost original; the publisher's address dates it between 1721 and 1733. The choice of

nöels and miscellaneous pieces recalls the contents of Lebègue's third organ book (*c*1685), and the variation techniques seem to reflect those of Lebègue (Dufourcq). Three airs by 'Monsieur Dandrieu' in collections published by Ballard in 1697 and 1699 are likely to be by Pierre, since Jean-François would have been only about 15 in 1697.

WORKS

3 airs in *Recueils d'airs sérieux et à boire*: Mes yeux par leur langueur extrême (Aug 1697), L'amour s'est fait pour la jeunesse (April 1699), Petits oyseaux sous ces feuillages (April 1699)

Noëls, O filii, chansons de Saint-Jacques, Stabat mater, et carillons, org/hpd (Paris, *c*1714; enlarged 2/1721–33); ed. in Publications de la Société française de musicologie, i/22 (Paris, 1979); see Jean-François Dandrieu for a further version of this collection

(2) Jean-François Dandrieu (*b* Paris, 11 Sept 1681 – 17 Jan 1682; *d* Paris, 17 Jan 1738). Composer and organist, nephew of (1) Pierre Dandrieu. After Couperin and Rameau, he was the most celebrated harpsichord composer of the 18th century. His parents, both from Angers, were Jean d'Andrieu, a prominent and very comfortably-off master *gainier* (maker of scabbards, jewel-boxes and other fine leather cases), and Françoise Rondeau. No record of his birth exists; the death certificate gives his age as 56, and a document of 10 September 1697 gives it as 15. He had a brother, Nicolas, and two sisters, (3) Jeanne-Françoise and Marie Louise-Charlotte. The whole family (including his uncle, Pierre) lived in the large paternal house in the Rue Ste-Anne 'près le Palais'. According to Titon du Tillet he was a pupil of J.-B. Moreau, an exact contemporary of his father and, like him, a native of Angers. It was probably owing to Moreau that the child Dandrieu, not yet five years old, played before Elisabeth-Charlotte of Bavaria, the princess Palatine, wife of the king's brother, Philippe d'Orléans, and known as 'Madame'. The connection appears to have continued, since nine years later he was to dedicate a book of sonatas to that same delightful lady. Through her, he might also have played to Marie-Anne-Christine-Victoire of Bavaria (*d* 1690), wife of the dauphin and, like Elisabeth-Charlotte, a Wittelsbach. In any case, a German connection seems to have been established, which manifested itself in the existence of a considerable number of pieces scattered through nine German and Austrian sources, both printed and manuscript (François-Sappey, 1982, p.99), as well as in a style that was evidently perceived as sufficiently German – perhaps because of his love of fugal writing – for him to have been commonly called 'the German organist' (F.W. Marpurg, *Historisch-kritische Beyträge zur Aufnahme der Musik* (Berlin, 1754–8), i, 460; note also the German connection of (3) Jeanne-Françoise Dandrieu).

His first official position was as organist of St Merry, a prestigious post occupied by Lebègue until his death in 1702. Dandrieu assumed the duties in January 1704, was named to the post on 20 July 1705 and remained there until his death. The title-page of *Livre de Sonates* op.2 (1710) names him organist of St Barthélemy; no document explains why he should have temporarily occupied his uncle's post, to which he succeeded officially only upon the latter's death in 1733. On 17 December 1721 he was confirmed as organist of the royal chapel for the April to July quarter succeeding J.-B. Buterne, a post with heavy duties that would have obliged him to provide a substitute (perhaps his sister) at St Merry and later St Barthélemy. Few other professional activities beyond the publication of his works are recorded: two juries, the first of which (1706) awarded the post of Ste Marie-Madeleine en la Cité to Rameau, and a consultation regarding the organ of St André des Arcs. He never married, and was buried in St Barthélemy (pulled down in 1858). The vast bulk of archival documents concerning the Dandrieus concerns their considerable financial affairs (transcribed in Françoise-Sappey, 1982).

The most striking witness to Dandrieu's talent is his two sets of string sonatas (1705 and 1710), which show an astounding mastery of imitative counterpoint and tonally directed harmony, italiante rhythm and disjunct melody. Rarest of all for a French composer, however, was his ability to achieve continuity and drive by delaying or avoiding cadences or maintaining the rhythmic flow through them. La Laurencie (who misdated the 1710 book to after 1733) characterized the melodic style of his allegros as 'vive, légère, d'une extrême élégance'. Whether taught by Moreau or instilled by study of Corelli and the example, perhaps, of Mascitti (attached to the Orléans establishment from 1704), these skills, counterpoint above all, permeated his music to the end. To a greater extent than any of his French contemporaries, Dandrieu seems to have thought polyphonically. It was natural for him to invent melodies that worked in double counterpoint, to imitate them immediately in another voice and to transpose, recombine them and develop them. Sequences, falling or rising, often with exchange of parts and chains of suspensions, and single, transposed repetitions of longer phrases were his favourite way of spinning out ideas.

These characteristics are much less evident in the first three books of harpsichord music, the very Italian-sounding pair of preludes to the first book excepted, since he was writing within an established native idiom (no such idiom had yet been established in France for sonatas). The first book (*c*1704–5) particularly, consisting of one substantial and very serious classical suite, takes an honourable place in the company of Marchand (1702), Le Roux (1705) and Rameau (1706). The special interest of the third book, made up entirely of easy teaching pieces, lies in the very complete fingering of each piece. It was in the last harpsichord book (1734) that italianism made its return – indeed the string sonatas themselves returned, transformed into harpsichord pieces. A number of the movements have one or two variations appended.

Under the revolutionary impact of François Couperin's harpsichord publications, which began in 1713, all traces of the old suite – specifically, the defining allemandes and courantes – were banished from Dandrieu's fourth and fifth books, which were published as books 1 and 2, as if the 'reactionary' earlier ones had been repudiated; moreover, whereas not a single piece in the early books bears a character title, *all* the pieces in the two new books are titled. The third and last of the new series (1734) constituted a retrogression. To be sure, all the pieces are titled and none carry dance labels; nevertheless, the first two suites begin with crypto-allemandes and courantes, and nearly all the other pieces belonging to these suites are recycled from the early books, somewhat simplified and otherwise brought up to date. The remaining six suites of this book, all of three movements, consisted entirely of ingenious (and unacknowledged) transcriptions from the string sonatas.

Dandrieu had little of Couperin's harmonic audacity, complexity of rhythm and texture, endless variety of harpsichord colour, studied naivety, humour or nobility. Instead, there was effortless craft, cohesion, drive and brilliance. The themes, motifs and figures are always well-turned, but they are drawn from a narrow range of types. Even the rationale of the titles is different: whereas Couperin worked from the idea to the music, Dandrieu used titles as performing directions: 'I have tried to draw them from the very character of the pieces they designate, so that they can determine the style and tempo by awakening simple ideas acquired by the commonest experience or ordinary and natural sentiments of the human heart'. Far more than either Couperin or Rameau, Dandrieu cultivated the variation; besides the varied noëls for organ and single *doubles*, there are nine sets of from two to five variations in the harpsichord books. The multiple printings and editions of his works, which continued long after his death, are proof of the celebrity this music enjoyed in the 18th century.

Although the *Livre de pièces d'orgue* appeared a year after his death, it is clear that Dandrieu himself completed the preparation; indeed, the music may have been largely composed between 1705 and 1710 (François-Sappey, 1982). Sets of from three to six pieces, each beginning with an offertory, alternate with *Magnificat* settings through six church 'keys'. Here also, Dandrieu raided his string sonatas: five of the offertories are transcriptions from the opening two (in one case three) movements of as many sonatas, with their extended italianate fugues. The effect on the organ is of vaguely Bach-like preludes and fugues, a genre virtually unknown elsewhere in French classical organ music. Fugal writing dominates in the rest of the collection, too, and confers on the conventional pieces, such as duos, trios and division basses, an unaccustomed coherence and solidity. The book of noëls, which was not published until 21 years after Dandrieu's death (possibly by his sister) and has been a musicological puzzle for nearly a century, is a thorough revision with cuts and additions of Pierre Dandrieu's noëls. It was the subject of an exhaustive discussion by Hugon, François-Sappey and Dufourcq (*RMFC*, 1979), who were unable to do more than list various hypotheses as to the authorship and chronology of both collections. What is certain, however, is that the later version is a great improvement on the earlier; it is shorn of prolixities, corrected, tightened up and enriched.

Dandrieu wrote one rather jejune piece for orchestra, *Les caractères de la guerre*, to be danced in an unidentified opera. Like so many others of his pieces, it too reappeared again and again, first in the harpsichord book of 1724, then in revised and separately issued re-editions. His *Principes de l'accompagnement* was no less successful, and its approach was apparently considered useful enough to merit a thorough updating according to Rameau's advances by an unknown hand as late as 1777; only the announcement survives.

Dandrieu's considerable body of music, nearly all of it attractive and very skilfully composed, yet almost never played, richly merits revival; but its greatest fascination lies in the multiplied possibilities of observing the composer at work, revising and recomposing his own and his uncle's music, sometimes more than once. In one case, for example, a violin allemande (from the *Livre de Sonates*, op.2 (1710), Sonata no.2) is transcribed for keyboard fairly faithfully, though with note values doubled (*D-SWl* 619), then partly recomposed as *La modeste* for the harpsichord book of 1734.

WORKS

published in Paris unless otherwise stated

Editions: *Jean-François Dandrieu: Trois livres de clavecin*, ed. P. Aubert and B. François-Sappey, Maîtres anciens de la musique française, vi (Paris, 1973) [A]

Jean-François Dandrieu: Trois livres de clavecin de jeunesse, ed. B. François-Sappey, Publications de la Société française de musicologie, i/21 (Paris, 1975) [F]

Livre de clavecin (*c*1704–5; 2/1710–20 as Livre de clavecin . . . 1er livre), repr., with [2e] Livre de clavecin and Pièces de clavecin, in Pièces de clavecin rangées en 6 suites (1719–20); F

Livre de sonates en trio (1705); another printing, as op.1 (1705)

Livre de sonates, vn, vc, bc, op.2 (1710/*R*), also pubd by Roger as Sonate (Amsterdam, 1710); allemande from Sonata no.2 transcr. kbd, *D-SWl* 619

[2e] Livre de clavecin (1710–20), repr., with Livre de clavecin and Pièces de clavecin, in Pièces de clavecin rangées en 6 suites (1719–20); F

Pièces de clavecin courtes et faciles de quatre tons différents (1710–20), repr., with Livrè de clavecin and [2e] Livrè de clavecin, in Pièces de clavecin rangées en 6 suites (1719–20); F

Les caractères de la guerre, ou Suite de symphonies ajoûtée à l'opéra, fls, obs, bns, tpts, timp, str (1718); arr. hpd in Livre de pièces de clavecin (1724), rev., pubd separately (1733, 1754); listed under 'sonates de violin' in J.-P. Le Clerc catalogue (1737), lost

Principes de l'accompagnement du clavecin exposez dans des tables (1718–19/*R*); Nouvelle édition augmentée de la basse fondementale . . . avec des leçons tirées des meilleurs auteurs italiens, announced 1777

5 airs: Buvons à tasse pleine (parody of the 1st fanfare in Les caractères de la guerre), *Recueil d'airs sérieux et à boire* (Sept 1718); Tendres regrets, amoureux soupirs, *Receuil d'airs sérieux et à boire* (Jan 1719); Pour conquérir Médée et la Toison, *Mercure de France* (May 1719); Sur les bords d'une fontaine, *Recueil d'airs sérieux et à boire* (May 1719); Trop aimables bergères (parody of the 1st fanfare in Les caractères de la guerre), Concerts périodiques, iii (1730)

Livre de pièces de clavecin, contenant plusieurs divertissements dont les principaux sont Les caractères de la guerre, ceux de la chasse et La fête de vilage (1724/*R*; 2/1734–7 as 1er livre de pièces de clavecin); several printings and edns to 1758, with at least one independent edn each of Les caractères de la chasse and La fête de vilage in addn to those of Les caractères de la guerre listed above; A

2e livre de pièces de clavecin (1728/*R*); A

3ème livre de pièces de clavecin (1734/*R*), incl. arrs. of earlier str sonatas; A

1er livre de pièces d'Orgue (1739; 2/1753), incl. arrs. of earlier str sonatas; ed. in Archives des maîtres de l'orgue, vii (Mainz, 1905/*R*)

Noëls, O filii, chansons de St Jacques, et carillon, org/hpd (1759), rev. of P. Dandrieu's Noëls; ed. in L'organiste liturgique, xii, xvi, xix, xx, xxii (Paris, *c*1955–60)

(3) Jeanne-Françoise Dandrieu (*b* 1695; *d* 1752–60). Harpsichordist and organist, sister of (2) Jean-François Dandrieu. Like her brother, she was a pupil of J.-B. Moreau; her uncle (1) Pierre Dandrieu was her 'tutor'. She was harpsichordist to Maximilian II, Elector of Bavaria (another Wittelsbach; see (2) Jean-François Dandrieu), during his residence in France between 1709 and 1715. (This further evidence of a link between the Dandrieu family and German circles is augmented by the fact that portraits by the French painter J. Vivien exist of both Maximilian and Pierre Dandrieu.) In 1718 she played a role in the presence of the king in a *ballet de cour* alongside a 'Mlle Couperin'. Upon her brother's death in 1738 she became organist of St Barthélemy, a post she held until her death. Though she is not known to have composed, she may have been responsible for the various posthumous publications of her brother's works. Like him, she never married.

Danek, Adalbert. *See* DANKOWSKI, ADALBERT.

Dan Fog. *See* FOG, DAN.

D'Angelico, John (*b* New York, 1905; *d* New York, 1 Sept 1964). American guitar maker of Italian descent. He was apprenticed to his great-uncle, Raphael Ciani (who repaired string instruments in New York City), and also began to study violin making and playing. While still in his teens D'Angelico ran the Ciani business after Raphael's death, but in 1932 he started his own shop on Kenmare Street and began building arched-top guitars and mandolins, the guitars at first in the style of the industry-standard Gibson L-5. Soon he began refining his instruments, and jazz players (including Oscar Moore, Chuck Wayne, Johnny Smith and Mundell Lowe) especially were drawn to D'Angelico's big, powerful-sounding guitars. By 1936 D'Angelico was defining his two most famous models, the New Yorker and the Excel, continuing to add distinctive decorative touches and subtle improvements. He moved to nearby premises in 1959, and James (Jimmy) D'Aquisto became an increasingly important and valued collaborator. D'Aquisto continued making guitars in the D'Angelico tradition after the latter's death, until his own death in 1995. A total of 1164 numbered D'Angelico guitars were recorded; they are widely sought by players and collectors alike, and are among the most highly valued arched-top guitars ever produced.

TONY BACON

D'Anglebert, Jean-Baptiste-Henry (bap. 26 March 1662; *d* 1735). French musician, son of JEAN HENRY D'ANGLEBERT.

D'Anglebert, Jean Henry (bap. Bar-le-Duc, 1 April 1629; *d* Paris, 23 April 1691). French composer, harpsichordist and organist. His father, Claude Henry dit Anglebert, was a prosperous master shoemaker at Bar-le-Duc (Meuse). Henry was the name of the family, in which Anglebert was a traditional first name. Nothing is known of his early musical training or how he came to Paris. He is thought to have been a pupil of Chambonnières, and the fact that one of his finest pieces is a *tombeau* for him implies at least friendship and high regard. A keyboard manuscript (private collection of Guy Oldham, London) containing autograph entries by him, Louis Couperin (pieces dated from 1650–59) and probably also Chambonnières, apparently circulated among these composers and shows D'Anglebert to have been closely associated with the leading members of the French harpsichord school in the 1650s. He is first known in Paris from the contract of his marriage (11 October 1659) to Magdelaine Champagne, sister-in-law of the goldsmith and organist François Roberday. In it D'Anglebert is described as *bourgeois de Paris*, indicating that he was by that time well established there.

His first professional appointment appears to have been as organist to the Jacobins in the rue Saint-Honoré, where he was employed when they contracted for a new organ from the builder Étienne Énocq (26 January 1660). He was also among those who provided Roberday with a subject for his *Fugues et Caprices* for organ (Paris, 1660). D'Anglebert's involvement in music at court began about this time. In August 1660 he purchased the charge of *ordinaire de la musique pour le clavecin* to the Duke of Orléans, brother of Louis XIV, in succession to Henry Du Mont, a post he held until at least 1668. His friendship with Lully is attested by Lully's being godfather at the baptism of his eldest son Jean-Baptiste-Henry on 26 March 1662. Later that year D'Anglebert formally entered the king's service by buying (23 October) the reversion of the post of harpsichordist from the disaffected Chambonnières, in an arrangement whereby Chambonnières kept the emoluments but D'Anglebert took over the duties. He was thenceforth entitled *ordinaire de la musique de la chambre du roi pour le clavecin*. On the attainment of his majority at the age of 13, Jean-Baptiste-Henry became in turn his father's reversioner (9 March 1674) and held the post until his death in 1735. After 1679 D'Anglebert was also in the service of the Dauphine Marie-Anne de Bavière, Duchess of Burgundy.

D'Anglebert's principal musical monument is his *Pieces de clavecin* (Paris, 1689; ed. M. Roesgen-Champion, Paris, 1934, and K. Gilbert, Paris, 1975, including all of his other music, to be found in the *F-Pn* manuscript discussed below), which was clearly intended to summarise his life's achievements. It is one of the most handsomely engraved of all early keyboard books, which is probably why so many copies have survived. D'Anglebert may have been helped with the expense of publishing it by the dedicatee, the Princesse de Conti, legitimated daughter of Louis XIV and Mlle de la Vallière. It was for her, a talented harpsichordist who later was also a pupil of François Couperin, that D'Anglebert says he composed most of the harpsichord pieces. These are arranged in four key groups and are of a richness and grandeur that place them among the most magnificent creations of the French harpsichord school. His activities as organist are represented by five fugues in which the same subject is worked in different metres, as it would be in the sections of a ricercare and canzona; and a *Quatuor* on three subjects derived from the Kyrie *Cunctipotens*, to be played with a voice on each of three manuals and one on the pedals. These demonstrate the mastery of expressive

counterpoint that underpins the quality of all D'Anglebert's works.

His activities as court musician and his admiration for Lully are evident in harpsichord arrangements of pieces from Lully's stage works. They are the finest examples of many such arrangements, expanding the repertory of keyboard genres to include the overture and the character piece, and enriching keyboard textures to suggest orchestral sonority. The pieces must have been very familiar to him as continuo player or even participant on stage, as in the *Mascarade de Versailles* in which he appeared along with other musicians (18 January 1668) and whose overture is among those he arranged. The *Pieces* also includes a brief and practical basic tutor for continuo playing, which gives useful indications about the texture, tessitura and decoration of chords.

Two autograph manuscripts contain most of his other known works. One (*F-Pn** Rés.89ter, *c*1675–80) has, in addition to the types of repertory in the *Pieces*, arrangements of lute pieces by Mesangeau, Ennemond and Denis Gaultier, and Germain Pinel. These are the only such arrangements known by one of the leading French harpsichord composers and show D'Anglebert's interest in transferring the very sensitive style of the lute to the harpsichord. The other (autograph, Guy Oldham's private collection) has two pieces written in a form of letter notation designed to gain for the keyboard the clarity of lute tablature in representing complex *brisé* textures.

An important part of D'Anglebert's influence is the extreme care he took to represent performance detail in his notation, including the notation of *préludes non mesurés* (*see* PRÉLUDE NON MESURÉ). The *Pieces* set a new standard in the engraving of keyboard music. Its table of ornaments is the most sophisticated before François Couperin's (1713) and provided a model into the 18th century for French harpsichord composers including Rameau, and also outside France, most notably for J.S. Bach, who made a copy of it around 1710 (*D-F* Mus.Hs.1538) and used it as the basis for his own system of ornament signs.

Daniel [d'Aniels], **Arnaut** (*b* Riberác, ?1150–60; *d* *c*1200). Troubadour. Famed as a master of the difficult style, or *trobar ric*, he brought the poetic style of the troubadours to new heights. His most notable admirers have included Dante, Petrarch, and, much later, Ezra Pound. In canto xxvi of the *Purgatorio*, Dante not only rated Arnaut higher than Giraut de Bornelh (known as the 'maestre del trobadors'), but paid him a supreme compliment by rendering his speech in Old Provençal. What little is known of Arnaut's life has been derived from his *vida*, his *razo* and a few references scattered throughout his poems. The *vida* refers to him as a man of letters who later became a *joglar*, or entertainer. One of Arnaut's poems (PC 29.8) alludes to his presence at the coronation of the 'king of Estampes', probably that of Philippe II Auguste in 1179 or 1180 (see Gouiran). Dante made him a contemporary of Count Raymond Berenger of Provence (1168–81).

Music survives for two of Arnaut's 18 poems, *Chanzon do·l moz* (PC 29.6) and *Lo ferm voler* (PC 29.14), both of which are found only in the manuscript *I-Ma* R. 71. In *Lo ferm voler*, poetry and music reveal subtle order despite apparent chaos (see Switten). The poem's six rhymes recur in an apparently random sequence in each of its six strophes and its *tornada* (final three-line strophe). Likewise, the melody, the same for each strophe, is not made up of repeated sections, but is through-composed. Yet the rhymes follow a precise pattern, and are paired thus in the *tornada*: *ungla–uncle*, *verja–arma*, *chambra–intra*. A similar pairing is found in the final note of each melodic line (G–G, F–F, C–C). Kropfinger has suggested that the static melody and fluctuating rhymes interact to reinforce the key word-pair *chambra–intra*. A further unifying device is the motif C–E–G–A, which opens and concludes the melody. The poetic form of *Lo ferm voler*, referred to by Arnaut as a *chantar* or *canso*, was later imitated by Dante; not until Petrarch did it receive the name by which it has become known – the sestina.

JOHN D. HAINES

Daniel, Francisco (Alberto Clemente) Salvador (*b* Bourges, 17 Feb 1831; *d* Paris, 24 May 1871). French musicologist and composer of Spanish descent. He was a pupil at the Ecole Normale in Bourges and learnt the violin, the piano and theory from his father, Salvador Daniel. He entered the Paris Conservatoire in 1843 and later joined the orchestra of the Théâtre-Lyrique, where he became friendly with Delibes; and played the viola with Gouffé in chamber music concerts. His friendship with Félicien David influenced him to go in 1853 to Algeria, where he became interested in Arab music and collected folktunes from village and countryside; he also made journeys to Tunisia, Morocco, Egypt, Spain and Portugal for this purpose. In Algiers he was the director of a choral society and professor of music at the Ecole Arabe. In 1857 he went to live in Madrid, where he gave violin concerts and, accompanied by Max Marchal, played in the salons of high society. The following year he was a music critic for *La independencia española* under the pen name of Sidi-Mahabul; in 1859 he went to Lisbon.

When Daniel returned to France in 1865 he set about introducing the Arab music he had collected to the European public. In 1867, at the suggestion of Prince Napoleon, he presented a programme of Arab airs which he had arranged for orchestra as one of a series of concerts given in the famous Pompeian house built by the prince on the Champs-Elysées. He also gave lectures on Arab music to the Société des Compositeurs de Musique, of which he was a member, and published several Arab fantasias for piano, a *Messe africaine* (Paris, n.d.) and an *Album de [12] chansons arabes, mauresques et kabyles* (Paris, *c*1865–70).

His political leanings were revealed in his friendship with Vallès and Courbet, his concerts for the people in the Rue St Denis and his contributions to Rochefort's *La marseillaise* and other revolutionary journals. Because of these activities he lost favour with society and the musical establishment and his deteriorating financial situation forced him to resume work as an orchestral violinist. During the Siege of Paris he took part in the rising of 31 October 1870 and was wounded. In January 1871 he bore arms against the regular troops and in May replaced Auber as director of the Conservatoire, for which activities he was shot.

Talented, intelligent and cultured, Salvador, as he was known to his friends, was also passionate and arrogant, considering himself rejected by a society which refused to recognize his talent. He was known above all as a specialist in the history of Arab music; his death prevented the publication of a collection of 400 Arab songs translated into French with piano accompaniment. He also wrote an opera using Arab themes, which, despite the support of Berlioz, was not performed. This and several compositions for violin and piano are lost.

GUY BOURLIGUEUX

Daniel, Jean [Miltou; Mitou] (*b* Poitou, *c*1480–*c*1501; *d* Angers, *c*1550). French composer, organist and poet. He was organist at Notre Dame, Nantes, in 1518. From about 1524 to 1544 he was organist in Angers, first at St Pierre, and later at the cathedral, where he knew Janequin. Signing his poems 'grâce et amour', Daniel wrote music and text for dramatic monologues and texts for some compositions by Pierre Certon. His chansons were printed between 1556 and 1583 in collections by Le Roy & Ballard and Fezandat. Around 1525–30 he wrote both music and text for numerous noëls, but only the texts were published, several of which are in Poitou dialect.

JANE ILLINGWORTH PIERCE

Daniel, John. *See* DANYEL, JOHN.

Daniel, Oliver (*b* De Pere, WI, 24 Nov 1911; *d* Scarsdale, NY, 30 Dec 1990). American administrator and musicologist. He was educated at St Norbert College, West De Pere (1925–9), and afterwards studied piano in Europe and at the New England Conservatory, Boston. He toured

as a concert pianist and taught piano until 1942, when he became music director of the educational division of CBS radio; from 1947 to 1954 he produced and directed various broadcast series, including 'Invitation to Music', '20th-century Concert Hall', and programmes of the New York PO and the Boston SO. Daniel co-founded the Contemporary Music Society with Stokowski. In 1954 he helped set up CRI, where he also served as a director, and from 1954 to 1977 he headed the concert-music division of BMI. He has been on the board of directors of many organizations, including the American SO (1962–72), the American Music Center (1966–78), the Society for Asian Music (1967–9), the Charles Ives Society (1973-83), and the American Composers Orchestra (honorary chairman, 1977–), and from 1958 was active in the affairs of the International Music Council of UNESCO. In 1956 he received the Laurel Leaf award of the ACA.

An ardent and effective advocate of American composers, Daniel spurred the efforts to edit and perform Ives's Symphony no.4 that led to its première in 1965. Also active as a journalist, he contributed a regular column to *Saturday Review* (1957–68); other writings appeared in *The New Grove*, *The Etude*, *Musical America*, and *Stereo Review*. He edited several collections of early American music by such composers as Billings, Belcher and Hopkinson, and wrote the biography *Leopold Stokowski: a Counterpoint of View* (New York, 1982).

CARL SKOGGARD

Daniel, Paul (*b* Birmingham, 1 July 1958). English conductor. He was a chorister at Coventry Cathedral before gaining a music scholarship to King's College, Cambridge; he then studied conducting at London's GSM, continuing with Franco Ferrara in Italy and in London with Sir Adrian Boult and Edward Downes. He was associated with David Freeman's Opera Factory in London from its inception in 1981, and from 1987 to 1990 was music director, conducting works ranging from Cavalli to Birtwistle, Ligeti and Maxwell Davies. At the same time he pursued a concert career with major orchestras at home and abroad, and made his American début with the London Sinfonietta at Pepsico Summerfare in 1988. From 1990 to 1996 he was musical director of Opera North, for which he conducted *Ariane et Barbe-bleue* (Dukas) and the first British stage productions of *Der ferne Klang* (Schreker) and Verdi's *Jérusalem*. He was appointed music director of the ENO in 1997, having previously conducted for the company the British premières of *Akhnaten* (Glass), *Le Grand Macabre* (Ligeti), *The Stone Guest* (Dargomïzhsky) and *Lear* (Reimann), as well as sharing (with Elgar Howarth) the world première of *The Mask of Orpheus* (Birtwistle). In 2000 he conducted the première of Turnage's *The Silver Tassie*. Daniel's performances in an adventurously wide repertory are distinguished by discerning musicianship and exciting theatrical flair. He is married to the soprano Joan Rodgers. His recordings include Michael Berkeley's *Baa Baa Black Sheep* and orchestral works by Birtwistle.

JOHN STEVENS

Daniel, Salvador [Salvador-Daniel, Don] (*b* Hostalrich, Gerona, 1 April 1787; *d* ?Paris, *c*1850). Spanish pianist, organist, teacher, writer on music and composer. A captain in the forces of the liberal party (not the Carlist, as has been thought), he fled Spain and took refuge in France after the absolutist reaction of 1823. He settled in Bourges and, making use of the musical knowledge he had acquired while training for the priesthood, became a piano teacher, organist of the cathedral of St Etienne and a teacher of solfège and harmony at the town's Collège Royal and Ecole Normale. He was still in Bourges in 1847, but apparently settled later in Paris. An excellent violinist and pianist, he also made a serious study of music theory. He supported the GALIN–PARIS–CHEVÉ METHOD, a simplified method of teaching music which gained popularity and created controversy in Paris in the mid-19th century, and put forward a new application of it in his writings. He composed a mass for three voices, which was published in the second volume of *Grammaire philharmonique*.

WRITINGS

Grammaire philharmonique, ou Cours complet de musique contenant la théorie et la pratique de la mélodie, les règles de la transposition ainsi que de l'écriture à la dictée ou d'après l'inspiration, la théorie et pratique du plain-chant et la théorie et pratique de l'harmonie (Bourges, 1836–7)

GUY BOURLIGUEUX

Danieli, Irlando (*b* Lanzo d'Intelvi, Como, 4 Nov 1944). Italian composer. He studied classics and, concurrently at Milan Conservatory, composition with Donatoni (graduating in 1970), choral music and choir direction. He began to teach composition at the conservatory in Milan in 1976. His awards include the Prix de Monaco (1973), the Gaudeamus Prize (1976), the Guido d'Arezzo international choral composition prize (1977) and the Stockhausen Prize (1978). Danieli has remained somewhat apart from the main contemporary scene in Italy. Nevertheless, firmly rooted in the European tradition, he has developed a personal language, at once advanced and rigorous, which is especially characterized by a musical fabric built from richly expressive melodic lines. His output is diverse and reveals a particular interest in vocal music and music for children. He has been involved in the preparation of editions of other composers' work, including that of Nono and Togni.

WORKS
(*selective list*)

STAGE

Ops: Breus (young people's op, G. Pascoli and Danieli, after V. Hugo), 1961, rev. 1992; L'ansia di Ulisse (Danieli), 1972; Il

viandante atomico (M. Bor), 1974; Viaggio di un bambino attraverso i suoi sogni (Danieli, G. Raboni, F. Bass, texts by children), 1989; Ghiolmo l'Olmo, o la giornata di un albero (young people's op, Danieli, B. Brecht, Raboni and others), 1991, Bergamo, 1997; Cantico dei cantici (Scriptures, G. Ceronetti and others), 1994, Milan, Rosetum, 1995; Monologo di Galileo nel suo LXXVI anno (G. Galilei and Danieli), 1996

Other stage: Around Scorpio (ballet, Danieli), 1995, Milan, Ghislanzoni, 1996; La grande opera, pictures from 'L'alchemista' (music theatre, P. Coelho), actress, 5 perc, 1997; incid music

VOCAL

Vocal-orch: O Môrt, (vieux) capitaine (C. Baudelaire), vv, bn, 2 orch, live elecs, 1975; Nè mai tu potrai morire, ora sei pensiero (Danieli), chorus, brass, 1980; Splendor: canto dell'aurora (S. Ambrogio), Bar, SATB, orch, 1997

Choral: Veris Carmen (Virgil), SATB, 1963, rev. 1991: Interrotte speranze (Petrarch), female chorus, 1973; Pierres milliaires et feux follets (E. Verhaeren), 1v, large chorus, insts, 1975; Donna de paradiso (J. da Todi), female chorus, 1975, rev. 1990, arr. 1v, insts; Casida del llanto (F. García Lorca), female chorus, 1977; 3 frammenti dall'Apocalisse (S. Giovanni), male chorus, 1983, arr. 2 choruses; Ploratus Musae (Déploration de Josquin) (J. Molinet), female chorus, 1986; Missa aquae fractae, male chorus, perc, tape, 1988, arr. mixed chorus, org, 1989; 3 canti di bambini (Danieli), children's chorus, 1991; Laudes Mariae: Mystère (Scriptures, C. Bettinelli, Petrarch, Dante), spkr, 5 vv, 5 choruses, tubular bells, org, 1993

OLGA CALIGARI

Danielis, Daniel (*b* Visé, nr Liège, bap. 1 May 1635; *d* Vannes, 17 Sept 1696). Flemish composer, organist and singer. He became organist at the cathedral of St Lambert, Liège, at the age of 22, leaving that post in spring 1658 to go to Spa, where he met Duke Gustav Adolf of Mecklenburg-Güstrow. On 20 June the duke engaged him as a bass singer, and Danielis settled in the north German duchy. He became Kapellmeister in February 1661. After several periods away from Duke Gustav Adolf's court, he finally left it on 26 March 1681 and is next heard of in France on the occasion of the famous competition for posts at the Chapelle Royale held in 1683, in which he was unsuccessful. On 14 January 1684 he was appointed *maître de musique* at the cathedral of St Pierre, Vannes, and remained there until his death.

Danielis's extant works are chiefly *petits motets*. His other works, now lost, included larger-scale sacred pieces (masses, vespers settings and a *Te Deum*) and works for the theatre. Apart from six motets in the Düben collection in Uppsala, hardly anything remains from his Dutch and German periods. None of his works was published during his lifetime, but the number of extant copies of some motets (e.g. *Ad arma* and *Venite et videte*) shows that he was highly thought of in his day. Copyists have sometimes confused him with other composers, both French (J.-F. Lochon and François Couperin (ii)) and Italian (Carisio, Lorenzani and Carissimi). His origins and professional career led Danielis to write in an italianate style, somewhere between Du Mont's and Couperin's.

CATHERINE CESSAC

Daniel-Lesur [Lesur, Daniel Jean Yves] (*b* Paris, 19 Nov 1908). French composer and teacher. His mother, Alice Thiboust, was a composer and pupil of Tournemire, with whom Daniel-Lesur had early organ and composition lessons. He studied at the Paris Conservatoire (1919–29) with Jean Gallon for harmony and Caussade for counterpoint and fugue, also taking piano lessons from Armand Ferté. In 1935 he was appointed professor of counterpoint at the Schola Cantorum, where he remained until 1964, serving also as director for the last seven years of his tenure. His pupils there included Ohana. In 1936 Daniel-Lesur was, with Messiaen, Jolivet and Baudrier, a founder-member of the group La Jeune France, dedicated to a 'return to the human' and opposed to the neo-classicism then prevailing in Paris. He was organist of the Benedictine Abbey of Paris (1937–44), and in 1939 he began a long and varied association with French radio. The administrative posts he has held in later years have included those of Inspecteur Principal de la Musique (1969–73), Administrateur de la Réunion des Théâtres Lyriques Nationaux (1971–3) and Inspecteur Général de la Musique (from 1973).

Daniel-Lesur's music stands apart from that of his more famed contemporaries in La Jeune France, being more conventional in texture, rhythmically more regular, and more directly diatonic. Its modal shading probably comes

less from his colleagues' influence than from his respect for Tournemire and his interest in folk music. Of this he has made numerous arrangements, besides using folktunes occasionally in original compositions in a manner that suggests a closeness to d'Indy. However, in its strength and warm dignity, his music has more in common with that of Dukas. A list of forebears would also have to include Berlioz, whose influence is evident in the opera *Andrea del Sarto*, and not just in the choice of a story taken from the romanticized life of an artist of the Italian high Renaissance. The project was particularly important to Daniel-Lesur: he wrote incidental music for Musset's drama in 1947, drawing on this for the symphonic poem of 1949; the opera followed in the 1960s. It shows a Berliozian desire to establish sudden psychological insights by means of orchestral coups, but its more permanent qualities of richly veiled mystery suggest a successor to Dukas' *Ariane*.

WORKS
(*selective list*)

Stage (incid music unless otherwise stated): L'étoile de Séville (A. Ollivier, after Lope de Vega), 1941, Lyons, 1941; Le destin d'Orphée (P. Barbier, after Sophocles), 1945; Anne et le dragon (R. Caillava), 1945; Le fourbe de Séville (T. de Molina), 1946; Prométhée enchaîné (Aeschylus), 1946; Athalie (J. Racine), 1947; Andrea del Sarto (A. de Musset), 1947; Saint-Amour (P. Barbier), 1948; Le bal du destin (ballet), 1954; Andrea del Sarto (op, 2, Daniel-Lesur, after A. de Musset), 1961–8, Marseilles, 24 Jan 1969

Orch: Suite française, 1935, also for pf; Passacaille, pf, orch, 1937; Pastorale, cbr orch, 1938; Ricercare, 1939; Variations, pf, str, 1943; Andrea del Sarto, sym. poem, 1949; Ouverture pour un festival, 1951; Conc. da camera, pf, chbr orch, 1953; Serenade, str, 1954; Symphonie de danses, 1958; Sym. D'ombre et de lumière', 1974; Nocturne, ob, orch, 1974; Fantasie concertante, vc, orch, 1992

PAUL GRIFFITHS/R

Daniélou, Alain (*b* Neuilly-sur-Seine, 4 Oct 1907; *d* Lausanne, 27 Jan 1994). French musicologist and orientalist. After gaining his baccalauréat in Paris (1925) he spent a year at St John's College, Annapolis, Maryland (1926–7), and on his return to Paris studied the piano, classical dancing (N. Legat and Nizhinska), singing (Charles Panzéra) and composition (Max d'Ollone). After involving himself in Parisian artistic life with recitals and exhibitions of his paintings, he left in 1932 for the East: he travelled in North Africa, the Middle East, India, Indonesia, China and Japan, and finally settled in Benares in India, where he studied Sanskrit, philosophy and music in the traditional schools (1935–50). In 1949 he was appointed research professor at the Hindu University of Benares, and associate director of the School of Indian Music. He left Benares to become director of the library of manuscripts and Sanskrit publications of Adyar in Madras (1954), and in 1956 became a member of the Institut Français d'Indologie in Pondicherry. He was appointed a member of the Ecole Française d'Extrême-Orient in Paris (1959), adviser to the International Music Council of UNESCO (1960) and director of the International Institute for Comparative Music Studies (1963) which he established in Berlin and Venice.

Daniélou's experience with the musical languages of both East and West gave him a unique approach to musicology, in which he attempted to relate philosophical and emotional concepts with precise mathematical calculations of scalar intervals. In his *Traité de musicologie comparée* he took this approach even further by trying to prove the ancient Chinese theory that universal order depends on the precise tuning of intervals. His work provoked criticism, in particular for misquoting the ancient texts on which he based much of his information. Daniélou also published on various aspects of Indian civilization, such as Hindu philosophy and sculpture. As music adviser he edited collections of discs of Asian and African music for the series UNESCO Anthology of the Orient.

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

Danielpour, Richard (*b* New York, 28 Jan 1956). American composer. He studied at Oberlin College and the New England Conservatory (BM 1980), where his teachers included John Heiss. He went on to study with Persichetti and Mennin, among others, at the Juilliard School of Music (MM 1982, DMA 1986). He also studied conducting with Benjamin Zander and the piano with Theodore Lettvin, Lorin Hollander, Veronica Jochum and Gabriel Chodos. In 1981 Danielpour performed the première of his Piano Concerto with the Caracas PO. Among his numerous honours are the Columbia University Bearn's Prize (1982), the American Academy and Institute of Arts and Letters' Charles Ives Fellowship (1983) and residencies at the MacDowell Colony and Yaddo. In 1989 Bernstein invited him to serve as guest composer at the Accademia di S Cecilia, Rome and the Schleswig-Holstein Festival. He has also served as composer-in-residence with the Seattle SO (1991–2), the University of Southern California (1992), the Santa Fe Chamber Music Festival (1994) and the Pacific Symphony (from 1998). His teaching appointments include positions at the Manhattan School of Music (from 1993) and the Curtis Institute of Music (from 1997).

Like many American composers of his generation, Danielpour has largely divorced himself from serial techniques, which were important to early works such as the First String Quartet (1983). With *First Light* (1988), he found a new, distinctly American voice. He is best known for his orchestral and chamber music, including vocal works in both genres. Although he is often described as a neo-romantic, his musical language is broadly based and widely varied. Acknowledging the Beatles as an early influence, his style draws freely from pop, rock and jazz rhythms; he cites the music of John Adams, Christopher Rouse and Joseph Schwantner, particularly in his use of percussion, as later influences. In his vocal works, which display pristine idiomatic writing, he has collaborated increasingly with living poets. Many of his instrumental works are given evocative titles that refer to extra-musical sources. The two books of *Sonnets to Orpheus* (1991, 1994) balance surface clarity with complex formal structures. The Cello Concerto (1994), *Anima mundi* (1995) and the Concerto for Orchestra (1996) combine the simplicity of the *Sonnets* with involved textures characteristic of earlier works, and feature an increased attention to colouristic variety.

WORKS
(*selective list*)

Stage: Anima mundi (ballet), 1995, Seattle, 4 April 1996; Urban Dances (ballet), 1997, New York, 4 June 1997

Orch: Pf Conc., 1981, withdrawn; Sym. no.1 'Dona nobis pacem', 1985; Sym. no.2 'Visions' (D. Thomas: *Vision and Prayer*), S, T, orch, 1986; First Light, chbr orch, 1988 [arr. orch, 1989]; The Awakened Heart, 1990; Metamorphosis (Pf Conc. no.1), 1990; Sym. no.3 'Journey Without Distance' (H. Schucman: *A Course in Miracles*), S, chbr chorus, orch, 1990; Song of Remembrance, 1991; Toward the Splendid City, 1992; Pf Conc. no.2, 1993; Vc Conc., 1994; Conc. for Orch 'Zoroastrian Riddles', 1996; Celestial Night, 1997

Vocal: Prologue and Prayer (Bible: *Gospel of St John. Paul's Letter to the Ephesians*), SATB, str, 1982, rev. 1988; Sonnets to Orpheus I (R.M. Rilke, trans. S. Mitchell), S, chbr ens, 1991; Songs of the Night (Rilke, trans. Mitchell), T, pf trio, 1993; Sonnets to Orpheus II (Rilke, trans. Mitchell), Bar, chbr ens, 1994; Canticle of Peace (Bible), Bar, SATB, str, brass, perc, 1995; Sweet Talk (T. Morrison), Mez, vc, db, pf, 1996; Elegies, S, T, orch, 1997; Spirits in the Well (Morrison), S, pf, 1998; see also ORCH, CHBR

LAURIE SHULMAN

Daniels, Barbara (*b* Newark, OH, 7 May 1946). American soprano. After studying at Cincinnati College-Conservatory, she made her début in 1973 with West Palm Beach Opera as Mozart's Susanna. In 1974 she was engaged at Innsbruck, where her roles included Fiordiligi and Violetta; at Kassel (1976–8) she added Liù, Massenet's Manon and Zdenka to her repertory and took part in Walter Steffens's *Unter dem Milchwald*. At Cologne (1978–82) she sang roles such as Martha, Micaëla, Musetta and Alice Ford. She made her Covent Garden début (1978) as Rosalinde in *Die Fledermaus*, her San Francisco début (1980) as Zdenka and her Metropolitan début (1983) as Musetta. Her repertory, which had earlier included Adèle (*Le comte Ory*), Handel's Agrippina, Mimì, Butterfly, Mařenka and Gounod's Marguerite, began to change as her lyric soprano became more powerful and dramatic. In 1991 she sang Minnie, which has developed into her finest role, at the Metropolitan and she has also taken on such parts as the Marschallin, Puccini's Manon and Tosca. Her recordings include Musetta under Bernstein and Minnie in *La fanciulla del West* under Slatkin.

ELIZABETH FORBES

Daniels, David (*b* Spartanburg, SC, 12 March 1966). American countertenor. He began studying as a tenor with George Shirley at the University of Michigan Music School before re-studying as a countertenor. He sang Nero (*L'incoronazione di Poppea*) at Glimmerglass for his stage début in 1994, repeating the role at the Staatsoper in Munich in 1997. He returned to Glimmerglass in 1995 as Tamerlano and in 1998 as Arsace (*Partenope*). His London début was at the ENO as Britten's Oberon in 1996, after which he appeared with the Royal Opera at the Barbican as Sextus (*Giulio Cesare*) in 1997. The same year he appeared at the New York City Opera as Arsamene (*Serse*). His first appearance at Glyndebourne was as an admirably expressive Didimus (*Theodora*) in 1996, the year of his Salzburg Festival début as Hamor (*Jephtha*). Daniels also sings frequently in oratorio, most notably in Handel, and won plaudits for his David in *Saul* at the 1999 Edinburgh Festival. His rich yet flexible voice, used with a vivid dramatic sense, has more strength and vibrancy than that of most countertenors, as can be heard on a disc of Handel arias with Norrington and on a video of *Theodora* from Glyndebourne.

ALAN BLYTH

Daniels, Joe [Joseph] (*b* Zeerust, South Africa, 9 March 1909; *d* Northwood, 2 July 1993). South African jazz drummer and bandleader, active in Britain. He arrived in England aged two, and began playing drums in public at 13. Three years later he played on numerous transatlantic crossings in ships' bands for Cunard liners, before returning to London to play with the trumpeter Max Goldberg (1926). Daniels assumed leadership of that band, but Goldberg continued to play regularly for him (1926–7) and in Daniels's later groups. Daniels played in bands led by Al Tabor (1927), Billy Mason (1929) and Harry Roy (1929–32, 1932–7). While in Roy's band, Daniels formed a recording band, his Hotshots, in June 1935. He led this band full time from 1937, and became recognized as the leading drum virtuoso in British jazz, exemplified by recordings such as *Crashing Through* (1939) and *Drum Boogie* (1941). His stage shows involved elaborate routines in which he juggled illuminated sticks while playing technically demanding solos.

During World War II Daniels led an RAF band, but continued to record commercially with the Hotshots, which re-formed full time in 1945. He later changed his band's name to the Joe Daniels Jazz Group, employing several significant British musicians including the trumpeter Kenny Baker, the trombonist Don Lusher and clarinettist Dave Shepherd. He ceased to record in the 1950s, but led a big band most years until 1974 for Butlin's holiday camps, playing only sporadically thereafter.

ALYN SHIPTON

Daniels, Mabel Wheeler (*b* Swampscott, MA, 27 Nov 1877; *d* Cambridge, MA, 10 March 1971). American composer. She studied at Radcliffe College (BA 1900) and sang in the Glee Club, for which she wrote several operettas. She studied orchestration with Chadwick at the New England Conservatory and in 1902 became the first woman in Thuille's score-reading class at the Munich Conservatory. From 1911 to 1913 she directed the Radcliffe Glee Club and the Bradford Academy music programme and was head of music at Simmons College, Boston (1913–18). Thereafter, with support from family money, she devoted herself to composition. After conducting her choral work *The Desolate City* at the MacDowell Colony, she returned there as a fellow for 24 summers, beginning in 1914.

Daniels's musical language encompasses non-functional triadic harmony with occasional diatonic dissonance; the melodic lines are sometimes angular, due partly to modal shifts and unpredictable triads. Her compositions show the influence of vernacular music and music of the popular theatre as well as sharing elements with the work of Debussy and Lili Boulanger. *Deep Forest*, her first significant orchestral composition, published in 1932, is linked stylistically with Debussy's *Prélude à 'L'Après-midi d'un faune'* in its sparse orchestration, and in its use of timbre, whole-tone melody, augmented chords and tremolo strings. The work also marked a shift in her focus from the Germanic musical tradition to French Impressionism. She preferred writing for voices, and choral pieces are among her best-known works. She did not call herself a feminist or 'woman composer', yet she worked for women's suffrage and acknowledged discrimination against women musicians. A collection of her papers, scores and press cuttings is in the Schlesinger Library, Radcliffe College.

WORKS
(*selective list*)

Stage: A Copper Complication (operetta, R.L. Hooper) (1900); The Court of Hearts (comic op, Hooper) (1900); Alice in Wonderland Continued (operetta), 1902; The Legend of Marietta (operetta, 1), 1909; Digressions, ballet, op.41/2, str, 1947; addl nos. for musical plays The Show Girl (R.A. Barnet and D.K. Stevens) (1902) and Baron Humbug (Barnet) (1903)

Orch: Deep Forest, op.34/1, ww qnt, tpt, perc, str (1932), arr. large orch (1933); Pastoral Ode, op.40, fl, str (1940)

J. MICHELE EDWARDS

Danilevich, Lev Vasil'yevich (*b* Shuya, Vladimir province, 12/25 June 1912; *d* Moscow, 1 Sept 1980). Soviet musicologist and teacher. After graduating from the Moscow Conservatory in 1936, he continued his studies as a postgraduate and took the *Kandidat* degree in 1939 with a dissertation on Tchaikovsky's symphonies. While teaching music history at the Moscow Institute for Military Conductors (1944–57) he was also a senior lecturer at the Moscow Conservatory (1949–57). From 1945 to 1953 he was deputy director of the music department of All Union Radio, and from 1954 he was chairman of the committee of music critics at the Union of Composers of the USSR. Danilevich's principal research interests were in 19th- and 20th-century Russian music. He wrote books and articles on Tchaikovsky and Rimsky-Korsakov and published numerous studies of Soviet composers, notably Kabalevsky and Shostakovich. A number of his works reflect the ideology of his time.

IGOR BĚLZA/LYUDMILLA ZINOV'EVNA KORABEL'NIKOVA

Danilewicz-Czeczot, Witold. *See* CZECZOTT, WITOLD.

Danilin, Nikolay Mikhaylovich (*b* Moscow, 21 Nov/3 Dec 1878; *d* Moscow, 6 Feb 1945). Russian choral conductor and teacher. He attended the Moscow Synodal School under Stepan Smolensky, Aleksandr Kastal'sky and Vasily Orlov, and later studied the piano with Koreshchenko at the Philharmonic Academy, Moscow. While teaching solfège and sight-reading at the Synodal School (1897–1918), he became assistant conductor of its choir in 1904 and was principal conductor from 1910 to 1918. By improving its standard, and widening its repertory beyond the conventional limits of church music, he played an outstanding part in the development of Russian choral singing. He toured with the choir in Austria, France, Germany and Italy from 1911 to 1913. Under his direction it was renowned for an emotional and colourful vocal tone, and a strong but restrained vigour that incorporated the best national choral traditions. After the establishment of the USSR, Danilin was successively conductor of the Bol'shoy Theatre Choir, Moscow (1919–23), the Leningrad Academic Choir (1936–7) and the USSR State Choir (1937–9). He taught at the People's Choral Academy, Moscow, from 1918 to 1923 and was professor of choral conducting at the Moscow Conservatory from 1923 to 1945. He trained many leading choral conductors in the USSR.

I.M. YAMPOL'SKY

Danilov, Kirsha (*fl c*1760–90). Russian folksong collector. All that is known of him is that his name, perhaps a pseudonym, is associated with one of the most valuable 18th-century folklore collections. There is evidence that he began fieldwork in one of the south-western regions of Siberia during the 1760s, for in 1768 P.A. Demidov, a wealthy writer who possibly commissioned the collection, sent one of the song texts, 'obtained from the Siberian people', to the historian G.F. Miller; however, the manuscript of 70 songs (now in *RUS-SPsc*) was probably not completed until the 1780s. For many years Demidov owned the collection, but in 1802 or 1803 it was passed to F.P. Klyucharyov, director of the Moscow postal service, who in 1804 arranged for the publication of 26 of the song texts without music; a second edition (1818), containing 61 songs with music, was prepared on the instructions of N.P. Rumyantsev, who had acquired the manuscript in 1816.

Danilov's was the earliest important collection of Russian *bïlinï* (epic songs) and historical songs, and provides a wealth of source material on folk tales. Many Russian writers, including Pushkin and Tolstoy, possessed copies, and Rimsky-Korsakov used one of the songs, *Vïsota li, vïsota podnebesnaya*, in the finale to the fourth scene of his opera *Sadko*. All the folktunes, some of which accompany more than one text, are unharmonized and written above the comfortable range of the human voice; this suggests that the collection was intended not for amateur performance, like those of Trutovsky and Pratsch, but for more scholarly study. In 1894 the manuscript was discovered in the library of Prince Mikhail Rostislavovich Dolgorukov, and an authoritative edition by P.N. Sheffer appeared in 1901; a transcription and exhaustive study was published in 1958.

GEOFFREY NORRIS

Danish Musicological Society. *See* DANSK SELSKAB FOR MUSIKFORSKNING.

Dan'kevych, Kostyantyn Fedorovych (*b* Odessa, 11/24 Dec 1905; *d* Kiev, 26 Feb 1984). Ukrainian composer and conductor. After graduating from the Odessa Institute of Music and Drama in 1929, he joined its faculty; he was later a professor and director there (1948–51), before he was invited to teach at the Kiev Conservatory. From 1956 to 1967 he was head of the Composers' Union of Ukraine and in 1978 he received the Shevchenko Prize. Although he wrote symphonies, symphonic poems, chamber music, songs and film scores, his fame rests primarily on his operas. His musical style grew out of the national school established by Lysenko. By the time he reached maturity as composer in the mid-1930s his style fell into step with the new dogma of socialist realism. His First Symphony (composed in 1937 and dedicated to the 20th anniversary of the October revolution) is an excellent example of this style, as is the more interesting and at the time highly successful ballet, *Lileya* ('Lily') of 1939. His magnum opus, the opera *Bohdan Khmel'nyts'ky* (1951, revised in 1953 and 1977) about the wars of liberation of the Ukrainian people against the Poles in the 17th century, achieved international recognition in its second version. The difficulties encountered in the staging of *Bohdan Khmel'nyts'ky* demonstrated that the end of World War II did not bring about the hoped-for lessening of political pressures. After the opera's première in Kiev in 1951 it was heavily criticized for being formalistic and too nationalistic (in part for not stressing the 'eternal friendship between Russian and Ukrainian Peoples', as required by Socialist realism) and Dan'kevych produced a revised version which was staged in 1953, this time to total approval. Musically and dramatically, the work is modelled on Lysenko's *Taras Bul'ba*, a Ukrainian classic. The style of the opera, as with most of Dan'kevych's music, can be described as eclectic, heavily based on 19th-century Russian models – especially Musorgsky – with touches of contemporary colour and rhythmic drive. It is in substance, not unlike the music of Aram Khachaturian.

WORKS
(*selective list*)

Ops: Trahediyna nich [Tragic Night] (V. Ivanovych and Dan'kevych, after O. Bezymens'ky), 1935; Bohdan Khmel'nyts'ky (4, 6 scenes, V. Vasylevska, after O. Korniychuk), 1948–51, Kiev, 29 Jan 1951, rev. 1953, rev. 1977; Nazar Stodola (3, 4 scenes, L. Predslavych, after T. Shevchenko), 1960, Kharkiv, 28 May 1960
Orch: Sym. no.1, 1937; Otello, sym. poem, 1938; Lileya [Lilly], ballet suite, 1939; Taras Shevchenko, sym. poem, 1939; Sym. no.2, 1945; 1917, sym. poem, 1955
Vocal: Zhovten' (Oktyabr') [October] (orat), Mez, Bar, chorus, orch, 1957; Poem of the Ukraine, chorus, 1960; Zorya komunizmn nad namyziyshla [The Dawn of Communism has Risen over us] (cant., Dan'kevych), 1961
Film scores, incid music

VIRKO BALEY

Dan'ko, Larisa Georgiyevna (*b* Krasnodar, 27 Sept 1931). Russian musicologist. She studied under Druskin at the Leningrad Conservatory (advanced diploma 1955), and took a postgraduate course with Gozenpud at the Institute of Theatre, Music and Cinematography (1957–60). She was a lecturer at the College of Musical Education (1955–65) and in the department of the history of Western and Russian Music of the Academy of Culture (1966–76). In 1976 she was chosen to head the newly created department of music criticism at the Leningrad Conservatory; in 1996 she also became head of the musicological faculty there.

Among Dan'ko's many areas of research is music theatre, a theme reflected in her *Kandidat* dissertation (on Prokofiev's *Betrothal in a Monastery*, 1964) and her doctoral dissertation (on 20th-century comic opera, 1984), as well as in numerous books and articles. A leading figure in the musical life of St Petersburg, Dan'ko displays a lively interest in contemporary composers. She has guided the publication of academic collections and archive material and organized a number of musicological conferences.

ERA BARUTCHEVA

Dankowski [Danek], **Adalbert (Wojciech)** (*b* ?Wielkopolska district, *c*1760; *d* after 1810). Polish composer and violinist. He was at first attached to the Cistercian monastery at Obra, where he is thought to have studied; about 1779 he was a monastery musician. From 1787 to 1790 he was conductor and composer at Gniezno Cathedral. Elsner stated that around 1792 he was a viola player at the German theatre in Lemberg. His compositions were known in almost all the major Polish musical centres at that time, in the Wielkopolska district, Wilno, Krzemieniec and the Kraków region.

Dankowski's instrumental pieces are in the early Classical style; his vocal works (exclusively to religious texts) show a marked influence of the Neapolitan school. His music, mostly homophonic, is characterized by Polish dance elements, and he sometimes made use of traditional instruments. His extant works include two symphonies, in D (ed. J. Krenz, Kraków, 1951), and E♭ (ed. D. Idaszak, *Muzyka staropolska*, Kraków, 1966); 39 masses, 3 requiems, 27 vespers, 7 litanies, 37 motets, a *Salve regina* (T. Maciejewski, ed., requiem in E♭, litany in E♭, *Salve regina* in E♭, Warsaw, 1993; mass in e, Warsaw, 1994) and other sacred compositions in numerous libraries (notably *SK-KRE*, *D-Mbs*, *LT-V*, *PL-CZ*, *GNd*, *GR*, *OB*, Pilzno, *Pa*, *SA*, Staniątki, *SZ*, *Wtm* and *WL*).

DANUTA IDASZAK

Dankworth, John [Johnny] **(Philip William)** (*b* London, 20 Sept 1927). English jazz alto saxophonist, composer, arranger and bandleader. He began his career playing the clarinet in a novelty traditional-style band. After studying at the Royal Academy of Music (1944–6), he performed on transatlantic liners in order to travel to America and hear jazz first hand. By this time he was playing the alto saxphone (he was at first strongly influenced by Charlie Parker), and he quickly became a leading figure in postwar British jazz. He was a founding member in 1948 of the Club Eleven and in 1950 he formed the Johnny Dankworth Seven. From 1953 to 1964 he led his first large jazz orchestra in which his wife, Cleo Laine, was the featured singer. He became her music director in 1971 and has continued to tour in the 1980s and 90s.

Dankworth's many works include several large-scale suites, film scores, an opera-ballet and a number of classical pieces, notably a third stream work with the composer Mátyás Seiber. His early big band arrangements, such as *Experiments with Mice* and *Take the 'A' Train* (both 1956, Parl.), were refreshing in their originality and his later work, which has always reflected current musical trends, frequently achieves a sense of profundity without becoming ostentatious. In 1969, with Laine, Dankworth founded the Wavedon Allmusic Plan, a cultural organization based at his home in Buckinghamshire. International artists from every musical sphere perform regularly in its 300-seat concert hall, and Dankworth also makes presentations to schools and holds various jazz courses, workshops and masterclasses under its auspices. He was made a CBE in 1974. His son is the jazz double bassist Alec Dankworth.

WORKS
(*selective list*)

Stage: Lysistrata (op-ballet), 1964
Film scores: The Criminal, 1960; Saturday Night and Sunday Morning, 1960; The Servant, 1964; Darling, 1965; Modesty Blaise, 1966; Return from the Ashes, 1967; The Last Grenade, 1969; 10 Rillington Place, 1970; Fairoak Fusions, 1982; Octavius, 1983; Innovations, 1987; Generation Big Band, 1994
Suites (all for jazz orch): What the Dickens!, 1963; $1,000,000 Collection, 1967; Lifeline, 1973
Other works: Improvisations, sym. insts, jazz orch, 1959 [collab. M. Seiber]; Escapade, 1967; Tom Sawyer's Saturday, 1967; Str Qt, 1971; Pf Conc., 1972

CHARLES FOX/DIGBY FAIRWEATHER

Danmark. (Dan.). *See* DENMARK.

Dannemann (Rothstein), Manuel (*b* Santiago, 16 May 1932). Chilean ethnomusicologist and folklorist. At the University of Chile he studied philosophy, specializing in Romance languages and Spanish education (1958–65); he also studied ethnomusicology and folklore privately with Carlos Lavín. He has held positions as professor of folklore at the Catholic University (1957–74), professor of ethnology and folklore at the University of Chile (appointed 1971), professor of ethnomusicology at the latter institution (appointed 1963), chairman of the art department of the Catholic University (1972–4) and president of the Research Committee of the University of Chile, northern campus (appointed 1974). In 1973 he visited the University of California at Los Angeles and Berkeley as a fellow of the University of Chile.

Dannemann has lectured widely in Latin America and the USA, and participated in numerous international conventions and congresses. In his research he has concentrated on the study of Chilean folklore and folk music, devoting many years to field work; his extensive publications reveal a systematic and comprehensive approach to the subject.

GERARD BÉHAGUE

Danner, Christian (Franz) (bap. Schwetzingen, 12 July 1757; *d* Rastatt, 29 April 1813). German violinist and composer, son of Johann Georg Danner. A pupil of his godfather Christian Cannabich, he is listed as a supernumerary violinist in the Mannheim court orchestra in 1770–72 and as a violinist in 1773–8. By 1776 he was receiving a salary of 300 gulden, which rose to 450 in 1778. His great ability on the violin is confirmed by Mozart, who taught him composition in Mannheim (as recorded in a letter from Mozart's mother, 14 December 1777). He accompanied the court when it moved to Munich in 1778, and there gave violin instruction to his most famous pupil, J.F. Eck. In 1785 he became Konzertmeister in Zweibrücken, and three years later took over the same position at Karlsruhe. From 1803 he held the title of musical director to the Grand Duchy of Baden. His only known work is a violin concerto composed in Munich in 1785 and published about two years later by Sieber in Paris and Amon in Heilbronn.

ROLAND WÜRTZ/EUGENE K. WOLF

Danner, Johann Georg (bap. Mainz, 11 Nov 1722; *d* Karlsruhe, 28 March 1803). German violinist and oboist, possibly of Alsatian descent, father of Christian Danner (a Danner is recorded as organist in Strasbourg in 1733). From 1743 he held the position of *Kammermusicus* at Zweibrücken, but at the 'reform' of the court music, on 9 February 1755, he was dismissed. He found employment in 1756 at Mannheim as a violinist, from 1764 also as music master to the children of the court. Account lists from 1759 and 1776–8 give his salary as 400 gulden. He remained at Mannheim until 1778, after which he went to Munich when the court moved there that year. After 1802 he lived in retirement in Karlsruhe with his son, the violinist Christian Danner.

For bibliography *see* DANNER, CHRISTIAN.

ROLAND WÜRTZ/EUGENE K. WOLF

Dannreuther, Edward (George) (*b* Strasbourg, 4 Nov 1844; *d* London, 12 Feb 1905). English pianist, writer and teacher of German origin. In 1846 his family moved to Cincinnati, where, within the city's substantial German community, his father established a piano factory. He took lessons from Frederick L. Ritter and in 1860 he entered the Leipzig Conservatory, where he studied the piano with Moscheles, counterpoint and theory with Hauptmann and E.F. Richter and also attended David's orchestral classes. While in Leipzig he befriended Grieg, Franklin Taylor, Sullivan, Rudorff, Walter Bache, Carl Rosa and Wilhelmj and developed his enthusiasm for the music of Bach, Beethoven, Brahms and especially for Wagner, whom he heard conduct the first performance of the overture to *Die Meistersinger* on 1 November 1862.

In 1863 he was brought to London by Henry Chorley, critic of *The Atheneum*, and enjoyed immediate success with the first complete performance in England of Chopin's F minor Piano Concerto (11 April 1863) at the Crystal Palace and, a fortnight later, Beethoven's Fourth Piano Concerto. In 1865 he made a tour of the USA with Carl Rosa and Euphrosyne Parepa (later Rosa's wife); on his return to England, Dickens persuaded him to write an account of his travels for his journal *All the Year Round*. Under Chorley's wing he became acquainted with many prominent literary and musical figures in London including Grove, Browning, Matthew Arnold, Rossetti, William Morris, Costa and Hallé. According to the memoirs of Dannreuther's wife, Chorley, a wealthy man, intended to make Dannreuther his heir, but changed his mind after Dannreuther's sympathies for Wagner became increasingly conspicuous and also after disapproving of his engagement to Chariclea Ionides, daughter of the Greek textile merchant Alexander Constantine Ionides. He married Chariclea in 1871 and at around this time he took British citizenship.

In 1867 Dannreuther, along with Karl Klindworth, Frits Hartvigson, Walter Bache and Alfred Hipkins, formed the Working Men's Society. At the private gatherings of the society, works by Beethoven (notably the late sonatas), Chopin and Liszt were performed and criticized; later, chiefly at the behest of Klindworth and Dannreuther, Wagner's music dramas were played through. After Klindworth's departure for Moscow, Dannreuther founded the London Wagner Society in 1872 and conducted two of its series of concerts (1873–4). During this period he became a close friend of Wagner and took a keen interest in the development of the Bayreuth Festspielhaus. He acted as English agent in the supplying of the 'stage fauna' and the dragon for the first performances of the *Ring* at Bayreuth in 1876 and did much to promote the London Wagner Festival in 1877. During the festival Wagner and Cosima stayed at Dannreuther's home at 12 Orme Square, Bayswater, where, for the first time, Wagner read the complete poem of *Parsifal* on 17 May in the company of George Eliot, George Lewes, Parry, Walter Bache, Frederick Jameson and Alfred Forman. During the 1870s and 80s Dannreuther produced numerous writings and lectures on Wagner including an extensive article for the first edition of *Grove*, which contains much biographical material of a first-hand nature that is still useful to Wagner scholarship. His assessment of Wagner's operatic theories, written before the *Ring* was completed, are impressively penetrating. Moreover, with his fluent ability in both German and English, he was able to produce attractive translations of Wagner's frequently complex prose, and for Wagner's essay, *Beethoven*, he helpfully provided additional extracts from Schopenhauer's *Versuch über das Geistersehen* and *Die Welt als Wille und Vorstellung* for illustrative purposes. In 1895 he became President of the London Wagner Society, a position he held until his death.

In addition to his promotion of Wagner, Dannreuther did much to promulgate new works by other composers. As a brilliant virtuoso he gave the first English performances of piano concertos by Grieg, Liszt (in A major), Scharwenka (in B♭ minor), Tchaikovsky (in B♭ minor) and Parry; moreover, with the Tchaikovsky concerto he was successful in persuading the composer to make changes to the solo part (where Nikolay Rubinstein had failed), which were incorporated into the full score printed in 1879. Equally pioneering were the series of semi-private chamber concerts held at his home at Orme Square between 1876 and 1893, which introduced works by Brahms, Scharwenka, Sgambati, Tchaikovsky, Rheinberger, Stanford, Parry and Richard Strauss to English

audiences for the first time. To counterbalance this energy given to new music, he also devoted much time to Renaissance, Baroque and Classical keyboard repertory, the deep knowledge of which he employed in his treatise on ornamentation. This remained a standard reference work for many years.

Although much of Dannreuther's scholarly writing reveals his affinity for German art and philosophy (borne out by his contribution 'The Romantic Period' for the *Oxford History of Music* which venerates the Beethoven-Wagner legacy), he nevertheless wrote perspicaciously on Berlioz and Chopin. His discernment and familiarity with the repertory of 19th-century virtuoso piano music, as is demonstrated by the surviving portion of his private music library, was also considerable.

As a composer Dannreuther concentrated exclusively on song forms and published several collections. Many of these were performed at Orme Square. He also made editions of Liszt's Paganini Studies (London, 1899), Transcendental Studies (London, 1899) and Three Concert Studies (London, 1898). As a teacher Dannreuther proved to be the vital catalyst in the early career of Hubert Parry and numbered among his other pupils J.A. Fuller Maitland, Frederick Dawson, William Hurlstone and James Friskin. In 1895 he took over from Ernst Pauer (who had retired to Germany) as a piano professor at the RCM.

JEREMY DIBBLE

Dannström, (Johan) Isidor (*b* Stockholm, 15 Dec 1812; *d* Stockholm, 17 Oct 1897). Swedish singer, teacher and composer. He studied at the Swedish Royal Academy of Music in Stockholm (1826–9) under J.E. Nordblom (singing), T. Byström (piano) and E. Drake (harmony). His father wanted him to pursue a commercial career, and Dannström worked as a clerk between 1829 and 1836; however, by giving guitar and flute lessons he earned enough money to resume his musical studies. In 1835 he returned to Drake for lessons in harmony and counterpoint, and he studied singing with Isak Berg. From 1836 he devoted himself wholly to music. In 1837, shortly after the publication of his first song, he began a journey through Europe which lasted four and a half years. He studied music theory with Siegfried Dehn in Berlin and singing with Forini in Bergamo; in Paris the Italian opera was his main interest and for a short time G.B. Rubini became his teacher. Later he gave concerts in Warsaw and Kraków and also visited Vienna before he returned to Sweden. He was engaged as a baritone at the Swedish Royal Opera in Stockholm in 1841, and together with Jenny Lind, Giovanni Belletti and J. Günther he created an outstanding period in its history. He made his début in Mercadante's *Il bravo*. One of his best roles was Don Giovanni; he accompanied himself in the serenade.

In 1844 Jenny Lind left Sweden, which seems to have caused Dannström to do the same. He studied with Jenny Lind's teacher Manuel Garcia in Paris for a year. After his return to Stockholm he became one of the most sought-after singing teachers there. In 1849 he published his *Sång-method*, which for many years remained the best tutor in Swedish (2/1876). He also conducted the Harmonic Society (1847–8), though he had no real interest in choral music. For some years around 1850 he wrote music criticism in different Stockholm papers, *Dagligt allehanda* and *Aftonposten* (1848–9), and *Aftonbladet* (1854–5), and from 1851 he was a very active member of the Academy of Music. In 1853–4 he was in the USA, where he taught and gave concerts, mostly in Washington, DC. In 1856 he founded a successful music shop in Stockholm.

All Dannström's compositions are vocal music. His operetta *Doktor Tartaglia* had its first performance at the Swedish Royal Opera in 1851 (a revised version was given in Göteborg as *Crispinos giftermål*, 1878). He was also successful with his music for the comedies *Skomakaren och hans fru* (1847), *Herr och fru Tapperman* (1848) and *Lordens rock* (1861). Some of his popular songs, the 'polskas', are of folkdance character but embellished with rich coloratura. Others, such as *Hur ljuvt det är att komma*, are sacred songs. In 1876 one of his song collections was awarded a prize by the Musikaliska Konstföreningen. Among his duets the comic *Duellanterna* is the best known. His memoirs, *Några blad ur Isidors Dannströms minnesanteckningar* (Stockholm, 1896), give interesting portraits of Jenny Lind and many of his contemporaries.

FOLKE BOHLIN

D'Annunzio, Gabriele (*b* Pescara, 12 March 1863; *d* Gardone Riviera, 1 March 1938). Italian writer. A strong influence on Italian music in the early 20th century, he frequently wrote about music and musicians, for example in the odes to Bellini and Verdi in the second book of *Laudi* (Milan, 1904) and the passages on Monteverdi and Wagner in the novel *Il fuoco* (1896–8). It has often been

said that to have recognized Monteverdi's stature before 1900 itself revealed a searching mind, and that D'Annunzio was also ahead of his time in admiring Wagner as an artist while refusing to accept his philosophy and theories. But it has also been shown (see Tedeschi) that these 'advanced' opinions were plagiarized mainly from Romain Rolland. Nevertheless throughout his life – from his passionate concert-going in Rome around 1880 to his retirement in the Vittoriale, where he even had his own string quartet, the Quartetto del Vittoriale – he sought the company of musicians and won their respect for his knowledge and penetrating insight: many fell completely under the spell of his personality.

D'Annunzio collaborated directly with composers on several occasions. *Parisina* was originally drafted as a libretto for Puccini, but was eventually set by Mascagni instead; and *Fedra*, although initially conceived as a play, was written with the idea of then adapting it as a libretto for Pizzetti, with whom D'Annunzio was for a time on very close terms (he even invented for him the quintessentially D'Annunzian pseudonym 'Il debrando da Parma'). Pizzetti's elaborate incidental scores for *La nave* and *La pisanelle* were commissioned as integral parts of the dramas' conceptions, while the texts were being written; this was also the case with Debussy's music for *Le martyre de St Sébastien*. Other composers who used adaptations of D'Annunzio plays as opera librettos included Franchetti, Zandonai, Montemezzi and G.F. Malipiero; the list of those who set his poetry in songs or choral pieces is long, ranging from Tosti to Casella and Dallapiccola. Furthermore, many Italian composers were influenced in a more general way, for better or worse, by that cult of the elaborately picturesque, the exotic, the selfconsciously archaic, the gratuitously barbaric and the sensual which has come to be known as 'dannunzianesimo'. Respighi in particular, although quite unlike D'Annunzio personally, often came remarkably close to the D'Annunzian spirit in his works: his regular librettist, Claudio Guastalla, was a disciple of D'Annunzio.

On a more practical plane, D'Annunzio played a significant part in encouraging both the resurgence of Italian instrumental music and the revival of music from the remoter Italian past – he was even director, at least nominally, of I Classici della Musica Italiana, a series of editions of early music for which he wrote an introduction in 1917. That he was also enthusiastically involved in the foundation of Casella's Corporazione delle Nuove Musiche (1923) is a further proof of the vast range of his interests.

WORKS SET TO MUSIC

DRAMATIC

La città morta (play, 1898): op La ville morte by R. Pugno and N. Boulanger, 1911, unpubd, unperf.

Sogno d'un tramonto d'autunno (play, pubd 1898, perf. 1905): incid music by G. Napoli, 1911; op by R. Torre Alfina, before 1913; op by G.F. Malipiero, 1913–?14, unpubd, concert perf. RAI, 1963, staged Mantua, 1988

Francesca da Rimini (play, 1901): incid music by Scontrino, Rome, 1901, unpubd; op by Zandonai, Turin, 1914; music by Veretti, Rome, 1938

La figlia di Iorio (play, 1904): op by Franchetti, 1905–6, Milan, 1906; music by R. Bossi, 1929, Milan, 1930; op by Pizzetti, 1953–4, Naples, 1954

La fiaccola sotto il moggio (play, 1905): op Gigliola by Pizzetti, 1914–15, inc.

La nave (play, 1905–7, perf. 1908): incid music by Pizzetti, 1905–7, Rome, 1908; op by Montemezzi, Milan, 1918

Fedra (play, 1909): op by Pizzetti, 1909–12, Milan, 1915; incid music by Honegger, Rome, 1926

Le martyre de St Sébastien (play, 1911): incid music by Debussy, Paris, 1911

Parisina (op libretto, 1906–12): op by Mascagni, Milan, 1913

La pisanelle, ou La mort parfumée (play, 1912): incid music by Pizzetti, Paris, 1913

Cabiria (inter-titles and sung text for film, 1914, dir. G. Pastrone): music by Pizzetti [Sinfonia del fuoco, 1914]

CONCERT WORKS

vocal-orchestral

Vere novo (from *Intermezzo di rime*, 1883): music by Zandonai, Bar, orch, 1912

Canto augurale per la nazione eletta (from *Laudi*, bk ii, 1904): music by Lattuada, T, chorus, orch, 1933

Nel primo centenario della nascita di Vincenzo Bellini (from *Laudi*, bk ii, 1904): set as Cant. a Bellini by Savagnone, S, orch, 1935

La canzone del Quarnaro (1918, from *Canti della guerra latina*, 1914–18): music by Dallapiccola, T, male chorus, orch, 1930, unpubd

choral

Pizzetti: Cade la sera, mixed vv [no.1 of Tre composizioni corali], 1942

songs

R. Brogi: Un ricordo, Spandono le campane (1916); Casavola: La sera, Van gli effluvi, O falce di luna calante (1924); Casella: La sera fiesolana, 1923; Castelnuovo-Tedesco: La sera fiesolana, 1v, vc, pf, 1923, unpubd; P. Coppola: Vecchi pastelli (1914); Freitas Branco: Despedida, 1920; Gandino: 3 liriche, op.9, 1900–02, Tristezza di una notte di primavera, op.22, 1905–23, nos.1–2 of 5 liriche, op.28, 1911–14, 5 liriche, op.30, 1914 [= nos.5–9 of 12 liriche (1919)]; G.F. Malipiero: I sonetti delle fate, 1909, Ditirambo dell'estate [no.4 of Le stagioni italiche], 1923

Musella: Rabbrividisce il mare, 1926; Orefice: Plenilunio, 1918; Pick-Mangiagalli: Ecco settembre, op.3, 1903; Pilati: Lunella, 1926; Pizzetti: I pastori, 1908, Erotica, 1911; Reger: Wenn lichter Mondenschein, op.35 no.6 (1899); Respighi: Mattinata [no.3 of 6 melodie], 1906, O falce di luna calante, Van gli effluvi [nos.1–2 of 6 liriche], 1909, La donna sul sarcofago, 1919, La statua, 1919, 4 liriche, 1920; Sgambati: Ninna nanna, 1v, str qt, ?1895, unpubd, Rose, op.41 (1910); Sinigaglia: La tregua, op.23 no.3, 1901, Canto dell'ospite, op.37 no.1 (1912)

Tosti: Buon capo d'anno (1882), 'A vucchella (1903), 4 canzoni di Amaranta (1907), 2 piccoli notturni (1911), Ninna nanna (1912), La sera, 1916, Consolazione (1919); M.V. White: Isaotta Blanzesmano (1906)

Other songs by G. Benvenuti, A. Berisso, A. Cais di Pierlas, S. Caltabiano, M. Campagna, G. dall'Adria, E. Desderi, M. di Marsiconovo, P. di Pietro, M. di Veroli, G. Fioravanti, A. Gasco, G.F. Ghedini, M. Maini, G. Mancini, F. Mantica, M. Marangoli, M. Mariotti, A. Mazzuoli, G. Scelsi, G. Setaccioli, A. Tronchi

JOHN C.G. WATERHOUSE

Danon, Oskar (*b* Sarajevo, 7 Feb 1913). Yugoslav conductor and composer. He studied at the Prague Conservatory (1932–6) and took his doctorate in musicology at Prague University (1939). From 1939 he established himself as a choral, orchestral and theatrical conductor in Sarajevo. During the war he took part in the Resistance movement against German occupation. In 1944 he was appointed director and conductor of the Belgrade Opera, posts he held until 1963. He was subsequently appointed principal conductor of the Slovenian PO and the Radio-Television Zagreb SO.

Although Danon had conducted performances of *The Bartered Bride* in Prague in 1946, his international fame began in 1958 with the Belgrade Opera performances of Borodin's *Prince Igor* and Massenet's *Don Quichotte* at the Lausanne Festival and at the Théâtre des Nations Festival in Paris. He conducted the company in Prokofiev's *Love for Three Oranges* at the 1959 Wiesbaden Festival and the Paris Opéra's *Boris Godunov* in 1960. The Belgrade company's proficiency in the Russian repertory was particularly valued at a time when the West had virtually no contact with Soviet operatic enterprise. Although the company performed at home in Serbian, it was engaged to record in Russian. Danon's conducting of *Prince Igor* was the first complete recording of that work ever to reach the West (1955), followed in 1956 by Glinka's *A Life for the Tsar* (*Ivan Susanin*). At the Edinburgh Festival of 1962 he was much commended for his vigorous conducting of the Belgrade company in *Don Quichotte*, *Prince Igor* and the first stage performances in Britain of Prokofiev's *The Gambler* and *Love for Three Oranges*. Later the same year he conducted *Prince Igor* in the Chicago Lyric Opera season. He conducted Konjović's *The Prince of Zeta* at the opening of the restored National Theatre in Belgrade in 1990. Among Danon's compositions are a Symphonic Scherzo, chamber and vocal works, revolutionary songs and music to several plays including Shakespeare's *Much Ado about Nothing* and *Twelfth Night* and Jonson's *Volpone*.

ARTHUR JACOBS/ZDRAVKO BLAŽEKOVIĆ

D'Anossa, Giuseppe. *See* AVOSSA, GIUSEPPE.

Danoville (*fl* Paris, 1687). French viol player and writer on music. He held the title 'Escuyer' and lived in the rue St Jacques, Paris; his first name is unknown. He published *L'art de toucher le dessus et basse de violle* (Paris, 1687/*R*), which appeared in the same year as Jean Rousseau's *Traité de la viole*. Both authors attributed recent advances in the technique of the viol to Sainte-Colombe, and in his preface Danoville described Sainte-Colombe's excellent manner of playing. In the body of the work he discussed the position of the left hand and the holding of the bow and provided an explanation of tablature and staff notation and of seven ornaments (*tremblement*, *pincé*, *port de voix*, *coulé du doigt*, *tenuë*, *couché du doigt* and *balancement*). (H. Bol: *La basse de viole du temps de Marin Marais et d'Antoine Forqueray*, Bilthoven, 1973)

MARY CYR

Danse macabre (Fr.). *See* DANCE OF DEATH.

Dansker, Ol′ga L′vovna (*b* Mishelevka, Irkutsk region, 12 Dec 1921). Russian musicologist and archivist. She enrolled in the Oriental department of the Faculty of Philology at the University of Leningrad specializing in the ethnology of Central Asia, but her studies there were interrupted by World War II, during which time she saw active service in military hospitals. Graduating in 1948, she then studied ethnology and folk music with Gippius at the Miklukho-Maklaya Institute of Ethnology (1949–53), and was an occasional student at the Conservatory, where she studied with Druskin, Rubtsov, Ginzburg and Sergey Bogoyavlensky. She was a research assistant in the art history department of the Institute of History, Archeology and Ethnology at the Tajik SSR Academy of Sciences in Dushanbe (1953–8), and took part in expeditions to record the folk music of the mountain regions of the Tajik SSR. Returning to Leningrad in 1958, she was an assistant at the Institute for the History of the Arts (now the Zubov Institute for the History of the Arts) from 1960 to 1981, and returned to the Institute in 1991 as a research assistant in the manuscript room in the department of source studies. Her main interests are Tajik folk music and the history of Russian musical culture as embodied by some of its leading figures, including Maximilian Steinberg, Vyacheslav Karatïgin, Nikolay Mal′ko, Samuil Samosud and Isa′ya Sherman.

LYUDMILA KOVNATSKAYA

Dansk Selskab for Musikforskning (Danish Musicological Society). A society founded in 1954 by J.P. Larsen, Nils Schiørring, Henrik Glahn and Sven Lunn to promote musicology in Denmark, through publications and lectures, and to be a link with similar organizations abroad. It arranged congresses of Scandinavian musicologists at Copenhagen (1958), Århus (1966) and Askov (1983) and the 11th IMS congress in Copenhagen in 1972. It published the *Dansk aarbog for musikforskning* from 1961 to 1977 and has produced volumes for the series Dania Sonans.

□

Dansse real. Medieval French term which appears at the head of one monophonic, textless and possibly instrumental piece in *F-Pn* fr.844 (a manuscript of troubadour and trouvère chansons; *see* SOURCES, MS, §III, 4), and may be extensible to other pieces. It bears some resemblance to the forms of the ESTAMPIE and DUCTIA.

The piece concerned follows (f.104*v*) immediately after eight other monophonic textless pieces, each labelled 'estampie real', and was probably entered by the same hand (very different from the main body of the manuscript), all nine pieces being in a mensural notation (unlike the chansons) which, however, is not without its ambiguities. They were probably copied into the manuscript before 1325 (see Aubry). The *Dansse real* strongly resembles the estampies except for the fact that it comprises only three melodic sentences, and that these are not repeated.

On f.5 of the same manuscript there are two pieces, probably in the same hand, which strongly resemble the above. Both pieces consist of repeated sentences with *ouvert* and *clos* endings. These endings are written out only on their first occurrence, with the words *ouvert* and *clos* actually written under them, and with fairly clear indications that the same endings were to be repeated after all sentences. The first of the two pieces has four such repeated sentences, the second has three. Thus the latter seems to correspond completely to the description given by Johannes de Grocheio for the *ductia*. It is, however, labelled 'Danse', while the former is without label.

HENDRIK VAN DER WERF

Dante Alighieri (*b* Florence, May or June 1265; *d* Ravenna, 14 Sept 1321). Italian poet. Italy's greatest poet became prominent in the 1280s as a leading member of a group of young poets who were transforming the style and content of the fashionable, elevated love-lyric; later he characterized the achievement of those years as the 'dolce stil novo'. He included the best of his early poems in his short prose work *La vita nuova* (*c*1292–3), the record of his love for Beatrice and his grief at her early death in June 1290. In the mid-1290s he fell in love with Philosophy, personified in his poems as a noble lady, and devoted himself wholeheartedly to the study of logic, ethics, physics, metaphysics and theology – indeed, to almost every branch of medieval science. Simultaneously he began to be active in the political life of the turbulent Florentine republic. He rose to be one of the six Priors in 1300, before suffering exile after a *coup d'état* by his political opponents in November 1301. He never returned to Florence. In exile he continued to write lyric poetry (88 poems survive) and pursued his philosophical studies, writing several learned prose works. Two of these demand attention: *Convivio* (*c*1304–8), a 'banquet' of learning written in the vernacular to reach a lay audience, and *De vulgari eloquentia* (*c*1305), a Latin work defining the language, style and metrical form proper to the highest reaches of vernacular poetry.

The great work of Dante's maturity, a narrative poem he called simply *Commedia*, presents in fictional form a radical reassessment of his involvement in politics and philosophical study. It falls into three more or less equal parts: *Inferno*, *Purgatorio* and *Paradiso*. It is divided into 100 cantos, each of about 140 lines. Perhaps its greatest debt to the medieval art of music lies in the many intricate numerical symmetries that govern its structure, and in what these symbolize; the metre itself, *terza rima*, rhyming *aba*, *bcb*, *cdc* etc., and linking the hendecasyllabic lines to make a pattern of threes in an unbroken chain, mirrors the greater art of the Three Person Creator. The poem is at once extremely simple and linear, and extremely complex. Over a cantus firmus, represented by the realistic narrative of the journey, Dante wove the equivalent of many polyphonic strands by giving the story an allegorical dimension, by introducing prophecies, flashbacks, digressions and learned discourses, and by spinning a complex web of correspondences and patterns of meaning through a virtually unbroken flow of simile, metaphor and allusions to history, myth and legend. Music is significantly absent in Dante's *Inferno*: Hell reverberates with 'sighs, screams and lamentations', and 'different tongues make not sweet harmony but an eternal tumult in the dark air' (*Inferno* iii.22–30, set by Luzzaschi). In *Purgatorio* music plays an important part: on every terrace the souls sing an appropriate hymn or antiphon from the liturgy. However, the emphasis falls on the 'therapeutic' power of such music, sung as an act of corporate worship and as part of a rite of expiation. It is in Heaven (or rather in the heavens) that music assumes its proper role: in association with images of the dance, music conveys the order, beauty and bliss (*dolcezza* is the key term) of eternal beatitude and perfect love, the state men may enjoy when they have been not only redeemed and restored but 'transhumanized' (*Paradiso* i.70, xxx.57) and made divine. No-one who has read *Paradiso* will lightly misjudge the purely sensuous sweetness of music in Dante's day. Dante is still unsurpassed in his power to suggest in poetry the impact of great music on the listener, the experience of ecstasy or transport in which everything else is forgotten (e.g. *Purgatorio* ii.106–20; *Paradiso* xiv.118–26, xxiii.97–111, 127–9). He declared himself unable to express 'la dolce sinfonia di Paradiso' (*Paradiso* xxi.59), but the reader is left feeling that he too has heard.

Conversely, Dante's poetry has been poorly served by musicians. No contemporary settings of any of his verse have survived, and the earliest that have date only from

the first half of the 16th century (see Einstein). The madrigalists rarely used texts by him. Romantic composers (Liszt, Tchaikovsky: see below) responded with characteristic abandon to the horror of certain scenes and the pathos of tragic encounters in the *Inferno*, but these are really uncharacteristic of the *Commedia* as a whole.

Dante's scattered remarks about the relationship of poetry and music are often quoted, though they are often misrepresented. 'Poesis ... nichil aliud est quam fictio rethorica musicaque poita', he wrote in *De vulgari eloquentia*, II, iv.2. This was wrongly rendered (with an earlier reading of 'posita' or 'composita' for 'poita') as 'poetry is a rhetorical fiction set to music', making the musical setting a condition of poetry. A better translation might be: 'poetry is simply a work of imagination [*fictio*] composed or made [*poita*, from Gk. *poein*] according to the rules of rhetoric and music'. Good prose is *rhetorica poita*; so the musical organization of words is certainly that which distinguishes poetry from prose. But 'musica' is here used both in a precise and limited technical sense (as governing the rules of rhythm) and in a general sense which allowed Dante to speak of his craft as 'harmonizing words' (*Convivio*, II, xiii.23; *De vulgari eloquentia*, II, viii.5). To bring words into harmony is to organize the sequence of syllables rhythmically and numerically so that they form lines of verse with a fixed number of syllables and certain cadences (*musica poita* in the technical sense). It is also to temper the harsher and smoother sounds of words (scrupulously defined in *De vulgari eloquentia*, II, vii.4–6) so that they will combine to form a structure that is pleasing and appropriate to the meaning (*De vulgari eloquentia*, II, i; *Rime* ciii.1–2; *Inferno* xxxii.1–3). Further, it is to bind the lines of verse into groups of three, four or more by rhyme, thus creating the larger metrical units that make up the constituent parts of the stanza in a canzone or ballata, or the quatrains and tercets of a sonnet. Poems can be called *rime* ('rhymes') when *rima* is used in the broad sense to denote 'all speech which is governed by numbers and time and ends in rhymed consonances' (*Convivio*, IV, ii.12). The sweetness of poetry depends on its *armonia* so understood. Like music itself, poetry is 'tutta relativa' (*Convivio*, II, xiii.23), and 'the more beautiful the relationship [proportion], the sweeter is the resultant harmony'; this is why the sweetness of poetry cannot survive translation, since the aural relationship of the parts must inevitably be broken (*Convivio*, I, vii.14).

There is another sense in which a canzone stanza is *musica poita*: it has to be constructed so that it can be set to music ('omnis stantia ad quandam odam recipiendam armonizata est', *De vulgari eloquentia*, II, x.2) according to the musical conventions of the day. These were similar to the rules of Meistergesang as explained by Hans Sachs in Act 2 of Wagner's *Die Meistersinger*, and they required that the stanza be set to two contrasted melodies, of which the first must be repeated (*AAB*). Hence the stanza had to have two metrically identical *pedes* with shared rhymes (Ger. *Stollen*) followed by a metrically distinct *sirma* with contrasted rhymes (Ger. *Abgesang*: *see* BAR FORM). But it is perfectly clear that, for Dante, the poem already had its own 'harmony' and was complete when the poet's work was done: it did not need a musical setting to exist as a 'song'.

Madrigal settings of Dante survive by Luzzaschi, Marenzio, Claudio Merulo, Domenico Micheli, G.B. Mosto, Soriano and Pietro Vinci. Later composers' interest in him seems to have been slight, and only with the onset of the Romantic period did it revive, chiefly with reference to the Francesca da Rimini episode. 'Nessun maggior dolore' (*Inferno* v) is sung under Desdemona's window by gondoliers in Rossini's *Otello* (1816). Mercadante (1830) and Morlacchi (1839) wrote operas called *Francesca da Rimini*. Donizetti composed a setting of the hymn to Mary (*Paradiso* xxxiii) for bass and piano, and an opera called *Pia de' Tolomei* (1837). Boito and Verdi set Dante texts (Zandonai's *Francesca da Rimini*, 1914, is a setting of a libretto by D'Annunzio based on Boccaccio's commentary to Dante), and Liszt and Pacini wrote symphonies inspired by his work.
